CROP REPORTS.

[Continued from page 19.]

and most of the hogs gone that will go. Tendency now to hold hogs for higher price, also grains.

McCook, Nebraska (6): Corn is being marketed fast as roads permit around \$1.10. Farmers are shipping light hogs to save corn. Bulk of our corn is going west.

Swanton, Nebraska (9): Farmers are being offered \$1.07 for corn and 55c for oats. Roads are bad and not much grain is being moved. Hogs are sold light on account of high price of feed.

Orleans, Nebraska (6): Farmers are being offered \$1.09 for corn and 60c for oats. Corn and oats marketed freely. Farmers are shipping light hogs. Not a great deal of corn will move during the next 30 days. Bad roads stopped corn delivery and as the roads improve movement is getting heavier. Lots of corn yet to be marketed.

Wood River (9), Neb.: Farmers being offered \$1.07 for corn and 55c for oats. Some corn and oats being sold. Farmers continue to ship hogs light weight. No corn to go to terminals during next 30 days.

Harvard (9), Neb.: Farmers are being offered \$1.07 for corn and 58c for oats. No corn being marketed here. No oats. Farmers shipping hogs light weight because they claim the price is out of line with corn prices. No corn to go to terminals during the next 30 days as weather is bad and roads not fit to haul grain to country elevator. Those feeding this winter are experiencing great difficulty in getting corn to keep their stock on account of bad roads and bad weather.

KANSAS.

Madison, Kansas (9): Farmers are being offered 90 to \$1.00 per bushel for corn. They are selling some corn and oats. Farmers still continue to ship hogs light weight on account of high price of corn. There will be some movement of corn during the next 30 days to terminals.

Sedan, Kansas (9): Farmers are being offered \$1.10 for corn and 60c for oats. Shipping out all hogs light as corn is too high. Corn about all shipped out.

Hillsboro, Kansas (5): In our vicinity the farmers are receiving \$1.07 for corn and 50 to 55c for oats. Farmers are selling corn but no oats are being marketed. Farmers selling hogs light weight because corn is too high priced for feeding. There will be no corn moving from our station to terminal markets during the next thirty days. The corn crop is falling short from estimate.

Pleasanton, Kansas (8): Farmers are being offered \$1.05 for corn and 55c for oats. Some marketing of corn and oats. Farmers continue to ship hogs light weight on account of high priced feed. Some movement of corn anticipated during the next 30 days.

Wichita, Kansas (6): Farmers are being offered \$1.05 for corn and 60c for oats. Not much corn or oats moving. Marketing of hogs light weight is slowing up. Very little corn will move to terminals during the next 30 days.

Minneapolis, Kansas (4): Farmers are being offered \$1.15 for corn and 65c for oats. No marketing of corn or oats. Farmers continue to market hogs light weight on account of high prices of corn. No corn to move within the next 30 days. Will ship in corn.

Mahaska, Kansas (4): Farmers are being paid \$1.61 for wheat and \$1.07 for corn. No oats offered. Are selling corn. The high price of corn is causing hogs to go to market light.

Humboldt, Kansas (9): Farmers are being offered \$1.00 for corn and 50c for oats. Farmers are selling corn and oats. Farmers still sending hogs light weight because grain is too high. Some corn to go to terminals during next 20 days.

Uniontown, Kansas (9): Farmers are being offered \$1.00 per bushel for corn. They are selling corn as fast as husked. Farmers are shipping hogs light be-

cause they think hogs and cattle won't pay \$1.00 per bu. for the corn it takes to fatten them. Some corn will move during the next thirty days.

Belle Plaine, Kansas (6): Farmers are receiving \$1.07 for yellow corn. No oats raised. Surplus corn about all moved. No hogs to speak of, a very small amount of corn will move in next 30 days. Don't think there is 10,000 bushels surplus corn left in this territory.

Neodesha, Kansas (9): Farmers are receiving \$1.05 for corn. No oats to sell. Selling corn and wheat. Not many hogs to market. Corn to move in next 30 days. Bad weather delaying a little at present, yet some is moving. We had a fair crop of good corn.

Ashland (3), Kans.: Farmers being offered \$1.00 for corn and 60c for oats. Farmers are not selling very freely. Shipping hogs light weight. There will be no corn shipped out. There will probably be some shipped in.

Belleville (4), Kans.: Lots of farmers are selling hogs light weight. Plenty of corn to feed.

OKLAHOMA.

Enid, Oklahoma (4): Corn price to farmers from \$1.00 to \$1.10 per bushel. There is not much corn to be marketed, but what there is will be sold at these prices as it is too high to be fed profitably to livestock of any kind. There is some corn being shipped from many stations in northern part of the State, but local demand will consume what there is near Enid, as we usually have to ship in here from Kansas and the south part of the State.

Geary, Oklahoma (2): Corn priced to farmers at \$1.05 per bushel and oats at 55c. Farmers are selling some corn and oats. Farmers continue to ship hogs light weight because grain is too expensive. No corn to move within the next 30 days.

Marshall, Oklahoma (5): Farmers are offered \$1.00 per bushel for corn

and 60c for oats. Not selling corn or oats freely. Shipping hogs light weight on account of high prices of corn and need of feed. There will be no corn shipped to terminal markets from this section.

Calumet (2), Okla.: Corn is selling at \$1.05 and oats 60c. Farmers are selling corn and oats freely. There are very few hogs left in the country. Wheat has had an ice covering since Dec. 17th. Cannot tell yet what damage it might do, if any. Weather still cold.

Driftwood (1), Okla.: Corn is selling

at \$1.05 and oats 55c. Farmers are selling some of their corn. No oats are being offered. No hogs are being fed for market on account of price of corn. Some corn will move to terminal markets here in next 30 days.

Kingfisher (4), Okla.: Corn is selling at \$1.00 to \$1.05 and oats 55c. Had snow and ice but about gone now. Good moisture in ground for wheat.

Altus (3), Okla.: Farmers are being offered \$1.15 for corn and 65c for oats. A very little corn and oats are being sold. Farmers not feeding hogs. No corn or oats to go to terminal markets.

**CONE-SHAPE
GRINDERS**

It PAYS TO GRIND ALL GRAINS

Look to the Grinders. They do the work! Bowsher's Cone-Shape grinders are the correct principle in Feed Mill construction. They mean larger grinding surface close to center of shaft; thus more capacity, lighter draft, longer life.

"Desire to express my appreciation of the long-lasting, trouble-proof Bowsher. Have used a No. 4 ten years with less than One Dollar per year for repairs." E. W. Watt, Jacobburg, O.

WAGON LOADS RECEIVED

A book for the use of country grain buyers in keeping a record of grain received from farmers.

Its column headings are: Month, Day, Name, Kind, Gross and Tare, Net Pounds, Bushels, Pounds, Price, Dollars, Cents and Remarks.

The book, 9½x12 inches, 160 pages, 20 lines to each page, giving room for recording 3,200 loads, is printed on Linen Ledger Paper and is well bound in strong board covers with leather back and corners. Order form 80. Price \$2.75.

PRICE CURRENT-GRAIN REPORTER,

305 So. La Salle St., Chicago, Ills.

Legal, Traffic and Arbitration Decisions

COURT DECISIONS.

Condition of oats admissible as evidence. Evidence of the condition of a shipment of oats upon arrival at the point of destination is admissible to show the condition of the oats when loaded, where there is evidence tending to show either an absence of anything that would naturally result in a change in such condition or tending to explain any change that has occurred.—Intermountain Farmers' Equity, et al., v. Norris. (Supreme Court of Idaho), 229 Pac. 745.

Collection on draft with bills of lading. Where a time draft attached to shipper's order B-L is left with a bank for collection, bank must hold B-L until draft is paid, as security for payment of draft as cash transaction. Where bank, with which shipper left for collection time draft attached to shipper's order B-L, indorsed in blank detached B-L and sent it to buyer of shipment without attempting to secure payment of draft held that, on failure of buyer to pay, bank could not recover from shipper amount advanced on draft.—Citizens' Bank & Trust Co. v. Everbest Shingle Co. (Supreme Court of Washington), 229 Pac. 743.

Demurrage decision favors grain companies. A decision that is liable to be far-reaching, and which ultimately will involve nearly a million dollars in law suits, was rendered recently in Buffalo, N. Y., by a Superior court jury before Justice Crosby. The verdict was for no cause of action and was given in the case of the Cleveland Cliffs Iron Co. against six defendants, all of whom are in the grain business on the great lakes. The amount involved was \$16,000. The defendants are as follows: Armour Grain Co. of Chicago and Buffalo; Williamson Forwarding Co. of Buffalo; Sandy & Co., and Mueller & Co. of New York City, Ralston-Purina Co. of Buffalo, and the Townsend-Ward Co. of Buffalo. The jury's verdict establishes a precedent in such a case and whether the verdict will be appealed or not is a question. It is the general opinion that an appeal will be taken. The history of the case dates back to the year 1922 when the railroad shopmen's strike was in force in Buffalo. The steamer William H. Mather came to Buffalo with 371,000 bushels of grain. The Cleveland concern was the carrier. The boat laid here 19 days before it was able to unload at an elevator. Meanwhile, the defendants, all of whom were interested in the cargo made every effort to obtain railroad cars for Montreal and transportation over the barge canal so as to relieve the congestion at this port so as the Mather and other boats could be unloaded.

Difference between value of animals when delivered to carrier and when delivered by it in injured condition is

not measure of damages. Difference between market value at point of delivery, of animals injured during shipment, and their value when delivered to carrier, is not proper measure of damages, and evidence of market value before injury is inadmissible. Measure of damages for injury to animals during transportation is difference between value at point of destination in damaged condition and value if uninjured.—Morrow, et al., v. Wabash Ry. Co. (Kansas City Court of Appeals, Missouri), 265 S. W. Rep. 851.

Chattel mortgage on crop a first lien. As between mortgage of land and mortgage on growing crop, latter is superior to former, and superior to any one acquiring title to land from mortgagor.—Kirby v. First National Bank of Pasco. (Supreme Court of Washington), 229 Pac. 305.

Interstate rates may not be changed, so as to result in discrimination. With respect to interstate shipments, rates established according to law may not, by importunity, mistake, or otherwise, be changed for advantage of individual shippers, nor may any special advantage or discrimination be secured by contract or otherwise.—Louisville & N. R. Co. v. A. H. Cleaver & Co. (Supreme Court of Alabama), 101 Sou. Rep. 597.

TRANSPORTATION MATTERS.

Load Limit Information on Freight Cars.

Freight cars will be marked with load limit information as well as the present nominal capacity, and the details as to the marking and changes in car service rules will be effective Jan. 1, 1925. The cars will be re-marked as early as practical after that date. This should afford a great deal of assistance in bringing about heavier loading of freight equipment.

Wheat Movement in Oklahoma.

During the period from July to November, 1924, inclusive, 33,615 cars of wheat were loaded in the state of Oklahoma. Averaging these cars at 1,250 bus. each, makes 40,028,750 bus., according to figures compiled by the Oklahoma Grain Dealers' Assn. To this should be added the amount received by the mills from farm wagons direct, which is reported at 3,301,200 bus., making a grand total of 45,329,950, or 86.2 per cent of the total estimated crop of 52,598,000 bus. These figures indicate that there is a little less than 14 per cent of the crop remaining in farmers' hands and country elevators on Dec. 1.

Suspend Grain Tariffs Affecting Chicago.

New tariff schedules, proposing to cancel transit privileges on grain and grain products at Chicago, Chicago Junctions, Peoria, and Pekin, Ill., moving under proportional and reshipping rates from East St. Louis, Alton, Granite City, Madison, Venice, Peoria, and Pekin, Ill., and St. Louis, Mo., to points in Central Freight Assn., Trunk Line and New England territories, have been suspended by the I. C. C. The new rates were

to have gone into effect on Dec. 20, 1924, but will come up for a rehearing on Apr. 19.

New Rates to Texas Held Up.

The I. C. C. has suspended from Dec. 20 until April 19, 1925, proposed schedules establishing through rates on grain and grain products in carloads from points in Iowa, Minnesota and Missouri on the Chicago Great Western Railroad to points in Texas applicable via Kansas City, Mo., which are lower than the present applicable combination rates.

Revise Rice Rates.

In a report on No. 15613, New Orleans Joint Traffic Bureau and New Orleans Rice Millers' Assn. vs. Beaumont, Sour Lake & Western Ry., Attorney Examiner John McChord recommended that the I. C. C. should find unreasonable and unduly prejudicial rates on wrought rice in carloads from points in Arkansas to New Orleans to the extent they exceed rates that would result from the application of the mileage scale established in Lake Charles Rice Milling Co. vs. A. & N. Ry. Co., 63 I. C. C. 40, over the shortest route.

Vancouver Charges Discrimination in Grain Routing.

Complaints emanating from Vancouver charge discrimination against the route to that port. Chairman Boyd, of the Board of Grain Commissioners, replying to these charges, said, "Farmers can ship their grain through Vancouver to just as good advantage as through Winnipeg. We can find no discrimination against the western route. We are anxious to help Vancouver as a grain exporting port, and will continue to use every effort to do so." It has been rumored in western Canada that grain routed east got a better grading than that to the west.

Party to File Claim for Loss, Damage or Delay.

In a recent issue of Traffic World, the question as to which party should file claim for loss, damage or delay was brought up for answer. The question was: A shipper at point "A" sells a bill of goods f. o. b. shipping point, same to be forwarded with sight draft attached to bill of lading. The car is loaded and bill of lading signed by carrier, but before the car reaches destination, the car is destroyed by fire. The shipper and consignee are notified of the loss. The shipper claims that the consignee should place claim to cover the loss, as the goods became their property after the shipper had received the carrier's signature to the bill of lading. The answer to the question follows: The intention of the parties, as determined from the terms of the contract, determines at what point title to the goods will pass. The party with whom the title to the goods rests at the time of their loss or destruction, is the party who should file a claim for the value thereof with the carrier. Where the provision in a contract of sale is f. o. b. at the point of shipment, the title will pass, as a general rule, when the property is placed on the cars for shipment; on the other hand, where the provision is for delivery f. o. b. the point of destination, the title is not, as a rule, considered to pass until the subject matter has reached such point, as the delivery to the carrier is not a delivery to the buyer.

BROOM CORN MARKETS.

Buying in the dwarf districts was especially active in November and December until the unfavorable weather retarded activity. While odd crops have been picked off under the \$60 mark, yet the amount is negligible, and the general spread of dwarf corn ranges from \$60 upwards to \$100 with the bulk obtained from \$60 to \$80.

In the Lindsay standard district, the bulk of corn secured is taken from \$75 to \$85, with \$100 and above paid. Farm-

L. E. VATORMAN Says: "Profit Means Prove It A Peerless Will Do It"

Write for information of Business Equipment Co., regarding a Peerless system of Better Grain Bookkeeping. 120 S. Jefferson, Peoria, Ill.

ers in the Lindsay district are not free sellers under present conditions.

There has been a steady buying on the Central the past two weeks, and quite a lot of corn has moved slowly, the weather for the past week has been very cold, but deliveries have kept up right along, as the roads are good. Would estimate that half of the new crop of Illinois corn has been sold, and the price range from \$100 for the late short corn to \$130 for the best self working corn.—Broom Corn Review.

VISIBLE SUPPLY OF GRAIN.

Following is the visible supply of wheat, corn and oats by weeks (final 00 omitted), with comparisons:

WEEVIL KILLER

TETRAFUME

(REGISTERED)

WILL NOT BURN—WILL NOT EXPLODE

Approved by Fire Insurance Co's.

Harmless—Stainless—Leaves No Odor

The Grain and Feed Trade have learned to use Tetrafume. Save Dockage for Live Weevil, and Loss in Stored Grain and Feed Stuffs.

ESTABLISHED 1916

Douglas Chemical & Supply Company

Manufacturers and Direct Distributors

829 and 831 Southwest Boulevard

KANSAS CITY, MO.

WANTED and FOR SALE MARKET PLACE, CLASSIFIED

for Buyers and Sellers of Properties and Equipment in Grain, Seeds, Hay, Feed, Flour, Millfeed, Beans, Produce, etc.
25c Per Printed Line Each Insertion

HELP WANTED.

WANTED—Brokers in Iowa and Minnesota to sell feed products for large manufacturers. Address **BROKER**, Box 27, care Price Current Grain Reporter, 309 So. La Salle street, Chicago, Ill.

SITUATIONS WANTED.

POSITION WANTED—As manager of Farmers' Elevator, or will join anyone who wants an experienced buyer to operate a country elevator. Address **N. J. RODENBERG**, Cathay, N. D.

MACHINES FOR SALE.

FIVE (5) Eureka ring graders made by the S. Howes Co., practically new; these machines are 5 rings high and 2 rings wide, consisting of 10 rings; excellent seed graders in first-class shape, at a bargain price. **STANDARD MILL SUPPLY CO.**, 501 Waldheim Building, Kansas City, Mo.

SEEDS FOR SALE.

FOR SALE—White seed corn, fully matured, planted in April. Car lots or less. **COLE SEED SAVER CO.**, Newbern, Tenn.

BUSINESS OPPORTUNITY.

FOR SALE—Flour and feed mill, 25 bbl. Midget, average monthly sales \$1,700 with sufficient working capital to supply public demand. Sales would double in very short time in same local territory, prosperous community, built new 1920. Will sell or take in partner. **TOPEKA ROLLER MILL**, Topeka, Ind.

ELEVATORS FOR SALE.

FOR SALE—Iron clad elevator, 40,000-bu. capacity; only one competitor; good grain territory; a 400-car station doing good profitable business; electrically equipped, in good running order; storage for 10 cars of hay, 10,000 bu. of ear corn; located on best shipping R. R. in Ohio. Good reason for selling. Address **H. G. POLLOCK**, Middle Point, Ohio.

FOR SALE—Terminal elevator and Kansas Line. Terms. Bargain. **ALLIN GRAIN CO.**, Coffeyville, Kans.

ENGINES FOR SALE.

FOR SALE—Oil Engines. Slightly used.
60 H. P. Fairbanks Morse.
50 H. P. Fairbanks Morse.
40 H. P. Fairbanks Morse.
40 H. P. Otto.
25 H. P. Fairbanks Morse.
32 H. P. Fairbanks Morse.
And all small sizes.
These engines are in first class condition and operate on a low grade oil. Write for prices today. **A. H. McDONALD**, 543 W. Monroe St., Chicago.

MILLING PLANT FOR SALE.

OHIO—RECEIVER'S SALE—5 grain elevators and 1 corn meal mill, known as the "Heffner Mill," and one flour and meal mill, known as the "Crites Mill," situated in Circleville, Ohio, and vicinity, together with certain brands and the good will of said mills respectively, will be offered for sale by order of Court, by the Receivers of The Dixie Mills Co., at public auction at the door of the Court House in Circleville, on Thursday, January 29th, 1925, at 1 p. m. Opportunity of a lifetime to acquire valuable milling and elevator properties cheap. Full particulars will be furnished upon request. Address **Chas. Gerhardt and Edwin C. Wright**, Receivers of **THE DIXIE MILLS CO.**, Circleville, O.

ATTENTION, MILLERS!

What you need for your mill we probably have.
Full line of new equipment and very complete stock of used machinery at prices that will interest you.
Everything from the receiving elevator to the packers.
Write us today.

W. R. LEATHERS,
9 S. Clinton St. Chicago, Ill.

GRAIN FOR SALE.

HULLESS OATS for sale, greatest feed for chickens and hogs. Yields to 50 bushels. **TOWNSITE STOCK FARM**, Freeman, South Dakota.

HAY FOR SALE.

ALFALFA or anything you want in dairy hay. Write or wire for prices. **HARRY D. GATES COMPANY**, Jackson, Mich.

PLANT FOR RENT.

FOR RENT—Our plant which we operated as a feed store for 40 years and until October 1, 1924. 1923 sales \$175,000.00. **CONKLIN AND CUMMINGS**, Goshen, N. Y.

CLINCH PAPER CLIPS

Bolt A Business Boom Onto Your Belts! HOW? by Using Superior Elevator CUPS!

Would your elevators handle a sudden boom in your business if it should come?

They would, if equipped with Superior Elevator Cups, because:

- 1 They will handle more than your present cups, without change of spacing, or of speed.
- 2 They will handle from one to three times more than your present cups, if you change the spacing, and speed up a little.

Write us for full information and free sample cup

BUSINESS AND TRADE CONDITIONS

SENTIMENT, even through the East, continues to slowly and satisfactorily replace a feeling of uncertainty with one of confidence. In the middle West, the outlook is substantially improved, with sufficient business difficulties of rather a competitive nature to halt any tendency towards inflation and to teach business the wisdom of progressing with caution. Advances in prices and business volume in steel, iron, grain, and the movement of live stock from the country to the meat packing centers were offset by slackened business in automobile production, textiles and chemicals, and wholesale trade in several lines.

The early marketing tendency is reflected in visible supply figures in grain in terminal markets, roughly, twice as much as at the same date a year ago. This has very naturally brought cash into the hands of country dealers and in turn carried such funds into trade channels as reflected for instance in the volume of business transacted by mail order houses.

Central and Western districts show considerable increases in savings accounts and decreased business failures, tempered in the full bloom of optimism by the chemicalization going on in Iowa.

Iowa Banking Affairs.

Coincident with last week's news regarding the difficulty of several Iowa banks, the information is released from authoritative sources that Iowa's difficulties are not entirely unexpected. It seems that the Federal Reserve Bank and large city correspondent banks have been carrying Iowa banking paper in the expectation that the directors of the latter would finance their own affairs; take up the outstanding obligations, and make the turn into 1925 with a cleaner slate. Bank examiners have, with justifiable consideration, permitted this condition to exist but it is now suggested that it might have been just as well to have taken losses and its associated drastic action several years back when Iowa for the most part and other Western farming states were so thoroughly cleaned up in a financial sense.

The above tempering influences on undue business expansion is well and good, for too much of inflationary ideas can be gleaned by the unwary from the general discussion on rising prices, increasing bank loans, heavier taxation, and expanding foreign trade. Comparative figures on the latter factor alone have received considerable prominence in the year end reviews, and presented to the public with similar data on domestic business but without critical analysis. Price advances in agricultural products stands out as a notable exception and an advantage to farming communities because it has benefited those, sorely in need at home without cutting off farm products' exports. The closing months of 1924 favored the American farmer to a marked extent in his participation in the building up of our favorable trade balance through increased exportation. The outlook continues good on farm exports, supported by the likelihood of increased imports in other lines, tending to reduce an over-wide and undesirable margin in comparing exports with imports.

It is becoming more and more felt by economists that the general business outlook would be vastly improved through declining prices in certain lines, notably in textiles. It is their desire and it should be the purpose of publishers, market letter writers and others wielding public thought to present both the favorable and unfavorable aspects of the business outlook.

But there is reassurance in the fact which Secretary Hoover in his recent widely quoted comments recalls as reason for good cheer:

"As a nation our business men, bankers and public officials have gained enormously during the past four years in understanding of the basic factors which create healthy prosperity as distinguished from over-expansion, as well as in understanding of their responsibilities in the matter."

Our Foreign Affairs.

Business and private interests here continue to closely follow the development of our foreign affairs touching domestic interests more closely as each year

ATTITUDE OF FARMERS

FARMERS are strong holders of corn where the quality is of merchantable grade, and anticipate a high market price for corn, hogs and cattle during the crop year. Farm consumption of oats is heavy. The environment of the farmer and his view of present conditions causes him to feel exceedingly bullish. With the exception of the Dakotas, the price offered to farmers ranges from \$1.00 to \$1.20 per bu. for corn and 50 to 60 cents per bu. for oats. The price in Nebraska, Kansas, Iowa, and Missouri ranges as high as throughout the States east of the Mississippi River. Illinois appears to have some surplus corn, and the prices offered farmers are on that account on a terminal market basis. Elsewhere the prices are governed largely by local feeding demand, and in Western Nebraska by the Mountain and Pacific Coast demand.

passes. It now looks like the great problem of funding the French debt is to be definitely arranged, requiring a combination of business acumen and humanitarianism that is these days dominating such affairs. It is to be hoped that the interests of the United States will be expressed in policies and deeds which can be approved by the nation and that will have the coöperation of our treaty making authorities, the State Department and the Senate.

Business is demanding a closer "hitch-up" between its just rights and governmental official action, as it should encourage the development of foreign trade, the protection of domestic interests and with all, an opportunity for the nations of Europe to regain their right positions in world affairs.

Business further expects to be taken into the confidence of our State Department and the senate committee on foreign affairs, objecting to any tendency in such quarters towards exclusive airtight action. It is recalled that much harm grew out of such experiences during Mr. Wilson's administration and, although we do not by any means counsel the wisdom of publicity for every step in the bargaining process, a general plan along the above lines is surely practical and wise.

Investments.

It is customary around the first of the year to seek safe investments for such surplus funds as may be

available from dividends and other sources. Turning to one's banker for advice in such matters is good business, but for those who go it alone, there are certain outstanding features of the bond market that should be recognized. Fundamentally, factors which tend to increase the value of bonds are easy money rates and lower living costs, both of which, but particularly the latter, are not in force today. Money has stiffened somewhat, meaning it is required for more active service than bond investments. Living expenses are very likely to rise gradually under which circumstances it is apparent that the fixed income from bonds will buy fewer necessities, and hence bond prices are likely to decline somewhat. It is mainly in the more dependable class of security found in bonds that recommends them to conservative investors. Their speculative element is small and the yield materially less than is earned in stocks.

However, stocks, bonds, and the entire list of speculative commodities are continuing their rapid march, and the public is strongly in the market.

The week end brought continued strong demand for coal, petroleum products and fuel supplies generally. The same weather conditions and cold weather, favoring the above commodities, correspondingly, but in reverse ratio, slowed up the demand for building materials.

Orders on the books for present and future delivery of iron and steel products are large, the industry being far more satisfactory than a year ago. Railroads have been heavy buyers of cars, rails, and other supplies.

Following the holiday season, markets in lard, produce and food stuffs declined somewhat but not as much as many had expected.

A LEGISLATIVE POLICY

MEDDLING in farmers' affairs has been a political pastime for many ambitious vote getters from time immemorial. It is safe to say, however, at this time that the farmers are getting tired of being continually misled and are beginning to express themselves in a most vehement manner, giving utterance to statements which will show these demagogues where they stand. Legislation never has and never can cure an economic ill, all it can do and does, is to hamper and hamstring the industry it is intended to benefit. The farmers are to be congratulated that there are a few farm paper editors who not only have the courage but the vision as well to see and point out the fallacy of such legislation and stand by their convictions in the face of severe criticism from farmers who are being misled by alluring promises which can never be fulfilled. The following editorial from a recent issue of *The National Stockman and Farmer of Pittsburgh*, which is perhaps the best exponent of progressive farm thought in the country, clearly portrays a sound principle:

"The third annual coöperative conference, the annual meeting of the National Council of Farmers' Coöperative Marketing Association, will be held at Washington, D. C., Jan. 5-8. This meeting is largely for the purpose of discussing and deciding the legislative policy or policies coöperative organizations are to support. May we gently but definitely suggest that they favor no further legislation which has to do with the conduct of coöperative enterprises. If coöperation, which is a business enterprise, cannot stand on its own feet as other business enterprises do, it deserves to fail. And if it is hampered by a lot of government 'support' with consequent gov-

ernment supervision and meddling it is very likely to fail. The less government in business the better, and coöperative business is no exception to this rule."

WHO IS RIGHT?

GRAIN exchanges are in the unenviable position of being literally between "the devil and the deep, blue sea." When grain prices are low, there is a wail from the farmer that prices are being manipulated to lower levels at his expense, and when they are high, labor sets up the cry that prices are boosted to higher levels for an ulterior purpose.

Who is right? Both the farmer and the labor man is wrong, and both complaints are born either of ignorance or with the thought of stirring up prejudice for personal gain. The latest source of complaint in the Kansas City Labor News charges that "Chicago Board of Trade manipulators are violating the Capper-Tincher anti-grain gambling act." James H. Anderson, the editor of this labor paper, sent the following telegram to Washington, "I submit that an immediate investigation of the records of the Chicago Board of Trade showing the transactions of James A. Patten, Arthur Cutten, and Julius Barnes, as well as an investigation of the books of brokerage firms through which they are operating, will furnish you an abundance of evidence."

It is such silly prattle as this that keeps the grain trade in a perpetual stew. If there had been anything done contrary to the provisions of the Capper-Tincher law, action would have been taken long ago as trading operations are now an open book to the government. It is to the credit of Secretary of Agriculture Gore that he refused to be inveigled into this "baiting" scheme of the labor editor, and requested him to submit his evidence to the grain exchange supervisor at Chicago.

SIDE LINES

COUNTRY elevators should retail merchandise as a side line. By this, we mean they should handle lines that work in well with their own business such as flour, feed, salt, fence posts, and other material which can be supplied to the farming trade and some of which may be sold at retail in their own town. There are very few elevators that can make a satisfactory living from handling the grain that is offered at their station. Grain dealers who do not handle side lines have too much slack time during the twelve months of the year; time which could and should be put in, in a way that will produce more business and income. Many have handled side lines for years but the changing conditions under which the grain business must be operated in the future demand that all country elevators should take steps to enlarge their business activity and utilize the waste time in their business. By so doing, the grain business will become more stable, handled with less overhead and ereate less dissatisfaction in rural communities.

CONTROLLING WHEAT PRICES

HIGH wheat prices are causing much concern to the British government, and various schemes have been proposed to reduce the high cost of living. One of the plans is to create "a department of supply with authority to buy wheat in bulk and thereby stimulate an increase in home-grown grain and eventually eliminate middlemen." Another plan is to reconstruct and expand the English elevator system, and to establish a board of grain commissioners.

Both plans menace the American grain market, but it is doubtful whether they would bring any material relief to Great Britain in lower bread prices. The only places where grain can be controlled as even a temporary influence on prices are in the countries of surplus production, and all the British resources are not capable of such a task. However, the first plan would have a demoralizing effect on the markets until

they adjusted themselves to the new conditions. The second plan for controlling wheat prices also would not solve the problem. It would involve the expenditure of a large amount of money to expand the elevator capacity to anywhere near the requirements of grain imports and would add another charge against the import wheat price. For many years Great Britain has depended on the ships afloat instead of storage elevators, and by this means has cut down on the handling costs of grain imports.

These schemes offer little help in reducing Great Britain's vexing problem. The most lasting plan to lighten the high cost of living would be to distribute the surplus population in the dominions, and to work for the revival of trade.

GOOD PRECAUTIONS

WE wonder how many of our readers are watching carefully the water barrels in the elevator to see that they contain the right amount of calcium chloride so as to make a non-freezing solution. It is always well to know that the pails are in their proper place. An empty water barrel or a full one with the pails missing is liable to cause a serious loss in case of fire. Care should also be taken during cold weather in oiling bearings, for oil does not flow freely in winter time and all bearings should be looked after more frequently than during warm weather.

THE HIGH COST ELEVATOR

NORTH DAKOTA is learning by the hard road of experience that "it is not the first cost but the upkeep that counts." Some years ago, the people of the State went on a socialistic spree and authorized by a bond issue the construction of an elevator and mill at Grand Forks. It proved to be a white elephant as a mill, and now it has been discovered that the elevator is in the same category.

Efforts have been made to obtain grain storage business for the State elevator, but the cost is prohibitive as Grand Forks is not a "terminal market." J. A. Kitchen, member of the state industrial commission, in reviewing the situation points out that it would cost \$28.67 a car to handle grain at the elevator before even storage charges were figured. He says, "There is only one meaning for the word 'terminal,' and that is the place where grain reaches its ultimate destination or where it is to be transferred from one system of transportation to another. Apparently, Grand Forks does not comply with this definition because it has been unable to attract grain to its 2,000,000 bus. storage capacity which is practically empty.

WATCH YOUR R. R. LEASE

IT is evident that railroad companies are recognizing the menace lightning is to setting property afire along their right of way. One of the Western railroads includes the following clause in its leases being made with elevator owners whose elevators are on railroad property: "Elevators shall not be placed nearer than eight feet from the nearest rail on any track and must be covered with corrugated iron or any other such fireproof materials as shall be satisfactory to the railroad company." It is well known that an elevator properly covered with corrugated iron and grounded is immune from destruction through lightning. Also, that sparks from passing locomotives which lodge on roofs covered with fireproof roofing quickly die out. Shingled roofs and wood-sided elevators seem to be tabooed.

MAY THEIR TRIBE DECREASE

SOME malcontents, among whom is included Senator Frazier of N. D., state that the average farmer had to sell his grain as fast as he could as conditions were such that he needed the money as quickly as he could get it. That the increased prices

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	Jan. 3, 1925.	Dec. 27, 1924.	Jan. 5, 1924.

since election are for the benefit of the speculator and not the farmer. The same individual and other radicals before election complained that farm prices had been advanced by Wall street and the republican party to win the election, after which prices would recede. Perhaps this is the necessity that forced many farmers to sell, the fear that such men had planted in the minds of the farmer. Well, this is a pretty good old country to live in anyway. Don't you think?

MORE TAXES FOR MORE SALARIES

THE passage of the adjusted compensation law commonly called the bonus law, necessitates the appointment of a large force of employees to do the work, and as a starter the U. S. Civil Service Commission has announced that several hundred stenographers and typists will be needed. Our legislatures have piled commission on commission, bureau on bureau and increased the personnel of our government staffs—federal, state and municipal—until creditable authorities estimate that there are on the public payroll 2,700,000 public servants, one person out of every twelve over 16 years of age gainfully employed. As a speaker at a recent grain convention expressed it, "At the present rate of increase it would not appear to be long before all of us will be making

CHICAGO, JANUARY 7, 1925.

GRAIN TRADE REVIEW

WHILE grain markets closed the year within a fraction of the best prices on the crop, the undertone during the past week was much easier than of late due to heavy profit taking. The market acted as though it was about to enjoy a natural setback, one of those breaks that come in all markets regardless of how bullish conditions may appear. There has been considerable change in sentiment recently, however, owing to the relatively slow demand for domestic grain incident to the relatively higher prices prevailing for American wheat as compared with the offerings on the new crop from the southern hemisphere. The crops of Argentina and Australia are now moving to ports on a fairly liberal scale, and clearances are expected to increase materially from now on. However, this grain will not arrive in Europe until March in any volume, and in the meantime considerable wheat will have to be taken from North America. Liverpool of late has been showing considerable strength, with sterling now up to the best figure in some years and it is gradually working up to par. Continental exchange rates, however, have improved very little and are not likely to until general business rather than politics becomes the order of the day.

Statistically there seems to be no shortage of wheat as compared with the demand for the 1924-25 season, but at the same time there is no surplus of consequence. The high prices have naturally cut down consumption to some extent, which is not surprising in view of the fact that wheat is now worth \$2 per bu. and over. How much consumption can be reduced remains to be seen. Foreign Governments have apparently found it useless to try and stop the advancing tendency in the cost of living which has been noted for some time past, and restrictions on the use of wheat flour are likely before long. There is no grain, however, that can be substituted for wheat or rye, and the world will have to get along with what it has.

Visible Supply Reducing Slowly.

Visible supply of American wheat is being rather steadily reduced with a relatively light movement from the interior. The December clearances have

proven smaller than expected, and it is not likely that the actual exports for the first six months of the crop year will exceed 185,000,000 bu., which would suggest around 90,000,000 bu. remaining for European buyers after a reduction in the estimated carryover at the end of the season to around 75,000,000 bu. However, if the carryover were the same as last year there would be only 65,000,000 bu. left for export, and that quantity can be sold and cleared almost regardless of the price. This is a most peculiar season as far as statistics are concerned, and they can be made to tell a number of different stories.

The outlook for the new wheat crops in America and Europe is now attracting more attention, and the next important price trend promises to be influenced to a large extent by the developments regarding the 1925 harvest. The ice blanket still prevails over a wide area in the central west, and it is now covered by snow which with temperatures remaining around zero prevents it from disappearing. Parts of Europe are in need of rain. Russia has surprised the trade by buying wheat flour and also rye in North America, and the demand from that country is likely to remain fairly constant for sometime to come. If Russia should take around 20,000,000 bu. in the aggregate it might have considerable influence on values toward the end of the season when the available supply is usually very small. At the present level of prices it is not surprising that Argentina and Australia should want to sell new wheat quite freely. Considerable attention has been given to the big advance in American wheat prices during 1924. However, part of the advance was in the way of readjustment to a level that should have prevailed much earlier in the season, so that the actual upturn is not as large as shown by the range of values.

Coarse Grains.

Eastern demand for cash corn and oats remains distinctly slow, and the visible supply continues to accumulate. This is rather disappointing to the holders of oats, but is only natural as far as corn is concerned. The amount of corn coming forward to terminal markets is less than the average for this season of the year, and with killing discounts for low grades farmers are hardly likely to be free sellers at the present time, especially where \$1 per bu. cannot be secured at country loading points. Liquidation in livestock has apparently let up, and hog values are now nearer in line with corn than they have been for sometime past. Highly beneficial rains have fallen in Argentina and the outlook for the new crop is satisfactory with indications that the largest acreage on record has been put in. American corn prices are far above an export basis, and there is little chance of business developing.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Jan. 3, 1925.	Dec. 27, 1924.	Jan. 5, 1924.
Wheat	3,868,000	4,740,000	2,943,000
Corn	3,937,000	5,963,000	5,578,000
Oats	4,241,000	4,409,000	2,938,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1925.	1924.
Past week	12,046,000	11,459,000
Preceding week	15,102,000	19,242,000
Since July 1	711,024,000	645,540,000

Scattered liquidation was on in wheat the past week, and while the finish was on a strong rally, there were net losses of 5¢ to 3¼¢, the latter on the May, while the July showed the least loss. December went out without any fireworks, closing at \$1.75½ on Dec. 31, a net loss of 1½¢ as compared with the preceding Saturday. Foreign buying of cash grain showed indications of broadening toward the closing days of the week, but the technical position was re-

garded as weak and favorable for a further decline.

Corn market was under pressure a good part of the week, and failed to show much rallying power, the finish being about the bottom with net losses of 3¼¢@3½¢. Scattered liquidation was on at times, and the market generally failed to get aggressive support. Cash corn basis was lowest of the season at the close. December finished at \$1.27½, or 2½¢ better than at the close on Dec. 27. Sentiment was generally bearish at the last.

Oats were weaker and lower, and there was a noticeable lack of the aggressive buying, so much in evidence recently, the finish being about the bottom, with net losses of 3¼¢@3½¢, while December went out at 59½¢, a net loss of 1½¢, as compared with the close on Dec. 27. Cash demand showed improvement as the result of the declines. Foreign demand for rye was fair, but failed to have much influence and scattered liquidation in the December closed at 6¼¢ under the finish of Dec. 27, while the other deliveries were 2¼¢@4¢ lower for the full week. Range of prices the past week, follows:

	High.	Low.	Jan. 3, 1925.	Dec. 27, 1924.	Jan. 5, 1924.
Wheat—					
May	\$1.81½	\$1.74¼	\$1.77¼	\$1.80½	\$1.08
July	1.55½	1.50¼	1.53¼	1.53½	1.06¼
Corn—					
May	1.31½	1.27½	1.27½	1.31	.76
July	1.32¼	1.28¼	1.28¼	1.31½	.76½
Oats—					
May	.65½	.62	.62½	.65½	.45½
July	.64	.60½	.61	.64½	.43½
Rye—					
May	1.58	1.50½	1.53¼	1.57¼	.74¼
July	1.37½	1.32¼	1.34¼	1.37½	.75

GREAT BRITAIN INCREASES FARM PRODUCTION.

A national agricultural policy designed to give confidence and stability to the farming industry will be formulated at a conference of land owners, farmers and farm works in Great Britain. Consideration is to be given to increasing the arable land in England and Wales and means of stimulating the maximum economic production of food from all land.

Don't let your subscription lapse, you may lose valuable numbers.

WHEAT IN PRIMARY MARKETS.

Receipts of wheat the past week at 14 primary markets, compared with the corresponding week last year and also for the period beginning July 1 to Jan. 3 (000 omitted):

	Jan. 3, 1925.	Jan. 5, 1924.	Jan. 3, 1924-25.	Jan. 5, 1923-24.
Chicago	348	216	61,133	42,876
Sioux City	7	22	1,273	973

WORLD'S WHEAT EXPORTS.

Exports of wheat last week compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Jan. 3, 1925.	Dec. 27, 1924.	Jan. 5, 1924.
American	5,775,000	6,535,000	9,374,000
Argentine	2,706,000	1,790,000	937,000
Australian	944,000	288,000	808,000
Indian	680,000	712,000	16,000
Russian	888,000
Others	128,000	864,000
Total	10,105,000	9,453,000	12,887,000

Of the above total wheat from America there cleared in the form of flour 1,214,000 bus.

The total export of wheat since Aug. 1, the commencement of the European crop year, compared for three years:

	1924-25.	1923-24.	1922-23.
American	243,969,000	211,655,000	242,704,000
Argentine	35,050,000	35,586,000	34,404,000
Australian	16,984,000	18,200,000	8,976,000
Indian	17,864,000	5,856,000	3,468,000
Russian	328,000	16,120,000
Others	2,504,000	11,466,000	3,167,000
Total	316,699,000	298,833,000	292,719,000
Season	753,195,000	662,698,000

WORLD'S CORN EXPORTS.

Exports of corn last week, compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Jan. 3, 1925.	Dec. 27, 1924.	Jan. 5, 1924.
American	16,000	16,000	371,000
Argentine	1,644,000	1,648,000	1,224,000
African
Russian	255,000	75,000
Others	1,615,000	1,182,000	1,490,000
Total	3,275,000	3,101,000	3,160,000

Exports of corn since Nov. 1, 1924, compared with last year and year before:

	1924-25.	1923-24.	1922-23.
American	232,000	1,523,000	17,723,000
Argentine	30,460,000	14,272,000	38,696,000
African	544,000	4,519,000
Russian	646,000	419,000
Others	5,776,000	10,560,000	41,000
Total	37,658,000	31,293,000	56,460,000
Season	229,932,000	205,235,000

WORLD'S OATS EXPORTS.

Exports of oats last week, compared with the previous week a year ago, as reported to the Broomhall service and forwarded to this paper:

	Jan. 3, 1925.	Dec. 27, 1924.	Jan. 5, 1924.
American	58,000	330,000	650,000
Argentine	924,000	553,000	168,000
Others	50,000
Total	982,000	933,000	818,000

Exports of oats since Aug. 1, 1924, and comparisons for three years:

	1924-25.	1923-24.	1922-23.
American	13,323,000	9,453,000	20,401,000

CANADIAN GRAIN IN U. S.

The following table exhibits the quantities of bonded grain in the United States reported last week compared with previous week and one year ago:

	Jan. 3, 1925.	Dec. 27, 1924.	Jan. 5, 1924.
Wheat	18,182,000	19,326,000	31,713,000
Oats	1,739,000	1,934,000	1,821,000
Rye	1,004,000	1,259,000
Barley	3,349,000	3,697,000	419,000

ONE MILLION BU. ELEVATOR AT OSWEGO

State of New York Has Recently Completed Large Concrete Elevator at Oswego Providing Facilities for Transshipment of Grain From Great Lakes to Barge Canal.

WITH the opening of navigation on the Great Lakes in the spring of 1925, the new 1,000,000 bu. capacity elevator at Oswego, N. Y., will be available for receiving grain. Although the elevator has been completed, it is not thought that much grain will be handled before navigation opens as it was not ready in time to take the fall movement of grain in 1924. The State of New York has taken every step possible to make the Barge Canal route for grain and other shipments attractive,

Machinery.

Machinery for unloading lake vessels is located on the east side of the elevator, and consists of two movable marine towers 158 ft. high, 24 ft. wide, and 30 ft. long. These towers are carried on 20 car trucks of standard type, with 40 wheels which operate on four parallel rails on the floor of the pier, each tower having an unloading capacity of about 16,000 bus. per hour. Discharging machinery on the west side of the elevator consists of three spouts connected with the conveyor system, and having a loading capacity of about 20,000 bus. per hour. Scales for weighing grain in and out of the elevator were furnished by the Buffalo Scale Co. of Buffalo. All belting on the conveying system was provided by B. F. Goodrich Rubber Co., Chicago. Grain may also be loaded and unloaded into freight

STATE OWNED ELEVATOR AT OSWEGO, N. Y.

and the construction of the modern, concrete elevator at Oswego will be a special inducement to shippers of grain as it is erected at the lake terminus of the canal and offers unexcelled facilities and cheap transshipment to the Atlantic seaboard. The construction of the elevator at Oswego, to a large extent, resulted from the successful operation of the Gowanus Bay grain elevator at Brooklyn, other cities along the route of the Barge Canal requesting that elevators be erected by the state to provide facilities which had achieved such a success at Brooklyn. Oswego was chosen as the location of first importance as it was strategically situated at a terminus of the canal.

Bin Construction.

After the necessary appropriations had been made by the State Legislature, bids were submitted and the contract awarded to James Stewart & Co., of Chicago, at \$1,119,985.83. Capacity of the elevator is 1,000,000 bus., with 27 circular bins, each 24 ft. in diameter and 94 ft. high, 16 interstice bins and 20 outside bins. It is built of reinforced concrete and covers an area of 213 by 69 ft. The structural steel work was furnished by the Bancroft-Jones Corporation of Buffalo, and the sash by David Lupton's Sons Co., of Chicago. Operation of all machinery is by electric motors of General Electric manufacture, the wiring, both light and power, being made by the Electric Construction & Supply Co. of Oswego. All transmission machinery was furnished by the Dodge Manufacturing Corporation of Mishawaka, Ind.

cars, two standard gauge tracks being located in the train shed on one side of the elevator for that purpose. Facilities are provided for removing grain dust to eliminate the explosion hazard, but no machinery is provided for cleaning grain as the elevator will be primarily a transfer house. In addition to the elevator plant, a separate building was erected as the working quarters for elevator employees.

Plans for the elevator were made under the supervision of State Engineer Dwight B. LaDue after consultation with a number of grain elevator engineers. It is assumed that the operation of the elevator will be under the administration of R. K. Fuller, commissioner of canals and waterways, Albany, N. Y.

WHEAT PROSPECTS POOR ON PACIFIC COAST.

Reports received by the *New York Journal of Commerce* in its recent survey of the winter wheat situation indicate prospects for a poor crop in the Pacific Northwest. In Washington and Oregon, the condition of the crop is described as poor in some counties and unusually good in others. Still others are said to be in at least moderately good position. The area in which condition is reported as distinctly poor comprises about half of the important wheat producing district in two states. In those sections where weather has been good and the crop is reported to be in excellent condition there does not appear to have been very much change in

acreage, although instances appear where it is said to be larger. On the average, however, some reduction in acreage appears to have taken place. Wheat production in this Far West district is unusually concentrated. Substantially less than a dozen counties in the states of Washington and Oregon raise the vast bulk of it. Generally speaking, the northern portion of the district is the part which has suffered from adverse weather conditions; in the early autumn much too dry and in the later weeks far too wet.

LAMSON'S GOLDEN ANNIVERSARY.

The test of time is one of the best measures to judge the worthiness of any enterprise. A business which has been able to weather the vicissitudes of violent economic and political changes over a period of a half century indicates that it has had able leadership and strong financial methods. It is to these attributes that Lamson Bros. & Co., Chicago, may claim its fifty years of successful growth.

Lorenzo J. Lamson, the original founder of the firm, was born near Hinckley, Ill., in 1840. After being in business at State Center, Ia., he came to Chicago and started in the grain commission business in 1874. In a short time his brother, S. W. Lamson, joined him and the firm name was made Lamson Bros. Later with Sidney Date as a partner, the name became Lamson Bros. & Co.

From the small beginning in 1874 the firm has rounded out fifty years of service in the grain commission business. In 1906 L. F. Gates and Warren A. Lamson became partners in the firm,—Sidney Date and S. W. Lamson having retired. Later H. H. Lobdell became a partner and the firm has W. A. Lamson, L. F. Gates and H. H. Lobdell as senior partners; E. F. Thompson, James A. White, H. J. Rogers and Geo. E. Booth as junior partners.

As members of the Chicago Board of Trade, the New York Stock Exchange, Chicago Stock Exchange, and other leading exchanges of the country, the firm does an extensive commission business in grain provisions, stocks and cotton. During the past twenty years the organization has been extended greatly, particularly in connection with the handling of cash grain, and this company was the first to give private wire service in a general way to grain shippers in the smaller towns.

The cash grain service combines private wires with special salesmen for the different grains,—H. J. Rogers for corn; F. J. Dolan for oats; Geo. E. Booth for wheat, rye and barley. Orders for future delivery are transmitted to Chicago or any of the other terminal markets over wires leased by Lamson Bros. & Co., insuring the most rapid service possible.

It appears that the original Lamson Bros. built well and that in later years the most modern methods in the trade have been used to develop and maintain the large commission business, which the partners now enjoy.

NORTHWEST EMERGENCY PASSED.

Bank relief activities of the Agricultural Credit Corporation, Minnesota, have been discontinued and 10 per cent of the subscriptions to its working capital of \$6,000,000 have been returned as it was felt that no further emergency existed. However, the corporation will proceed during 1925 with its program of mixed farming promotion and advance approximately \$500,000 more to farmers for the purchase of dairy cattle and sheep. This will complete the corporation's plans for assisting farmers in one-crop districts to obtain live stock for diversification activities.

If this paper pleases you kindly recommend it to your neighbors in the trade.

THE GRAIN TRADE OF BALTIMORE IN 1924.

By Robert C. Neu.

The grain trade of 1924, as compared with that of the previous year, shows a considerable falling off in both receipts and exports at Baltimore, although the year closes with the outlook decidedly brighter for increased movement in the coming year.

Total receipts of all grains in this market for the year 1924 are slightly under 36,000,000 bushels, compared with 42,800,000 bushels in 1923, whereas total exports of all grains are slightly in excess of 25,300,000 bushels, as against 43,100,000 bushels last year. Wheat exports were the smallest since 1912, and shipments of rye the smallest since 1918.

The one particularly encouraging phase of the situation is the increase in the export movement of flour through the port, which shows a gain of 160,000 barrels over the shipments of 1923.

During the first six months of 1924, due to the fact that competing nations, particularly Canada, were underselling the United States on wheat, there was little domestic wheat exported; after the new crop had been harvested, however, the export movement received considerable stimulus, and in this connection it might be mentioned that there are at present stored in the several grain elevators at this port a total of 9,700,000 bushels—the largest quantity of grain ever under cover at one time in the history of the Baltimore market.

Prices of all grains ruled much higher the past year than during 1923, and the comparative scarcity in recent months of No. 2 red Winter, garlicky, wheat (largely grown in the nearby sections) has resulted in the price of this grade reaching the same level as that being paid for No. 2 red Winter wheat, because of the good demand for the former from nearby and southern mills.

The shortage in the corn crop, and the resulting high prices, seriously curtailed the export demand for this grain, with the result that 1924 exports of corn, a little under 2,450,000 bushels, are the smallest since 1920.

Shipments of barley show an unusual increase, and in the amount of roundly 3,000,000 bushels the past year are the largest since 1919, last year's exports of barley having been only 320,675 bushels.

Oats have been almost entirely a domestic proposition, and the exports, as compared with last year, are considerably smaller.

Business in hay has been generally unsatisfactory, with prices averaging from \$5.00 to \$6.00 per ton under those of 1923. A large nearby hay crop has resulted in the continued influx of loose hay from nearby country points, and by being delivered direct to the user, this class of hay supplanted baled hay, handled by local merchants, in many instances.

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grains from the principal ports of the United States to foreign countries during the week ending Dec. 27, 1924 (000 omitted):

Articles and countries.	Week ending—		Since July 1, 1924.
	Dec. 27, 1924.	Dec. 29, 1923.	
Barley	292	88	18,089
To United Kingdom	103	84	8,435
Other Europe	189	8,891
Other countries	4	763
Corn	145	235	3,720
Oats	52	8	3,982
Rye	54	9	27,808
Wheat	*1,814	1,528	143,064
To Italy	602	12,681
United Kingdom	482	17	31,246
Other Europe	221	44,137
Canada	47,836
Other countries	509	1,511	7,164
Total U. S.	2,357	1,868	196,663
Canadian in transit:			
Barley	331	278	4,263
Oats	30	106	6,855
Rye	17	1,839
Wheat	1,731	2,763	25,201
Total Canadian.	2,092	3,164	38,158

*Including via Pacific ports this week: Wheat, 543,000 bus.; flour, 65,700 bbls.

WILD HAY STANDARDS

Department of Agriculture is Making Studies With Co-operation of University of Minnesota.

HAY standardization on the basis comparable with the standardized trade and commerce in other major agricultural projects is a new task to which the United States Department of Agriculture, assisted by several college experiment stations, has addressed itself. The University of Minnesota is co-operating in this work, its experiment station at University Farm having been designated as headquarters for the Dakotas, Minnesota and Wisconsin.

The particular study and investigation at this time concern wild hay to the end that it may be classified and graded just as timothy hay, clover hay and other varieties have been standardized by the federal department. A hay laboratory, third of its kind in the United States, has been opened at University Farm. Laboratory and field work are in general charge of Prof. Andrew Boss, vice-director of the Minnesota Experiment Station, with F. H. Steinmetz, a member of his staff, in personal charge.

Laboratory Experiments.

Scores of baled wild hay samples have been assembled at the University Farm laboratory and are being studied and analyzed for color, percentages of weeds and other foreign materials and mixtures of various sorts. Types of vegetation are the factors determining the classes, while color and foreign materials largely form the basis for the proposed grades. Upland and midland prairie hay from Minnesota, western wheat grass from the Dakotas, and packing hay from Wisconsin and Minnesota are the classes which are being handled at the present time.

The term "class" is used to describe the kind or type of hay without reference to quality or condition. The term "grade," on the other hand, is used to describe quality which varies in all classes of hay. When the work is completed the general term, "United States grades," will be used comprehensively to include all the tame and wild hay classes and the grades within each class. Workers in the laboratory go through the rather tedious motions of separating the hay to determine class, while color, which varies with the maturity or time of cutting, with methods of curing, storage, and with the character and extent of the weather damage, is determined by a modified Munsell color apparatus furnished by the government.

Preliminary work which will lead, it is expected, to the promulgation of standards for market wild hay is now being done in all states where such hay is produced in commercial quantities. Earlier in the season Mr. Steinmetz made botanical surveys in the wild hay districts of Minnesota and the Dakotas. Field work took him to the extensive districts in west central Minnesota and along the eastern border of the old lake bed which once covered the Red river valley, to the prairie regions bordering both sides of the Missouri river in the central part of South Dakota, and to those adjacent to Bismarck, Mandan, McKenzie, and other points in central North Dakota. The coarse hay from Wisconsin, which is largely used for packing purposes, comes principally from the region about Green Bay and Horicon. Baled hay samples, representative of the different districts, were purchased and shipped to University Farm for laboratory analysis. Probably three grades and "sample" or no grade will eventually be established as a result of the co-operative work now being carried on at the different college stations north and south.

Field Studies.

"My field studies lead me to believe," says Mr. Steinmetz, "that there is a group of readily recognizable plants in

WALTER M. BROWNE OF MEMPHIS, TENN.

ONE of the regular attendants at the Grain, Hay and Feed Convention for many years is Walter M. Browne of Memphis, Tenn. His association friends and business acquaintances will be pleased to know of his present election to the presidency of the Memphis Grain and Hay Association. Mr.

Browne is one of the popular brokers of this large Southern market, and handles a considerable consignment business in grain, hay, feed, flour and cotton seed products. He is a member of all trade associations and is well fitted to administer the affairs of the association which he now heads.

much of the prairie hay which are typical of certain environments and no more difficult to recognize than our present varieties of tame grasses which most hay inspectors must know. I believe that this phase of the work we are now doing can be expressed in terms that will in time be recognized by the trade just as it now recognizes timothy, red-top, blue grasses and various legumes."

Minnesota has more than two million acres of wild hay land. The most extensive and best known producing section is in the west central part of the state with the towns of Clontarf, Foxhome and Felton as the chief shipping points. Clontarf and Foxhome each ship from 1,000 to 1,200 cars of baled wild hay yearly. The traffic from Felton amounts to 500 to 1,000 cars a year, depending on yields and market conditions. Benson handles 400 to 500 cars in the shipping season and there are several other towns which make heavy shipments each year. Crookston and the country to the northwest average about 400 cars yearly.

The stockyards companies of South St. Paul are heavy consumers of the wild hay. Approximately 3,500 cars, averaging 12 tons of wild hay to the car, are sold each year to feeders in the packing plant town. Duluth handles 1,500 to 2,000 cars every 12 months and distributed largely among the lumber camps and farms of the north country. The Twin City market, exclusive of South St. Paul, is generally good for 3,500 to 4,000 cars in a year.

Yields in Minnesota averaged rather low this year, varying from 700 to 1,600 pounds an acre with an average of 1,000 to 1,200 pounds. Cost of production is about \$5 a ton in stack. When the hay is baled and marketed it must be sold for more than \$10 a ton to give the producer a profit. Freight charges plus commission and inspection on charges apparently run from \$2.50 to about \$5 a ton for points in Minnesota.

Most of the hay lands in Minnesota are owned by outside investors and are leased by agents at from 40 cents to \$1.50 an acre. Much of the crop is cut "outside the season," after the rush of other farm work is over. All the heavy work is done by machinery, very little hay being handled with pitchforks. The baling is done with horsepower and gas engine presses. Windrow pressing and marketing directly is practiced if labor is available and the market is

strong. However, the larger portion of the hay is stacked and marketed throughout the winter and spring.

Grades Not Compulsory.

Grades for hay, tame or wild, are not compulsory. Producers and market men use them only by choice. Wisconsin has adopted and is using the system of grades developed by the Department of Agriculture for timothy and clover and has a force of hay inspectors paid by the state. Chicago and a few other municipalities also conduct their hay markets under the federal standards. Kansas City and Cincinnati are the leading hay markets in this country.

United States grades for timothy and clover were approved and made effective Feb. 1, 1924. Training schools for inspectors have since been held and the grades are gradually being extended in use over the country. What has been done in this connection it is hoped to do for the producers and consumers of wild hay.

VISIBLE GRAIN SUPPLY.

The following table gives the stocks of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons as compiled by the secretary of the Chicago Board of Trade for the week ending Jan. 3, (000 omitted):

In store at	Wheat.	Corn.	Oats.	Rye.	Barley.

A YEAR'S BUSINESS AT FORT WORTH.

Below, we give a review of this year's inspections as compared with last year's. Also give comparison of this month's inspections against the preceding month's and the corresponding month of last year:

	1924.		1923.	
	Rcts.	Shpts.	Rcts.	Shpts.
Wheat	13,410	4,567	6,164	3,073
Corn	2,458	462	1,813	495
Oats	2,171	694	1,634	465
Sorghum	1,514	291	578	135
Barley	732	240	428	61
Rye	26	6	8
Buckwheat	15	14
Heads	1,838	22	544	10
Hay	1,828	35	1,584	25
Cane seed	295	3	164	14
Millet	10	10
Mixed grain	123	200	36	1
Snap corn	1,173	419
Off. samples	231	167
Miscellaneous	89	71
Total inspections for 1924	32,433		17,913	
against 17,913 for 1923.				
	Dec., 1924.		Nov., 1923.	
	Rcts.	Shpts.	Rcts.	Shpts.
Wheat	823	354	870	402
Corn	592	24	230	15
Oats	93	47	112	37
Sorghum	326	32	154	32
Barley	45	20	36	15
Rye	9	1	3	2
Buckwheat
Heads	379	535	2	133
Cane seed	57	1	5	1
Millet	1
Snap corn	132	38	142
Off. smpls.	29	31	30
Miscel.	14	15	12
Hay	119	122	161
Total inspections for Dec., 1924	3,123		3,123	
Total inspections for Nov., 1924	2,671		2,671	
Total inspections for Dec., 1923	1,614		1,614	

It will be noticed from the above that the receipts for 1924 practically doubled 1923, while the shipments increased more than 50%. Wheat receipts showed the greatest increase of over 100%. Corn increased about 30%, while sorghum heads showed an increase of more than 300% with threshed sorghums almost as great. Snap corn also shows an increase of almost 300% and cane seed too shows a good gain.—V. L. Nigh, Chief Inspector, Ft. Worth Gr. & Cot. Exch.

FUTURE TRANSACTIONS AT CHICAGO.

The volume of sales for future delivery on the Chicago Board of Trade for the days indicated, subject to corrections of minor importance, as reported by J. W. T. Duvel, Grain Exchange Supervisor, were as follows (last three 000 omitted):

PRESIDENT COOLIDGE ON COÖPERATION.

Every utterance of the President on agricultural coöperation is seized upon by the pool fanatics and interpreted as giving his wholehearted endorsement to every coöperative scheme now extant. The President is a plain-speaking man, easily understood, and there is nothing which he has said which can honestly be defined as endorsement of some of the uneconomical methods now employed by coöperative associations, so-called. In fact, he has condemned some of the coöperative plans in no uncertain terms. He is a believer in coöperation from the ground up, starting with efficient production on the farm. President Coolidge's remarks anent coöperative marketing before the Washington, D. C., meeting of the coöperative marketing associations, follow:

"Firmly as I believe in the broadest and soundest programs of coöperative marketing, I want to make plain that I am no blind believer in any magical attribute of the coöperative proceeding. A good deal that is positively mischievous has put about in this regard. There is a school of coöperators who seem to believe that the program can be started at the top and built downward. They want the government, or the banks, or philanthropies, or Providence, to lay out a scheme big enough to cover the country, set its machinery moving, guarantee it all needed capital and then invite the farmers to sit in places reserved for them and proceed to garner their profits. I offer no such Aladdin-like project.

"I want to see society as a whole help, but I want to see the farmers do their share, and I warn them that this will be the lion's share."

The first steps the President thinks coöperators should take are (1) establishment of grades and standards, (2) encouragement of good and elimination of poor varieties, (3) increase in the efficiency of production, (4) provision of a unified product adapted to its market, (5) organization of distribution, and (6) creation of confidence in products and methods.

SHIPPING BOARD COMMENDED.

Gray Silver, president of the Grain Marketing Co., Chicago, recently commended the United States Shipping Board for putting additional vessels in the Gulf ports grain trade. The commendation was in the form of a letter addressed to Chairman T. V. O'Connor of the Board endorsing Mr. O'Connor's letter to President Jas. A. Farrell of the United States Steel Corporation, answering the latter's criticism of the Shipping Board for assigning additional vessels to Gulf ports during the height of the grain movement, when congestion was beginning and a blockade was impending. Mr. Silver said in part, "Had it not been for the action of the Shipping Board in assigning additional vessels to the grain trade, all our otherwise successful efforts to move the immense volume of grain offered for export would have come to naught so far as southwestern outlets were concerned. No other American vessels were available and it was highly important, in more ways than one, that this grain should move in American bottoms. Of what use is our great emergency fleet if it cannot be used in such emergencies as this, not only for the benefit of the American merchant marine and the nation as a whole?"

LATE FIRES.

The elevator of J. C. Roush at Onawa, Iowa, was destroyed by fire on Jan. 4th, with a total loss of \$20,000. Cause of fire not reported.

A small fire loss occurred at Buffalo, N. Y., when the dust collecting system at the plant of the Russell-Miller Milling Co. was destroyed on Jan. 4th.

FIFTY YEARS IN THE GRAIN BUSINESS.

P. B. MILES.

Continuous service for fifty years as a business organization is an achievement which is worthy of recognition and should be a source of pride to those who have had a part in it. On Jan. 1, 1925, P. B. & C. C. Miles, the time-honored grain commission firm of Peoria, Ill., celebrated the fiftieth anniversary of the founding of company in 1875. Both P. B. Miles and C. C. Miles, who started the firm, are still in the business in an active way, and associated with them are William Miles, Grant

C. C. MILES.

Miles and Jos. C. Miles. They have severally and collectively done much for the organized grain interests of Peoria and the country at large. Not many men are privileged to live and enjoy the fruits of a successful venture extending over half a century, and the grain trade, we are sure, will voice with THE PRICE CURRENT-GRAIN REPORTER their congratulations and extend the hope that the corporation remain in the grain trade another fifty years and more.

INVESTIGATE "GRAIN GAMBLING"?

Request for an investigation by the Department of Justice and the Department of Agriculture into charges that Chicago Board of Trade "manipulators" are violating the Capper-Tincher anti-grain gambling act has been made by the Kansas City Labor News. Secretary of Agriculture Gore has instructed that all evidence in possession of the publication should be referred to Dr. J. W. T. Duvel, grain exchange supervisor at Chicago. James H. Anderson, editor of the labor publication, says, "I submit that an immediate investigation of the records of the Chicago Board of Trade, showing the transactions of James A. Patten, Arthur Cutten, and Julius Barnes, as well as an investigation of the books of brokerage firms through which they are operating will furnish you an abundance of evidence."

CAPPER-WILLIAMS BILL RE-INTRODUCED.

Senator Capper of Kansas has reintroduced in the Senate the Capper-Williams coöperative marketing bill. The measure has been revised, but the vital features remain as before. The bill creates a federal marketing board of seven members, including the Secretary of Agriculture, the Secretary of Commerce and five others to be appointed by the President. The purpose of the board is to encourage and aid in establishment of coöperative marketing associations of producers, coöperative marketing clearing houses and terminal marketing associations, and to issue charters to such associations. Authorization to fix standards and grades of farm products in connection with the marketing arrangements of the measure also is provided.

NO RUSSIAN EXPORTS TILL SPRING.

Owing to the failure of crops in Russia, exports of wheat and rye have been stopped. According to M. Rykoff, chairman of the commission dealing with this question, it will not be possible to ascer-

tain whether there will be any surplus before April, 1925. The export of other cereals and feeds is proceeding normally, especially with barley, corn, oil-cake, linseed, and sunflower seed.

COAST GRAIN PRICES.

Quotations of grain reported by grain exchanges of the Pacific Coast as of Dec. 31 are as follows:

Portland — Merchants' Exchange, noon session, Dec. 31:			
	January.	February.

FARM ELEVATOR ACCOUNTANTS' MEETING.

Managers of more than 100 farmers' elevators and other coöperative enterprises in Illinois and representatives from other states will meet in Champaign, Ill., on Jan. 24 for the first annual meeting of the Farmers' Auditing and Accounting Company. The associa-

tion is the first of its kind ever operated in Illinois, having as its purpose that of providing expert auditing, accounting and business advisory service.

WARN AGAINST WHEAT OVER-PRODUCTION.

Following one of the largest wheat crops in the United States on record, several agencies are warning the American farmer not to increase his acreage owing to the temporary high prices received on account of European shortages. The Food Research Institute in its series of studies of the wheat situation points out the danger of repeating the conditions resulting from the 1923 developments. Referring to 1923-24 conditions, the Institute says, "This year the situation is reversed. American yields per acre are good, the wheat is of high quality, and world prices have definitely improved, largely in consequence of low yields of mediocre quality in Canada and Europe. This year, for the first time since 1919-20, the American wheat crop will be clearly remunerative to the growers. In many other countries the price advantage to growers will be largely offset by reduced yields and lower quality. The experience of this year indicates that, within limits, when the value of wheat in relation to other commodities drops to a distinctly low point, there is considerable elasticity in the demand and considerable resistance to further decline in prices. This elasticity is afforded by the ready use of wheat as feed and by the ease of substitution in human diet. Exceptionally large crops of grain are likely to be absorbed during the years following the respective harvests, rather than be stored up against future needs. So-called surplus production will be currently absorbed, and deficiencies in production will be met by resort to other food and feeds."

1923 WHEAT DECLINE ANALYZED.

In a series of wheat studies recently published by the Food Research Institute of Stanford University, the following explanation is given: "International shipments of wheat and flour in 1923-24 were the largest in history, and this despite good crops in most of the importing countries. Shipments to Europe and to Japan and China were of record size. Canada broke all records for export. Russia re-entered the ranks of important exporters with shipments of 60,000,000 bus. of wheat and rye and the bulk of the crop was absorbed during the year and the carryovers were only moderately increased.

"The world wheat crop of 1923-24 was the largest since the war and equal to all by the best pre-war crops. Indeed, if one excludes Russia or even Russian domestic consumption the crop was the largest ever harvested. Good crops were general, and on the whole the wheat was of high quality. Canada and Argentina had record harvests; Italy, Spain, Hungary and Australia had exceptionally good ones. The United States crop, though smaller than any since 1917, was larger than any pre-war crop except those of 1901 and 1914. Russia's crop, though small as compared with pre-war records, was probably the best since the revolution of 1917. The size of the wheat crop was the more impressive because the preceding world crop had been of fair size and because other cereal crops were also large."

GERMAN HARVESTS MORE FAVORABLE.

Prussian harvests are considerably more favorable than was predicted during recent months by the government. The total bread grains harvested in 1924 was 58,898,000 quintals compared with 72,949,000 in 1923. The potato crop was larger than in 1923. A quintal is 220.46 lbs., or approximately 3½ bus. of wheat.

COTTON NEWS

World Cotton Production.

Cotton production in countries that grow between 93 and 96 per cent of the world crop is estimated at 22,211,000 bales of 478 pounds net, as compared with 17,928,000 bales last year, the Department of Agriculture announced on Jan. 2.

Total consumption in the United States for the four months ended November 30, was 1,818,000 running bales of lint cotton, as compared with 2,054,000 bales for the same period in 1923. This decrease, however, has been more than offset by increased exports. The export of domestic cotton, excluding linters, for the four months, August to November, this year, was 3,237,000 bales, as compared with 2,459,000 bales during the same period last year.

New Bill Affecting U. S. Cotton Standards.

Already increased powers for the Secretary of Agriculture to enable that official better to carry on in foreign countries negotiations for the recognition and the maintenance in foreign trade of the United States cotton standards are sought in a bill introduced in the Senate Dec. 30 by Senator Ransdell of Louisiana.

Legislation to Check Ginning Reports.

Detailed information concerning the ginning of cotton would be made available to the cotton growing industry under the terms of a bill sponsored by Senator Smith, Democrat, of South Carolina, and passed by the Senate today.

The bill is for the purpose of giving to the public a means of checking the reports of the Bureau of the Census as to the total amount of cotton ginned. It provides that the post office address and ownership of each gin shall be given, and the amount of cotton ginned by each gin in each report, and also the name of the special agent or other bureau employee reporting for such district. These reports, which are made semi-monthly under the Smith bill, will, its author declares, enable every gin to ascertain whether the amount credited to it from time to time is correct. It will also enable any interested party to make inquiry.

Holding Back Cotton.

"Concerning the disposition to hold cotton for higher prices, it is certain that farmers generally are much disappointed over the season's results. They expected much higher prices, and now that the rush marketing time is over the expression of this disappointment is apt to become apparent. Farmers will hold on the farm, with their factors, and also in the cooperative associations. The movement to hold will not be discountenanced by the banks, but the contrary; for the banks are overstocked with funds and ask for nothing better than to advance on cotton."—Espy Cotton Company.

Chicago Market Progressing.

After only one month's experience those who were foremost in the innovation and who are now working hardest for its development are confident that eventually Chicago will be recognized as one of the most important cotton markets in the world.

Reports from New York and New Orleans showed that their volume of business in cotton had dropped considerably and that, of the reduced volume done, Chicago had its full quota. This year Chicago will be in line for the hedging business, and should increase its volume very materially. Its more favorable position as to domestic distribution should prove particularly helpful.

Contracts on the Chicago Board of Trade require delivery of "high density" compressed sales in warehouses at Houston or Galveston. Ample store room has been acquired at those points and prompt handling of all deliveries has been assured. All contracts are subject to the United States Cotton Futures Act.

Southern and southwestern interest in the trade was rapidly developing at the close of the year, and there appeared to be sound reason to expect rapid expansion. Price movement during the month was influenced to some extent by action at outside markets, with the finish not much below the high point of the year.

Market Opinion.

The cotton market maintained a steady undertone at close of the week, influenced by higher Eastern markets. We still adhere to our former views that, in line with expansion of business, increasing prices and continued demand for textiles, that cotton should be purchased on declines for investment purposes.—J. J. Badenoch Co.

WHEAT POOLS BOUND TO FAIL.

In speaking before the business training class of the Hamilton, Ont., Chamber of Commerce, J. P. Bell, general manager of the Canadian Bank of Commerce, said, "Trusts or pools were originally formed to keep prices up or to regulate production, but they have never been successful just as the farmers' pools for marketing grain will in the long run be found unworkable. Nearly all these schemes are as ancient as Roman law and the rock on which they split is human nature. The farmers will have a bad year. The pool will not make returns and next year the farmers will have no wheat to deliver. It will belong to his wife or his children."

CASH CONTRACT WHEAT.

Following is the monthly range of cash No. 2 red winter and No. 2 northern (and better) wheat at Chicago for a series of years:

	1924	1923	1922	1921	1920	1919	1918

HEATED GRAIN MADE NORMAL THROUGH FUMIGATION.

Grain infested with insects may heat, due to their presence, until it becomes favorable to the breeding and development of large numbers of destructive weevils and beetles of various species. If the temperature of the grain continues to rise, it reaches a point where spoilage occurs. Insects have been known to raise the temperature of grain to 88° F. and 95° F. when the outside or room temperature was below 50° F. It is highly necessary, therefore, in warehouses where large quantities of grain are stored to keep the temperature of the grain low and particularly to destroy any insects which may be present.

A study of the effect of fumigation upon heating grain has been made by the Bureau of Entomology of the Department of Agriculture. This has demonstrated that when heating is a result of insect infestation the insects can be killed and the temperature of the grain reduced to normal by fumigation with hydrocyanic gas or carbon disulphide. Even grain and beans heating to 103° F. have been reduced to normal temperatures by fumigation. Such reduction in temperature prevents the continued destruction of grain in cold weather, when owners not understanding the ability of insects to raise grain temperatures believe they are enjoying protection due to insect inactivity resulting from temperatures of 50° F. or lower.

NEW INTERESTS BUY NASHVILLE ELEVATOR.

One of the largest grain elevators in the South, the Nashville Warehouse &

Elevator Co., Nashville, Tenn., has been acquired by new interests. The name will be changed to the Nashville Warehouse & Elevator Corporation, and it will be recapitalized at \$151,000 with 1,500 shares of nonpar value. The incorporators are S. M. Allen, Jr., president; Joseph W. Scales, general manager; Paul M. Davis, P. D. Houston, and V. I. Witherspoon. It is planned to spend \$50,000 in improvements, and to operate a public storage elevator with all modern facilities. The elevator now has a capacity of 750,000 bus.

U. S. GRAIN IN CANADA.

The Canadian Bureau of Statistics reports the following amount of grain in store in Canada on Dec. 26:

	Dec. 26, 1924.	Dec. 19, 1924.	Dec. 28, 1923.
Wheat	2,694,134	2,364,698	375,203

STORAGE CHARGES IN STATE
ELEVATOR TOO HIGH.

Efforts have been made to secure grain for storage in the North Dakota State Elevator at Grand Forks, but without success as the high cost of stopping in transit and other charges makes it prohibitive. J. A. Kitchen, member of the state industrial commission, makes the following report: "The elevator department of the state mill and elevator has been under the management of Mr. Simmons. Mr. Simmons has made every effort to secure grain for storage as over 2,000,000 bus. could be stored at the elevator. It seems storage expense and freight differentials prohibit and bar the stoppage of grain in transit. There is only one meaning for the word 'terminal,' and that is where the grain reaches its ultimate destination or where it is to be transferred from one system of transportation to another. Thus Minneapolis in the first instance is a 'terminal' point and the other instance, Duluth or Superior on the Great Lakes, where grain is transferred from railroad to steamship, would be the other. For the privilege of stopping a car in transit at the Grand Forks elevator, the charge would be \$28.67 a car, not including storage charges. We can hardly see how any elevator or person would care to pay that much for storage of grain in transit."

1925—1879.

Nineteen twenty-four has passed away and adds another year to our life as a grain and seed concern, and brings the age of J. F. Zahm and Co. to exactly forty-five years. Naturally we are hoping we can continue and reach the half-century mark.

A happy, healthy, prosperous new year is what we wish to every reader of the red letter, and at the same time we extend our thanks to the folks that have helped make our business what it is, and we hope our pleasant relations may continue for at least the next five years, and "then some."—J. F. Zahm & Co., Toledo, O.

A REMARKABLE RECORD.

Rye closes the calendar year several cents under the top scored recently, with a gain from the year's low to its high of 88c, an advance that in seven months has far more than doubled the price and reinstated this cereal in the bread-stuff class. Exports since Aug. 1 are two and one-half those of last year—about half of North America's surplus. Stimulated by high prices, free marketing has left in first hands far less than usual, so that while terminal stocks are ten per cent larger than last year, they represent a much greater part of the total available supply now than normally.—Frank H. Blodgett, Inc., Janesville, Wis.

BRITISH POLICY WILL NOT
AFFECT MEAT EXPORTS.

Considerable comment has been aroused in this country by the announcement that British dominions will receive preferential treatment on meat exports. C. J. Roberts, president of Roberts & Oake, Chicago packers, said, "Canada does not raise enough pork for her own use, so count her out. Ireland sends all her surplus to England, anyway. The Danish imports have been increasing right along for years, except during the war. Besides, the Danish meat is too high priced for the masses. I can't see why we should not continue to ship over our product."

TEXAS NEEDS CORN.

On account of the shortage in the last corn crop, Texas will have to import from other states many thousands of bushels, according to H. H. Shutz, agricultural statistician at Houston. He reports that only a few counties of the state have produced a surplus of corn. The yield of the year is estimated at 79,232,000 bus., an average of 16 bus. per

acre. Last year the state produced 96,440,000 bus. of corn. The five-year average is 132,000,000 bus. Average yield per acre of grain sorghums is estimated at 23 bus. and the total yield at 45,678,000 bus., or about the same as that of each of the two years previous.

NEW YORK GRAIN DEALERS'
MEETING.

The mid-winter meeting of the New York State Hay & Grain Dealers' Assn. will be held on Jan. 15, in the Onondaga Hotel, Syracuse, N. Y. An excellent program has been prepared for the meeting by Secretary Jones, one of the most important subjects being the horse publicity drive campaign.

Corn Movement Slow.

Price Current-Grain Reporter: Quite likely some damage in certain localities will show up in the winter wheat fields after present coating of snow and ice disappears, but the farmers we talk to seem very cheerful as to their growing wheat.

Prospects are not as bright for a large movement of corn to market from the farms as seemed apparent a week ago. We have excellent wagon roads and plenty of box cars. Considerable corn is now arriving at country elevators, but it's mostly to apply on old contracts, as we can hear of very few new deals entered into the past week.—H. I. Baldwin & Co., Decatur, Ill.

NEW YORK OATS MARKET.

Oats receipts, 74,000 bushels bonded, 68,000 bushels domestic. The moderate receipts did not influence prices to any extent, as the cash demand was light and the offerings sufficient to supply the needs of the trade without difficulty. Dealers, no doubt, have recently reduced stocks to a minimum in a number of instances, but consumptive requirements at present are below a seasonal average, so that there is no inducement for them to increase their holdings until there is evidence of an improved demand. Spot premiums are little changed, but show a hardening tendency in an effort to absorb accruing storage charges. The fact that the visible supply continues to show a weekly increase at this season is not generally considered conducive to higher levels.—L. W. Forbell & Co.

MILO-KAFFIR.

Demand here just about adequate to take care of arrivals, with no indication that markets will show any weakness until some new development in the situation. North Plains reports a big part of their surplus moved; however, South Plains section is said to have their big movement ahead of them.

Milo-kaffir heads tendency is still upward and we are still advising consigning. We know of one big lot of maize heads that can be bought at \$35.50.—Federal Commission Co., Ft. Worth, Tex.

CANADIAN COÖP. PROFITS.

It was revealed at the annual meeting of the United Grain Growers' Co., Winnipeg, Canada, that the profits for the year ending Aug. 31, 1924, were \$552,443. This is 12 per cent of the combined surplus and capital of the company. An 8 per cent dividend was paid to shareholders, amounting to \$228,176, the balance of profit, \$462,000 being placed to profit and loss account.

INVESTIGATE BAKERY MERGER.

An investigation into the legality of the \$15,000,000 bakery merger has been started by the Department of Justice, according to Washington reports. Although Attorney General Stone said that he knew nothing of the details of the merger, its magnitude warranted the department taking notice of it. Four agents have been directed to gather all data concerning the amalgamation of the properties.

GOOD RESOLUTIONS.

Why not make a few resolutions?
Resolve to pay the farmer a correct price for off grade grain and seed.
Resolve to inspect all shipments carefully and not blame the receiver when grain or seed grades below your ideas.
Resolve not to over-trade in futures but to be a conservative and not take on more than can be marketed easily.
Resolve to accept fair returns on an investment or short sale of futures, and let the other fellow make something.
Resolve to do your own thinking and not follow too closely the advice of others, and, at times, use the stop loss plan, etc., etc.—J. F. Zahm & Co., Toledo, O.

LOOK FOR HIGHER PRICES.

CHICAGO, ILL.—At the close of 1924, when this letter is written, grocers and dealers seem to have a very light stock of beans or peas; there have been two or three speculative holdings, most of which have been fairly well absorbed, and the recent cold weather has been very favorable to the consumption of these items.

These conditions ought to make themselves felt with the turn of the year, and as Michigan beans are the cheapest article on the list at the present time, we are looking for an improvement in prices in that direction. California operators maintain that their schedule of prices on all varieties is fully justified by the short crops on the Pacific coast, although it is very much higher than that prevailing in other directions. There have been very small importations, but if the central and eastern market should advance to a parity say with California, it would encourage nearly all varieties from abroad in spite of the duty. The good prices prevailing for grain will be a favorable factor, and the general outlook for the first half of 1925, both as to values and demand, is good.—Herbert W. Smith Brokerage Co.

STOCKS LIGHT.

CHARLOTTE, MICH.—Bean stocks seem lighter in farmers' hands than usual at this time of year, but much heavier in dealers' hands and we get reports of far more than the usual amount of beans being stored by speculative interests, so the market would seem in position to respond quickly to any good demand that might develop from the trade, but the buying by the trade has been very light for some time back.—L. H. Shepherd G. B. & Mill. Co.

BEAN CROP SHORT.

LAMB, MICH.—I would say that the bean crop in this locality is, at least, 50% short of last season. Sixty per cent, I believe, of the 1924 crop has already been marketed and the situation would indicate higher prices in the near future.

Six carloads I have marketed from this point; average pick has been about 5%. The quality has been very good.

From present appearance, many more beans will be sown during 1925 than in 1924 throughout this locality.—M. P. Shanahan.

LEGUMES ENRICH SOIL.

Alfalfa clover, beans, peas, in fact all the legumes, are believed to enrich the soil by taking part of their nitrogen from the air and leaving large stores of this element of plant growth in the soil for following crops.

This is true if the legume be inoculated with a bacteria which forms nodules on the roots of the plant as they gather nitrogen from the air, says the Ohio Experiment Station.

The species of bacteria generally differ for the different legumes. This makes it necessary usually to inoculate the seed or soil for a legume the first time it is grown in a field. There are a few exceptions to this rule, such as alfalfa after sweet clover.

CASH CONTRACT OATS.

BARLEY MARKETS.

MILWAUKEE—Barley was practically the only cash grain which showed strength during the past week and closed 1@2c higher in the Milwaukee market. Demand from the maltsters continued good and shipping demand was excellent throughout the week. Receipts were 135 cars as compared with 125 cars a week ago and 38 in 1924. Choice to fancy, 48 to 50 lb. test, quotable at \$1.01@1.02; fair to good, 44 to 47 lb. test, 94c@1; light weight, 40 to 43 lb. test, 90@98c; feed, 85@93c. Iowa quoted 90c@1.02, as to quality; Wisconsin, 90c@1.02; Minnesota, 90c@1.02; Dakota, 90c@1.00; feed and rejected, 85@93c.

FT. WORTH—Barley receipts have been rather light with an indifferent demand and prices about unchanged. No. 3 or better barley is selling at prices near to 97 cents group one.

KANSAS CITY—For the second week in succession, no receipts of barley were reported here. However, stocks increased 2,000 bus., owing to unloading of previous arrivals. Prices were nominally unchanged to 2c per bushel higher, closing with No. 3 at 90@91c and No. 4 at 88@90c. Consumptive demand was light.

BUFFALO—Feeders are slowly buying up the available supply of ex-lake malting barley. When the present stocks are exhausted it will be necessary to use all rail western barley which will figure considerably higher than ex-lake, which is worth nominally, 48 lb. malting, 98c to \$1 in store, Buffalo. Estimated cars, 4.

PORTLAND, ORE.—Feed barley slow, with buyers taking only occasional car lots. Better demand during the cold spell, but prices are so high that con-

sumers are getting along as best they can with all of their coarse grains. No desire to speculate on high prices, and the business that has been passing has been for immediate requirements. Forty-four pound barley is quoted, \$44 per ton.

CHICAGO.—Prices here established a new high for the season with sales being made at \$1.00 per bu. for malting. Offerings were extremely light and demand good. There is an excellent shipping business, presumably by Eastern account for export, and also local maltsters are active in the market. Barley screenings are in good demand. Stocks of grain are decreasing on account of the heavy domestic and export demand, and offerings are consequently on the decrease. Malting was quoted 95@1.00 at the close. Exports for the week ending Jan. 3 were 514,000 bus., against 961,000 last week, and 287,000 a year ago.

MINNEAPOLIS.—With light offerings and a good demand, the market was firm throughout the week and high prices were registered on the crop. Prices quoted at close ranged from 76 to 93 cents per bu.

RYE MARKETS

RECEIPTS OF RYE.

1912	1.51½	.89½	1.11	1.73	2.41	1.81½

RYE MARKETS.

MILWAUKEE.—Making the biggest part of its decline on the first day of the week, rye closed 5@6c lower for the period in the Milwaukee market. The decline was considered by traders as being a merely temporary reaction and on

CULL BEANS WANTED

LARGE WHITE and RED
KIDNEY CULLS

Submit Samples—Quote f.o.b. Prices

SIGMOND ROTHSCILD CO.

HOUSTON, TEXAS

Saturday a slightly stronger tendency was noticeable. Offerings were mostly offgrade with high moisture content and discounts were liberal. Dry was scarce and wanted. Receipts for the week were 36 cars as compared with 41 the previous week and 8 in 1924. The market closed at \$1.44½@1.46½ for No. 2, inside for Wisconsin, ranging at 7@9c under May price.

NEW YORK.—Export business in rye for the week approximated two million bushels principally to Germany and Scandinavia.

DULUTH.—Activity in the rye market here during the last week came in fits and starts. A disposition to sell was more generally shown by holders and demand fell off from the rate it had been running at. Export trade was lacking for the time being and the market became draggy. Spot No. 1 rye closed 3c off at \$1.44½.

CHICAGO.—An easy market prevailed most of the week in sympathy with wheat. With general liquidation the futures market lacked support and prices declined sharply. Export demand was slightly improved, but the report of amount actually worked during the week was much smaller than the amounts reported taken by foreigners. Carlot offerings were moderate, and demand was only fair. At the close No. 2 sold at \$1.48. Exports during the week ending Jan. 3 from the principal Atlantic ports were 193,000 bus., compared with 176,000 a week ago, and 21,000 last year.

MINNEAPOLIS.—Fairly active demand for milling grades and light offerings most of the week. Movement from the country is light, indicating small stock and a strong statistical position in the market. The winter rye crop is generally believed to be in excellent condition with a good blanket of snow. At the close No. 2 to arrive was quoted \$1.41½.

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Jan. 3:

Beans—

Boston—Car lots, per 100 lbs., N. Y. and Mich.: Choice h.-p. pea beans, \$6.35@6.50; fair to good, \$6@6.15; Calif. small white, \$8@8.10; yellow eyes, extras, \$7@7.25; red kidneys, \$9.50; Calif. limas, \$14@14.25; native green peas, \$7.25@7.50; Canada, \$6@6.25; jobbing prices, 25 to 50 cents above car lots.

Chicago—Fair trade at firm prices. Supplies light and demand good. Spot navy beans, Mich., \$6.10@6.15; brown Swedish, \$6.25; red kidneys, \$9.25.

Minneapolis—Nominal quotations, in lbs., including sacks: Beans, fcy, h.-p. navy, 6c; lima, Calif., 18c; brown, 6c; peas, green, fcy, 8c; yellow, fcy, 6c; marrowfat, 9c.

New York—Continued dull movement in all varieties and prices as a whole about steady and unchanged. Domestic—Marrow, \$10@10.25; pea, ch., h.-p., \$6.25; pea, screened and prime, \$5.50@6; red kidney, \$9.35; white kidney, \$9.25.

Potatoes—

Chicago—Carlot receipts during the week ending Jan. 3, were 258 cars vs. 125 cars week ending Dec. 27, and 107 cars a year ago. Market quiet to a shade easier. The trade was light, but this was rather expected for a week-end. Buyers were fairly well supplied during the past few days and the demand was mostly to fill some urgent orders. Bulk, per 100 lbs., Wis., \$1.20@1.35; round white, sacks, Wis., \$1.10@1.25; Minnesota, \$1.10@1.20; Idaho russets, \$1.75@2.20; early Ohio, sacks, Red Rivers, \$1.20@1.30. New potatoes—First arrivals from the south. Quality fairly good. Hampers, Texas, \$2.50@2.75. Sweets—Demand good; prices slightly easier. Bus., Ill., Jerseys, \$2@3.25; Nancy Halls, \$3; Arkansas, \$2@2.50; Ill., Nancy Halls, \$2.75; hampers, Tenn., Nancy Halls, \$2.65@2.75; Ill., \$2.00; Jersey, eastern, kiln-dried, \$3.75@4.00; Ill., Jersey, large hampers, \$3.00@3.25; small hampers, \$2@2.25.

New York—Sack potatoes dull and nominally unchanged. Bermuda potatoes at a complete standstill. Delaware and Maryland basket sweets sold as quoted; Jerseys very quiet. L. L. bulk, 180 lbs., \$3.35@3.65; 165-lb. sk., \$2.75@3; 150-lb. sk., \$2.75@3.25; 3-bu. sk., \$3; Me., bulk, 180 lbs., \$2.10@2.50; car lots, cwt., \$1.20@1.25; 150-lb. sk., \$1.90@2.10; state, bulk, 180 lbs., \$1.85@2.10; car lots, cwt., \$1.10@1.15; 150-lb. sk., \$1.65@1.85; Bermuda, bbl., No. 1, \$13@14; No. 2, \$11@12; No. 3, \$7@8. Sweets—Jy., bskt., \$2@3.75; Del. and Md., bskt., \$1.75@2.75.

BUCKWHEAT MARKETS.

MILWAUKEE—There was little trading in buckwheat in the Milwaukee market during the past week. Prices, however, remained firm and unchanged as there was sufficient demand to take all offerings. Current quotations are, per 100 lbs.: Japanese, \$2.30@2.35; silver hull, \$2.15@2.25.

BUFFALO—Quoted locally at \$2.31 per 100 lbs.

MINNEAPOLIS—Spot quotations follow: Japanese, \$2.45@2.50; silver hull, \$2.40@2.45; mixed, \$2.40@2.45.

ST. LOUIS—Re-cleaned buckwheat at \$2.60 per 100 lbs.

Crop Reports

Compiled by GEO. A. WELLS

MARKETING CONDITIONS.

There is a remarkable uniformity of country marketing conditions throughout the entire surplus grain states and also in the attitude of farmers with reference to selling corn, oats and hogs.

With the exception of the Dakotas, the price offered to farmers ranges from \$1.00 to \$1.20 per bushel for corn and 50 to 60c per bushel for oats. The price in Nebraska, Kansas, Iowa and Missouri ranging as high as throughout the states east of the Mississippi River, Illinois appears to have some surplus corn and the prices offered farmers appear to be on a terminal market basis on that account. Elsewhere the prices are governed largely by local feeding demand and in western Nebraska by the Mountain and Pacific coast demand. With the exception of central Illinois there does not seem to be any corn going to terminal markets and no prospect of much movement to terminal markets during this crop year.

The price of oats is practically one-half the price of corn. Oats may be fed on the farms to advantage for growing purposes, but corn or manufactured feeds are necessary for fattening. The enormous rush of light weight hogs to market is partly because of the high prices of corn as compared with the price of hogs and also because of the poor quality and low feeding value of the corn. In other words, scarcity of corn may be considered a large factor in the unprecedented movement of hogs to market.

There are no doubt farmers who are strong holders of corn where the quality is of merchantable grade and who anticipate a high market price for corn as a certainty and also very much higher prices for hogs and cattle during this crop year. The farm consumption of oats is heavy. The environment of the farmer and his view of conditions cause him to feel exceedingly bullish.

GENERAL REPORTS.

The general reports received from correspondents are in reply to the following questionnaire, namely: (1) As to prices farmers are being offered by the grain trade for corn and oats. (2) As to whether or not farmers are selling corn and oats. (3) As to whether or not farmers are still inclined to ship hogs light weight and what seems to be the reason for doing so. (4) Will there be any movement from stations to terminal markets during the next thirty days?

OHIO.

Sidney, Ohio (2): Corn is being offered to the farmers in this locality at \$1.00 per bushel and oats at 56c per bushel. The movement of corn and oats is very light. Farmers are shipping hogs light on account of scarcity and high price of corn. There is considerable good corn here but farmers will not sell now. But one car has been shipped to terminal markets and it looks like it will be the only one.

Blanchester, Ohio (3): \$1.75 is being offered to the farmers for wheat, \$1.10 for corn and 55c for oats. Farmers are not selling corn and oats. The farmers are inclined to feed the hogs out, if they have enough corn. There will not be any corn moved from this station to terminal markets during the next thirty days.

Upper Sandusky, Ohio (4): No corn for sale. Farmers selling to farmers at \$1.25 per bushel. Oats selling at 58c. Farmers are selling light weight hogs as they say it will not pay to feed them. No corn will be shipped from here. Corn crop here is the poorest in years.

Greenville, Ohio (2): \$1.50 is shipping basis for corn per hundred weight but it is selling from farm sales for this much and more per bushel. 55c

is being offered the farmers by the grain trade for oats. Nothing is selling except between farmers and feeders. Farmers are still inclined to ship their hogs light on account of the prices of hogs and corn. Do not anticipate any movement of corn from this station to terminal markets during the next thirty days.

Bucyrus, Ohio (4): Farmers are being offered \$1.20 per bushel for their corn and 55c for their oats. Farmers are not selling their corn and oats. Hogs are being sold light because of the scarcity of feed. Corn was a very slim crop this year. No corn to move in this territory.

Circleville, Ohio (6): Farmers are receiving from \$1.10 to \$1.15 for corn. No oats in this territory. Farmers holding corn for feeding. Large feeders buying direct from farmers at elevator prices or more and hauling. Elevators will only handle about 15 per cent normal corn crop. The farmers are still shipping hogs light weight on account of being short of corn. Very little, if any corn will be shipped from here within the next month.

INDIANA.

Marion, Indiana (5): We pay \$1.79 for No. 2 wheat, \$1.50 per hundred for ear corn and 55c per bushel for oats. Very little corn to sell. Will not sell many oats. Hogs are going on the market at about 225 to 240 pounds. No corn to move to terminal markets from this vicinity.

Monticello, Indiana (1): The price being paid for No. 5 yellow corn is \$1.10 and the price being paid for No. 3 white oats is 53c. Farmers are selling a little corn. They are shipping light weight hogs. They believe better to sell hogs than to feed them corn. There will be a little corn moved from our stations in the next thirty days.

Winchester, Indiana (8): We have had the coldest weather in the past ten days that we have had in years. Winter wheat went in the ground in good shape, it is short but good stand and well covered with snow. Up to this time everything points to a good acreage. We have in this part of Indiana a 25 per cent increase over last year. 75 per cent of the corn crop has been fed. Poorest crop in 20 years. Feeders say it has poor feeding value. Probably 35 per cent of the oats crop yet on the farms and not 5 per cent of this will come out as farmers are feeding oats as never before. They are buying great amounts of all kinds of mill feed.

Kendallville, Indiana (7): Farmers are being offered \$1.25 per bushel for corn. They are being offered 52 to 55 cents per bushel for oats. No corn and very little oats for sale. Farmers are still shipping hogs light on account of high price of feed. No corn will be moved from this station to terminal markets during the next thirty days.

Frankfort, Indiana (2): Farmers are being offered \$1.78 for wheat, \$1.05 for corn and 53c for oats. Very little grain moving. Hogs going to market light on account of high prices for feed. Will not ship any corn from this station in the near future, if at all.

Rushville, Indiana (8): Farmers are being offered \$1.00 for corn which is very fair quality around here. Farmers are being offered 55c for oats. Farmers are selling corn. Farmers not shipping quite as many hogs light as they were. Some corn will be shipped within the next thirty days.

Lawrenceburg, Indiana (9): Farmers are being offered \$1.20 per bushel for corn and 60c for oats. They are not selling much good corn. Farmers are shipping their hogs light weight on account of high corn. Not much corn will go to market within the next thirty days.

Winamac, Indiana (1): Farmers are being offered \$1.05 for corn and 53c for oats. Not much corn for market.

Western Grain Dealers Mutual Fire Insurance Company

Hubbell Building

Des Moines, Iowa

LIGHTNING PROTECTION

If lightning rod protection could be installed on every grain elevator on which this Company carries insurance, it would not only affect a reduction of ten cents in the rate but also a reduction in fire losses paid by this Company. This would also affect a lower cost of the insurance which would be reflected to the policyholder in an increase in the dividend rates.

Farmers shipping hogs light weight. Very little corn to be shipped within the next thirty days.

Tipton, Indiana (5): There will be no corn shipped out as there has been several loads shipped as well as some oats. Farmers are not selling oats as they will be all needed for feed. Farmers are inclined to ship hogs light on account of high corn and bad feeding quality of the corn crop.

Angola, Indiana (7): Grain buyers are paying for No. 2 red wheat (soft) \$1.70, oats, 53c, rye, \$1.25 and ear corn \$1.40 per hundred pounds. Wheat for shipment is about all in. Very few oats will be sold off the farms and absolutely no corn at all to ship on this crop. Farmers will feed their hogs as long as the corn lasts and then ship light or heavy. Young hogs are rather plentiful. There are the usual number of brood sows to winter.

Bloomington, Indiana (3): \$1.80 is being offered the farmers for No. 2 wheat. 60c is being offered for oats and \$1.05 for corn. Farmers are not selling either corn or oats. They are still shipping light hogs on account of having no feed. No corn to ship out of here at all.

Brook, Indiana (1): We are paying \$1.03 to \$1.12 for corn according to quality. 53c for oats. Very little corn to go out of this community. Think in a general way hogs will be finished, if the corn will hold out.

Wabash (4), Ind.: Farmers are being offered \$1.20 for corn and 55c for oats by the grain trade. Farmers are not selling corn or oats as all are needed for feed on farm. Farmers continue to ship hogs light on account of corn shortage and comparative corn and hog prices. No corn to move to terminals during this year.

Decatur (7), Ind.: We are paying \$1.45 for 100 lbs. for new corn and 55c for oats. No grain is moving. Hogs shipped light weight. No corn to move to terminals.

Jasper (3), Ind.: We are paying \$1.10 for corn and 65c for oats. Corn is not moving very freely. Hogs are being shipped light weight. Price for hogs is not high enough in comparison of grain price. No corn being moved from here to terminals.

ILLINOIS.

Ashton, Illinois (4): The farmers are being offered \$1.14 for No. 4 corn and 54c for oats. Corn is moving moderately and oats the same. A good many hogs going out light due to price of corn relative to hogs. There will be a fair movement of corn the next thirty days.

Freeport, Illinois (4): The farmers are being offered \$1.10 for new No. 4 yellow corn and 53c for No. 3 white

oats. Farmers are selling corn and oats moderately. The hogs are still going to market light weight on account of high price of corn. Very little corn will be moved to terminal markets during the next thirty days.

Lexington, Illinois (5): The grain men are offering \$1.12 per bushel for corn and 55c for oats. Farmers are not selling corn or oats. They are still selling light weight hogs on account of high priced corn. Some corn will be moved next month.

Earlville, Illinois (4): Plenty of corn will move from this station in the next thirty days. \$1.14 is being offered the farmers for No. 4 corn and \$1.08 for No. 5 corn. 53c is offered for No. 3 white oats. The farmers have confidence in hogs and will not ship them cut light weight.

Vermont, Illinois (2): Farmers are being offered \$1.10 and \$1.12 for corn and 54c for oats. The farmers are not selling corn and oats very freely. The hogs are going to market light on account of the high prices for corn. We look for a fair movement of corn to market through January.

Eureka, Illinois (1): The farmers are being offered \$1.09 to \$1.12 for corn. They are being offered 52c for oats. The farmers are shipping some corn and oats. Farmers selling hogs light weight on account of the high price of corn. Some corn will be shipped out within the next month.

Wenona, Illinois (4): Farmers are being offered \$1.12 for No. 4 corn and 53c for No. 3 oats. Farmers are selling corn and oats. They are still inclined to ship hogs light weight. Some corn will be moved from this station to terminals during the next month.

Nashville, Illinois (3): No corn or oats will be shipped from this section. Just about enough for local consumption. No hogs being fed or marketed.

Mt. Pulaski (5), Ill.: Farmers are being offered \$1.08 for corn. Most corn will grade No. 5. They are being offered 52c for oats. Little corn or oats selling at present. Hogs mostly going to market light weight on account of high priced feed. Not a great deal of corn to terminal markets.

Paris (8), Ill.: Market price of corn is \$1.05 and of oats 52c. Farmers are

Grain Merchants

CHICAGO MILWAUKEE
SIOUX CITY

not selling much corn or oats. Wanting a higher price. Where the farmer has corn he is making his hogs heavy and holding for higher prices. Farmers will not move any corn in the next 30 days at present prices.

Decatur (5), Ill.: Farmers are paying \$1.07 for corn and 53c for oats. Farmers are selling some corn and a little oats. The farmers are shipping their hogs light on account of high corn prices and hog sickness. There will be a light movement of corn during the next 30 days.

Riggston (5), Ill.: Farmers are being offered \$1.10 for corn and there are no oats here. Farmers are selling some corn. Most of the hogs are getting good weight. No hogs going out light. Some corn moving now. Wheat fields are now covered with 3 inches ice and sleet.

Highland (6), Ill.: We are paying \$1.90 for wheat, \$1.12 for corn and 55c for oats. Farmers are not selling corn and oats, are feeding it to dairy cows. Hogs are pretty well cleaned up, either shipped or killed. Need the corn for dairy cattle. Corn too high to feed to hogs. There will be very little, if any, corn shipped from here to terminal markets.

Mt. Carroll (4), Ill.: We are paying \$1.00 for corn and 56c for oats. There is little corn to sell. Shipping in corn. Hogs going to market light rather than to buy corn to finish them. No surplus corn or oats.

MISSOURI.

Higginsville, Missouri (2): The farmers are being offered \$1.10 for corn. No oats on farms to sell. Farmers selling hogs on account of high prices of corn. No corn moving on account of severe winter weather.

Lamar, Missouri (3): Farmers are being offered \$1.03 for corn and 45c for oats. Farmers are selling corn and oats. They are shipping hogs light weight on account of high price of corn. Moderate amount of corn to move during the next month. The roads are quite rough.

Bethany, Missouri (1): The farmers are shipping in corn and oats. The hog run is about over. Have shipped out most all of them on account of no feed.

Chillicothe, Missouri (1): The farmers are being offered \$1.20 for corn and 65c for oats but there are none being sold. Hogs being shipped light on account of scarcity of corn on farms and high price for wheat is shipped in. 75 per cent of the farmers will have to buy corn before another crop is raised.

Carrollton, Missouri (2): Corn is selling from \$1.10 to \$1.15 per bushel. There are no oats to sell. Hogs are still running light on account of high priced corn. No corn to go to the terminal markets. Will ship in corn later.

Springfield (3), Mo.: Corn is selling at \$1.10 and oats 60c. Some corn and oats being sold by farmers. Some hogs moving but big movement is over. No corn will move from this part to terminal markets from now on.

Carrollton (2), Mo.: Very few cattle on feed. Hogs going out very light. Will have to ship in corn after January for general purposes. No corn for terminal markets.

IOWA.

Indianola, Iowa (6): Corn is selling in the country at \$1.00 to \$1.20 according to quality. Elevators either have to ship in or pay the high prices. Oats selling at 50 to 60c. Hogs are being sold to avoid buying corn.

Belmond, Iowa (4): Farmers are being offered 50c for oats and \$1.00 to \$1.05 for corn. Not much grain is moving. The farmers are still shipping the hogs light weight on account of the high prices of corn. A small amount of corn will be shipped in within the next thirty days.

Randolph, Iowa (3): The farmers are being offered \$1.10 to \$1.12 for corn. No oats to sell. The farmers are not selling very freely but are moving a little corn to feeders in Southern part of Iowa. The farmers

are shipping hogs light on account of the price of corn. Don't think the terminal markets will get any corn as long as the feeders' demand lasts.

Wall Lake, Iowa (2): The farmers are selling no corn but are shipping in. They are selling some oats. Farmers not shipping hogs as light as they did some time ago. No corn to terminal markets during next thirty days.

Tama, Iowa (5): We are paying \$1.10 for basis No. 4 corn. We are paying 52c for No. 3 white oats. Farmers selling very little corn and oats for the reason that they do not have but little. Farmers are not selling light hogs as freely as they did.

Jefferson, Iowa (5): Farmers are being offered \$1.15 for corn and 52c for oats. Some little oats and corn selling, not usual amount. Hogs are being shipped 30 to 50 lbs. light. We will have movement of corn to terminal during next 30 days.

Guthrie Center, Iowa (2): We are paying the farmers \$1.05 to \$1.08 for corn and 50c for oats. There is very little grain moving here. I hear of 50 cars ordered for stock shipments. Looks like this will clean out our surplus stock, big and little. This can only mean one thing, out of corn. We may be able to ship one or two cars of corn within the next 30 days.

Arthur, Iowa (2): We are paying the farmers \$1.12 for corn and 53c for oats. No corn or oats being sold. Still shipping hogs light on account of short crop of corn and the high price and poor feeding value. No corn to terminals in the next 30 days.

MINNESOTA.

Albert Lea, Minn. (6): We are paying 50 to 51c for oats and 80c to \$1.00 for corn. Receipts have been light on account of the extreme cold weather and icy roads. There is very little corn sold. Oats would move, if it warmed up at present prices. Hogs are still coming light on account of poor quality of corn. There will be a light movement of corn during the next 30 days. Not safe to handle after cold weather, quality too poor.

Eden Prairie, Minn. (6): Oats and corn are all feed to stock in this section. Hogs are killed and sold to Minneapolis & St. Paul.

Hutchinson, Minn. (6): Farmers are being offered 75c for their corn and 50c for oats. No corn has been sold to the trade but a few oats have been sold. Hogs are shipped half light and half heavy on account of corn being nearly gone and not much good and too high priced. No corn will be shipped from here.

Donnelly, Minn. (2): Elevators are paying 48c for No. 3 white oats. Elevators are paying from 75 to 90c for No. 5 corn. Farmers are selling a good many oats and some corn. Farmers are shipping hogs quite freely. There will be a few cars of corn shipped during the next 30 days.

Minneota (3), Minn.: Corn ranging about \$1.00 and oats 50c. Fair movement of corn and oats on. Hogs are now in strong hands and will be fed.

NORTH DAKOTA.

St. Thomas, N. D. (7): Farmers are being offered around 50c per bushel for oats. No corn. Farmers are selling surplus oats. Farmers are shipping hogs light. Can't afford to feed at present prices. No corn to move to terminals from here within the next month.

Ashley, N. D. (6): There is no corn or oats to be marketed in this part of the country at all.

Carrington, N. D. (5): Oats here today are 47c. No corn is offered. The list on corn here is 96c. Oats are being sold but no corn for sale. About half of the hogs are going out light because of the high price of feed and the scarcity of corn. No corn to be shipped from here.

Fargo, N. D. (8): Farmers are being offered \$1.00 for corn and 48c to 50c for oats. The farmers are selling corn and oats. Hogs still being shipped light on account of high priced corn. Very little corn will be shipped to terminals during the next month.

"Good!"

Cavalier, N. D. (7): No corn here. Farmers being offered 48c for their oats. Farmers are selling some oats. They are still shipping light hogs on account of the high prices of feed. No corn shipped from this station.

Lakota, N. D. (7): Oats are 48c at the elevators. None offered for sale. Corn is all fed on the farms. Farmers not inclined to ship light weight hogs.

SOUTH DAKOTA.

Brookings, S. D. (8): Farmers receiving about 48c for oats and 80 to 90c for corn but account of severe cold very little grain marketed. Hogs going out light on account lack of feed and high feeding costs. Very little corn to ship out.

Miller, S. D. (5): No. 5 yellow shelled corn is worth 91c per bushel. No. 3 white oats 45c. Farmers are selling corn and oats. Hogs are still being shipped light but a change to heavier feeding is taking place. There will be a little corn moved to terminal markets within the next 30 days but most of it will be fed near by. Corn will be very scarce here before it grows again.

Canton, S. D. (9): No corn for sale. Many of the farmers are buying corn for own use.

Bridgewater, S. D. (8): Farmers are being offered \$1.00 for No. 4 corn and 50c for oats. Farmers shipping hogs light. We will not market over 25 per cent of the corn we did last year. Farmers are buying corn wherever available to carry light hogs through.

Flandreau, S. D. (8): Farmers are being offered 95c for new corn and \$1.15 to \$1.20 for old corn, and 50c for oats. Cold weather, bad roads, prices advancing and farmers selling little. Farmers continue selling light hogs due to poor feeding value of corn with commercial value of new corn more attractive. Expect some movement of new corn next 30 days but impossible to anticipate what extent, but due to poor quality movement of wheat there is to come forward will largely obtain in Jan. and Feb.

NEBRASKA.

Humphrey, Nebraska (8): \$1.08 to \$1.10 being offered the farmers for corn and 53c for oats. Very little corn or oats moving. It is very cold and the ground is covered with snow.

Oakland, Nebraska (7): Farmers are being offered \$1.14 for corn by elevators but not selling. The farmers are shipping hogs light to save the corn.

Neligh, Nebraska (7): Farmers are being offered \$1.04 to \$1.10 for corn and 50 cents for oats. No oats moving and very little corn. Farmers are continuing to sell hogs light because of high price of corn. No movement to speak of during the next 30 days.

Belden, Nebraska (7): Farmers are being offered \$1.10 for corn and 52c for oats. Farmers still holding hogs. Look for a little corn to move in the next 30 days. Farmers are inclined to hold corn.

Winnetoon, Nebraska (7): Farmers are being offered \$1.15 for corn and 50c for oats. They are not selling corn and oats. There will be no corn to go to market from here.

Humboldt, Nebraska (9): Farmers are being offered \$1.15 for corn at sales and 60c for oats. They are not selling corn and oats. Farmers continue to ship hogs light weight on account of high corn. There will be no shipment of corn in the next 30 days.

Superior, Nebraska (9): Farmers are being offered \$1.05 for corn and 60c for oats. The farmers are selling some corn. Holding hogs better since the advance in prices. Believe there would be a good movement of corn, if road conditions were not so bad.

Nebraska City, Nebraska (9): Corn is being sold for \$1.12 and \$1.14. Oats 51c. No light hogs being sold now. Not much corn moving now. Most corn sold lately has been resold to feeders in this territory.

Superior, Nebraska (9): Farmers are being offered \$1.05 for corn and 60c for oats. They are not selling. Farmers not inclined to market corn now

[Please turn to page 4.]

Terminal Markets

OMAHA.

Leigh Leslie, Correspondent.

The Omaha market received around eleven and a half million bushels more of wheat in 1924 than in 1923, while receipts of all grains in 1924 were more than eight million bushels in excess of those in 1923.

E. S. Westbrook, of the Bartlett-Frazier Co. of Chicago, was in Omaha several days last week. Mr. Westbrook was president of the Trans-Mississippi Grain Co. of Omaha when he went to Chicago several years ago to become the official head of the Bartlett-Frazier Co.

The Missouri Valley Elevator Co., which operates a terminal elevator at Missouri Valley, Iowa, is doing a general receiving and shipping business in this market. The company is making a specialty of consignments. R. N. Reasoner is president and the active head of the company.

A gain of 29.4 per cent in the value of Nebraska's crops over last year, a total value nearly two and one-fourth times that of the low point in 1921, and a value that has been exceeded twice only, is announced by A. E. Anderson, statistician for the Bureau of Crop and Livestock Estimates, in a report just issued.

Mrs. John R. Manchester, mother of Frank P. Manchester, secretary of the Omaha Grain Exchange, died at the Clarkson Memorial hospital in Omaha Thursday, Jan. 1. Mrs. Manchester was 79 years old. She had resided in Omaha since 1859. She is survived by her husband and two sons and a daughter.

OKLAHOMA CITY, OKLA.

W. E. Kerr, Correspondent.

D. K. Sterrett, who is employed in Fort Worth by the Fort Worth Elevators Co., spent the holidays with his family in Oklahoma City.

E. R. Lehman, manager of the Geary Milling Co. at Geary, was in Oklahoma City recently with a party of other Geary business men.

The Tulsa Feed Co. of Tulsa, capital stock \$75,000, was incorporated recently by Sherman Durret, R. A. Hayden and A. H. McDonald, all of Tulsa.

W. W. Jarnagin, wholesale feed dealer of Grove, Okla., who recently bought the Ross elevator and feed mill there, is to start erection early in January of a flour mill.

Sam Marquis of California, former Enid grain dealer, and his wife left for Kansas after spending the holidays with relatives in Oklahoma City and will return home in January.

A charter was granted recently to the Dudley Milling Co., Douthat, Okla., capital \$20,000, incorporators L. W. Goings, Douthat, and C. W. Theurer and D. L. Wheat of Joplin, Mo.

Garland White of the White Grain Co. and Frank Hardin of Oklahoma City and E. M. Lloyd of Taloga, Okla., are incorporators of the recently organized Farmers' Grain & Elevator Co., of Turpin, Okla., capital stock \$10,000.

Carl H. Robinson, federal crop statistician, estimates that in Oklahoma this fall 3,659,000 acres have been planted to wheat, an increase of nearly 200,000 acres over last fall. Largest increase, he says, is in northwestern counties. The growing condition on Dec. 1 was 86 per cent of normal. The acreage of rye is estimated at 32,000, a decrease of 4,000 acres from last fall.

M. I. Jordan, Federal grain inspector, inspected about 5,000 cars of grain, most of them wheat, between July 1 and Jan. 1. He estimates that 15,000 cars were inspected in the state during that period. Enid probably leading because of wheat growers' pooled wheat having been shipped from there to Texas for storage, Mr. Jordan says the half year was an exception, both as to quality and quantity of wheat. The average grade was No. 2. December receipts of corn showed a No. 2 average for that grain. Grain sorghum inspections were light. Much of the Oklahoma crop is being shipped to the Pacific coast.

Grain dealers estimate that 10 to 20 per cent of the 1924 wheat crop remained

within the state on Jan. 1. The larger part of this was in the hands of growers, they said, many of whom will hold for spring sale. Only a few of the larger independent elevators contain wheat. It is estimated that requirements of Oklahoma mills to June will be 11,000,000 bus. In view of a large part of the requirements of Texas mills being filled in Oklahoma, dealers say that millers of the two states will have to go to terminal markets for wheat early in the spring. Texas mills have light wheat stocks on hand and Oklahoma mills but slightly larger.

The value of Oklahoma's 1924 wheat crop is placed by the State Board of Agriculture at \$59,332,000. The production was estimated late in December at 53,938,000 bus., or 17,638,000 bus. more than the 1923 crop. The state produced 31,931,000 bus. of corn with a value of \$62,520,000, or \$29,864,000 more than the value of the crop of 1923. In grain sorghums 1,340,000 acres produced 29,614,000 bus. with a value of \$22,803,000. In oats 1,168,000 acres produced 30,368,000 bus., valued at \$15,184,000; barley 139,000 acres, 3,406,000 bus., value \$2,384,000; rye 36,408 acres, 491,508 bus., value \$437,442. The value of 2,017,400 tons of tame hay was \$28,244,000 and of 505,000 tons of wild hay \$4,924,000. The total value of all crops, including \$174,880,000 of cotton, was \$427,234,000.

To Ask Freight Reductions.

Flour millers of Southwestern States and Nebraska and Missouri are to present an organized protest to trunk line railroads that have been petitioned by millers and grain dealers of Northwestern States to make freight rate reductions to points on the Atlantic seaboard. A conference of millers is to be held in Kansas City Jan. 3, under call of Secretary Topping of the Southwestern Millers' League for a discussion of the subject. Later in the week representatives of the league will hold a conference with railroad officials in Chicago.

It is contended that if reductions asked for are granted unfair discrimination against southwestern mills would be the result.

The Oklahoma Millers' League will be represented in the Kansas City conference by President J. Lloyd Ford of Shawnee, Secretary Frank Foltz of Oklahoma City and George Sohlberg, president of the Acme Milling Co. of Oklahoma City.

WINNIPEG.

Geo. M. Meacham, Correspondent.

The first market day of the new year witnessed a slight setback in wheat prices towards the close after a strong opening and sharp advance. There was a very strong market on New Year's eve on reports of heavy flour sales for export and active buying by both millers and exporter. Sentiment leans strongly to the bull side and the only bear argument is that the market is overbought and occasional setbacks from liquidation inevitable.

Statistics appear to be more bullish the more closely examined and there is a very general opinion that after making due provision for bread and seed the Canadian west has comparatively little wheat for export. There are rumors of government stepping in and safeguarding both the producer and consumer with regard to seeding and milling supplies.

There will doubtless be every effort made to increase the wheat acreage in the Canadian west for next season's crop, but those in a position to know cannot see how any increase is possible. The acreage of fall plowing in all three prairie provinces is small and this, of course, greatly adds to the amount of work to be done on the land in the spring. An early spring would be very favorable and a late spring much the reverse.

The Dominion Bureau of Statistics has recently issued a mass of figures on the comparative values of the field crops of Canada for the last three years. The crop of 1924 is valued at \$948,663,400 as compared with \$899,166,200 in 1923 and \$962,293,200 in 1922. The main feature of the report is the estimated increase in values over last year of \$49,497,200. It is more than likely that when final returns on the 1924 crop are available that the increase in value will be found to be larger.

Receipts throughout the week have been small partly due to the holiday season and extremely cold weather that has prevailed. But the fact must not be lost sight of that the stocks in the interior elevator are being rapidly cleaned out and many houses are already shut down for the season.

The coarse grains have followed wheat and there has been considerable liquidation in them that has been well absorbed. Flax sales in the middle of the week were heavy and this grain has ap-

parently gone into strong hands. Holders seem confident of their position. Generally all lines have started the new year pretty well evened up and the professions consider the situation as "healthy."

BALTIMORE.

Robert C. Neu, Correspondent.

The committee on hay and straw quotations of the Baltimore Chamber of Commerce for the month of January will consist of Messrs. George E. Morrison, Richard H. Diggs and H. D. Eidman.

President A. W. Mears of the Baltimore Chamber of Commerce, who is also president of the National Federated Flour Clubs, has been invited to attend the annual dinner of the St. Louis Flour Club on Jan. 15.

Among the out-of-town visitors on the floor of the Baltimore Chamber of Commerce last week were H. L. Bodman, of Milmine, Bodman & Co., New York; H. D. Carter, of New York City, and J. M. Bond, of Chicago, Ill.

Total stocks of grain in the several Baltimore elevators at the close of 1924 amounted to 9,761,000 bushels, of which 5,437,600 bushels were rye. This is the greatest quantity of grain ever stored at one time in Baltimore.

W. P. Tanner-Gross & Co., New York flour merchants, are negotiating with the Port Development Commission of this city for the lease of a waterfront warehouse, to be erected by the municipality and to be constructed especially for the handling of flour for export.

As illustrative of the recent heavy movement of rye to Baltimore in the last few weeks, it might be stated that the receipts of this grain for the month of December alone were greater than the entire eleven months' receipts, January 1 to November 30, 1924, inclusive.

The closing day of the old year on 'Change here was comparatively tame in contrast with some of the jollifications held on New Year's eve in former years. Everybody in the grain trade seemed anxious to forget 1924 and look with renewed hope to the coming of 1925. A few cowbells and the explosion of several blank cartridges enlivened the close of the session.

An all-day entertainment of steamship agents, brokers and shippers was conducted on Dec. 30 by the freight departments of the Baltimore & Ohio R. R. at Pier 7, Locust Point, this city. Entertainment and refreshments were provided by the railroad company. During the intermission the guests inspected the recently completed new export elevator of the Baltimore & Ohio, one of the most modern and efficient in the country.

The names of the following gentlemen have been posted on the official bulletin board of the Baltimore Chamber of Commerce as the nominees for a three-year term as directors of the chamber, beginning the latter part of January: John J. Snyder, Edward Netre, Wm. T. Schackelford, Gustav Herzer, Jr., C. Wilmer Watkins. The board of directors is composed of fifteen members, five of whom retire annually, leaving ten holdover directors. Those whose terms in the board will expire on Jan. 6, the date of the annual election for new directors, are: Vice-President of the Chamber, Charles P. Blackburn, Walter F. Macneal, J. Ross Myers and J. A. Manger.

MILWAUKEE.

D. K. Steenberg, Correspondent.

The Milwaukee Chamber of Commerce was closed all day on Thursday, Jan. 1, New Year's day.

The January rate of interest has been determined by the finance committee of the Milwaukee Chamber of Commerce at 6 per cent.

Joseph Wagner, who has sold his feed and grain business at Beaver Dam, Wis., to Fred Meyer, was a Milwaukee visitor during the holiday period.

C. E. Higbie of Rio, Wis., traveling representative with Deutsch & Sickert, this city, was a visitor at the Chamber of Commerce on Tuesday of last week.

J. E. Zaske, who travels in Wisconsin for the Ladisch-Stoppenbach Co., passed part of the holiday period in Milwaukee. Mr. Zaske's home is at Green Bay, Wis.

Car receipts at Milwaukee for the year 1924 totaled 33,670 cars, as follows: Wheat, 6,171 cars; corn, 9,164 cars; oats, 8,825 cars; barley, 7,165 cars; rye, 1,999 cars; flax, 346 cars.

Receipts of cash grain at Milwaukee during the past week were 135 cars barley, 104 corn, 153 oats, 20 wheat, 36 rye, 6 flax, 3 miscellaneous; total, 457 cars, against 439 the week before, 290 a year ago and 754 in 1923.

Shipments of cash grain from Milwaukee during the week ending Jan. 3 were 106,575 bus. oats, 31,625 corn, 57,840 barley, 20,250 wheat, 22,650 rye; total, 238,940 bus., against 284,426 the preceding week and 643,145 a year ago.

Milwaukee milling output for the past week consisted of 5,500 barrels of wheat flour, as compared with 5,000 barrels the previous week and 3,500 last year. Receipts were 11,200 barrels, as compared with 23,450 last year, and shipments were 7,370 barrels, as compared with 7,980 last year.

W. A. Zahn has resigned as secretary and severed all connections with the Chas. A. Krause Milling Co. of this city. Mr. Zahn had been identified with the firm for many years and is very popular among the trade. He is not expected to retire from business, but as yet has made no announcement of his plans.

Slight reaction from the upward course of values occurred the past week in the Milwaukee market. Rye is 5@6c lower for the period, oats 3@3½c, corn 3@4c, while wheat is unchanged to 2c lower. Premiums for spring varieties are better. Barley is 1@2c higher. The movement was moderate and the demand good.

Arthur Teweles of the firm of Teweles & Brandies at Sturgeon Bay, Wis., who is well known to the feed and grain trade of this territory, was the first registered guest of 1925 at the Milwaukee Chamber of Commerce. Edward Pick, of Pick Bros., West Bend, Wis., was second, and David Rosenheimer of Kewaskum, Wis., third.

State callers at the Milwaukee Chamber of Commerce during the past week included: H. C. La Febre of Green Bay, M. Chudicoff of Marinette, A. E. Anderson of Algoma, Theodore Edwards of McFarland, A. W. Ruck of Cedarburg, L. H. Sloan and J. Utter, representatives of the Springfield Milling Co. at Madison, and Joseph Free of Columbus.

Richard Mohr of Minneapolis, Minn.; Peter Yudin of Manistee, Mich., A. J. Hinston of Sheldon, Ia., W. A. Powers of Bozeman, Mont., D. Denaher of Chicago, H. W. Hensley of Birmingham, Ala., and C. Morris of the Washburn-Crosby feed department, Minneapolis, Minn., were among visitors at the Chamber of Commerce during the past week.

Locked in a blazing barn while attempting to rescue a horse, S. Makowski, proprietor of a feed store at 809 Lincoln avenue, Milwaukee, escaped death on Jan. 2 by fighting his way through burning hay and jumping from the hay loft window to the ground beneath. The fire damaged the barn, the store, the family residence above the store, a warehouse adjoining the store, and killed the horse, causing a loss estimated at \$25,000.

Members of the Milwaukee Chamber of Commerce held their annual New Year frolic on the afternoon of the last day of 1924. All business of the organization was halted shortly before noon, after which variations in market quotations were treated with complete disdain. A negro orchestra demanded all the attention usually given the tickers and board and jazz tunes filled the hall from noon until mid-afternoon. Matt Kleiser was in charge of the arrangements.

Many incidents of the past were recalled to members of the Milwaukee Chamber of Commerce recently by the visit of G. Altenhofen of Los Angeles, Cal. Mr. Altenhofen formerly conducted a progressive and successful grain and feed business at Random Lake, Wis., and is very popular among the trade. He retired several years ago and moved to California, but was visiting in Wisconsin during the holiday period and called on friends at the Chamber on Wednesday of last week.

William Degentesh, vice-president of the Degentesh Bros. Co., coal and feed dealers at Twenty-eighth and Forest Home avenue, this city, was found dead in his garage shortly after his return from the office on Jan. 2. Emergency hospital physicians attributed death to natural causes. Mr. Degentesh was born in Milwaukee in 1884 and has been associated with the Degentesh Company for more than twenty years. He is survived by his widow, five children, his mother, three brothers and two sisters.

The La Budde Feed & Grain Co. of Milwaukee has opened a new branch office at Spencer, Ia. The office did its first business on Jan. 2 and is under the management of Claude B. Martin, who has been engaged in the grain business at Spencer for many years and is well known to the trade. The activities of the office will be restricted to buying grain and soliciting the same on consignment. Announcement of the acquisition of the new branch office was made by Carl Holton, manager of the grain division of the La Budde firm.

LOS ANGELES, CALIF.

C. G. White, Correspondent.

Charles G. Glenn, formerly of the West Coast Grain Co., has accepted a position with the Sperry Flour Co.

J. C. Hodge, president of the Atlas Milling Co., returned the first of last week from a business trip through northern California.

At the annual meeting of the Grain & Hay Traffic Association of Los Angeles, held Dec. 18, the following officers were elected for the ensuing year: D. J. Dunne,

president; J. J. Fisher, vice-president; D. Davis, treasurer, and C. G. White, secretary.

Jack Noyes, a prominent grain man of Portland, Ore., was a guest of the Atlas Milling Co. on the floor of the Exchange one day last week.

The Atlas Milling Co. suffered a very disastrous fire Dec. 31 in their office, causing a loss of all their minor records and papers, but fortunately the books in the safe were not disturbed. The origin of the fire was electric wires. The loss was well covered by insurance.

The California State Fair will last five months every year, if a movement fostered by the State Fair Exhibitors' Association is approved by the state government. The association urges that the exposition opens in Sacramento in April each year and continue until September.

The Los Angeles Grain Exchange held a delightful Christmas luncheon in the rooms of the exchange on Dec. 24, which was followed by a musical program by the members under the direction of J. C. Hodge of the Atlas Milling Co. The rooms were beautifully decorated for the occasion by the entertainment committee. About 90 members were present and a most wonderful time was had by all.

Employees of the Nicholls Grain & Milling Co. were presented with Christmas bonuses, amounting to \$5 for every year of service of each employee. Inasmuch as many Nicholls employees have been with the company for quite a number of years, these gifts were of a very substantial nature in many instances. The occasion for this celebration, which took place Dec. 23, was a regular monthly meeting of the Nicholls Orange Brand Club in the main offices of the company on Santa Fe avenue, and the presentation from the Christmas tree was preceded by a mammoth party. A giant pine tree had been brought from Mr. Nicholls' place in the high Sierras and erected as the center of attraction, from which depended more than 100 cash presents for the members of the Orange Brand Club. Music, games and a talk by Dr. J. Whitcomb Brougher, as well as delightful refreshments, added to the pleasure of the occasion. Many stockholders were also present and joined in the festivities.

Cash Markets.

The market conditions at this terminal have remained very good. The demand for all kinds of stock foods has been increasing, creating a market for all arrivals during the week and leaving empty railroad tracks. The grain market has been particularly active and there has been a great movement of grain sorghums and Indian corn. No. 3 yellow corn is easy quotable at \$2.60 to \$2.65, with No. 2 at 5c higher. Kafir corn is being offered at \$2.35 for January shipments, and \$2.35 is being offered for local milo maize and \$2.25 for eastern. No. 2 western red wheat, re-cleaned, is bringing from \$3 to \$3.05 per hundred and Utah-Idaho mill run is quotable at \$41 per ton. There is but little trading in barley at the present time, owing to the fact that heavy deliveries for December sales made some months prior are being made. Ground feeds are very active, yet the prices are practically unchanged since one week ago. Kansas bran is quotable at \$37 per ton and alfalfa products remain firm. Medium ground meal is bringing \$33 and molasses alfalfa mixed \$31 per ton. Cottonseed meal is moving a little better at a price of \$42 per ton. Rolled barley is still selling at \$50.

The hay situation has changed somewhat as the demand for alfalfa has been increasing and with the light receipts for the week has boosted the price up \$1 per ton and No. 1 alfalfa is now selling at \$26, No. 2 at \$24. The grain hay market is very weak, with light demand and shows a decline of \$1 per ton. No. 1 barley hay is selling at \$28 and No. 1 oat at \$31. The prospect for the hay crop for the coming season is very good so far and with a few weeks of continued warm weather there will be considerable pasturage.

MEMPHIS.

George Williamson, Correspondent.

E. G. Berry was registered as a visitor at the Merchants' Exchange Friday.

Receipts for the week were 100 cars of corn, 47 cars of oats and 21 of alfalfa meal. Nobody is disposed to buy ahead of requirements as they see them.

E. E. Buxton, well known grain broker, appeared on 'change early in the week with a broken right arm. He tried to crank a car Christmas Day. He is local champion trap shot, but is on the retired list for a time.

Business has shown very little improvement since the new year opened, but signs are still favorable and it is expected that as soon as inventories are completed there will be better buying. It will be some time before business will expand with those who "furnish" planters as farming operations will not get under way until then. Transactions have been light, and cash prices have not been any too strong, although white corn is nearer to yellow than in some time. Track quotations are \$1.27 for 3 white, \$1.25 for 3 mixed and \$1.29 for 3 yellow. Oats have been rather slow and slightly easier, track 3 white quotable Saturday at 64½c to 65c, with asked prices higher.

The annual election of the Merchants' Exchange is to be Saturday, Jan. 10, and the campaigning is already under way. Following the primary method of choosing candidates, the following are to be voted for: President, Sim F. Clark and L. F.

49 Board of Trade

CHICAGO

Cook; vice-presidents, Thomas B. Jones and J. J. Wade, Sr.; directors, W. R. Smith, Vaniz, S. E. Rison, S. T. Pease, C. S. Kenney, E. W. Sommer, W. P. Browne, V. L. Rogers, Walter M. Browne, E. E. Anderson, John M. Trenholm, L. B. Lovitt, W. P. Battle, J. T. Russell, W. A. Hall, John B. Edgar and T. B. Andrews. Eight directors are to be chosen. Balloting will be between 10 and 2 o'clock, and the usual lunch and entertainment will be had.

Official announcement has been made that the four sweet feed companies, including one in Meridian, Miss., controlled by local people, had formed an association for the purpose of greater and increased economic facilities for purchasing, manufacturing and distributing their products. This the merger rumored for several weeks as under way and includes Edgar-Morgan Co., Pease & Dwyer Co., Royal Feed & Milling Co., Memphis; Royal Feed & Milling Co., Meridian, Miss.; and Superior Feed Co. The announcement states that each will retain its corporate identity, and there will be no change in management except for such improvements as the new organization may be able to produce. Further details of the merger are promised within the next few weeks by those engineering it.

KANSAS CITY.

T. J. Tanner, Correspondent.

Among the week's visitors at the Board of Trade were Galen Jones, Gleichan, Alta; L. O. Street, Woodward, Okl.; E. H. Barrett, Flagler, Colo.; H. L. Cowgill, Carthage, Mo.; Leo Chapman, Great Bend, Kan.; F. A. Woodward, Fort Scott, Kan., and C. W. Helston, McPherson, Kan.

W. O. Atkeson, head of the Missouri Grain Inspection Department, has been asked by Governor Hyde to resign before Sam Baker takes the office of governor. Mr. Atkeson is standing pat on the ground that his commission does not expire until April 15, 1927. Mr. Atkeson is a Republican. His management of the bureau has been satisfactory.

James H. Anderson, editor of the Kansas City Labor News, secured a little publicity this week by demanding an investigation by the Department of Justice and the De-

HARRY C. GAMAGE,
President-elect,
Kansas City Board of Trade.

partment of Agriculture of a charge that manipulators in Chicago, notably Arthur Cutten and James A. Patten, are violating the Capper-Tincher anti-grain gambling act. Anderson was advised by Howard M. Gore, secretary of the Department of Agriculture, to place all information as to "corners" in the hands of J. W. T. Duvel, Chicago, supervisor of grain exchanges.

Gamage's Election Made Easy.

Withdrawal of H. J. Diefenbaugh from the race assured the election of Harry C. Gamage as president of the Kansas City Board of Trade January 6. There were no other nominees. Mr. Gamage served the exchange in 1924 as first vice-president. In 1923 he was second vice-president and prior to that he was a director for two years. He has been a member of the Board of Trade since 1917. He is treasurer of the Moore-Seaver Grain Co., having begun his connection with that firm in 1906 after brief service in the offices of the Vander-slice-Lynds Co. and the Rosenbaum interests.

Mr. Gamage was born in Fort Madison, Ia., 38 years ago. He is married. The family includes two daughters, 10 and 12 years old, living at 3911 Tracy avenue. .

Mr. Gamage has various club connections. He is vice-president of the Kansas City Grain Club and has memberships in the Kansas City Club, the Hillcrest Country Club, the Automobile Club and the Chamber of Commerce. He is a Shriner.

Grain Business in 1924.

Total receipts of grain in Kansas City during 1924 were 127,271,150 bus., the largest since 1921. The volume exceeded that of 1923 by 23,245,250 bus. Wheat receipts were 90,822,650 bus., as compared with 68,733,900 for the preceding year; corn, 23,112,500 bus., against 17,575,000; oats, 7,692,500 bus., against 13,984,200; rye, 323,400 bus., against 337,700; barley, 682,500 bus., against 1,623,000; kafir and milo, 4,637,600 bus., against 1,772,100. In all cereals except kafirs the top prices for the year were recorded in the final month. The great increase in the volume of grain handled was largely a result of the extraordinary marketing of wheat after harvest to secure the advancing prices. Total shipments of grain for the year were 82,282,050 bus., against 52,973,650 in 1923. The Kansas City flour output, based on weekly reports of mills, was 5,549,000 bbls., or 662,000 more than was officially shown in 1923. This may prove to be too high. More than 656,000 bbls. of country flour were handled in Kansas City, as well as 57,480 tons of millfeeds. The shipments of flour were 6,062,225 bbls., while those of millfeeds were 271,280 tons.

Into the New Home.

After an occupancy of 28 years, the Kansas City Board of Trade vacated the old Board of Trade building, at Eighth and Wyandotte streets December 31. The first business day of the new year, January 2, found the exchange in its magnificent new 14-story building, on the southeast corner of Tenth and Wyandotte streets. The final two hours of the last market session before the removal were given over to a "fandango," in which the younger members of the exchange and their clerks and stenographers engaged in dancing to the music of a negro jazz orchestra. Everybody wore gaudy headgear and carried a rattle or a horn. The air was full of confetti and paper ribbons. It was a big jamboree, during which both cash and speculative trading practically was impossible.

The resumption of business in the new building on Friday, was informal, but it proved to be a most impressive affair. The local bankers and other friends of the grain men sent many bouquets of flowers and hundreds of men and women visitors crowded the trading hall. Over the radio President Allen Logan broadcasted a new year greeting to the territory surrounding Kansas City, and there were many telegraphic responses. The first telegram from the new building was sent by E. D. Bigelow, assistant to the president, addressed to John Fennelly, chairman of the committee that negotiated the building contract. Mr. Fennelly is in Baltimore, where he has been sick for some time. B. C. Christopher and B. F. Hargis made the first trade in corn futures and a similar honor in wheat futures went to Alex. McKenzie and Howard Vanderslice. The initial cash grain transaction was between Henry Lichtig and E. M. Jolley, based on a car of No. 2 white Kafir. R. H. Sturtevant sold the first car of wheat to Fred W. Lake.

Cash Grain Markets.

Wheat—Receipts for the week, 357 cars, against 428 a week ago and 263 a year ago. Declines and advances followed one another in quick succession, as in the case of futures, making a very irregular market for both hard and soft winter wheat. There was very good buying of the milling grades of hard and dark, while ordinary and low grades were slow. At the close prices were generally 2@3c lower than on the previous Saturday, with No. 1 on a range of \$1.70@1.90, No. 2 at \$1.70@1.89, No. 3 at \$1.69@1.88 and No. 4 at \$1.68@1.87. Soft wheat was in small supply, as usual. It was well taken, mostly by mills. The upper grades were shaded about 1c, but some sales of No. 3 were up 1@2c. Final quotations were: No. 1, \$1.87@1.92; No. 2, \$1.85@1.91; No. 3, \$1.83@1.89; No. 4, \$1.81@1.87. Shipments and mill withdrawals from elevators reduced the total stocks 605,000 bus., to 14,898,000, as compared with 13,118,000 last year. Though export sales were rumored at the Gulf ports, Kansas City houses did not confirm any business of that kind. In fact, the foreign situation was characterized as very dull. Additional snow gave assurance as to the welfare of the growing crop in most parts of the Southwest. There were a few complaints from Oklahoma as to exposed fields.

Corn—Receipts, 438 cars, against 711 a week ago and 313 a year ago. Prices had an uneven course, as in the wheat market. The best buying was on declines, including feeding orders as well as absorption by elevator men. The hedging basis was 6½c under May for No. 2 mixed, as a rule. Corn closed ½c to 2c lower than a week ago, as follows: No. 2 white, \$1.20@1.20½; No. 3, \$1.19@1.20; No. 2 mixed, \$1.16½@1.17; No. 3, \$1.15½@1.16; No. 2 yellow, \$1.20½@1.21; No. 3, \$1.19½@1.20. was an increase of 589,000 bus. in local stocks, to 3,816,000, against 963,000 last year. Weather permitting, there may be liberal receipts from Kansas and Nebraska for several weeks to come. Elevator men are hoping for an expanding demand in Texas and the South during the next few weeks. There is nothing definite regard-

ing the export outlook. Iowa, instead of shipping to Kansas City, buys cars here occasionally.

Oats—Receipts, 66 cars, against 75 a week ago and 77 a year ago. Consignments were less than purchases to arrive. Therefore, offerings were light. Demand was limited to a few local feeding orders and the market was slow and weak. At the close white oats were 2c lower and red oats were off 1@1½c, as follows: No. 2 white, 60c; No. 3, 59½c; No. 1 red, 60½c; No. 2, 60c. Southern demand was less active than a week ago, but holders are counting on big sales southward as spring approaches. The slight premium of red oats over white is attributed to seed requirements. Total stocks increased 86,000 bus. during the week, to 2,249,000, against 1,583,000 a year ago.

Kafir and Milo—Receipts, 91 cars, against

197 a week ago and 45 a year ago. Shipping demand was about equal to the arrivals. Prices changed slightly. Kafir closed unchanged to 1c lower and milo was off 1@2c per cwt., as follows: No. 2 white Kafir, \$1.83; No. 3, \$1.81@1.82; No. 4, \$1.79@1.81; No. 2 milo, \$1.93@1.94; No. 3, \$1.92@1.93; No. 4, \$1.90@1.91. Stocks in the elevators were unchanged, standing Saturday at 209,000 bus., against 67,000 last year.

DULUTH.

S. J. Schulte, Correspondent.

Wendell Moore, representative of the Moore Grain Co. at New York, is spending a vacation at his home in Duluth. He asserted that exporters at the seaboard are looking forward to a continuance of foreign demand until the present stocks of wheat and other grains held in the east have been disposed of.

Members of the Duluth Clearing House Association will hold their annual meeting on Tuesday, Jan. 6 for the election of two directors to serve for a term of three years. The terms of two directors, W. J. McCabe and M. L. Jenks will expire. George F. Foster is the manager of the clearing house association.

Stocks of all grains in Duluth and Superior elevators as on Jan. 1 aggregated 24,772,000 bushels, including 9,033,000 bushels of wheat. At the present rate of movement from the country, it is estimated that elevator space would be available about early in March. In case of emergency boats are available in the harbor to take on storage cargoes, so that operators here are sanguine of being able to take care of the movement up till around the opening of navigation.

Frank C. Tenney, manager of the Tenney Co.'s grain business on the Duluth market, has left for Boston to assume the presidency and management of the Clifton Manufacturing Co., a rubber manufacturing enterprise conducted by his father up till the time of his death several months ago. Mr. Tenney's present plans are to remain in Boston for the next six or eight months, and then he will be governed by circumstances. His position with the Tenney Co. at Duluth is being filled temporarily by Fred C. Thomas, its secretary.

Members of the Duluth Board of Trade will hold their annual nomination meeting on Saturday, Jan. 10, when candidates for president, vice-president, three directors, three members of the board of arbitration and three members of the board of appeals will be nominated. The following are those whose terms of office expire: President, G. H. Spencer; vice-president, P. H. Ginder; directors, W. W. Bradbury, G. E. Robson and B. Stockman; board of arbitration, G. G. Barnum, Sr., M. M. McCabe and E. A. Vivian, and board of appeals, Thomas Gibson, F. E. Lindahl and W. C. Mitchell.

New high records for all time were set in receipts and shipments of grain at Duluth elevators during the calendar year ended Dec. 31 last. Receipts of all grains aggregated 192,122,489 bushels, including 189,646,289 bushels of domestic and 3,066,200 bushels of bonded grain. Domestic wheat receipts were reported at 99,119,748 bushels; corn at 900,954 bushels; oats at 20,075,037 bushels; barley at 12,085,001 bushels; rye at 41,220,732 bushels and flaxseed at 15,644,817 bushels. Shipments from the elevators aggregated 182,375,659 bushels, including 180,346,107 bushels of domestic and 2,529,532 bushels of bonded.

NEW YORK.

J. M. Nugent, Correspondent.

Herbert Pond has been admitted as a general partner in the firm of C. W. Andrus & Co.

R. F. Straub has resigned as vice-president and director of the Bunge-North American Grain Co. and will no longer represent that firm on the Produce Exchange.

There was a fair export trade in wheat during the week and sales totaled around five million bushels. Most of the business appeared to be in Manitoba wheats, but there was also a fair business in Duluth spring wheats, and some scattered sales of American winters and durums were made.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: W. L. Harvey of Minneapolis; P. N. Billington, E. F. Holleran, G. P. Reuter and J. Aronson, all of Chicago; W. W. Danforth of St. Louis; L. R. Godfrey of Winnipeg and C. T. San-

ford and L. Eisemann, both of New Orleans.

Flour Situation.

New York, Jan. 3, 1925.—The feature in the flour trade during the past week centered in the export line with sales of from three to four cargoes of Canadian flour made to Russia. This followed business of some two cargoes made only a few weeks ago. At the same time there were reports here that English millers had sold direct five cargoes.

Aside from this development trade operations in the local flour market were extremely quiet, natural with the holiday tendency. Prices, however, were firm.

Spring patents were quoted at \$8.75 to \$9.25, soft winter straights \$8.50 to \$8.75 and hard winter straights \$8.65 to \$9.25 per 196 lbs.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

At Port Richmond 1,240 cars wheat, 56 barley, and 20 oats; total, 1,316 cars.

Exports of grain for the week ending Jan. 2 were 404,593 bushels of wheat.

The third annual student grain show of the Pennsylvania State College will be held Jan. 15, 16 and 17 at State College.

At 29th street elevator 21 cars oats, 9 mixed grains, 9 corn, 1 barley, 1 peas, 1 rye and 1 wheat; total, 40 cars.

Receipts of flour and grain for the week ending Jan. 3 were: Flour, 38,921 bbls.; wheat 727,456 bus.; corn, 5,494 bus.; and oats, 27,084 bus.

John H. Young, chief flour inspector of the Commercial Exchange, also died on Dec. 30, after several months of illness with cancer.

During the month of December, 1924, the following cars of grain were unloaded at Girard Point: Wheat, 1,891 cars; corn, 27 cars; rye, 76 cars; total, 1,994.

G. P. Lemont, head of the feed and grain business of E. K. Lemont & Son, has gone back to Pinehurst, N. C., with his wife and daughter, where they will remain during the winter.

Clarence S. Woolman of the Hales-Hunter Co., Chicago, hay and grain merchants, who has been spending the holidays with his brother, Walter K. Woolman of S. C. Woolman & Co., has returned to his home in Chicago.

Sydney Danby Conwell, head of the firm of S. D. Conwell & Co., wholesale dealers in bakers' supplies and for many years a member of the Commercial Exchange, died on Wednesday last of pneumonia after a week's sickness, in his 53rd year.

The following out of town visitors were registered at the Commercial Exchange during the week: Paul W. Phillips, Sudlersville, Md.; Geo. W. Witmer, Selinsgrove, Pa.; T. W. Drews, Chicago; Thomas Rhoades, Pittsburgh, Pa.; A. W. Kenyon, Kansas City, Mo.; Louis N. Osmond, New York City; C. S. Kieser, Waverly, N. Y.; W. S. Breyer, Buffalo; W. H. Hutchner, Bridgeton, N. J.; Stanley R. Miller, Norfolk, Va.; Elmer Bucky, Littlestown, Pa.

Philadelphia Flour Market.

Philadelphia, Jan. 3.—The market continues firm in sympathy with wheat, but buyers operate cautiously and mostly in resale stock for present requirements, which can be bought at some concession from current quotations. The mills on the other hand are holding out for full prices believing that values will not be much lower before the arrival of a new crop.

Receipts for the week were 38,921 bbls. We quote per 196 lbs. packed in 140-lb. jute sacks: soft winter straight, western, \$8.25@8.50; soft winter straight, near-by, \$8@8.25; hard winter straight, \$9@9.50; hard winter short patent, \$9.50@10; spring first clear, \$8.50@9; spring patent, \$9.50@9.75; spring short patent, \$9.90@10.10; fancy spring and city mills patent family brands, \$10.45@11.10. Rye flour, \$8.30@8.80 per bbl. in sacks, as to quality. Buckwheat flour, \$4.25@4.50 per 98-lb. sack.

NEW ORLEANS.

M. L. Davis, Correspondent.

It has been reported that a sale of 100,000 bushels of Canadian oats has been made for January shipment at 74c C. I. f. Havana.

Standard Blackstrap Molasses is very firm at 14c per gallon f. o. b. tank cars New Orleans; light blackstrap is quoted at 15c per gallon.

W. H. Osborn, president of the American Baltic Chartering & Shipping Co., has returned from a business visit to Chicago and New York.

Stocks in elevators as of today are: Wheat, 1,984,000 bushels; corn, 445,000 bushels; oats, 273,000 bushels; rye, 36,000 bushels. Cars on tracks: Wheat, 69; corn, 82.

The S. S. Mont Agel loaded with grain and miscellaneous cargo was badly damaged during a severe fog in the harbor this week. The S. S. Mont Agel was rammed by the tank ship W. L. Steed. The damage has not as yet been ascertained.

but it will be necessary for the S. S. Mont Agel to go into dry dock for extensive repairs.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

The property formerly operated by Faucett Milling Co., located at Seventh and Olive Sts., has been reopened by the St. Joseph Milling Co., a corporation capitalized in the amount of \$160,000. Charles Smolin is president, D. P. Moore, vice-president; S. Levin, secretary, and S. Leavitt, treasurer. Mr. Moore has been connected with the Marshall Hall Grain Co. for the past few years; he has transferred his representation on the St. Joseph Grain Exchange to the St. Joseph Milling Co. and will represent them on the trading floor. The corn flour milling capacity of this concern is 500 barrels daily and feed 160 tons daily. Storage is at present 60,000 bushels, with 40,000 additional in process of construction.

Receipts of all grains at St. Joseph for 1924 totaled 27,818,650 bushels, a banner year in the history of the St. Joseph grain market. The previous high record was in 1922. Arrivals for the past five years follow:

Year.....	
1924.....	27,818,650 bu.
1923.....	22,754,750 bu.
1922.....	26,944,950 bu.
1921.....	23,844,850 bu.
1920.....	15,776,800 bu.

Average receipts of years 1919 to 1923, inclusive, is 21,470,930 bushels. Total shipments for 1924 were 14,247,800 bushels. These figures indicate a difference between the inbound and outbound carloads of 13,570,850 bushels, which was absorbed here by mills and industries during the year. Consumption figures on the same basis for 1923 show 10,280,350 bushels.

The Chicago Great Western elevator was destroyed by fire early in 1924 and detracted 125,000 bushels from the total public storage. At the close of 1924 public storage at St. Joseph totaled 2,250,000 bushels; private, 1,317,000 bushels. Wheat flour milling capacity amounts to 9,000 barrels daily; corn milling, 2,500 barrels, and feed milling, 2,010 tons daily.

No membership transfers were made on the Exchange during the past year. Thirty-four firms are represented on the Exchange.

Officers of the Exchange for 1924 were: R. E. Hastings, president; C. A. Geiger, vice president; Nelson K. Thomas, secretary; F. L. Ford, treasurer. Messrs. C. L. Scholl and W. M. Huff have been nominated for president for 1925 and Messrs. C. A. Geiger and S. A. Penny for vice president.

Comparative receipts and shipments, St. Joseph, Mo., of all grains for 1924 and 1923. Figures are in bushels:

Receipts—	1924.	1923.
Wheat	13,651,400	10,150,000

FORT WORTH, TEX.

G. E. Blewett, Correspondent.

Weather.

Weather in Texas the past two weeks has been the severest in the history of the weather bureau, with extremely low temperatures and snow and ice reported as far south as Galveston and Brownsville. This severe storm found most of the wheat and other grain protected by an ice covering, and since the weather has moderated it is found that all of the winter sown oats have been killed, and reports as shown by the local newspapers indicate that the

**WEEKES
COMMISSION CO.****SHIPPERS**

KAFIR MILO SUNFLOWER SEED
CORN OATS CHICKEN WHEAT
409 Merchants Ex., St. Louis, Mo.

wheat crop has suffered more or less, but just what extent cannot at this time be determined. Temperatures in the Panhandle went as far as six below zero, while Fort Worth minimum showed six above zero, San Antonio ten above zero, Houston and Galveston twenty above. Very little moisture was derived from the snow and sleet, and a general soaking rain is badly needed over the entire state.

Business.

Business the past two weeks has been highly satisfactory and most dealers report a satisfactory December and very satisfactory business for the year. Mills are reducing their runs and most of them are on a daylight run, while some of the larger mills are running full high. They report a fair demand for flour at the present basis of \$9.30 for high patent delivered, and shipping instructions are being received on old bookings, which are gradually getting cleaned up. Premiums on wheat are not as satisfactory as they have been and are nearer the export basis than any time the past three or four months, but with prospects lighter receipts of wheat it is believed that the mills will be forced to draw on elevator stocks for their requirements, and to raise their bids over export basis to draw the wheat from the country.

Wheat.

Wheat receipts have been steady the past two weeks with a fair demand, sufficient to absorb all offered and track sales meet with attractive bids and today's values are as follows delivered Texas Group One points: No. 1 soft red winter wheat, \$2.02; No. 1 80% red, \$1.97; No. 1 dark hard, \$1.88; No. 1 hard, \$1.86; No. 1 durum, \$1.82.

Corn.

Corn receipts the past week is rather heavy and demand somewhat slower, except on white which continues to bring a fair price, although shippers from interior markets are of such volume as to bring purchases below terminal basis. Yellow and mixed corn are rather slow with liberal offerings and elevators are well stocked and satisfactory sales are slowly made. Today No. 2 white corn is worth \$1.35, No. 2 yellow \$1.31, No. 2 mixed \$1.27, group 1.

Oats.

Oat receipts continue rather light with a fair demand at a better premium, and dealers are showing more inclination to buy than previously, and today No. 3 white oats are selling at 69 cents group one, while February shipments would bring a cent a bushel more.

Milo and Kafir.

Milo and kafir have taken some decline the past few days, owing to fewer offerings and slower demand and today No. 3 or better yellow milo is selling at \$2 basis delivered Texas group 1 points, while No. 3 or better white kafir is bringing \$1.90.

Cane Seed.

Cane seed is somewhat weaker on receipts with freer offerings and demand is somewhat slower and today 80 per cent germination red top is selling at \$2.15 group 1, while black amber is bringing about \$2.05 group 1.

CINCINNATI.

George Mosbacher, Correspondent.

Frank Maguire, who suffered the loss of his wife last week, will seek rest in a month's stay at Asheville, N. C.

Total stocks of grain for last week and week previous in Cincinnati elevators are as follows:

	Jan. 2, '25.	Dec. 26, '24.
Wheat	262,977	264,132
Corn	118,904	127,092
Oats	295,349	216,429
Rye	3,492	2,472

The grain and hay associates of Elmer H. Heile of the Cincinnati Grain & Hay Co. congratulate him on his election as president of the Covington, Ky., Board of Education, which he will serve for the ensuing two years. Mr. Heile is eminently fitted for the presidency of the board, having served as vice-president for the past two years.

Paul Dorsel, who served the Dorsel Grain Co. as manager of its hay department with satisfaction for some time, has announced his intention to leave Cincinnati to enter the real estate business at Asheville, N. C. Paul has an inclination for this business, and some experience, and a large circle of friends at Asheville who will see to it that he is successful.

"The year 1924 was for a considerable period a dull one in the railroad business in the Cincinnati terminal, but it is predicted by representative traffic men, both commercial and railroad, that 1925 will tax the railroads to the full capacity to handle the business offered." So said J. A.

COMMISSION

332 So. La Salle St., Chicago, Ill.

Geo. A. Deterle and B. H. Wess. The new board will meet to organize Tuesday, Jan. 20, 1925, when the officers will be chosen. The nominating committee consisted of A. M. Braun, Dan B. Granger, W. A. Van Horn, Will J. Steuve and Elmer F. Voss.

Cash Markets.

The cash wheat market was steadier than futures, and despite the holiday conditions the week's business transacted was considerably improved. Shipments to mills were larger, and exceeded the light daily receipts, necessitating the withdrawal of elevator stocks. The market was strong and while option declines were ignored the advances were followed. Closing prices were about the same as a week ago.

No. 1 red winter, \$1.99@2; No. 2 red winter, \$1.96@1.98; No. 3 red winter, \$1.93@1.95; No. 4 red winter, \$1.90@1.93; No. 5 red winter, \$1.85@1.90.

Continued light receipts of corn, which are not expected to show much increase for some time held local cash prices steady to firm, but an active demand, and quick absorption of the daily offerings was also an influence of the market strength. Elevators as usual took most of the offerings, but a better demand was also noted from industries and millers. Shipments to nearby feeding sections were reported as largely increased over a week ago. Ear corn was especially strong and sharply higher with yellow at a good premium.

No. 2 white \$1.26@1.27; No. 3 white \$1.25@1.26; No. 4 white \$1.22 1/2@1.23 1/2; No. 5 white, \$1.18@1.20; No. 6 white, \$1.12@1.17.
No. 3 yellow \$1.27@1.28; No. 3 mixed \$1.24@1.25; No. 4 yellow \$1.24@1.25; No. 5 yellow \$1.21@1.23; No. 6 yellow, \$1.16@1.20; No. 4 mixed \$1.20@1.22; No. 5 mixed \$1.17 1/2@1.18 1/2; No. 6 mixed \$1.12@1.15.

The demand for oats was light, but the small receipts helped to hold the market fairly steady. Very few of the No. 2 grade were offered.

No. 2 white 63@64c; No. 3 white 61@62c; No. 4 white 59@61c; No. 2 mixed 61@62c; No. 3 mixed 60@61c; No. 4 mixed 58@60c.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Cattle prices were unchanged, with good veal calves selling at \$12 down. Receipts were very light.

Oats receipts have been very light the past week, with only 3 cars Saturday. Market was quoted 1/2c lower, with No. 3 white selling at 56 1/2c.

Fire destroyed the Farmers' Elevator at Alta, Ill., close to Peoria, Friday. The elevator was completely destroyed and the loss is expected to exceed \$20,000, which was partly covered by insurance.

A. D. Rhinesmith, who has owned and managed the Board of Trade restaurant for the past 30 years, has sold his interests in Peoria and will soon leave for the East, where he will become engaged in the hotel business with his brother.

Corn receipts at Peoria were 62 cars Saturday. Offerings were in fairly good demand at unchanged prices, local industries taking the bulk of the offerings. No. 4 yellow, \$1.19; No. 5 yellow, \$1.15 1/2@1.16 1/2; No. 6 yellow, \$1.12 1/2@1.13 1/2; No. 4 mixed, \$1.19; No. 5 mixed, \$1.15 1/2; No. 6 mixed, \$1.12 1/2@1.13; sample, \$1.09 1/2@1.11.

Hogs at the local yards scored another advance Saturday. With receipts of 1,500 head prices were quoted 10@25c higher,

Clement Curtis & Co.

The Rookery Bldg., Chicago

Members of all principal Exchanges
Private wire service to all leading cities
in this country.

with choice heavy weight butchers selling at \$11, the highest price for several months. Hogs weighing around 150 to 170 pounds were quoted at \$9.75@10.35. Trading was active, with lively competitive bidding. Light hogs, \$9.35@10.75; mediums, \$10.60@10.90; heavies, \$10.80@11; packers, \$9.75@10.25.

Grain receipts and shipments for week ending Saturday, Jan. 3, as compared with those of corresponding week last year, as reported by the Peoria Board of Trade:

Receipts—	1925.	1924.
Wheat	18,000	16,800
Corn	425,400	236,600
Oats	151,200	118,800
Barley	21,000	12,600
Flour, bbls.	615,600	434,800
Shipments—	1925.	1924.
Wheat	8,400	13,200
Corn	191,100	125,750
Oats	86,400	91,800
Barley	7,000	8,400
Flour, bbls.	292,900	239,150
	41,800	31,000

A new market for corn in Peoria will be created with the operation of the new Butyl Corporation, which will manufacture butyl alcohol, widely used in the manufacture of lacquers in the paint industry. The plant will use the Corning distillery buildings and also some of the present equipment. Production in the new plant will be at the rate of 2,000,000 lbs. per month, and a large supply of corn will be needed. In order to meet this condition by the time production is started, the corporation will begin soon after the first of the year to buy corn through the local market. Ample storage facilities exist in the newly acquired plant. Dr. Henry V. Walker, of Newark, N. J., is president of the corporation; Thomas G. Lovelace, vice president; John W. McDowell, treasurer; Arthur G. Heidrich, secretary, and Douglas H. Bethard, George J. Jobst and Hincley G. Atwood, directors. Hincley G. Atwood is also identified with the American Milling Company. The corporation has been capitalized at \$2,000,000, and has secured a lease on the Corning plant with an option to buy it for \$250,000.

CHICAGO.

Arthur Meeker was made chairman of the board of the Arcady Farms Milling Co., at the recent Board of Directors' meeting. W. B. Pearson was elected president.

Dr. W. H. Strowd, newly elected secretary of the Soft Wheat Millers' Assn., announces that the national headquarters of the organization is now located in Chicago.

Chas. A. Peck, who was for 20 years with A. J. White & Co., has become a partner of E. Newman & Co. The firm will continue under the same name and location at 7 Board of Trade Building.

Thos. J. Cannon, for 35 years a member of the Chicago Board of Trade and at one time connected with the Internal Revenue office, died recently. He leaves a widow, a son, John Doner Cannon, and a daughter, Mrs. Carl N. Wolf.

Logan & Bryan announces that Reginald C. Jenkins, manager of the San Francisco office for many years, has been made a partner. Louis N. Stott will retire as a partner of the company. Mr. Stott will confine his future activities to other lines of business, and will be located in southern California.

The Chicago Board of Trade reported the following statistics for 1924: Grain cars inspected, 146,210 compared with 122,398 in 1923; grain and flour received, 327,638,000 bus., compared with 300,587,000 bus. in 1923; grain and flour shipped, 213,496,000 bus., against 197,769,000 bus. in 1923. The value of the clearings was \$174,770,729 in 1924 compared with \$90,749,559 in 1923.

Morris, chairman of the Cincinnati Railroad Operating Committee and district manager local car service division, American Railway Association.

Will J. Stueve of H. W. Brown & Co., who has a genius for the work of selling grain, and a fixed habit of getting the top price, had the distinction of receiving \$2 per bushel for a car of No. 1 red, 61.3 lbs., and 13 per cent moisture, the highest price recorded here since 1923, when values reached \$3.06 in June, and a low and high range for No. 2 of \$1.88 to \$1.24 in December. H. Edward Richter of the Richter Grain Co., who has developed a good milling trade, was the buyer of the car, which proved mutually advantageous to both merchants, as Mr. Richter sold

the wheat to a nearby mill at a substantial and profitable advance over the price paid.

The nominating committee appointed by the Board of Directors of the Grain and Hay Exchange to select candidates for the annual election to be held on the exchange floor, Jan. 15, has recommended the following ten candidates to be voted for, five of whom are to be elected to serve for a period of three years: H. N. Atwood, Frank J. Curriss, John De Molet, John H. Dorsel, H. Trimble McCullough, Harry E. Niemeyer, Henry Nagel, W. A. Van Horn, and F. L. Watkins. Directors holding over are: A. M. Braun, Ralph H. Brown, Robert Lee Early, Fred E. Edmonds, Elmer H. Heile, D. W. Hopkins, Lew McGlaughlin, H. E. Richter, Fred W. Scholl,

M. W. Samuels & Co. hung out their shingle in Suite 685, Illinois Merchants Bank Building, which is at 231 So. LaSalle street, last week. The official opening, however, with flowers and good wishes, is today. Mr. Samuels has for years been associated with Jackson Brothers and continues his former trade in grain, cotton, provisions, stocks and bonds. A statistical blackboard of special construction is provided in one of the private offices for the use of customers with full ticker service and elaborate facilities of a business nature. An atmosphere of privacy, such as secured in private clubs, associated with practical business requirements predominates the layout of this new brokerage office.

WAGON LOADS RECEIVED
A book for the use of country grain buyers in keeping a record of grain received from farmers. Its column headings are: Month, Day, Name, Kind, Gross and Tare, Net Pounds, Bushels, Pounds, Price, Dollars, Cents and Remarks.
The book, 9 1/2 x 12 inches, 160 pages, 20 lines to each page, giving room for recording 3,200 loads, is printed on Lined Ledger Paper and is well bound in strong board covers with leather back and corners. Order form 80. Price, \$1.75.

Trade Opinion.
The action of wheat prices will be largely dependent upon the continuity and volume of foreign demand, but it must be remembered that the surplus of Argentina, Australia and India has yet to be marketed and will go far towards supplying European requirements. A conservative estimate of the combined surplus of these three countries is 235 millions. Further than this, North America has around 125 millions still remaining for export, and Broomhall estimates European requirements for the next six months at around 250 millions. If we can rely upon these various estimates, then no shortage is indicated, all of which leads us to believe that anticipation of higher prices is unwise.—Thomson & McKinnon.

has been in the directorate for three years, was re-elected with the highest vote on the list, 551. The other directors, with the vote cast, are as follows: Edward P. McKenna, 491; Francis B. Fox, 409; Louis C. Brosseau, 379; and Siebel C. Harris, 348. There was no contest on the committees. The nominating committee for one year comprises J. W. Badenoch, A. C. Clement,

FRANK L. CAREY,
President, Chicago Board of Trade.

Some of the trade appear to believe that we have passed the period of a heavy export demand. It is true that competitive countries have been under selling us and it is quite natural that Europe should turn to the countries that undersell us and where a formidable surplus is available. The wheat of the Southern Hemisphere was considerably cheaper a few days ago when top prices were recorded here, but the rapid decline here within the past two days has adjusted this position and in fact an increased inquiry for our wheat was reported on the decline here. We still believe that there will be a demand for our surplus and as to the strength of underlying conditions, we may refer to reports from Canada which state that the sharp advance in prices is causing apprehension over the supply for domestic needs.—Bartlett Frazier Co.

Corn prices averaged lower in sympathy with the break in wheat. Outside interests bought sparingly on the declines. The undertone, on the whole, remain rather firm. We are of the opinion that country offerings will increase during the next 30 days and would favor a trading position in corn. Favorable weather conditions prevail in the Argentine for the new corn crop.—J. J. Badenoch Co.

Weakness was more pronounced in the cash corn market at the close. Shippers report some increase in the business to Eastern distributors. The movement from country stations includes more shipments from west of the Mississippi River.—Pope & Eckhardt Co.

Current prices of July futures, which represents next year's crop delivery, have been approximately 25 cents a bushel under May. This is an unusually wide difference. At such wide differences there is little inducement to carry into next season. The strength in this market during the past week has been supported by the strength in foreign countries. Winnipeg continues to maintain a premium of about 8 cents over Chicago, an unusual situation.—Clement, Curtis & Co.

A virtual failure of the rye crop in Europe turned a big demand for United States rye. During the first part of the year rye sold at tremendous discounts, but the demand finally not only advanced prices simultaneously with wheat, but narrowed the discounts under wheat. Clearances have been liberal, but have fallen off the latter part of the year. Russia, who furnished much of the European rye, needs the previous year to the exclusion of our grain, has itself bought some rye. Speculative longs have made fabulous profits in this grain, but still have a good sized "corpse" to dispose, being the grain taken on delivery, and partly shipped to the seaboard.—Logan & Bryan Annual Review.

Board of Trade Officers.
Frank L. Carey, of the Nye & Jenks Grain Co., again was honored by the membership of the Chicago Board of Trade in re-electing him president by a unanimous vote of those cast. Henry A. Rumsey, who retires from the board of directors, was chosen vice president by the same vote, 710. James K. Riordan, who

SIoux CITY.
During the past year 242,000 bus. of wheat in excess of the receipts of 1923 were received through the Sioux City Grain Exchange. The aggregate receipts of wheat for the year were 2,455,008 bus. Rye also was received in greater quantities during the past year, the aggregate receipts of 94,928 bus. being 1,000 bus. in excess of 1923. Corn, oats and barley were received in smaller amounts than for 1923. The total receipts in bushels and carloads during the year just ended are recorded by inspection records of the Sioux City Exchange as follows:

	Bushels.	Cars.
Wheat	2,455,008	1,712
Corn	9,536,884	6,047
Oats	5,944,000	2,972

CORN WANTED
Track, Rockford, Ill.
Chicago Grain Products Co.
139 N. Clark St. Chicago, Ill.

TOLEDO.
S. M. Bender, Correspondent.

Louis Chase, president of the United Mills Corporation, Grafton, Ohio, was a visitor on the exchange floor last week.

Grain inspections for the past week were 23 cars of wheat, 45 cars of corn, 19 cars of oats and 7 cars of rye. Total, 94 cars.

Grain in store the week ending Dec. 23 was as follows: Wheat, 2,007,778 bus.; corn, 81,941 bus.; oats, 599,682 bus.; rye, 70,949 bus.; barley, 1,904 bus.

Receipts of grain for the month of November were 246 cars of wheat, 400 cars of corn, 157 cars of oats, 16 cars of rye, 3 cars of barley. Total, 822 cars.

Flour output of Toledo mills for the past week was 29,600 bbls., equal to 62 per cent of capacity. The week before it was 17,250 bbls., and a year ago last week was 22,900 bbls.

Cash trade in corn is inclined to be slow and feeding in this territory is said to be far under last year. Farmers got rid of their hogs when corn began to soar. Oats are bringing good prices and the movement has not been too large.

It is feared winter wheat may not fare so well as many fields were covered with ice before the snow came with its protecting blanket. Some reports indicate that there may be a repetition of what happened several years ago when a large acreage was abandoned.

Several of the grain boats in the harbor are being unloaded at the East Side Iron Elevator. The sturdy little tugs seem to have but little trouble breaking the ice to get these big freighters away from their moorings. This incident is looked upon as an indication of the demand for wheat which may become acute before another harvest rolls around.

Demand for grains, flour and feeds is expected to pick up now that the holiday dull period has passed. Stocks of flour and feeds being held are small and this

News of the Country Grain Trade

CALIFORNIA.

El Cajon, Cal.—John L. and Harold Bacon has established the Santee Supply Co. to handle grain, seed and poultry supplies.

Lancaster, Cal.—R. C. Hitte recently purchased from J. Slabo a one-half interest in the Valley Grain & Supply Co. of which he will be manager, at the same time retaining his interest in the Lancaster Feed & Fuel Co.

Stockton, Cal.—Short grain yields of the last several years in this locality, caused the closing of unit A of the Sperry Flour Co. recently. The company is considering increasing the Stockton plant, which is managed by Everett Devine.

San Francisco, Cal.—Another price advance was made recently on flour by the Sperry Company when they announced that the future wholesale price would be on the basis of \$9.50 a barrel, up 20 cents. President William H. Joyce reports a highly satisfactory year, and excellent prospects for 1925.

CANADA.

Calgary, Alta.—The new manager of the Alberta wheat pool is R. D. Purdy, asst mgr. of the Bank of Montreal.

Prince Rupert, B. C.—A 1,125,000 bushel terminal will be erected here for the government department of trade and commerce, for which tenders are to be immediately called for.

COLORADO.

Buckingham, Colo.—Fire of unknown origin destroyed the Buckingham Farmers Coöperative Elevator Co. on Dec. 28th.

ILLINOIS.

Harper, Ill.—Fire of unknown cause slightly damaged the Harper Grain Co.

Rantoul, Ill.—J. R. Harmon succeeds J. Barton as manager of the Tomlinson Coöperative Grain Co.

East St. Louis, Ill.—Fire caused from spontaneous combustion damaged the Corno Mills Co. warehouse at a loss of \$1,200.

Neelyville, Ill.—C. F. Cordes now operates the 10,000 bushel elevator, formerly owned by the Farmers Grain & Supply Co.

Marley (Mokena p. o.) Ill.—Louis F. Sass now operates and owns the elevator here formerly owned by the late Alex Harley.

Roseville, Ill.—Isaac C. Pratt has installed a Kewanee Truck Lift in his elevator, and has rebuilt and reinforced driveway and approaches.

Cairo, Ill.—Hastings Stout Co. now occupy offices in the Board of Trade building, taking the place of one that burned in November.

INDIANA.

Lafayette, Ind.—W. B. Foresman has discontinued of all of his grain interests.

Greenfield, Ind.—The Greenfield Milling Company has filed certificate of preliminary dissolution.

Windfall, Ind.—John W. Pugh succeeds A. D. Doggett as manager of the Farmers Grain & Supply Co.

Huntington, Ind.—The Commercial Asbestos Corp. has changed their name to Asbestos Manufacturing Company.

Sandborn, Ind.—A temporary elevator has been erected by A. B. Crane and R. R. Singer on the old mill site here.

Dunkirk, Ind.—The Coterman Grain & Flour Co. has installed an electric driven feed mill, purchased of W. W. Fearson.

North Manchester, Ind.—Joseph Bonner has sold his interest in the Ulrey Mill & Supply Co. to Claude Frey and Verna Ulrey.

Burket, Ind.—William Shaffer, in a suit for dissolution and receiver, was appointed receiver for the Burket Equity Union here, valued at \$20,000, and was authorized to sell.

IOWA.

Radcliffe, Ia.—The properties of the Radcliffe Grain Co. were disposed of at auction.

Paton, Ia.—The Clark Brown Grain Co. is installing an electric motor to operate the machinery in its elevator.

Conesville, Ia.—A radio receiving set has been installed by the McKee Grain Co. to enable them to get the latest markets.

Denhart, Ia.—Two linkbelt silent chain drives are being installed by Davis Bros. & Gentry, Walter E. Barton superintending the work.

Remsen, Ia.—The Farmers Elevator Co. has installed car unloading equipment at the elevator. Due to corn shortage this season grain will have to be shipped in.

Toledo, Ia.—The Toledo Farmers Elevator Co. was dissolved at a special meeting of the shareholders. M. J. Krezek of Toledo was elected trustee for the corporation.

KANSAS.

St. Paul, Kans.—W. E. Johnson is now managing the Farmers Elevator.

Iowa Point, Kans.—Fire originating in the engine house slightly damaged the A. J. Elevator Co.

Goodland, Kans.—An elevator with 8,000 bushel capacity, has been erected on the Kuhrt property.

Washington, Kans.—C. E. Warthen succeeds Mr. Frank McKelvey as county manager of the Farmers Union.

Garfield, Kans.—The Abrahamson Mill & Elevator Co.'s elevator has been purchased by G. W. Shell of Garden City.

Louisburg, Kans.—The Louisburg Elevator Co. was robbed of flour and coal recently, the loss estimated at about \$50.

Thayer, Kans.—The McNulty elevator here is reported as doing a rushing business these days. It is operated by the George brothers.

Alta Vista, Kans.—G. W. Newgard is installing the latest thing in a new feed grinder at his feed store and a ten horse power motor to operate it.

Harper, Kans.—The old Harper mill, recently purchased by the Kansas Milling Company, is being overhauled under the direction of George R. Cooper of Wichita.

Olcott, Kans.—The Gano elevator here has discontinued business until next season, and the manager, Arthur Althaus, is now employed by the Lamont Produce House.

Topeka, Kans.—The Grubbs Grain Co., formerly located in Room 226 New England Bldg., has moved into larger quarters, now occupying Rooms 230-232 in the same building.

Hutchinson, Kans.—The Hugoton Warehouse Co. at Hugoton has been purchased by the Security Elevator Co.

QUALITY and SERVICE

Kansas City, Missouri

It will be managed by W. H. Tilford of Moscow and R. B. Robinson of Hugoton, and does an extensive broomcorn storage and shipping business.

Miltonville, Kans.—O. H. Brooks of near Clyde will purchase the interest of E. A. Walno in the Miltonville Mill, in a deal being closed in McLouth, Kans. Joel Dobbs, resident of this community, died recently following a stroke of apoplexy. He was formerly operator of an elevator at Virginia City, Neb. and later at McLouth and Duna-vant, Kans.

KENTUCKY.

Lancaster, Ky.—The Lancaster Mlg. Co. has completed the enlargement of its mill.

Augusta, Ky.—A 15-horse power Wager motor has been installed by the Augusta Milling Co. in their mill. The company makes corn meal and cracked corn.

MARYLAND.

Bel Air, Md.—The Bel Air Elevator Co. has been incorporated with a capital of \$10,000, by Clinton L. and Milton A. Reckford, and W. W. Hopkins. They will handle the merchandising and milling of grains.

MICHIGAN.

Alpena, Mich.—A defective chimney caused a loss in the mill of C. M. Davis.

Mulliken, Mich.—McWaghton & Peabody suffered a slight loss on December 22nd from a defective flue.

Springport, Mich.—Notice of dissolution has been filed by the Springport Coöperative Elevator Co. It has a capital stock of \$60,000.

Pontiac, Mich.—An auxiliary tile building of C. E. Depuy & Co. was damaged by fire and baled straw burned at a loss of \$500.

Allegan, Mich.—The officers of the Allegan Coöperative Ass'n have acquired an option on Mill A of the Allegan Milling Co. Edward Horan, Jr. and William Legner has purchased the other mill owned by the company, Mill B.

MINNESOTA.

Belle Plaine, Minn.—The establishment of a corn flake plant here is being planned.

New Ulm, Minn.—Bingham Bros. have disposed of their entire line and are no longer in the grain business.

Welcome, Minn.—At a meeting of the Welcome Farmers Elevator Co., the charter was extended another 30 years, and they reported an exceptionally prosperous year.

Monterey, Minn.—Hubbard & Palmer Co. has purchased the Matson Elevator from the Monterey Farmers Elevator Co.

New Ulm, Minn.—The Eagle Roller Mill Co. will use the elevator formerly belonging to Bingham Bros. for storage purposes.

MISSOURI.

Niangua, Mo.—Fire partially destroyed the Abe Pinson & Son mill.

Doniphan, Mo.—Dave Damer will install electric motors in the new mill here.

Ozark, Mo.—A new corn sheller and cleaner has been installed by the Ozark Elevator Co.

Dalton, Mo.—J. M. Mason is manager of the Farmers Elevator Co. here. He was formerly connected with the elevator at Salisbury.

Carthage, Mo.—The McDaniel Milling Co. has ordered detail plans for an additional 300,000 bushel capacity elevator here to receive grain next fall, at a cost around \$100,000.

Ewing, Mo.—The Farmers Elevator & Exch. Co.'s new 15,000 bushel capacity elevator has been completed, costing \$8,000. A Richardson Automatic Scale has been installed, also a grain and seed cleaner and truck and wagon dump.

MONTANA.

Brady, Mont.—A small loss to the elevator of Frederick F. Lewis resulted from an overheated stove.

Moulton, Mont.—Fire of unknown origin totally destroyed the office and engine room of the Montana Elevator Co. The elevator was only slightly damaged.

Denton, Mont.—The Farmers Coöperative Elevator company here has shipped 315 cars of wheat to eastern and western points and more than 523,000 bushels of wheat have been received. The hauling season has covered approximately sixty days.

NEBRASKA.

Elsie, Neb.—The O. M. Kellogg Grain Co. will dismantle their elevator here and a new 40,000, bushel, 12 bin house will be erected.

St. Edwards, Neb.—The Nebraska Consolidated Mills Co. is dismantling

grain elevator here located at the government docks at Ogden Point.

Sumner, Wash.—The feed mill machinery of the Sumner Grain & Milling Co., which handles hay, grain and feed, consists of 50 horse-power electric motor, 24 inch Unique attrition mill, two roller-mills, cleaners, purifiers, cone feed mixer, and storage bins for 8 carloads of bulk grain.

WISCONSIN.

Crandon, Wis.—The flour and feed business of J. Breakstone has been purchased by Lynn Paul.

Coleman, Wis.—M. Martens has moved his flour and feed stocks, etc. into his new brick warehouse.

Oconto, Wis.—The Collins & Collins grain elevator, formerly the A. Pierre elevator, has been purchased by Lane & Son of Birnamwood who is now operating it.

TERMINAL MARKET NEWS.

[Concluded from page 25.]

will be a big factor in the prices to the spring trade. Mills outside of Toledo have been good buyers of wheat the past week. Sentiment is mixed as to the market trend, but most all dealers agree that conditions favor an advance before the season is ended.

PORTLAND, ORE.

Henry Kleinberg, one of the handlers of hay in Toppenish county, was a visitor in Portland over the holidays as a guest of his son.

W. H. Younger, manager of the Pasco Grain & Milling Co., was a recent visitor in Portland. Mr. Younger reports the milling business satisfactory considering the abnormally high price of wheat.

Terminal receipts in cars were reported by the Merchants Exchange for the season to Dec. 31 as follows:

Portland—	Wht.	Bly.	Flr.	Cn.	Oats.	Hay.
1924-25 ...	12,239	457	935	318	458	1,119
1923-24 ...	16,787	150	1,518	298	515	1,050
Tacoma—						
1924-25 ...	3,461	292	166	312	166	219
1923-24 ...	6,330	112	477	234	160	287
Seattle—						
1924-25 ...	5,636	248	1,426	440	348	961
1923-24 ...	7,002	190	1,855	562	336	782
Astoria—						
1924-25 ...	1,925	2	130	1	2	33
1923-24 ...	2,311	3	81	4	10	16

Wheat shipments from the port of Portland during 1924 exceeded shipments during the calendar year of 1923 by more than 5,000,000 bus., according to the records of the Merchants' Exchange. Total shipments amounted to 25,862,598 bus., compared with shipments of 19,626,586 in 1923. December shipments amounted to 1,014,034 bus., of which 84,000 bus. went to Vladivostok and the rest to European ports. The shipment to Vladivostok was the first cereal to go from Portland to that port for a number of years. A significant factor in the wheat business of the present cereal year is the fact that practically all of the wheat has gone to Europe, only a small amount having gone to the Orient so far this year. Europe has overbid the Oriental buyers most of the season.

ST. LOUIS.

W. C. Howland, Correspondent.

Offices of the Link-Belt Co. in St. Louis have been moved to larger quarters at 3638 Olive street.

After trading hours on the last day of the year the Merchants Exchange entertainment committee provided music for dancing on the trading floor.

Deliveries of grain on December contracts in the St. Louis market during the past month amounted to 355,000 bus. of wheat and 90,000 bus. of corn.

The membership in the Merchants Exchange of E. J. McConnell, of the International Mercantile Marine Co., has been posted for purchase and cancellation.

Firms in the grain business reporting on business as they have found it during 1924 state the year has exceeded 1923 in volume and all of them expect a greater percentage of increase for 1925.

The election of Geo. C. Martin, Jr., of the Martin & Knowlton Grain Co. as first vice president of the Merchants Exchange is assured by his nomination to the office at the recent caucus. Further details of

the election will be published in the next issue.

Dues of the St. Louis Merchants Exchange will be increased from \$100 to \$125 a year, and tenants in the exchange building have received notice of an increase in rentals, which in some instances amount to 40 per cent, but the average increase will be 17 per cent.

River traffic at St. Louis has been suspended since Dec. 17 on account of heavy ice flows. The barges and other river services are receiving freight at Cairo, Ill., where the river is sufficiently clear of ice to permit of steamboat traffic.

On account of the extremely cold weather which has prevailed of late throughout the middle west, the members of the Merchants Exchange responded to an appeal to help feed the birds by gathering up all the sample grain available and sending it out into the country.

The recapitulation of statistics for the year 1924 has not been completed, but the St. Louis stock yards is in position to announce the following totals in receipts: Cattle and calves, 1,384,626; hogs, 4,579,538; sheep, 488,630; horses and mules, 64,008. All things considered, the year has been a satisfactory one, although somewhat lower in receipts than in 1923. This information is of interest to the grain trade, in that it points out the enormous local market for grains.

E. J. Gissler, secretary of the Moffitt-Napier Grain Co., states: General business conditions in our line show improvement. The 1924 fall volume is above that of 1923. We believe the grain markets will continue active and that business will be on a large scale. The United States Department of Agriculture estimates the foreign needs of wheat at from 610,000,000 to 714,000,000 bushels, while exporting countries have a surplus ranging from 600,000,000 to 625,000,000 bushels. This indicates a very close adjustment between supply and demand and the probabilities of high prices remaining throughout the crop year. Early in June wheat sold in St. Louis market around \$1.02. Today May wheat sold above \$1.51. This adds more than \$200,000,000 to the value of the farmers' wheat crop.

TOLEDO SEED PRICES.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy for the week ending Jan. 3:

	Range for wk.		Cash	Close
	High.	Low.	Jan. 3.	Dec. 27.
Clover—				
Cash	\$19.75	\$19.60	\$19.75	\$19.40
Jan.	19.75	19.60	19.75
Feb.	20.00	19.85	19.90	19.60
March	20.05	19.90	19.90	19.60
Alsike—				
Cash, new.	13.25	13.15	13.25	12.90
Jan.	13.25	13.15	13.25
March	13.50	13.50	13.50	13.25
Timothy—				
Cash	3.35	3.25	3.25	3.30
Jan.	3.35	3.25	3.25
March	3.45	3.42½	3.45	3.42½

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending Jan. 3, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rcts.	Shpts.	Rcts.	Shpts.	Rcts.	Shpts.
Week ...	238	466	341	42	82	349
Prev. wk.	314	228	267	35	303	193
1924-25.	33	62	74	229	606	332
1924-25.	27,179	16,924	5,544	2,726	10,981	10,060
1923-24.	26,264	11,412	4,891	2,712	13,882	5,793
1922-23.	26,495	19,679	6,448	4,554	17,393	3,753

Timothy—Quiet and unchanged. Fair country run \$5.75@6.00 per 100 lbs., good country run about \$6.15@6.30 and high grades \$6.50@6.75.

Alfalfa Seed—Steady. Recleaned country lots \$21.00@23.00 per 100 lbs.

Clover Seed—Firm. Country lots, \$25.00@27.75 for 100 lbs., good \$28.25@29.25, choice \$29.75@30.75, fancy \$31.00@32.00 and Mammoth \$29.00@33.00.

Alsike—Firm. Average country lots \$19.00@19.75 per 100 lbs. Fair seed \$15.00@16.00 and poor \$10.25@12.25.

Flax—Steady. No. 1 Northwestern closed nominally \$3.14½@3.17½ per bu. of 56 lbs.

MILWAUKEE SEEDS.

Movement of timothy seed and clover seed at Milwaukee in pounds as reported for the PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, Secretary of the Chamber of Commerce, for week ending Jan. 3, 1925:

	Receipts.		Shipments.	
	Tim.	Clov.	Tim.	Clov.
1925-.....	77,030	50,648	39,650	93,153
1924-.....	60,000	11,120	83,400	109,553

Field and Grass Seeds

The new Virginia seed law, which went into effect on January 1, is published together with rules and regulations, in bulletin number 206, December, issued by the Virginia Department of Agriculture.

FLAX DEMAND IS INCREASING.

It is thought that the Northwest will produce several million more bushels of flax next year than has been produced during 1924. Leo P. Nemzek, chairman of the flax development committee of the Paint Manufacturers' Assn., reports that 10 million more bushels can find an available market in this country in 1925 without flooding the market as the demand for linseed oil is steadily increasing, and Europe will take most of the Argentine crop.

ST. LOUIS SEED MARKET.

Jan. 3.—Quote timothy—fair to good country seed at \$5.75@6.10; dark and low-grade seed at \$3.00@5.50. Clover—clean seed at \$29.25, fairly clean seed at \$27.00@27.40. Alsike at \$15.00@20.00. Alfalfa at \$16.00@20.00. Redtop at \$10.00@11.00 for clean seed—chaffy at \$4.00@8.50. Hog millet at \$2.60, Early Fortune at \$2.65@2.70, and Siberian at \$2.20@2.30, bulk basis.

Yellow, black and brown soy beans at \$1.75@2.75, according to variety and quality. Sunflower Seed—Sale ½ car No. 2 Missouri sold at \$3.50 per 100 lbs.

SEED RECEIPTS AT TOLEDO.

Following is a statement of seed receipts and shipments at Toledo in bags for week ending Jan. 3, and season to date and comparisons, also stocks, etc., as compiled by C. A. King & Co.:

	Receipts.		Shipments.	
	Clov.	Als.	Tim.	Clov.
This wk.	266	39	499	6
Last wk.	263	88	200	166
Sn. 1924-5.	6,492	3,349	13,961	2,227
Sn. 1923-4.	9,686	8,261	7,578	1,281
Sn. 1922-3.	30,232	5,615	14,421	7,763

Stocks in Toledo Jan. 3 show 13,422 bags red clover; 6,881 bags alsike and 15,565 bags timothy. Exports of timothy from New York last week were 814 bags; imports of clover, 2,370 bags.

	Clover.	Alsike.	Timothy.
This week.....	500	2,100	8,964
Season 1924-25....	3,050	7,400	4,050
Season 1923-24....	6,400		

BLUE GRASS POOL MAKES DISTRIBUTION.

Directors of the Central Kentucky Blue Grass Seed Pool recently held a meeting at Paris, Ky., at which they directed the secretary and treasurer to pay 50 cents per bushel to all members, which in the aggregate amounted to \$270,000. It is the purpose of the Board of Directors to make a final and complete settlement of the affairs of the pool by May 15, 1925.

DULUTH FLAXSEED MARKET.

DULUTH, Jan. 3.—Trading was on the holiday order in the flaxseed market during the last week. It was noted, however that quotations were well held with operators generally bullish regarding the outlook of the market for a long pull. High marks in the market for the crop year were set at the end of the week on the appearance of active bidding. Recessions later came about under the pressure of realizing sales. Final prices showed gains of ¼ cent in spot, a loss of ¼ cent January seed, and a loss of 2 cents in the May future. Crushers' reports were encouraging regarding the demand for linseed oil and the outlook in that trade for the coming year. Receipts from the country again showed a falling off, amounting to only 30,793 bushels for the five trading days and shipments were 50,880 bushels, representing withdrawals from the elevators

by crushers to cover their current linseed oil contracts. Supplies in the elevators were 1,119,000 bushels. Buying on the part of traders was claimed to have been on a better scale during the last week. That was attributed to the crowd growing more confident and again showing an inclination to climb up on the bull band wagon forgetful of their experiences during recent raids on the market. Confidence on the part of specialists is being engendered through the small current movement of seed from the country, and the claim that the great bulk of flaxseed held in the East is owned by crushers.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and the same period last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track..	\$3.04½-08¾	\$3.04-08	\$2.44¾-48¾
To arrive..	3.04½-05¾	3.04-05	2.45¾
January ..	3.04¾	3.05½	2.44¾
May	3.05¾	3.07¾	2.47

KANSAS CITY SEED MARKET.

KANSAS CITY, Jan. 3.—So far as it has progressed, the new year looks bright for the field seed trade. Dealers have not had sufficient time to readjust prices. Demand is not expected to develop fully before the end of January or until February. Deliveries on old contracts are going on, especially in alfalfa seed. There are occasional sales of blue grass seed. Inward movement of all kinds of seeds is light, though cane, millet and Sudan should be coming freely. Farmers are bullish on the forage seeds and marketings this season have been less than usual. The seeds are bound to come and advanced prices probably would result in a free movement.

Carlot prices of seeds, per cwt., are quoted f. o. b., as follows: Alfalfa, \$15 @22; blue grass, \$17@28; timothy, \$6 @6.50; red clover, \$25@30; sweet clover, \$10@12; Sudan, \$5@5.50.

Local dealers are bidding \$1.50 to \$3 for millet seed, with the best price for German. Prices offered farmers for cane seed range from \$1.40 to \$1.75. Soy beans from first hands are quoted at \$1.50 to \$2.25 per bushel.

TOLEDO SEED MARKET.

TOLEDO, O., Jan. 5.—Clover seed advanced thirty to thirty-five cents the past week. Seed dealers and investors were heavy buyers of the cash and futures. Dealers were removing hedges due to sales of cash seed and the investors were taking the opportunity to get into the market before prices were forced above the twenty-dollar level. Foreign seed is coming into the market and while large amounts were delivered on December it is thought it will be even larger during January and February. The quality so far has been excellent but reports from over there indicate that the best clover has been shipped and the inferior grades are now on the market.

Offerings of cash seed do not have to go begging as dealers here appear to be anxious to get them. The futures have been well absorbed also on the occasions when they were for sale. Some trading over from the nearby to the distant futures has been done by dealers the last week. Fresh hedging sales against the purchases of foreign seed have been eagerly gobbled up by the bulls.

Clover trend is entirely a question of demand during the spring months. Should it be up to the expectations of dealers there is little doubt but that an advance could occur.

Receipts for the past week were 266 bags; shipments 449 bags. Alsike and timothy were also stronger because of an improvement in the cash demand. Still further improvement will be welcomed as stocks here are enough to take care of a liberal trade.

BARKEMEYER Grain & Seed Co.

FIELD SEEDS

CHICAGO, ILL.

The Los Angeles Seed Co., Los Angeles, Calif., recently completed an addition of 120 ft. to their warehouse. The new arrangement provided entrance on two streets.

The Binding Stevens Seed Co., Tulsa, Okla., has purchased the two-story brick building across the street from their present location and will remodel it for a retail salesroom and offices.

Clarence K. Jones, secretary of the Wholesale Grass Seed Dealers' Assn., has ready for distribution copies of the International Seed Trade Rules adopted at the November meeting of the association.

Joseph Wagner, a pioneer seed dealer at Beaver Dam, Wis., has sold his store and seed interests to I. K. Mayr of Waukesha, Wis. Mr. Wagner was in the seed and florist business for nearly 50 years.

The first of a series of clipping sheets which will be distributed monthly by the Wholesale Grass Seed Dealers' Assn. is now off the press. It contains interesting articles of practical value to seedsmen, and is well illustrated. James H. Burdett, 130 N. Wells street, Chicago, is editor of this new service inaugurated by the Wholesale Grass Seed Dealers' Assn.

BUSINESS NEWS**HESS GRAIN DRIERS.**

Among recent orders for Hess grain driers, as reported by the company, are the following:

The Santa Fe Railroad Elevator at Argentine, Kans., to be operated by the Grain Marketing Company, contracted for the installation of a No. 12 four-unit drier. This will handle from two to three thousand bushels per hour, and is similar in construction to the Hess drier installed for the B. & O. Railroad at Baltimore. A separate drier house will accommodate the equipment, one of the largest type Hess driers. Its construction provides for unusual daylight arrangements on both sides of the building which are practically all metal windows. This gives easy access to all parts of the drier. Among its interesting features is automatic dust collection system, consisting of grates in the floors at proper locations with hoppers below through which the dust passes into the regular dust collection system of the elevator. Large capacity bins are located above each drier.

The new plant of the Northwest Elevator Co. at Fort William, designed and erected by Barnett & McQueen, includes a one-section Hess drier. It will be remembered that this elevator company owned the house at Port Arthur which burned a year or so ago.

A NEW DEPARTMENT.

The Illinois Farmers Grain Dealers Ass'n under the able direction of Lawrence Farlow, its secretary, has organized an audit department to be operated in connection with the association. Harry Heiser of Bloomington, formerly on the auditing staff of the American Auditing Ass'n, has been made head of this new department. Mr. Heiser is thoroughly familiar with the work in hand, having spent time in auditing work as well as one time being manager of a farmers' elevator.

BOOKS RECEIVED.

A complete Year Book covering statistics of all grain and grain product industries, flour milling, sugar and alcohol production of France and her colonies is now off the press. It contains in addition the names and addresses of grain dealers, millers, and manufacturers of machinery used in these industries. The book is known as the *Registre of Industries and Commerce in Grains, Grain Products, and Milling*, and is published by the Office de Publications Commerciales, 167 Rue Montmartre, Paris.

NEW BOOK ON RADIO.

Those interested in radio whether they have a set or are contemplating buying one will find much information and data of value in a book just published by the Norman W. Henley Publishing Co., 2 W. 45th St., New York City. The book is called *Henley's Work-*

able Radio Receivers. The price is \$1 a copy.

Introductory chapters give useful information such as vacuum tube characteristics, how to read circuit diagrams, etc. Later chapters discuss and illustrate various types of receivers ranging from the simplest crystal sets up to the 8-tube Super Heterodyne.

The authors of the book are John E. Anderson and Elmer H. Lewis. Mr. Lewis is well known, and anything on radio coming from his pen is authoritative.

CHASE BAG MERGER.

Formal announcement was made last week of the new \$12,000,000 corporation, the Chase Bag Co., a few details of which were published in an early issue. Elliot K. Ludington, of the Chase Bag Co., St. Louis, is president; J. W. Falconer, of the Northern Bag Co., Minneapolis, chairman of the board; L. B. Falls, treasurer; George D. Adams and Chas. R. Decker, vice presidents; Duane Hall, secretary, and F. H. Ludington, assistant secretary. The managers of the factories are: American Bag Co. branch, Memphis, Tenn.; B. Deutch, manager; Buffalo Bag Co., B. C. Benington, manager; Chase Bag Co., St. Louis, Mo.; William Murdoch; Chase Bag Co., Kansas City, B. S. Jones; Cleveland-Akron Bag Co., H. L. Condon; Milwaukee Bag Co., H. L. Hunter; Northern Bag Co., Minneapolis, J. W. Falconer.

Sales offices will be maintained in Chicago, Detroit, Cincinnati, Louisville, Dallas, Denver and Toledo. The main office of the company will be in New York. The various offices of the several bag companies in Chicago have been combined in a single office in the Temple building. Chas. R. Decker is manager of sales and located in Chicago. The main office will be in New York City in the Woolworth building.

DEATH OF FRANK C. JONES.

One of the leaders in Eastern feed trade circles, Frank C. Jones, of Bullville, N. Y., passed away Monday, Jan. 5th. He had been recognized as a straight thinker on trade problems, serving for years in official capacity as secretary of the Eastern Federation of Feed Merchants. His funeral held on Wednesday, January 7th, was attended by F. F. Brown, secretary of the American Feed Manufacturers' Ass'n, and other business associates of Mr. Jones.

CHICAGO GRAIN STOCKS.

Wheat stocks in all positions in Chicago decreased 1,886,000 bu. last week, and rye 296,000 bu., oats 424,000 bu., barley 48,000 bu. Corn increased 950,000 bu. Details follow, last three ciphers omitted, except in the totals:

	Public.	Private.	*Total.	Last yr.
Wheat	3,911	5,237	9,148,000	17,219,000
Corn	2,441	5,773	8,214,000	3,641,000
Oats	4,856	15,634	19,490,000	3,525,000
Rye	2,623	388	3,011,000	1,438,000
Barley	385	385,000	376,000

*A float, 962,000 bu. wheat and 1,151,000 bu. oats.

Official reports of crop out-turns indicate that Poland may be definitely eliminated as a source of cereal supply to neighboring states, and may even be compelled to import a fair quantity of bread grains.

CUT IN RUMANIAN CORN CROP.

A cut of 35,000,000 bus. from the previous forecast of the Rumanian corn crop is reported to the Department of Agriculture in a cablegram from the International Institute of Agriculture at Rome. The new crop is now placed at 122,000,000 bus. compared with 151,000,000 bus. produced last year, and 193,000,000 the average production estimated for the same territory in 1909-13.

This reduction is significant, inasmuch as preliminary forecasts from the Balkan countries had all shown increases over last year. The aggregate of preliminary forecasts of corn for Bulgaria, Hungary and Yugoslavia is 214,000,000 bus. compared with 157,000,000 produced last year and 199,000,000 bus. the estimated production for the same territory in 1909-13.

Wheat production in Rumania is placed at 74,000,000 bus. compared with 102,000,000 last year and 159,000,000 the estimated production for the same territory in 1909-13.

CANADIAN VISIBLE.

Canadian visible supply of wheat increased 1,500,000 bus.; oats, 244,000 bus.; rye, 19,000 bus.; barley, 93,000 bus. These statistics represent terminal stocks only.

	Jan. 3, 1925.	Dec. 27, 1924.	Jan. 5, 1924.
Wheat	31,448,000	29,948,000	48,322,000
Oats	16,682,000	16,438,000	10,048,000
Rye	1,739,000	1,715,000
Barley	5,952,000	5,859,000	2,026,000

SEED MERCHANT DIES.

Funeral services for Samuel Richardson Chambers, 74 years old, president of the Chambers Seed Company, who died Jan. 3, were held in Louisville, Ky., Jan. 5, at the residence, 1400 South Third street.

Mr. Chambers long had been in business in Louisville. He first was in the seed business for himself and later with Fred Lewis as Lewis & Chambers. At his death, Mr. Chambers was associated with his son, Kirby L. Chambers, in the Chambers Seed Company.

The Saskatchewan Coöperative Elevator Co., the largest of the farmers' grain handling organizations in the Province of Manitoba, announces that it will open offices in Liverpool and London shortly.

CHANGE IN ARCADY EXECUTIVE STAFF.

At a recent meeting of the Board of Directors of the Arcady Farms Milling Co., Arthur Meeker was made Chairman of the Board and W. B. Pearson was elected President.

Pleasanton, Stockton, Bakersfield, San Francisco, Sacramento, Petaluma, and Modesto. The Association will be called the California Hay, Grain and Feed Dealers' Assn.

COTTON SEED MEAL.

KANSAS CITY, Jan. 3.—The wonderful western feeding demand for cotton seed meal and cake resulted in defaults of many thousand tons on December contracts made by Oklahoma mills. A strong situation still prevails, affecting Texas, as well as Oklahoma, mills. Arkansas is the cheapest source of supply, with plentiful offerings westward, owing to lack of demand eastward. Little Rock mills are selling at \$39@40 a ton, f. o. b., the basis being below that of Texas for the first time in many years. Texas is asking \$40; Oklahoma, \$41@41.50. Kansas City dealers are selling carlots at \$45.60 and ton lots at \$49.60. The price of corn is \$43 a ton in Kansas City and \$45.25 in Chicago. These figures reflect the relative cheapness of cotton seed products, with their high protein value. Handlers in Kansas City say the demand for meal and cake slowed up during the holidays, but they are looking for renewed orders in the new year. Sales thus far this season have been 50 per cent larger than a year ago.

COTTONSEED MEAL QUIET.

MEMPHIS, TENN.—The meal market is quiet, and not much change in the price is anticipated any time soon. There is some accumulation in the hands of the mills but meal is moving right along and seed have advanced considerably since opening of the season. Present prices are close to the bottom for the year.—F. W. Brode Corporation, J. L. Brode, Vice-President.

FEED CONDITION.

ANDERSON, IND. — Nearly everyone seems to be well loaded up with feed aside from corn and corn products in this territory. Corn in this locality will not make over 25 per cent of an average crop that is in marketable shape. The moisture in the best of corn in this locality runs about 30 per cent.

Hay is cheap, running about \$12 per ton on track. The hog crop is small compared to last year and farmers are disposing of them just as quick as they can get them in shape for the market as continued feeding is sure to register a big loss.—The Union Grain & Feed Co., G. A. Lambert, Mgr.

FEED TRADE BRISK.

GOSHEN, IND.—Feeds of all kinds have had a brisk sale throughout December and we believe that farmers will continue buying pretty good through the rest of the season as they realize the importance of keeping their stock well fed. Prices have been advancing right along and you can tell as well as we can whether or not there will be any reduction within a month or two.

All grains have been moving slowly through December, caused no doubt by the cold weather and steadily advancing prices. Farmers, of course, want to get all they can for their grains and we don't blame them as they have to work hard for all they get.—The Goshen Milling Company.

CALIFORNIA FEED DEALERS ORGANIZE.

A meeting of dealers from various sections of California was recently held in Modesto, Cal., for the purpose of organizing a state association. A temporary organization was perfected with Henry G. Turner, of the Grange Company, Modesto, as chairman. The following directors were elected: D. M. McCauley, of the Russell & McCauley Co.; C. E. Berringer, of the Berringer & Russell Co.; A. W. Scott, of Scott & Company, all of San Francisco; Gail McDonald, of the Western Hay & Grain Co., Los Angeles; Arlo V. Turner, of the Grange Co., Modesto; L. V. Corvell, of the G. P. McNeer Co., Petaluma, and G. W. Furman, of the Southern Pacific Milling Co., Santa Barbara. Dealers were present at the meeting from Los Angeles, Salinas Valley, San Jose,

In linseed meal there is a limited trade. This has been the case throughout the fall and winter, so far as the Southwest is concerned, because the product is out of line with cotton seed meal and cake. The price quoted by dealers this week was \$51.80 a ton for carlots, the same as a week ago. Ton lots were \$4 above carlots. The Minneapolis mills asked \$47.50 for carlots. No change was noted in the tankage market, though an advance had been predicted. Manufacturers sold carlots at \$60 a ton and ton lots at \$65. Demand continued to equal the supply. Meat scrap for poultry sold freely at previous prices, \$70 for carlots and \$75 for ton lots.

OIL MEAL MARKET.

The Oil Meal market is higher than last week and demand is excellent from scattered sources. There are no big round lots being purchased either by the speculative trade or by the feed manufacturers, but consistent buying of one, two and three car lots has kept up with surprising regularity.

The mills are not exactly oversold but on the other hand in Chicago and Minneapolis especially, they are sold sufficiently far to keep in the clear on their daily production, and it seems as though each time shipping directions begin to get low a flood of buying orders comes in and takes the slack out of the market.

On the other hand it is interesting to note that the eastern markets are relatively lower than the western markets. Under normal conditions the Minneapolis market should be \$1.00 to \$2.00 under Chicago and Buffalo markets should be from \$1.00 to \$2.00 over Chicago. At this writing the Minneapolis market is about the same as Chicago and the Buffalo market is \$1.50 under us. Of course, we are unable to ship meal very far from Chicago into the east but on the other hand we are able to cover a good portion of the west because of the relatively high values prevailing in Minneapolis. Export demand continues quiet.—The Bertley Bulletin, Chicago, Jan. 3.

FEED MARKETS.

MILWAUKEE.

Milwaukee, Jan. 3.—There was a slight upward tendency noticeable in feed quotations throughout the past week, but the closing was generally firm and unchanged. Very slight demand was felt in this mar-

ket and movement was also negligible. All dealers agree that the consumer is yet to enter the market, but predict that he will soon be forced to buy and that prices will show further advances at that time. Current quotations are: Winter bran, \$33.20 @33.70; spring bran, \$33@33.50; standard middlings, \$34@35.50; flour middlings, \$33@38.50; red dog, \$42.50@43.50; rye feed, \$31.50 @32.50; old process oil meal, \$48.50@49.50; cottonseed meal, \$43.50@47.50; hominy feed, \$48@48.50; reground oat feed, \$13@14; gluten feed, 30 days, \$40.80; in 100-lb. sacks, carlots, f. o. b. Milwaukee.

NEW YORK.

New York, Jan. 3.—While business was naturally slow in the feed markets, prices were decidedly firm with a premium of \$2 a ton for February delivery asked on all Western grades. Despite the extreme cold and heavy snows through the West, the consuming demand was rather disappointing. City bran is quoted at \$38, middlings \$40 and red dog \$50, while Western bran rules around \$38.60, standard middlings \$41.60 and red dog \$49.50@50 per ton.

CINCINNATI.

Cincinnati, Jan. 3.—The mill feed market was firm in tone during the week and prices for bran and standard middlings from 50c@1 per ton higher, but the demand was slow and buyers more reluctant to pay the prices asked. Quite a number of cars on tracks were carried over from day to day and some willingness was shown by sellers to allow concessions when sales were possible, but little business resulted. The high prices asked by mills was holding up the quotation. There was little inquiry for deferred shipment. Quotations represent 100-lb. sacks: Soft winter wheat bran, \$35.50@36.50; hard winter wheat bran, \$35.50@36; standard middlings, \$38.50@39; soft wheat middlings, \$39.50@40; gray hard middlings, \$39.50@40; mixed feed, \$37@37.50; No. 1 alfalfa meal, \$29.50@30; hominy feed, \$51@52.

DULUTH.

Duluth, Jan. 3.—Trade in feeds was more active on this market during the last week, a good demand coming from loggers over the territory. Millfeeds were strong, gaining from 50c@1 and, but millfeeds weakened from \$1@1.25. Closing prices per ton follow: Bran, \$32; shorts, \$34; red dog, \$43; Boston mixed, \$34; flour middlings, \$37.50; ground oats, \$37; No. 1 ground feed, \$43.50; No. 2 ground feed, \$41.75; No. 3 ground feed, \$40.25; cracked corn, \$46.75; coarse cornmeal, \$46.75.

PHILADELPHIA.

Philadelphia, Jan. 2.—There is a good demand for feedstuffs and with light offerings prices are firm and a shade higher. Quotations are for carlots in 100-lb. lots at cost per ton: Soft winter wheat bran, \$41 @42; winter middlings, \$44@46; spring bran, Western shipment, \$39.50@47; standard wheat middlings, W. S., \$42@43; flour middlings, W. S., \$44@46; red dog, W. S., \$51@52; low grade flour, W. S., \$59@60; rye middlings, W. S., \$38@55; reground oats feed, \$16@27; fine yellow hominy, W. S., \$53@54; fine white hominy, W. S., \$54 @55; cottonseed meal, 36% protein, W. S., \$45@46; cottonseed meal, 41% protein, W. S., \$47.25.

MEMPHIS.

Memphis, Jan. 3.—Quietude still prevails in all branches of the feed market, without any important change in quotations. Early in the week some cars of millfeed were here on track and because charges were piling up wheat bran sold as low as \$33 and \$33.50, but when they were gone nothing offered at less than \$34 and \$34.50. Gray shorts quotable at \$39, with some asking as high as \$40. Cottonseed meal quiet and steady, with 41 per cent at \$39 @39.50 and 43 at \$41@41.50. Alfalfa meal in limited demand, but undertone firm and No. 1 on track or 30 days' shipment at \$28 @29. Buying still restricted.

BALTIMORE.

Baltimore, Jan. 3.—The undertone to the spot feed situation is firm as a result of strong advices from primary points of production, coupled with limited stocks in first hands here and a fair demand for sacked bran and middlings. Hominy feed is holding its own in price. Gluten feed unchanged. Alfalfa meal steady. Dried beet pulp in fair demand in a jobbing way. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$38@38.50; Western middlings, per ton, 100-lb. sacks, \$39@39.50; city mills winter wheat bran, per ton, 100-lb. sacks, \$39.50@40; hominy feed, per ton, \$48@49; gluten feed, per ton, \$47.50@48; dried beet pulp, per ton, \$38@39; alfalfa meal, per ton, \$32@33.

ST. LOUIS.

St. Louis, Jan. 5.—Millstuffs: Wheat feed firm, but demand quiet and business light. Sales: 1 track car hard bran at \$33 local, 1 car do local at \$32.50 and 1 car do to go out at \$33, 1 car do to go out at \$33.10; also 1 car bran (direct sale by mill) at \$34; gray shorts quoted nominal at \$37. Oat-feed held at \$14; last sale white hominy feed at \$46 bulk.

WEEKLY LINSEED REVIEW.

New York, Jan. 5.—United Kingdom: The linseed situation in the United Kingdom during the past week has remained firm. Plata seed in nearby positions is meeting with a better inquiry, but sellers are rather reserved.

Linseed oil rules firm with a good demand for this article in all positions. It is reported that America again bought fair quantities.

Cotton oil displays a firm tone, but the recent holidays tended to restrict business.

India: The present condition of the crop in this country is considered good, and the future condition depends on the Winter rains. The first official estimate of the linseed acreage for the country places the figure at 2,845,000 acres compared with 2,575,000 acres last season. Shipments of linseed this week amount to 52,000 bushels compared with 140,000 bushels the previous week.

Argentina: While the interior movement of seed in this country is gradually increasing, and Port stocks are enlarging, the clearances still continue rather moderate. Markets for seed remain steady to firm with a fair foreign demand in evidence.

MINNEAPOLIS LINSEED MARKET.

MINNEAPOLIS, MINN., January 3.—There is very little change in the North-western markets in the last week. May seed in Duluth closed today at \$3.08, an advance of two cents, and Minneapolis \$3.08½, which is a half cent per bushel less than a week ago. Argentine on the other hand is 5½ cents per bushel higher than last week. Weather conditions in Argentine continue favorable for harvesting of the flaxseed crop. Argentine shipments to December 26th are 14,435,000 bushels to the United States, and 43,700,000 bushels to Europe, or a total of 58,135,000 bushels, with visible supply of 2,200,000 bushels.

Indications are that the Argentine crop will probably be 20,000,000 less this year than last. Europe used more Argentine seed in 1924 than the growing crop in that country by at least 3,000,000 to 4,000,000 bushels. With only a few million bushels left in this country the United States must go to Argentina for 8 or 10,000,000 bushels, so if Europe needs anything like as much this year as last there will certainly be a scramble for the Argentine crop now being harvested. This statement is based on the supposition that the United States will continue to use flaxseed on the same scale as last year. There is some possibility that these high prices may curtail demand.

Undoubtedly the shortage of seed for 1925 will be acute, for our crop is largely absorbed and we must go to the Argentine for any further supplies. Europe has taken one-fifth of our wheat crop. In fact, we will only have a limited amount more to sell, so wheat is likely to continue on a very high basis, and flaxseed prices will undoubtedly be influenced to a large extent by this fact. Europe has the buying habit now, and will probably continue to buy flaxseed in 1925 on the same scale as 1924.—Archer-Daniels-Midland Company.

BLACKSTRAP MOLASSES.—A quotation of 14 cents per gallon f. o. b. Gulf points has been the market for several months; demand strong.

FEEDSTUFF SITUATION.

All markets are slightly easier at this time than at the same time of the previous week. Grains have had a slight reaction and, as has been the custom during the late Fall and the early Winter, millfeeds have sympathized, bringing out more sellers' interest than buyers, and what is bought is for immediate requirements, small lots, over widely scattered territories. Northwest and Southwest millfeeds are limited in their destinations to points west of Buffalo, as the Buffalo milling center, together with Canada, are supplying fairly well all wants of buyers east of Buffalo in the New England states and as far south as Baltimore points.

MINNEAPOLIS.—Bran, \$31.50; standard middlings, \$34; flour middlings, \$37; red dog, \$41.

CHICAGO.—Bran, \$34.10; standard middlings, \$36.60; flour middlings, \$39.60; red dog, \$43.60.

KANSAS CITY.—Bran, \$30; gray shorts, \$33.

ST. LOUIS.—Bran, \$32.40; gray shorts, \$35.40.

ALFALFA MEAL.

A limited number of sellers, this governed quite largely by the price of hay, for the price that alfalfa meal brings at the present time does not allow sufficient profit for the alfalfa miller to pay present prices of hay and mill it at a profit. Consequently, very few of the alfalfa millers are anxious sellers and those who are sellers are only contracting for meal to be milled from their present stocks of hay and not much beyond 30 to 60 day shipment. Nominally quoted second hand bag basis, choice, \$30; No. 1, \$28.75; No. 2, \$25.75 Chicago basis. Fine ground grade \$3 per ton more in each case.

REGROUND OAT FEED.—Mills are not anxious sellers and are not selling much as their prices are higher than resellers. Resellers are asking from 50c to \$1 per ton less than mills. Nominally quoted reground oat feed, \$13; unground oat hulls, \$14; for prompt 30 to 60 day shipment.

LINSEED OIL MEAL.—A little easier feeling particularly on the part of resellers for linseed oil meal. More sellers' interest than buyers', and selling at slight discounts, than the previous week. Nominally quoted mills \$48; resellers \$47.50 to \$48 Chicago basis. Resellers \$47 to \$47.50, mills \$48 to \$48.50 Minneapolis basis. In bulk, where available, \$2 per ton less.

GLUTEN FEED.—Very brisk demand for gluten feed, and manufacturers are pressed to fill orders. This demand is principally from retailers, but mixed feed business also has picked up slightly. Quotations follow: Gluten feed in bulk \$38 a ton, sacked \$40.80; gluten meal of 40 per cent protein \$46.80 in sacks, \$44 in bulk.

DRIED BUTTERMILK.—Demand is about steady, and creameries report a better inquiry. Most future contract business is for early delivery, not much being booked beyond 60 days' shipment. Quotations are as follows: Creamery in carlots at 6½c per lb. and L. C. L. up to 8 cents.

COTTONSEED MEAL.—Market continues slow with no appreciable change noted in the past week. Supply is in excess of demand, and until stocks are reduced or demand increases materially, the market will remain dull. Meal is nominally quoted for 43 per cent protein, Chicago basis, at \$46.

PACKERS' PRODUCTS.—A good, normal business is now being done in these products, and an even better demand later is anticipated. Prices are as follows: Meat scraps in carlots f. o. b. Chicago, \$65@70 a ton; 60 per cent protein digester tankage, \$60; raw bone meal, \$55.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago: Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35 @50 per ton, standard units of 50 lb., burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

Alfalfa Department

AGRICULTURAL GYPSUM AND ALFALFA

By Prof. George A. Olsen.

CONSUMERS of the various farm crops are interested in the quality of the grains, fodder, and live stock sold in the markets. As a matter of fact the buyers are frequently better able to judge the quality of the products than are the farmers for the reason that the farmers generally see only what they and their neighbors produce. The merchants and consumers on the other hand, are in a position to judge what the farmers in general produce. They observe that there are striking differences in the quality of the grains, hay and the various truck crops.

Quality in the sense of the defined and restricted meaning implies selection of the choicest. It is the discrimination employed by the merchants and ultimately the consumers. The factors which determine quality vary depending on the product and its use. However, general appearance, uniformity and intensity of color stand out prominently in determining choice. In other words, the product which looks the best is sought because it is relatively easy to sell.

Gypsum Improves Alfalfa Color.

Alfalfa hay, for example, of the lighter shades of green is not sold as readily as the dark rich green colored hay. It may be classified as being bleached, injured by rain or damaged in some other manner. Wheat comprising a mixture of starchy and vitreous appearance. Similar comparisons classify the grades of fruit, vegetables and other farm products. By means of comparisons selections are made.

It has been found that agricultural gypsum improves the color of alfalfa and various other legumes. Thus what may have been classified as damaged alfalfa in reality may have been off colored due to a lack of sulphate sulphur in the soils. Alfalfa lands treated with agricultural gypsum stand out prominently as a contrast to the off colored alfalfa grown on adjoining untreated alfalfa land. This plainly shows that off color may be due to a lack of sulphate sulphur in the soil. It also shows you can find a way of improving the appearance of the alfalfa so that when cured as hay it will be rich in green color.

Of equally as great importance have been the discoveries made by the Oregon and Washington experiment stations that yields of alfalfa have been increased through the use of agricultural gypsum. Thus the treatment has proved very profitable from the standpoint of production. These institutions have also found that the protein content of the alfalfa grown on the treated soil is usually higher than that found in adjoining untreated fields of alfalfa.

Yield Increased.

The Idaho experiment station has also found that agricultural gypsum increases the yields and enhances the protein content of alfalfa. The Montana experiment station recently reported increased yields ranging from 75 to 100 per cent and these crops have contained 27 to 35 per cent more protein than the legumes which were not subjected to the agricultural gypsum treatment. In a series of tests conducted by the Wisconsin experiment station gypsum increased the protein content as well as the yield.

Investigations continued at the Washington experiment station also show that agricultural gypsum not only improves the alfalfa, but the land which has received this treatment is superior, for the growing of wheat, to alfalfa land not treated. Both the yield and protein content of the wheat are increased.

The vitreous appearance of the wheat is also more uniform. What holds good for wheat also applies to other cereal crops. These findings prove that there is an indirect good effect from applying agricultural gypsum on lands in alfalfa, clover, etc. They also show that products can be raised on farms which possess the high quality desired by the consuming public. These are the products which are easy to sell.

ALFALFA MEAL MARKET.

KANSAS CITY, Jan. 3.—New year interest in alfalfa meal is developing slowly. There is a firm attitude on the part of holders, based on belief in an expanding demand, which is expected from this time forward. Kansas City manufacturers are encouraged by the disposition of Colorado mills to quote stronger prices. The market here on carlots, ton, f. o. b., is about as follows: Choice, \$28@29; No. 1, \$26@27; No. 2, \$23; No. 3, \$21@22.

Several instances of advanced prices were noted in the market for grain-molasses feeds, due to the fact that corn reached the top level of the season. Demand for poultry, dairy and horse feeds was good, with prospects for liberal new-year sales. The quotations on carlots, per ton, f. o. b., Kansas City, were: Dairy feeds, \$36@49; cattle feeds, \$38@47; hog feeds, \$45.50@54; pig meal, \$73; horse and mule feeds, \$33.25@48; alfalfa-molasses feeds, \$27.50@34; scratch poultry feeds, \$49.50@56.25; mash poultry feeds, \$54@81.50.

MINNESOTA ALFALFA PRODUCTION GROWING.

From 2,525 acres in 1910 to 196,396 acres in 1924 is the story of the advance of alfalfa in Minnesota. In the dairy sections and in the small grain sections of the state have come the biggest increases in acreage. Ottentail has the largest number of acres in alfalfa of any county, but Carver county leads in the number of acres as compared with the total area of the county. The cost of producing alfalfa in 1924 varied from \$16.14 per acre in Owatonna county to \$12.67 in Windom county. The cost of producing clover and timothy hay on these same farms was \$12.29 and \$11.06 per acre. However, alfalfa yielded an average from 2.1 to 2.4 tons per acre as compared with yields of 1.3 and 1 ton for the tame hay. The cost per ton for alfalfa was \$7.69 and \$5.28 per ton as compared with \$9.45 and \$11.06 per ton for the tame hay. The December price per ton on the farm was \$16 for the alfalfa and \$9 for the tame hay.

ALFALFA AFTER SWEET CLOVER.

Although a good crop of sweet clover prepared the way for alfalfa it is often hard to get a stand of alfalfa in the fall after the second year's growth has died down, due to the fact that the sweet clover uses up much of the available moisture and food supply. However, no other crop will provide inoculation for alfalfa like sweet clover.

MORE ALFALFA NEEDED IN THE EAST.

Although 65 per cent of the cattle of the United States is found in the East, 95 per cent of the timothy and only 14 per cent of the alfalfa of the country is raised in this section. Alfalfa supplies protein in a cheap form, and it is surprising that more of this valuable legume is not raised in the East. Lime also is supplied in alfalfa in an easily assimilated form for cattle. A ton of alfalfa removes from the soil the equivalent of 91 lbs. of limestone, sweet clover hay 100 lbs., red clover 88 lbs., and timothy only 18 lbs.

ALFALFA SUPPLANTS RED CLOVER.

During the past few years, there has been gradual use of alfalfa and sweet clover in the place of red clover in the rotation. This makes alfalfa strictly a two-year crop. Now, instead of the old rotation of corn, oats, wheat and clover, it is corn, oats, wheat, and alfalfa. If a pasture instead of a hay crop is wanted, or if the land is not in good healthy condition, sweet clover is used.

EXPORTS OF OILCAKE AND MEAL.

Latest figures available up to December 1, 1924, indicate that exports of linseed and cottonseed cake and meal were heavy during the month of November. Total exports of cottonseed cake were 114,455,906 lbs.; meal, 65,033,604 lbs. Denmark was the largest importer of American cottonseed cake and meal with 69,252,400 lbs. of cake and 2,544,640 lbs. of meal, followed by Germany, Great Britain, Sweden, Norway and Belgium in the order named. The largest importer of linseed products was Netherlands with 39,136,011 lbs. of linseed cake and 5,970,342 lbs. of meal, followed by Belgium and Great Britain.

CERTIFY SOY BEANS.

A considerable business in certified soy bean seed is being done by the growers of Champaign County, Ill., especially of the Manchu type. Seed from this county took the sweepstake prize at the International Grain and Hay Show in December of last year.

VANCOUVER HAS AMPLE GRAIN STORAGE.

Facilities for storing grain in Vancouver, B. C., are now large enough to permit free issuance of permits by railroads due to the enlarged storage capacity of the Harbor Board and private elevator companies.

RELIABLE Standard Blue Flame HOVER

"Foolproof and Safe"

Has newest improvements. Saves time, money and trouble. Nothing to wear out. Chicks grow faster and stronger. Built of galvanized steel. Special burners give steady flow of oil and even flame. Our 1923 style is perfection itself.

Hay Department

MESILLA VALLEY HAY SITUATION.

ANTHONY, N. M.—The Valley has much less alfalfa stored than usual at this time of year due to large acreage being plowed for cotton. It is the opinion of dealers that 60% will be consumed at home.—*Price & Rawlings, by J. D. Rawlings.*

CROP BIG—QUALITY GOOD.

DOUCETS LANDING, P. Q., CANADA—We have big crop in my country. The hay is very good and we can sell hay at price very cheap. The price now is \$8, \$9 and \$10 for the best hay, ton f. o. b. cars. We have enough grain for the consummation this year.—*Joseph Bourgois.*

CHICAGO HAY NOTES.

Contrary to the generally accepted idea of what a holiday market should be, prices during the past week were firm and on some grades slightly higher. Receipts were extremely light, and buying was sufficient to move all offerings. There was an especially urgent demand for packing hay and straw, and also shipping inquiry for clover and clover mixed. Prairie hay was scarce. On the last day of 1924, receipts were the smallest of the year, indicating a very light

movement from the country. With the first of the year demand now at hand, a firm-to-higher market is looked for. Consumption is heavy, and all good grades of tame hay should find a ready sale.

Bridge & Leonard report country loading almost nil, and many inquiries for tame hay, Western and Southwestern prairie, and marsh hay. Choice alfalfa is wanted. There is a big inquiry for rye straw, and also oat and wheat. Prices have moved up from 50 cents to a dollar.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

All hay harvested in Nebraska in 1924 was 5,980,000 tons, as compared with 6,350,000 in 1923.

The Oklahoma crop of tame hay in 1924, as finally reported by the State Board of Agriculture, was 2,017,400 tons, as compared with 1,498,000 in 1923. Value was \$28,244,000 on the basis of prices December 1. Wild hay made 505,000 tons, against 510,000 a year previous, with a value of \$4,924,000.

The Missouri crop of tame hay in 1924, as reported officially, was 4,820,000 tons, or 1.39 tons per acre. A value of \$57,840,000 was placed on the crop. Prairie hay made 157,000 tons, or 1.22 tons per acre; value, \$1,334,000. In addition, Missouri farmers saved 92,000 tons of cowpea hay and 161,000 tons of soy bean hay. The cowpea hay made

North & Company

Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

one ton per acre and the soy bean hay 1.25 tons.

The annual election of the Kansas City Hay Dealers' Association failed to develop any fresh interest this week. It was taken for granted that Newton C. Campbell would be re-elected president. Mr. Campbell announced that he would accept the office for another year only if it were tendered to him unanimously. A light vote is expected for all officers.

Kansas City received a total of 25,801 cars of hay in 1924, the largest since 1920. There was a gain of 3,953 cars over the 1923 total. Arrivals of straw were 459 cars, or one less than for 1923. New-crop prices were the lowest of the year in all kinds of hay. The top averages for the twelve months on all grades in each variety were recorded as follows: Alfalfa, \$20.99, in January; prairie, \$13.40, in January; tame hay other than alfalfa, \$18.85, in February. Alfalfa showed its bottom average, \$13.97, in June; prairie, \$9.37, in August; other tame hay, \$12.33, in August. Straw sold \$6.90 in June to \$9.50 in December.

HAY CHEAPEST FEED.

DECATUR, IND.—Hay is the cheapest feed on the market. Sooner or later feeders are going to awaken and use as much hay as possible on account of the high prices of grain and mixed feed. This should strengthen the market. The demand has been fair only for the last thirty days, and has been very slow around the holidays.

The bulk of the hay through this section is timothy. Quality good. Clover scarce. No. 1 clover very scarce. Quite a little No. 1 clover-mixed hay. We note an improved demand for the clover mixtures. Farmers are not free sellers, as they want more money. However some hay moving as a farmer needs money as well as anyone else. We believe 70% of the hay still in the farmers' hands. Bad weather, corn shortage, high prices of wheat and oats will cause more hay to be consumed on the farm than usual. We think the farmer should have \$15.00 per ton for his hay. This price is \$2.00 above present paying prices and the baling of \$2.00 per ton must be deducted.—*Burk Elevator Co.*

HAY MARKET REVIEW.

Continued cold weather with snow over a large part of the United States caused a more active demand for hay during the week ending January 3, according to the Department of Agriculture. Receipts at most markets were very light, and all offerings of the better grades of hay were readily taken. The eastern markets were relatively less active than those of the central west. At Boston the demand was only moderate, and there was some accumulation at the various railroad terminals of the medium and lower grades. Very little No. 1 timothy was offered, but the demand for this grade was limited. The market at New York advanced about \$1 per ton toward the close of the week as demand became more active and the supply decreased.

Receipts at Pittsburgh were very light, and were easily replaced at the previous week's prices. The accumulation at Cincinnati was well cleaned up during the week, and market prices were but little changed. Best grades brought moderate premiums. The principal demand was from the South where stocks had been allowed to run down. Local demand was of small volume but winter weather brought in larger orders for January delivery. Receipts were also very light at Chicago, and reports of

WESTERN UPLAND ALFALFA AND TIMOTHY

country loadings indicated continued light receipts. The market ruled very firm for all kinds of hay although quotations were practically unchanged during the week.

There was some improvement in the demand for alfalfa hay. Mills were in the market at Kansas City, although their bids were below current prices. Dairies and feeders were the most active buyers, and there was a good shipping demand from the South and Southeast for the better grades of alfalfa. Receipts were light both at Kansas City and Omaha.

The strength in the market for timothy and alfalfa hay was reflected in a better demand for prairie, receipts of which were also relatively light at most markets. Stockyards were good buyers at most of the central western markets.

HAY MARKETS.

NEW YORK.

Dec. 31.—The New York Hay Exchange Assn. has issued the following weekly report with latest quotations:

	Hay.	Straw.
Receipts for week, tons	611	32
Receipts last week	1,004	28
Receipts from Sept. 1.....	25,032	309

With the gradual decline in receipts, trading was stimulated in anticipation of a more active demand after Jan. 1, and in consequence the situation throughout has improved considerably over the week. Offerings have been reduced to a very low figure, the lowest for some time, with the result that prices have improved uniformly on all grades, at all harbor points, fully \$1 per ton. Buyers are anxiously seeking supplies and the limited lots are being absorbed rapidly at full quotations. The straw market, both as to rye and oat, in a weak condition, sales being made with difficulty. Invoices continue light.

Federal grade quotations in large bales follow: Timothy—No. 1, \$27; No. 2, \$25@26; No. 3, \$22@24. Light clover mixed—No. 1, \$25@26; No. 2, \$22@24; No. 3, \$20@21. Medium clover mixed—No. 1, \$22@24; No. 2, \$20@21. Light grass mixed—No. 1, \$25@26; No. 2, \$22@24; No. 3, \$20@21. Heavy grass mixed—No. 1, \$20@21. Rye straw, \$15@16.

MILWAUKEE.

Jan. 3.—There was a slump in actual trading in hay at Milwaukee during the past week, although inquiries continued active; dealers were declared to be optimistic over present conditions as compared with those of two months ago. Trading in volume is expected to begin about the middle of the month. Current quotations per ton are: No. 1 timothy, \$17@18; No. 2 timothy, \$15@16; No. 1 mixed, \$16@16.50; No. 2 clover mixed, \$15@16; sample hay, \$8@10; marsh feeding, \$12; packing, \$11; rye straw, \$10@10.50; oat straw, \$10@10.50.

CINCINNATI.

Jan. 5.—The hay market excited little more than passing interest with the closing of the old and beginning of the new year, not that the trade was dull and lacking, but on the contrary a good volume of business was transacted, and the market well cleared of the accumulation which depressed prices a week ago. There was little fluctuation in values, but the market was firm in tone, and high grade offerings of timothy and mixtures easily brought good premiums. The demand was mainly from the South and interior points, where stocks were reported as below normal, and only moderately active from local dealers, who had warehoused sufficient hay to supply the home and nearby requirements. Zero weather conditions increased the consumption to some extent, but there was also more disposition shown by buyers to anticipate future needs as evidenced by the increased orders for January delivery. trade generally is optimistic regarding the hay situation, which is commanding more attention because of the lower values as compared with other feeding materials. Timothy—No. 1, \$19@19.50; No. 2, \$17@18; No. 3, \$15@16; threshed, \$10@12; no grade, \$11@13. No. 1 heavy clover mixed, \$16.50@17.50. No. 1 light clover mixed, \$17.50@18.50. Clover mixed—No. 1, \$17@17.50; No. 2, \$14.50@15.50; no grade, \$11@13. Clover—No. 1, \$18@19; No. 2, \$14.50@16.50; no grade, \$10@12. Second cutting alfalfa, No. 1, \$26@28; No. 2, \$22@24. First cutting alfalfa—No. 1, \$18@20; No. 2, \$16@18. Sound sample grassy hay, \$13@15. Straw—Wheat, \$10.50@11.50; oats, \$10@11; rye, \$12@13.

BALTIMORE.

Jan. 3.—There is a firm tone to the market on the better grades of timothy and choice light clover mixed hay, of which descriptions the supply on spot is light. Low grade and inferior hay of all sorts hard to move and of irregular value. Straw is quiet and unchanged. Prices are sustained principally by limited spot stocks. Quotations follow: Timothy—No. 1, \$21@21.50; No. 2, \$19.50@20.50; No. 3, \$16@18. Light clover mixed—No. 1, \$18.50@19. Clover mixed—No. 1, \$17.50@18; No. 2, \$15@16. Straw—No. 1 straight rye, \$18@19; No. 1 wheat, \$12@13; No. 1 oat, \$13@14.

MEMPHIS.

Jan. 3.—Receipts of hay for the past week were 41 cars, but stocks are still fairly large, as demand has not shown much improvement. Buying limited to immediate requirements. Quotations have firm undertone, but no higher. Quote: Timothy—One, \$24.50@25; standard, \$23.50@24; two, \$22.50@23. Alfalfa—Choice, \$32; one, \$30; standard, \$28@29; two, \$23.50@24.

KANSAS CITY.

Jan. 3.—Advancing prices and smaller total receipts featured the hay market this week. Aggregate arrivals were 324 cars, as compared with 363 a week ago and 259 a year ago.

The receipts of alfalfa were 183 cars, against 200 a week previous. Heavy snow in Nebraska and Kansas further restricted baling and shipping. There was a new year spirit in the demand and prices were marked up 50c@1.50 a ton. Dairy grades were especially strong. There were both local and shipping orders. Dealers predicted increased offerings owing to the rise, but the demand was expected to continue good during the next two or three months.

Arrivals of prairie were 99 cars, or 28 more than a week ago. The receipts came chiefly from territory southwestward, which was not so seriously affected by the snow as the alfalfa region. Demand was general and offerings frequently were inadequate. Prices rose about 50c a ton.

The offerings of timothy, clover mixed and clover were 42 cars, or 4 less than a week ago. Improvement in the demand was noted, with southern shipping orders for timothy especially prominent. Timothy closed 50c higher. There was a similar rise in clover mixed, but clover was unchanged.

Six cars of straw came into sight. They were promptly taken, mostly by stock yards interests. Prices were unchanged.

Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City:

Alfalfa—Select dairy, \$27.50@29; choice, \$25.50@27; No. 1, \$23.50@25; standard, \$20.50@23; No. 2, \$18@20; No. 3, \$15@17.50. Prairie—No. 1, \$11.50@12.50; No. 2, \$10@11; No. 3, \$8@9.50; packing, \$6.50@7.50.

Timothy—No. 1, \$16.50@17.50; standard, \$15.50@16; No. 2, \$14@15; No. 3, \$12.50@13.50.

Clover mixed—Light, \$16.50@17; No. 1, \$15@16; No. 2, \$12@14.50.

Clover—No. 1, \$16@18; No. 2, \$12@15.50. Straw, \$9.50@10.

DULUTH.

Jan. 3.—Movement of hay was light on this market during the last week. Demand was good for the better grades, but sales of the off-grades were limited. Stocks of hay held on this market are not large. Quotations per ton are unchanged as follows: Timothy—No. 1, \$17; No. 2, \$15. Mixed timothy—No. 1, \$16; No. 2, \$12. Prairie—No. 1, \$16; No. 2, \$14; No. 3, \$12. Midland—No. 1, \$11; No. 2, \$9. Straw—Rye, \$9; oat, \$8.50.

PHILADELPHIA.

Jan. 3.—The hay market is quiet but firm under light offerings. Timothy hay grading better than No. 2 in some cases brought a premium. Straw is in moderate supply and demand with preference being given to straight rye. Prices showed little change. We quote (Federal grades): Timothy—No. 1, nominal; No. 2, \$19@20; No. 3, \$18@19; sample, \$10@12. Light clover mixed—No. 1, \$19@20; No. 2, \$17@18; No. 3, \$12@14. Medium clover mixed—No. 1, \$16@17; No. 2, \$14@15. Heavy clover mixed—No. 1, \$15@16. Light grass mixed—No. 1, \$18.50@19. Straw—No. 1 straight rye, \$15@16; No. 2, \$14@15; wheat, \$15@16; oat, \$15@16.

PITTSBURGH, PA.

Jan. 5.—The receipts of hay were lighter during the holidays than were ever known since Pittsburgh became a city hay market, and inasmuch as the demand was away below what it should be, the light receipts did not advance the prices materially.

Those in position to know tell us that a change is due; three years out of the last four prices were firmer in January than during the fall months and it now looks as if all open markets will change for the better. Present low prices are unexplainable except for the necessity of cashing in by the farmers. Hay is entirely too low and should advance with grain prices. The

difference, however, is that grain can be exported; hay is too bulky and therefore is not.

Our market is steady at values herewith. Prices cannot go lower. When things are at their worst they begin to mend. Hay receipts, 36; straw, 19 cars. Quotations: Timothy—No. 1, \$20.50@21; standard, \$18.50@19.50; No. 2, \$16@17; No. 3, \$14@15; No. 1 L. C. mixed, \$18@18.50; No. 1 H. C. mixed, \$18.50@19. Clover mixed—No. 1, \$18.50@19; No. 2, \$14@16. Clover—No. 1, \$18.50@19; No. 2, \$13.50@15.50. Straw: Receipts remain moderate and present prices are being maintained. Quotations: No. 1 wheat, \$13@13.50; No. 2, \$12.50@13; No. 1 oat, \$13@13.50; No. 2, \$12.50@13; No. 1 rye, \$14@14.50; No. 2, \$13.50@14.

PORTLAND, ORE.

Dec. 30.—An improved demand for alfalfa with the colder weather, with good quality stuff commanding a ready sale at good prices. Poor stuff still coming to market, but this must be sold cheaply on account of the influx of the poorer grades. Buying prices f. o. b. Portland: Alfalfa, \$19.50@20 ton; valley timothy, \$19@23.50; clover, \$16.50@17.50; oat, \$19@20; eastern Oregon timothy hay, \$16@17; oat and vetch hay, \$17.50@18.50; straw, \$7.50 per ton.

MONTREAL.

Jan. 2.—The condition of the market is unchanged and prices are steady with only a small trade passing for local account, and sales of odd cars of good No. 2 timothy hay are being made at \$14@14.50 per ton, and No. 3 timothy hay at \$12.50@13 per ton, f. o. b. cars here.

MINNEAPOLIS.

Jan. 3.—Prices are generally higher for the relatively light offerings, and dealers report a healthier tone.

Timothy—No. 1, \$18.50; No. 2, \$17.50; Mixed, Different Grasses—No. 1, \$17.50; No. 2, \$16.

Clover Mixed—No. 1, \$17; No. 2, \$13. Upland—No. 1, \$16.50; No. 2, \$15.50; No. 3, \$13.

Midland—No. 1, \$13; No. 2, \$9.50. Packing Hay, \$7.50.

Straw—Rye, \$9; oat, \$9; wheat, \$9. Alfalfa—No. 1, \$24; standard, \$20; No. 2, \$16.

CHICAGO.

Jan. 5.—Receipts and shipments of hay in tons in the Chicago market for the week ending Jan. 3, also the total receipts and shipments from Jan. 1 follow:

	Jan. 3, 1925.	Dec. 27, 1924.	Jan. 5, 1924.
Week's receipts ...	2,124	2,677	1,282
Week's shipments...	213	103	223
Rcts. since Jan. 1...	163,258	161,134	1,233
Shpts. since Jan. 1...	16,447	16,234	223

Receipts on Monday were 66 cars, comprising 49 timothy, 6 prairie, 3 packing, 2 alfalfa and 9 straw. These receipts were not considered heavy for Monday and prices were firm.

	No. 1.	No. 2.	No. 3.

ST. LOUIS.

Jan. 5.—Hay: Receipts, 10 cars, consisting of 9 timothy and 1 prairie. Little doing, offerings and demand light. Market steady. Sales: Timothy—Part car No. 2 at \$19, 1 car standard at \$20, 2 cars do at \$21, 3 cars do at \$22. Clover mixed—1 car heavy mixed at \$19, 1 car light mixed at \$20. Prairie—3 cars No. 2 at \$14, 1 car No. 1 at \$16.50.

TOLEDO.

Jan. 5.—The hay market is still marking time awaiting an active demand to give dealers a chance to move their liberal stocks. The dullness has been pronounced for several weeks and prices have been unchanged. Present levels are thought to be the point of resistance and any change will be upward.

Prices for the past week were as follows: No. 1 timothy, \$15; No. 2 timothy, \$13; No. 1 light clover mixed, \$14; No. 1 heavy clover mixed, \$13; No. 1 clear clover, \$13; No. 1 first cutting alfalfa, \$17; No. 1 second cutting alfalfa, \$23; sound dry wheat straw, \$9; sound dry oats straw, \$9.50, f. o. b. Toledo.

COST OF GROWING SOY BEANS.

The cost of growing soy beans has been estimated at \$15.75 an acre, according to figures compiled under the direction of P. A. Young, county agent, Gallia County, Ohio. The yield was based on 13 bu. per acre with a valuation of \$2.75 a bu., or \$36.75 an acre. Cost data includes everything from seed to labor.

BRITAIN EMBARGOES U. S. POTATOES.

An embargo on United States potatoes has been placed by Great Britain "for the prevention of the introduction

of the Colorado beetle." Shippers of potatoes in Maine have been trying to export potatoes to Great Britain which has a short crop, but the embargo will stop further shipments. It is said that Canadian potatoes are subject to the same insect trouble, but no embargo has been declared against the Dominion and it is felt that the act of the British government is in discrimination.

The tools of national service

The American people lead the world in the efficiency of industry. Who can say what part of their success is due to the superior implements they use. This much we know. They have the world's best telephone system as an instrument of communication, and they use it without parallel among the races of the earth. To this end our telephone service must be equipped with proper tools.

The tools of management. Bell System executives, rising from the ranks of those who know telephony, must share our responsibility to the public, most of whom are telephone users, shareholders or workers.

The tools of service. The national, two-billion-dollar Bell System, handling fifty-eight million telephone calls a day, must be enlarged and extended while in use.

The tools of forecast. We must continue to know the rapid and complex growth of communities and make provision in advance, so that the telephone will be ready when needed.

The tools of supply. The Western Electric Company, our manufacturing and purchasing department, its factories manned by 40,000 workers, assures us that extension of facilities need never be interrupted.

We must have the best tools of finance, of invention, of everything else, in order to continue serving the American people.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Jan. 5.—Speculation in provisions was heavy with lard in the lead. Packers took advantage of all bulges to sell, and speculators accumulated lard on the break. There were deliveries of 2,800,000 lbs. of lard on January 2, which was credited to Swift & Co. This house seldom delivers any lard, and their action is construed as meaning that there was not enough demand from Europe and the domestic trade to absorb their output, hence they have taken the opportunity to unload their surplus to sales of January delivery.

Foreign markets were mostly easier, and the export demand disappointing. Stocks of contract lard in Chicago on January 1, were 15,739,000 lbs., compared with 6,874,000 lbs. a month ago, and 5,275,000 lbs. last year. There were also increases in stocks of other lard, and liberal gains for the month in meats, the total supply of the latter being 110,673,000 lbs., compared with 54,515,000 lbs. December 1, and 118,000,000 lbs. January 1 last year.

Packers have been enabled to secure a better class of hogs within the last few weeks, hence the increase in stocks of cured product. Supplies of hogs continue liberal, and although prices had advanced early in the week, there was a reaction later on liberal receipts.

Packers are loading up the speculators with lard as fast as they can make it, and there are indications that they will get it all back later when the speculators attempt to get out. This has been the history of all bulges in provisions. Closing trades were well toward the lowest of the week with lard off 55 to 65c. On Saturday, fully 3,000,000 lbs. of May lard was sold at

\$17.00 and all disappeared. After the selling was over prices declined 15c.

The range of prices for week, the December range and range previous to December follow:

WANTED and FOR SALE
MARKET PLACE, CLASSIFIED
for Buyers and Sellers of Properties and
Equipment in Grain, Seeds, Hay, Feed,
Flour, Millfeed, Beans, Produce, etc.
25c Per Printed Line Each Insertion

HELP WANTED.
WANTED—Brokers in Iowa and Minne-
sota to sell feed products for large manu-
facturers. Address **BROKER**, Box 27, care
Price Current Grain Reporter, 309 So. La
Salle street, Chicago, Ill.

SITUATIONS WANTED.
POSITION WANTED—As manager of
Farmers' Elevator, or will join anyone who
wants an experienced buyer to operate a
country elevator. Address **N. J. RODEN-
BERG**, Cathay, N. D.

MACHINES FOR SALE.
FIVE (5) Eureka ring graders made by
the S. Howes Co., practically new; these
machines are 5 rings high and 2 rings wide,
consisting of 10 rings; excellent seed
graders in first-class shape, at a bargain
price. **STANDARD MILL SUPPLY CO.**,
501 Waldheim Building, Kansas City, Mo.

SEEDS FOR SALE.
FOR SALE—White seed corn, fully ma-
tured, planted in April. Car lots or less.
COLE SEED SAVER CO., Newbern, Tenn.

BUSINESS OPPORTUNITY.
FOR SALE—Flour and feed mill, 25 bbl.
Midget average monthly sales \$1,700 with
sufficient working capital to supply pub-
lic demand. Sales would double in very
short time in same local territory, pros-
perous community, built new 1920. Will
sell or take in partner. **TOPEKA ROLLER
MILL**, Topeka, Ind.

ELEVATORS FOR SALE.
FOR SALE—Iron clad elevator, 40,000-bu.
capacity; only one competitor; good grain
territory; a 400-car station doing good
profitable business; electrically equipped, in
good running order; storage for 10 cars of
hay, 10,000 bu. of ear corn; located on best
shipping R. R. in Ohio. Good reason for
selling. Address **H. G. POLLOCK**, Middle
Point, Ohio.

FOR SALE—Terminal elevator and Kan-
sas Line. Terms. Bargain. **ALLIN GRAIN
CO.**, Coffeyville, Kans.

ENGINES FOR SALE.
FOR SALE—30 H. P. Foos Gas Engine
priced right. Address **E. C. WEGENER**,
Minco, Okla.

MILLING PLANT FOR SALE.
OHIO—RECEIVER'S SALE—5 grain ele-
vators and 1 corn meal mill, known as the
"Heffner Mill," and one flour and meal
mill, known as the "Crites Mill," situated
in Circleville, Ohio, and vicinity, together
with certain brands and the good will of
said mills respectively, will be offered for
sale by order of Court, by the Receivers of
The Dixie Mills Co., at public auction at
the door of the Court House in Circleville,
on Thursday, January 29th, 1925, at 1 p. m.
Opportunity of a lifetime to acquire valu-
able milling and elevator properties cheap.
Full particulars will be furnished upon re-
quest. Address **Chas. Gerhardt and Edwin
C. Wright**, Receivers of THE DIXIE MILLS
CO., Circleville, O.

ATTENTION, MILLERS!
What you need for your mill we probably
have.
Full line of new equipment and very
complete stock of used machinery at prices
that will interest you.
Everything from the receiving elevator
to the packers.
Write us today.
W. R. LEATHERS,
9 S. Clinton St. Chicago, Ill.

GRAIN FOR SALE.
KAFIR—CANE.
White Kafir, Red Top or Sumach Cane
Seed in carlots. **THE L. C. ADAM MERC.
CO.**, Cedar Vale, Kansas.

HULLESS OATS for sale, greatest feed
for chickens and hogs. Yields to 50 bush-
els. **TOWNSITE STOCK FARM**, Freeman,
South Dakota.

HAY FOR SALE.
ALFALFA or anything you want in dairy
hay. Write or wire for prices. **HARRY
D. GATES COMPANY**, Jackson, Mich.

PLANT FOR RENT.
FOR RENT—Our plant which we oper-
ated as a feed store for 40 years and until
October 1, 1924, 1923 sales \$175,000.00.
CONKLIN AND CUMMINGS, Goshen,
N. Y.

MOISTURE TESTERS
can be used profitably NOW

Seedburo Quality
is now used by the Govern-
ment, Grain Inspection De-
partments and more than
10,000 mills and elevators.

**OFFICIAL BROWN-DUVAL
MOISTURE TESTERS**
in all sizes from one compart-
ment to six, heated by gas,
electricity or alcohol.

**HEAT YOUR TESTER with
Electricity—with or with-
out automatic shut-off.**

**SPECIAL "FOUR-IN-ONE"
SCALE NO. 14**

This scale, designed and manu-
factured by us, satisfies a long-
felt want in the grain trade, for a
small, complete office scale for
weighing samples for moisture
test and for determining test
weights for bushel, dockages,
weights for mailing, samples, etc.
Write for prices on moisture test-
ers and complete catalog of
SEEDBURO Quality grain and
seed testing equipment, which in-
cludes grain grade specifications.

**We are the largest handlers of
Grain and Seed Testing Equipment
in the world.**

*Adequate stock always—prompt
shipment is assured. We will
appreciate your business.*

BUSINESS AND TRADE CONDITIONS

IT IS good business of a permanent character that all desire rather than improvements here and there, by fits and starts. In contemplating this, as a recognized, sound principle, American business has been open to legitimate criticism because of its willingness to accept today's situation, for instance, without definite plans for the morrow. In the same plan of reasoning, our foreign neighbors have looked ahead in times past; laid definite schemes for the development of export trade and have secured it.

Therefore, if, as a nation, we are to settle down to a better domestic business and a more successful competitive sales and advertising campaign for foreign trade, we might well start with the cost of production. Whether operating a feed plant, a grain elevator, or a seed cleaning establishment, the management must cope with production costs in determining selling prices. The keen, aggressive spirit of Americanism has worked into these matters by simply advancing prices when profits were inadequate or cutting prices under the pressure of competition, and this is unsound business economics. It leads up to the second and most important fundamental which is the wisdom of getting and keeping the confidence of buyers, investors, and the public in its several capacities. In certain industries, it has become standard gospel to avoid excesses and thus maintain stability, through which program the slump following inflation is avoided. Manufacturers have to a certain extent learned, but at much expense the folly of unduly increasing production facilities during the war and business as a whole must stand its piling on certain bedrock principles as above outlined if this country, which is still comparatively young, is to retain and broaden its position at home and in world affairs.

The Future of Politics.

When we feel inclined to deplore the American political situation and to point with a rather sharp pen to the failure of this or that phase of politics, we might well turn to the foreign situation to realize that we are not so badly off after all. In Germany the newly elected reichstag is composed as follows:

Socialists	131
Nationalists	111
Centrists	69
German People's Party.....	51
Communists	45
Democrats	32
Bavarian People's Party.....	19
Bourgeois Business Party.....	17
Fascists	14
Hanoverians	4

From this it will be seen that it should be a comparatively simple task to cope with our two-party congress or to view without special concern the possibility of a Progressive party emanating from the G. O. P. The experience of our European neighbors in the realignment of their governments every fortnight gives reason for mature thought on the continuance of the present highly desirable two, or at most three, party government.

Farm Efficiency.

A mistaken impression relative to the business acumen of the farmer has very naturally followed the nursing bottle tactics of farm leaders, resulting in the widespread belief that he was somewhat lower in the scale of human intelligence than other folks. It has been only natural that some of his difficulties should arise from this mistaken belief, and through expression in a widely circulated journal by a reputable writer on agricultural subjects, we read that

much of this difficulty could be corrected through "balanced production" or "controlled production." This and similar efforts to lead or mislead the farmer impresses us as strictly bunk, and similar to the reasons back of the McNary-Haugen bill. The consuming and foodstuffs manufacturing interests of the United States and an increasing exporting trade in like commodities is a sufficient guarantee to the American farmer to produce all that he can from his acreage. He is likewise more generally and sensibly turning from the one crop idea to diversi-

HEAVY SOUTHERN HEMISPHERE MOVEMENT

THE entrance of Russia into last week's market as a buyer of flour, largely Canadian, brought some change in world wheat figures and the continued uncertainty, insofar as that country is concerned, is one of the large factors in the problem. Relatively high prices are bound to cause a rapid movement of southern hemisphere crops and that situation will, of course, have its effect on world markets. This prospective movement has, however, had practically no influence on prices as yet, but that movement and the continued heavy marketing of cattle and hogs should have an influence on prices very shortly.

fied farming, but it is paternalistic and unsound to expect the farm class to look for guidance to county agents or other higher-ups in Governmental chairs as a wet nurse.

Instead of lacking intelligence and efficiency, our farmers are highly efficient, as witnessed by the following figures:

They produce 2.3 times more per capita than the farmers of the United Kingdom; 2.5 times more than the farmers of Germany; 3.2 times more than the French farmer; and 6.5 times more than the Italian farmer.

Assisting the Railroads.

In view of the unquestioned damage of our late experiment in governmental railroad operation, it would seem most simple to put into effect some sympathetic, practical encouragement of our railroads, particularly those in the weaker class. In a broad sense, it is only the latter whose credit is not so good, those which are still under the control of the Government through notes in their hands. The major roads were able under easy money conditions of the past year to pay off their expensive obligations to the railroad administration. There has been for some time a movement under way very properly urging Congress to reduce the interest rate on obligations still standing against the carriers which show on their face about 6 per cent rates, undeniably high both from the standpoint of the security involved and the important, although somewhat indefi-

nite, angle suggested here concerning the natural and humanitarian treatment of our railroads which did so much in the opening up the country and are just as important today in its maintenance. The bill which is now up in Congress contemplates the reduction of such interest charges to a rate not exceeding one-fourth of one per cent more than the money cost the government.

Finance and Manufacturing.

All new financing records were broken last week with a total bond offering of \$263,000,000, issues that were promptly absorbed. Public utilities were liberally represented and a heavy volume of tax exempt securities were included in these bonds. The latter stuff was mainly purchased by savings banks and such institutions.

Last week's export of gold was \$11,250,000, and although large, there was no appreciable decrease in the ratio of the Federal Reserve from whose vaults this gold was taken.

The prices of manufactured commodities are advancing rather rapidly, averaging up to the highest point since 1920. Much of this advance, however, is in foods and feeds for human and animal consumption, which factor should be recognized in a general average because certain basic industries in textiles and metals have remained stable or advanced only a trifle. As we reach mid-January with continued strength in the stock market, but without definite glimpses behind the scenes as to the real stability of interests represented by such stocks, it is becoming widely felt that dependable knowledge of trade expansion will not be gleaned until spring. There are those who affirm that decidedly too much speculation prevails, over-public participation, etc., and until this has toned down, it is their belief that the stock market is not a true criterion of the actual value of those listed thereon.

Outside Opinions.

Among those breaking into print since the first of the year, the following comment impresses us particularly. Elbert H. Gary, chairman of the United States Steel Corporation Board, who pleads so eloquently for law enforcement, has an especially broad perspective and hence offers advice of a high order when he says:

I expect a high rate of general business prosperity to persist during 1925. I think the chief stimulating influence is a general feeling of confidence that the present favorable conditions are the beginning of a long continued period of prosperity; that apparently the disposition of the present governmental administration is to aid in every proper way the business interests of the country so long as the managers are reasonable, consistent and fair toward all others.

I do not see any factors likely to cause a setback to business during the coming year. I do not think commodity prices are likely to go lower during 1925. They will probably advance to some extent for the reason that they are still too low to permit a fair and reasonable profit on the capital invested.

I think firmness will develop in the money market during 1925 and that interest rates will be higher than they are at present. The controlling reason is that the volume of business will probably increase for some time to come.

As a total net result, I think the European situation will favorably affect American business during the coming year.

Roger W. Babson, who has carried his business as a statistical organization forward on a high plane, is quoted on the farmers' recovery as follows:

The spurt in business which started in the fall of 1922 and ran over into 1923, was doomed for this reason: With but 70 per cent of the prospects buying, the factories filled all the orders and soon got ahead of themselves.

The return of the son of the soil to our markets there-

fore deserves first position as a most important and significant development.

James S. Alexander, chairman of the board of the National Bank of Commerce, New York, said this week:

Although foreigners regard us as a hopelessly extravagant nation, it is doubtful whether we are more so in relation to our resources and our earning ability than most Europeans of corresponding economic levels. The best assurance against an era of soaring prices is the resistance to them which consumers have shown ever since 1920, and this spirit of common sense is likewise our best assurance of prosperity throughout 1925.

Calling upon members of the National Council of Farmers' Coöperative Associations to apply themselves to national problems of waste and distribution, Herbert Hoover, Secretary of Commerce, in an address at the third annual convention last week declared for a national agricultural program which would enable production to meet domestic demand. He also stressed his belief that urban development would not grow out of proportion to agricultural activity.

Mr. Hoover outlined the main points considered desirable in a national program, as fostered by the government and emphasized his belief in the soundness of the coöperative movement.

He sees, however, a number of obstacles in the way of successful functioning of the coöperatives. Among these he named the clarification of restrictions placed upon coöperative activities under the Restraint of Trade Acts; improvement of terminal facilities, drawing up of regulations for authorized auditing of accounts of these organizations, such as is practiced by banks, and drawing up of standards for agricultural products with the assistance of the government.

GRAIN EXCHANGE NECESSARY

ALTHOUGH many wild ideas have been advanced by visionary politicians for marketing grain, the season just closed certainly has proved the efficiency and the economy of the present system of the grain exchanges.

A constant cash market for the farmer's grain has been provided. It can be sold on a moment's notice and at a fraction of a cent per bushel for the service.

The unprecedented large crop of wheat this past year was absorbed on a continued rising market. Millions of dollars were paid out by the terminal market dealers upon arrival of the grain. The farmers received full market value, less freight and handling charges, and did not have to wait a minute for their money. A severe contrast to the operations of the various grain pools.

It is easy to see what would have happened if the grain exchanges had not existed. When last year's crops were harvested the farmers were hard up. The reason is known to all. Grain was marketed in large volumes. What price would the farmers have received if there had been no organized market for them, the grain exchanges, it is hard to say. Prices would surely have been forced down to a point where it would hardly have paid to harvest. The grain farmer would have been in the same predicament as many fruit farmers find themselves when a large crop is raised, fruit rotting on the ground and consumers paying a fancy price. But not so with the grain farmers; they had back of them the grain exchanges able to control untold millions, due to the highly organized marketing machinery perfected through years of evolution. Thus the grain crops could be moved on the smallest margin of profit and the farmer receive his cold cash without delay.

Grain speculators have been condemned for the economic service they render because the average person does not understand the function they perform. If the grain exchanges were abolished, where a free and open market prevails the farmers would soon find the spread between what they would receive and what the grain would finally sell for would be so wide as to be staggering. The service the grain exchanges render is recording world prices, letting the farmer know every minute of the trading day what his grain is worth and causing it to be handled

on a narrow margin of profit. No commodity not traded in on an organized exchange is marketed so readily, so promptly and so economically. The present system may be improved some day. It may even be discarded for a better one, but that better one isn't in sight yet, and until some other system of marketing is tried out and proven the present system must be kept for the preservation of agriculture.

Grain dealers should never apologize for being "middlemen." They should be proud of the business in which they are engaged—provided they live up to the code of ethics prescribed by their exchange in dealing with their customers.

A BUSINESS INVENTORY

JANUARY is inventory time on the business calendar, and every industry during the early part of the month has been busy checking over stocks and rummaging in dusty places to have an accurate report on assets.

Inventory should be more than a mere checking up of visible assets; it also should be a study of the past year's business as revealed in the record of stocks on hand. Every grain elevator operator, hay merchant, and feed dealer should make an analysis for his own benefit to determine why certain products moved slowly, the reason for excessive stocks as compared with the previous year, and what general economic conditions in his business territory or the country at large influenced the poor sale or purchase of commodities on hand.

The period when inventory is taken should be a special opportunity to check up on business methods as well as material assets. There may be a change in the character of the business done by a farming community which will require a corresponding change in the grain, hay or feed dealer's methods. Perhaps, feed grinding equipment should be purchased. A grain drier may be the means of increasing business. The construction of a feed, seed, and flour warehouse may open up new opportunities to serve your community and to produce profits. Numerous ideas such as these will be suggested by such an analysis. While it is true that no particular time should be set aside for a study of business conditions and methods, in the grain trade at least, this period of the year offers more leisure to calmly review the situation than in the other seasons when the grain movement is heavier.

"MUCH ADO ABOUT NOTHING"

THE farm press and particularly *Wallace's Farmer* has worked itself up to another paroxysm over the "huge profits" being made by the packers. Is it a crime to make a profit? If one may judge from the unbalanced expressions appearing in some of the erstwhile conservative farm press, it is perfectly proper to charge a corporation with every crime conceivable if it is unfortunate enough to make a profit.

But have the packers made such inordinate profits? There are a few events in current history which apparently disprove the assertions made by that phantom of what used to be a conservative paper. It is quite generally known that Wilson & Co. is in the hands of a receiver, that Armour & Co. is just emerging from one of the most dangerous crises in its history, that Cudahy Packing Co. had its financial stringency, and that even Swift & Co. had a difficult situation to solve following the post-war upheaval. Yet, *Wallace's Farmer* remains to be informed of these current events.

We hold no brief for the packers, but common decency demands that such grossly unfair statements should not go by unchallenged. Just when the packers are beginning to reach a normal financial strength such agencies of the character mentioned rise to strike them in the back. It is not putting it too strong to call this attack a foul blow, because the packers cannot defend themselves. They are denied the right to present their side of the matter

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	Jan. 10, 1925.	Jan. 3, 1925.	Jan. 12, 1924.
Wheat—			
Primary receipts	4,097,000	4,084,000	3,271,000

on equal terms in a farm paper, for the management will either refuse to give the defense the same prominence as the attack or deny any space at all. Some of the farm press likes to put the packers or any other large aggregation of capital in the light of pitiless giants crushing the poor, common people, but this is one case at least where the farm press is "Jack the Giant Killer."

STRIKING MATCHES DANGEROUS

ELSEWHERE in this issue appears a letter from the Mutual Fire Prevention Bureau touching on a fire hazard that perhaps has not occurred to many, and that is matches of the striking kind. Undoubtedly matches are responsible for a great many elevator fires that occur from unknown causes. Carrying loose in clothing striking matches is dangerous—there is a chance of their getting mixed in with grain so that in going through receiving separators or into the elevator legs they may ignite, due to friction; then something happens. If matches are needed around the elevator guard against this hazard by carrying those of the safety type.

THREE DOLLARS a year in the United States and Mexico; \$4.00 a year for Canada, \$5.00 United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at the same rate. Single copy 15 cents.

LETTERS from our readers are solicited on subjects of interest to those engaged in the grain and allied trades, news items, reports on crops, grain movement, new firms, contemplated improvements and cars leaving in transit.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain, feed, seed, bean and hay industries is unquestioned. The character of advertisements in its columns testifies to the favorable opinion of and value received by our advertisers. If you would be classed with progressives, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

CHICAGO, JANUARY 14, 1925.

GRAIN TRADE REVIEW

GRAIN markets have been fluctuating in a rather erratic manner during the past week, and there is nothing to indicate a material change from this condition in the immediate future. The world's wheat situation is decidedly complex and the market on the whole has disappointed both the bulls and the bears, refusing to hold advances or breaks, and both sides were confident of their position. Speculative interest has fallen off to some extent, which accounts in part for the irregular action. Statistics continue to make a rather bullish showing with the domestic visible supply being steadily reduced as the result of fair clearances and an improved milling demand, but at the same time the total is materially above normal for this season of the year and there is sufficient grain in sight at the moment to permit of a reduction of over 2,000,000 bu. per week from now to harvest and still leave plenty for carry-over into the new crop.

Estimates as to the amount of wheat available for export from this country, after allowing for domestic bread and seed requirements and the necessary carry-over, range from around 50,000,000 to 100,000,000 bu., much depending on the quantity that will be cleared during the first 6 months of the season. Under the most favorable conditions it is very probable that the carry-over will not be large, and that if the world takes anywhere near the amounts it theoretically requires the world's reserves at the end of the season will be materially reduced. At the end of the 1923-24 season, the world's carryover was figured by a leading European authority at 306,000,000 bu. At this season of the year the world's markets usually commence to feel the effect of the movement of the new southern hemisphere crops, which promise to move rapidly on account of the relatively high prices. However, so far the prospective run has had little or no influence, and the entrance of Russia into the market as a liberal buyer of flour, largely Canadian, causes a minor change to be made in the world's statistical condition. As a matter of fact, there is little use in including prospective exports from the so-called "other countries" this season, as the amount

they can spare is extremely small. Bulgaria, normally a good exporter, has taken a moderate quantity of American wheat this season. There has been a rather insistent demand of late from Mediterranean countries which have done little business with us for some years, usually securing supplies from Danubian countries, or from Russia. There is little likelihood of the latter being an exporter of either wheat or rye the balance of the season from the Black sea.

Outlook for 1925 Crops.

It is still too early in the season for the outlook for the 1925 crop to be a factor in the market, although inside of two months the prospective yield in both North America and in Europe will be the deciding influence as to the trend of values. Many traders would feel more sure of their position on the bear side if the effect of the prevailing ice pack over a wide area in the winter wheat belt was known. Under a condition such as prevails at the present time there is a prospect for a big crop scare, and a thaw would undoubtedly bring in complaints of the plant having been smothered in many sections. Farm reserves of wheat, based on all known movement figures, or on estimates received from the farmers themselves indicate that the holdings are somewhat below normal for this season of the year, one statistician figuring that total stocks in all positions are around 387,000,000 bu., against 420,000,000 bu. last year. With the present high prices there is a tendency to look for a considerable increase in the spring wheat acreage both sides of the international lines. European crop outlook is spotted with a need for rain mentioned in some countries, while in others the prospect at the present time is bright. Late cables suggest that it will be necessary to raise estimates on the Argentine exportable surplus.

Coarse Grains.

There is not sufficient cash corn being hedged at the present time to have any lasting effect on values, and within a month or six weeks the trades will commence to talk about farm work and decreased receipts. The continued heavy selling of light weight hogs and pigs by the country suggests that either holdings of swine have been materially under-estimated or that liquidation is very thorough and farm consumption of corn in consequence will be greatly curtailed. A private estimate suggests that the disappearance of corn so far this season has been relatively larger than expected, and that farm holdings are below normal.

Eastern demand for cash corn remains slow, and prices are too high to cause distributors to load up heavily for forward shipment. Some of the grain coming forward from the country is light in weight which accounts for the liberal percentage of No. 5 grades and lower in the receipts. The call for cash oats, however, has improved both east and south, and with a light movement there is a prospect that the visible supply will start to decrease shortly. The total North American holding is around 60,000,000 bu. in excess of last year at this time, which would permit of large shipments. Winter seeded oats in the southwest are said to have been badly damaged by the recent extremely cold weather.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Jan. 10, 1925.	Jan. 3, 1925.	Jan. 12, 1924.
Wheat	4,111,000	3,868,000	3,340,000
Corn	7,838,000	3,937,000	5,553,000
Oats	4,959,000	4,241,000	2,712,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week.....	16,911,000	11,605,000
Preceding week.....	12,046,000	11,459,000
Since July 1.....	727,935,000	657,145,000

Liquidation ran its course in wheat early in the week, and an advance which followed later lifted the May to within 2½c of the best prices of the season, with the close at net gains of 3½c, as compared with the previous week. July, however, was inclined to drag, as it represents the new crop and it was up only ½c for the week, spreading operations, the July being sold, having some effect. September was up 2½c. The export demand for domestic wheat was only fair, although Mediterranean countries were after supplies during the closing days. More attention was given to the outlook for the new crop on the Pacific coast, and there were claims of considerable damage there.

Corn prices held within relatively narrow limits but rallied sharply after an early break and closed well toward the top with net gains of 7½c on the nearby futures, while the September came in for more attention and gained 3½c, going to practically the same figure as the July. Sentiment on the whole was bearish and the market acted heavy at times, the strength in wheat being the main influence, and at the last the basis on cash grain was the widest of the season as compared with the May.

A revival in the domestic demand for cash oats failed to have any effect on the May delivery which closed the same as the previous week, while the July was up 7½c and September 3½c, spreading operations being a factor in causing the upturn in the latter. Foreigners bought on a moderate scale. Rye was moderately active and had a range of 7½c@7¾c, closing with net gains of 3¼c@3½c, with foreigners good buyers of the cash grain at the seaboard where the bulk of the cheaply owned grain has been sold. Range of prices the past week follows:

	High.	Low.	Jan. 10, 1925.	Jan. 3, 1925.	Jan. 12, 1924.
Wheat—					
May	\$1.81½	\$1.73½	\$1.80½	\$1.77½	\$1.09½
July	1.55½	1.51½	1.54½	1.53½	1.07½
Sept.	1.48½	1.44½	1.46½	1.44½	1.06½
Corn—					
May	1.29½	1.25½	1.28½	1.27½	.78½
July	1.30½	1.26	1.29½	1.28½	.79½

WORLD'S WHEAT EXPORTS.

Exports of wheat last week compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Jan. 10, 1925.	Jan. 3, 1925.	Jan. 12, 1924.
American	7,032,000	5,775,000	10,504,000
Argentine	2,461,000	2,706,000	1,542,000
Australian	3,552,000	944,000	1,624,000
Indian	600,000	680,000	8,000
Russian	1,096,000
Others	192,000

Total

Of the above total wheat from America there cleared in the form of flour 1,480,000 bus.

The total export of wheat since Aug. 1, the commencement of the European crop year, compared for three years:

	1924-25.	1923-24.	1922-23.
American	251,001,000	222,159,000	254,746,000
Argentine	37,511,000	37,128,000	36,167,000
Australian	20,536,000	19,824,000	10,128,000
Indian	18,464,000	5,864,000	3,263,000
Russian	328,000	17,216,000	...
Others	2,504,000	11,658,000	3,263,000

Total	330,344,000	313,849,000	308,236,000
Season	753,195,000	662,698,000

WORLD'S CORN EXPORTS.

Exports of corn last week, compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Jan. 10, 1925.	Jan. 3, 1925.	Jan. 12, 1924.
American	16,000	16,000	296,000
Argentine	2,688,000	1,644,000	796,000
African	110,000
Russian	213,000
Others	765,000	1,615,000	1,360,000

Total	3,682,000	3,275,000	2,562,000
-------------	-----------	-----------	-----------

Exports of corn since Nov. 1, 1924, compared with last year and year before:

	1924-25.	1923-24.	1922-23.
American	248,000	1,819,000	18,851,000
Argentine	33,148,000	15,068,000	43,376,000
African	544,000	4,629,000	...
Russian	859,000	419,000	...
Others	6,541,000	11,920,000	116,000

Season	67,500,000	65,765,000

CANADIAN GRAIN IN U. S.

The following table exhibits the quantities of bonded grain in the United States reported last week compared with previous week and one year ago:

	Jan. 10, 1925.	Jan. 3, 1925.	Jan. 12, 1924.
Wheat	17,769,000	18,182,000	30,563,000
Oats	1,651,000	1,739,000	1,487,000
Rye	1,392,000	1,004,000	...
Barley	2,791,000	3,349,000	269,000

DECEMBER CANADIAN MOVEMENT

By E. A. Ursell, Statistician,
Europe Must Have Grain—High Prices Reduce Their Activities—Cautious Attitude Adopted.

Board of Grain Commissioners for Canada.

FT. WILLIAM, Jan. 10.—The 1924 season of navigation closed very quietly, as far as the Canadian head of the lakes was concerned, with the loading and departure of the S.S. "F. B. Squire." The smaller movement during the last 3 months of the season as compared with the two previous years and the plentitude of lake tonnage available enabled shippers to send grain forward without the necessity for extremely heavy loadings during the last two weeks of the season. The shipments of the 1924 crops appear small when compared with the large figures representing the shipments of 1922 and 1923 crops previous to the closing of navigation, but it must be remembered that those were record crops. Compared with the total yields less requirements for seed it will be seen that this season's fall shipments represent fully as high percentage as regards wheat, but considerably higher as regards coarse grains.

The proportion which has been sold for export, however is very much smaller, so that more than 20 million bushels of wheat and 3½ million bushels of coarse grains are afloat in vessels, in addition to large stocks in store in the elevators, at lower lake ports. Besides this, large quantities of U. S. grain are afloat in vessels or in store in elevators at both Canadian and U. S. lower lake ports. Buffalo has a record fleet of vessels, no less than 119 being reported with Canadian and U. S. grain cargoes aboard for unloading during the month. The all-rail movement from Ft. William-Port Arthur to the Atlantic Seaboard will, therefore, be very light, although some shipments of barley and wheat have been made.

It would appear that the effect of the rapid rise in prices of grain during the past two months has been to make European importers reduce their activities in the purchase of grain and to adopt a more cautious attitude. Fair supplies are reported on hand for present requirements and in the meantime the Argentine and Australian crops are being harvested and shipped. It is reported that sales of the Australian surplus represents more than 40 million bushels whilst considerable quantities of the Argentine surplus have been sold also.

Europe must have the grain, but will purchase it in the lowest market, quality considered. The very large visible supplies available for export in Canada and the U. S. concurrent with the marketing of the surplus from the southern hemisphere presents an opportunity to importers to negotiate for lower prices which they will not fail to take full advantage of.

The small export demand for Canadian wheat has caused an almost complete cessation of shipments from Vancouver. Tonnage rates effectually prevent successful competition with the Atlantic route except in occasional instances when liners are so anxious to obtain cargoes that the space is offered at distress rates of around 22/6 and 25/— per ton. Prices have been too high to allow of Canadian wheat being purchased in any quantity to fill Japanese requirements, which appear to be quite large this season.

The severe winter weather of the last half of the month was reflected in the rapid falling off of cars passing inspection. During the month 23,747 cars of all grains were inspected, as compared with 51,753 a month ago and 55,457 a year ago. Of these 17,881 contained wheat compared with 38,851 a month ago and 48,020 a year ago; whilst 9,073, or 50.8 per cent only, graded into contract grades, as against 20,906, or 53.8 per cent, a month ago and 41,823, or 87.1 per cent, a year ago. The heavier movement of both barley and flaxseed as

compared with a year ago continues, 2,035 cars of barley and 914 cars of flaxseed being inspected during the month as against 1,594 of barley and 680 of flaxseed a year ago.

Comparative tables showing inspections, receipts, shipments and prices follow:

(1) Number of cars inspected in the Western Grain Inspection Division during December:

	—1924—		—1923—	
	Cars.	Bus.	Cars.	Bus.
Wheat	17,881	23,269,900	48,020	64,217,150
Oats	2,589	4,899,300	4,413	9,154,500
Barley	2,035	2,917,900	1,595	2,320,250
Flaxseed	914	1,036,100	680	804,000
Rye	234	297,150	639	828,750

Average bushels per car:

	Wheat.	Oats.	Barley.	Flxsd.	Rye.

MODERNLY EQUIPPED COUNTRY ELEVATOR

Feed Grinding Is Profitable Side Line.

TYPICAL of the progressive type of elevator found in Kansas, is the 35,000-bu. house recently erected by The Everly Grain Co., at Garden City. In the accompanying illustration is shown the new elevator, but the company owns in addition a large warehouse and coal bins across the road and not seen in the picture. The capacity of the house is 35,000 bus., the dimensions being 32 by 43 ft. at the base and 40 ft. high with a 24 ft. cupola. Every facility for the rapid handling of grain is included in the new machinery, which includes a Globe Dump, Richardson 10-bu. Automatic Scale, Lee Mfg. Company Suction Cleaner, American Great Western grinder; and two elevator legs with 2,300 bu. capacity each. Power is furnished by fully-enclosed electric motors.

Storage facilities comprise 18 bins, six of which are main bins, four overhead bins over drive-way, and eight grinder bins over the grinding room. The warehouse to the east of the elevator is 90 by 32 ft., and contains an office 16 by 26 ft. To the west is a flour store room which is 16 by 32 ft. Both elevator and warehouse are iron-clad.

EVERLY GRAIN CO. PLANT AT GARDEN CITY, KANS.

The officers of this progressive elevator company are H. H. Everly, president; Chas. Philpot, vice president; and E. M. Schreiber, secretary-treasurer. As evidence of the successful methods employed by this company is the plan for an advertising campaign in local papers which is soon to go into effect.

FORT WORTH RECEIVES FURTHER RECOGNITION.

Supervision over the handling of grain at Amarillo and Plainview, Tex., was recently assigned to Clyde W. Griffin, federal supervisor in Fort Worth, by an order of the Department of Agriculture. This is in recognition of the fact that practically all West Texas grains are shipped through Fort Worth. Prior to the recent change, Oklahoma City's federal inspector handled complaints at Amarillo and Plainview. The Fort Worth supervisor also had charge of Dallas, Waco, Sherman and Wichita Falls districts. Galveston is the only other Texas city with federal supervision and that supervision is only for export grains.

Grain merchants in Fort Worth are enthusiastic over the announcement, and coming on top of reports of the largest grain business ever transacted at the Fort Worth Grain and Cotton Exchange are very much gratified with the progress being made. During 1924, there were 32,433 cars of grain inspected under the exchange inspection department, headed by V. L. Nigh, as compared with 17,913 cars in 1923. A healthy increase in receipts and shipments was shown in every kind of grain, according to Leo Potishman, chairman of the committee

on public relations of the Fort Worth Grain and Cotton Exchange. Wheat receipts were 13,410 cars, shipments 4,567 cars, compared with 6,164 cars received in 1923 and 3,073 cars shipped out. It is estimated that the increase in corn receipts approximate 30 per cent, while oats and barley also show a good increase. Sorghum grain inspection increased over 300 per cent.

MONTANA ELEVATORS IN GOOD SHAPE.

Despite the difficult situation arising in Montana following the banking troubles of last year, all grain elevators in the state deposited bonds or securities as a guarantee under the law for operation in 1925. The only elevator which did not comply with the law was closed and not in operation. Two failures of elevator companies occurred during the year, one buyer was unable to meet his obligations, and one elevator burned, according to John M. Davis, chief of the division of grain standards and marketing of the state department of agriculture. The affairs of these concerns are being settled by the department through such means as circumstances dictate. In addition, the division of grain standards has handled several minor disputes between farmers and elevator companies.

IMPORT AND EXPORT PRICES.

Following are the import and export prices of below mentioned commodities on dates named, as averaged by the Bureau of Foreign and Domestic Commerce, import prices being values in foreign markets and export prices those at the time of exportation:

IS THE WHEAT PRICE TOO HIGH?

Department of Agriculture Exonerates Grain Exchange of Any Ulterior Influence—Prices Result of Supply and Demand Situation.

IMPROVEMENT in the farm and market price of wheat during the last six months is beginning to cause comment and complaint. It is not too much to say that this is unwarranted. For four years the wheat grower has been staggering under a load of distress. Depression and deflation have driven hundreds of thousands of wheat growers from the land. The complaints, generally speaking, rest upon the misapprehension that speculation has driven the price up unduly in the United States and hence that the United States price must be above a parity with the rest of the world.

The responsible agencies of the Department of Agriculture are in constant touch with the conditions of supply and demand, not only at home but abroad. Prices in a broad sense are the result of the expert opinion of the world either as to the supply available until a new crop is received or as to the estimated quantity that will become available if the crops have not been harvested.

The 1924 wheat situation in the United States presents a remarkable combination of circumstances. Last May wheat prices began to rise. The United States had reduced her acreage; Canada had reduced her acreage; the whole Northern Hemisphere had planted 10 or 12 per cent less than for 1923. May was a very unfavorable month for crop growth both in the United States and Canada. After June, except in the United States, the condition of the wheat crops of the world showed progressive deterioration. Naturally and inevitably, expert opinion concluded that prices would rise as they necessarily did. Each succeeding crop report advised of deterioration in the various parts of the world. Even as late as November the Canadian crop estimates, issued by the Dominion Bureau of Statistics, took off 20,000,000 bus. from the previous figures. Australia reported damage due to weather conditions. Argentina forecasted a crop of 55,000,000 bus. below 1923. The Bulgarian, French, English and other crops were reported short. And last, but not least, the Canadian export surplus, which for 1923 was roughly 375,000,000 bus., was reduced to 175,000,000 bus. The sum of the whole matter was that the slight but progressive improvement in the United States crop gave us alone of all of the producing and consuming countries a good crop, while generally throughout the rest of the world there was a shortage of bread grains. While our crop was a good crop, it was not a bumper crop by any means; in fact, it was 25,000,000 bus. below the 5-year average and was only about 70,000,000 bus. more than the small, but disastrously low priced crop of 1923.

This statement of the world situation shows unmistakably the reason for the prevailing price and also indicates that the conjunction of circumstances responsible for it is one that is unlikely to occur on the average more than once in many years and hence does not warrant expectation of continued high prices in future years. A Europe still prostrate from the after effects of war must perforce make almost superhuman efforts to meet her needs through home production.

The charges are in circulation that the grower is receiving no benefit from the high price of wheat and that the consumer is being unduly mulcted as a result of them. Furthermore, the grain exchanges are held responsible for existing conditions which those unfamiliar with the facts call very bad. Certainly complaint against wheat prices being too high is unwarranted when they have merely attained a parity of purchasing power with all commodities and when the index number of wheat

prices is still far below the index number of wages.

That the farmer is being benefited is easily demonstrable, for the 1923 farm price of wheat was only slightly more than 92c per bus., while the Dec. 1, 1924, farm price was \$1.30 per bus. Naturally, premium qualities have returned to the grower much more than the average farm price. For instance, during December a cooperative shipping association in Montana sold on the Minneapolis market several cars of premium quality spring wheat at \$2.01 per bus. Even with the cost of marketing and the heavy transportation expense, this price would yield to the grower probably more than \$1.60 per bus.

In connection with the statement that United States wheat prices are too high compared with the rest of the world, the charge is made that Chicago prices are higher than Liverpool prices. The exact opposite is the case. On a recent date when the December future price in Chicago was \$1.52, in Kansas City it was \$1.44, while the price in Liverpool was \$1.77. That speculation, at least in this particular situation, is not unduly burdening city consumers may be concluded from the fact that on Dec. 29 May wheat was selling at Winnipeg for delivery from elevators at Fort William at about \$1.87 per bus., while comparable wheat at Minneapolis was about \$1.75 and the contract grade No. 2 hard at Kansas City was \$1.71. The superficial inference from these figures is that the American price is too low and not too high, as is charged.

Exports on an unusual scale play their part in the situation. During the six months from July to December our exports of wheat were over 197,000,000 bus. During the same period in 1923 our exports were only about 81,000,000 bus. In other words, although the 1924 crop was only 70,000,000 bus. greater than 1923, exports are already 116,000,000 bus. greater for identical periods.

It is of course inherent in our wheat grower's situation that circumstances force him to market immediately or soon after harvest. Based on a 9-year average estimate, nearly 70 per cent of the wheat crop leaves the farm in the five months from July to November, inclusive. May is the high price month of the year. It is also the month of lowest marketings. To enable growers to benefit more largely from the high priced period of the year and from years when high prices prevail generally, we need greater ability on the farmer's part to store on the farm or to hold at terminals, when economic conditions indicate the desirability of such a course. Habit, stress, our whole marketing system, result in rushing the whole crop to market no matter what range of prices prevail.

Those who have felt concerned regarding the situation have charged the Department of Agriculture with failure to enforce the United States Grain Futures Act. These charges must necessarily be based upon a misunderstanding of the actual facts. The Grain Futures Administration of this department has competent investigators daily on the floors of the important grain futures exchanges. In addition it receives reports daily showing the outstanding interests of all firms. No information in the possession of its market supervisors gives ground for alarm that the essential bread grain of the United States is being

made the subject of vicious and harmful speculation.

ELEVATOR CONSTRUCTION AT BUFFALO.

Purchase of the Buffalo elevator of the Dakota Elevator Corporation has been made by Levi S. Chapman, Syracuse, N. Y., effective Jan. 1. The Dakota elevator has a capacity of 1,200,000 bus., and additional land included in the deal will involve a price of \$2,000,000. It is said that an addition to the elevator is being considered.

Representatives of the Barnett & Record Co., Minneapolis, have started preliminary work on the construction of the new \$1,000,000 elevator of the Saskatchewan Co-operative Grain Elevator Co., to be erected in Buffalo. Ground for the subbase will be broken at once, and bids on the main building will be taken soon.

FLOUR PRICE LAGS BEHIND WHEAT.

Statistics regarding the importation of North American wheat were given by Sir Herbert T. Robson, of the firm of Ross T. Smyth & Co., grain importers, in testimony before the Royal Commission investigating the high cost of living in Great Britain. He explained that "corners" in wheat and undue inflation, owing to speculation, were almost unknown. The price of flour always lagged behind that of wheat on a rise or fall, and the price of bread lagged very seriously behind the price of flour, but the attempted wheat "corner" of 1917 was of such short duration that it did not seriously affect the price of bread for any length of time. Canada is now such a large market that it would be practically impossible to hold up supplies in the United States, both for financial and political reasons. Very large quantities of wheat moved from the farm to the ocean ship on the basis of 2 cents or less per bushel profit; that is to say, at the present prices, a profit of about 1½ cents.

Other witnesses from the Liverpool district stated that the import business was cut so keenly that it was done for a gross profit of, in many cases, one-half of one per cent. It has been the custom of bakers in England to buy their flour requirements for perhaps two or three months on one day when they thought there was likely to be an advance in prices. Therefore, if millers and importers did not use forethought in providing for such sales, it would have an unfortunate effect on prices in exporting countries from the English point of view.

KANSAS FIGHTS THE CHINCH BUG.

Enormous damage is done every year to the grain crops of Kansas and other states across the Mississippi River by the chinch bug, but Kansas seems to be a special sufferer. To reduce the losses from the ravages of this insect, Kansas has had a campaign among farmers to destroy them. Burning of weeds, grass, and other plant refuse has been found to be the most effective way of destroying the chinch bug after the crops have been removed, as the adult bug over-winters in protected places such as those mentioned.

Strangely, leguminous crops are immune to attacks by the chinch bug. Farmers last year produced good crops of soy beans in corn fields where the bugs had eaten the corn.

CANADIAN VISIBLE.

Canadian visible supply of wheat decreased 407,000 bus.; oats increased 145,000 bus.; rye, 73,000 bus.; barley, 104,000 bus. These statistics represent terminal stocks only.

	Jan. 10, 1925.	Jan. 3, 1925.	Jan. 12, 1924.
Wheat	31,041,000	31,448,000	50,934,000
Oats	16,827,000	16,682,000	9,853,000
Rye	1,812,000	1,739,000	5,000,000
Barley	6,056,000	5,952,000	1,873,000
Afloat—Wheat, 9,095,000 bus.; oats, 1,112,000 bus.; barley, 888,000 bus.			

VISIBLE SUPPLY OF GRAIN.

Following is the visible supply of wheat, corn and oats by weeks (final 00 omitted), with comparisons:

The Letter Box

Wheat Cleaned Up.

PRICE CURRENT-GRAIN REPORTER: Regarding the wheat situation in Montana, the wheat is about cleaned up, do not think there is 10% left on the farms. *Gary Hay & Grain Company, Per John P. Gary, Bozeman, Mont.*

Use Safety Matches.

Price Current-Grain Reporter: We have a letter from R. W. Cole, manager of the Wilson Flour Mills, Wilson, Kan., in which he reports to us that they have recently had three instances where the wheat shipped to them from elevators contained matches of the ordinary striking kind. In the last instance a whole box of matches went into the receiving separator and were mixed with the wheat.

Undoubtedly matches are responsible for a great many of the fires that occur from unknown causes in flour mills and in grain elevators. We would scarcely ever be able to trace the origin of a fire which was so started.

If matches must be carried in the clothing of the elevator operators, they should be of the safety type.—*Mutual Fire Prevention Bureau, Eugene Arms, Manager.*

Seed Time and Harvest.

Price Current-Grain Reporter: Wheat is maturing in some portions of the world every month of the year. If you have a table showing this, will ask you to mail me one.—*P. A. Partrick, Florence, Ala.*

The following table gives the seed time and harvest and the country. We publish it thinking it might be of interest at this time to others.

Country and Seed Time.	Harvest.
Australia, New Zealand and Chile—May-June	January
East India and Upper Egypt—July-Aug.	Feb.-Mar.
Lower Egypt, Syria, Cypress, Persia, India, Asia Minor and Mexico—Aug.-Sept.	April
Algeria, Central Asia, China, Japan and Morocco—Aug.-Sept.	May
Turkey, Greece, Italy, Spain, Portugal and South of France—Sept.-Oct.	June
Romania, Bulgaria, Austria-Hungary, South of Russia and Germany—Sept.-Oct.	July
Switzerland, France, South of England, Belgium, Holland and Great Britain—Oct.-Nov.	August
Denmark, Poland, Lower Canada, British Columbia and Manitoba—Mar.-April	August
Scotland, Sweden, Norway, North of Sp. and Wh. Russia—April-Sept.-Oct.	September
Peru, South Africa and Argentina—May-June	November
Burmah—May-June	December

Much Corn Marketed.

Price Current-Grain Reporter: A practical and encouraging sign for agriculture is the fact that farm sales advertised this year are fewer in number than for several seasons, which no doubt means that more people are sticking to the land for a livelihood and fewer are deserting the farms and taking city job. We do not hear of the great scarcity of farm labor that has prevailed heretofore.

Many farmers who have sold corn at one time and another since the crop matured have taken advantage of the good roads and weather prevailing so far this month to make deliveries, many of which were delayed on account of December storms. It now appears that most of this work has been completed and that another week will see the near completion of this run of corn unless price should advance.

Probably two-thirds of the winter's run of corn has now passed over the elevator scales in Central Illinois. On account of the terminal congestion and wide discounts exacted at some of the large markets this stream of corn has been partly diverted to smaller markets and to local industries.

Quite a few days in January have shown over 100 cars of corn handled by the inspection department at Decatur;

the average moisture test somewhere between 19 and 20 per cent. Moisture is leaving our corn very slowly, but after the spring and summer breezes hit it, we expect it will practically all grade number two.—*H. I. Baldwin & Co., Decatur, Ill.*

Corn Crop About Harvested.

Price Current-Grain Reporter: We have been having some real winter weather the past three weeks, the temperature going down as low as 20 deg. below zero, which is cold weather for Nebraska.

Our corn crop is almost all harvested, and we find there is a lot of good sound corn that will be suitable for seed. In fact, we have in sight eight or ten cars of white and yellow corn that is testing from 98 per cent to 100 per cent.

This leads us to believe that the demand for seed corn for local consumption will be very limited. Farmers are selling quite a lot of corn and also selling their hogs, as they cannot afford to feed the hogs this high priced corn, which is bringing \$1.10 per bushel today. There was a little red clover raised in this section, but the farmers who own it are holding it for higher prices. A number of farmers are planting sweet clover in place of red clover. It looks now as though we would have a good demand for all kinds of seed this spring.

Demand has already opened up for incubators and brooders.—*Gunn Seed Company, E. S. Gunn.*

TO MEET AT MINNEAPOLIS.

Program of annual convention of Tri-State Country Grain Shippers' Association, to be held at Minneapolis, Feb. 5. The New Nicollet Hotel will be the headquarters.

Morning Session.

9:30 a. m. President's Address—F. E. Crandall, Mankato, Minn.

10:00 a. m. Appointment of committees.

Afternoon Session.

1:00 p. m. Luncheon—New Nicollet Hotel.

1. Address—E. S. Woodworth, Chamber of Commerce, Minneapolis, Minn.

2. "My Experience with the Coöperative Marketing Law"—A. O. Radke, Le Sueur Center, Minn.

3. "Some Legal Phases of the Minnesota Coöperative Marketing Law"—Joseph N. Moonan, Waseca, Minn.

4. "The Market Quotations of the Grain Bulletin"—F. R. Durant, Minneapolis, Minn.

5. "The Minnesota Storage Law"—J. T. Probstfield, Supervisor, Local Grain Warehouse Department, Minneapolis, Minn.

6. Reports of Committees.

7. Election of Officers.

CHICAGO GRAIN STOCKS.

Wheat stocks in all positions in Chicago decreased 911,000 bu. last week, rye 590,000 bu. and barley 32,000 bu., while corn increased 1,346,000 bu. and oats 244,000 bu. Details follow, last three ciphers omitted, except in the totals:

	Public.	Private.	*Total.	Last yr.
Wheat	3,349	4,888	9,199,000	16,685,000
Corn	3,020	6,540	9,560,000	2,763,000
Oats	5,546	14,188	20,885,000	3,169,000
Rye	2,005	416	2,421,000	1,400,000
Barley		353	353,000	376,000
*Includes 962,000 bu. wheat and 1,151,000 bu. oats afloat.				

NEW GRAIN LAW IN ROUMANIA.

A new law dealing with grading and storing of grain is being contemplated by the Roumanian government. It is expected that the government will create a trade monopoly for handling the grain, and exporters are very much alarmed. The intended government supported company is to have a capital of about \$2,500,000, of which 40 per cent will be foreign capital. This sum is considered entirely inadequate for starting a complete bulk handling system as up to the present only Braila, Constantza, and Galatz have terminal elevators.

TIME OF DELIVERY DEFINED.

The Board of Directors of the Grain Dealers National Association has officially defined, so far as the Association's membership is concerned, the meaning of the code word "Bounce" in the Robinson Code. The definition of the Board is as follows:

"That 'Time of Delivery' as provided on page 20 of the 1897 Revised edition of the Robinson Telegraphic Cipher shall mean 'Time of Delivery to the carrier for transportation to destination' and not 'Time of delivery at destination.'"

This action of the Board was the result of a controversy that arose in the trade over the meaning of the word. C. D. Sturtevant, of Omaha, chairman of the Association's trade rules committee, prepared the above definition after consultation with the other members of his committee and then submitted it to the directors who approved it.

Mr. Sturtevant points out in his letter to the other members of the trade rules committee that a reference to the Robinson code, page 20, will disclose the fact that all of the code words relating to time as used in contracts are under the heading "Time of Delivery." The universal custom is, of course, to use these words to mean "Time of Shipment." Now that the controversy over the meaning of the word has arisen it will not be long, the chairman of the trade rules committee thinks, before some of the Association's arbitration committees will be confronted with a case where the buyer of grain will seek to escape liability on this point. It was to anticipate any such proceeding that Chairman Sturtevant prepared the definition of the word and asked for the approval of the Board of Directors.

The constitution of the Grain Dealers National Association provides that all rules such as trade rules and arbitration rules, must be made or amended by all the members in annual convention. However, provision is made for meeting emergencies between annual meetings. The members of the Board of Directors may amend or make any necessary rule or rules, these amendments or new rules to be in full force and effect until the next annual meeting when they shall be considered by the convention and either adopted permanently or be modified or rejected.

The definition will be accepted by all arbitration committees of the Association from now until the next annual convention which is to be held at Kansas City, Mo., on October 12, 13 and 14. Chairman Sturtevant will present the matter to the convention and ask for its permanent disposition.—*Charles Quinn, Secretary.*

"SOME POOLER."

Well, Old Top: Markets are surprisingly strong these days—Kansas seems to have had a bumper crop of Pardons and while December deliveries were big, if newspaper reports can be depended on, markets held firm and they were in good demand right up to the close of the administration of the late Governor. He also was a strong advocate of the Wheat Poolers. He signed up all of the wheat he would raise on his cattle and corn ranch for five years with them. Their main idea was to do away with the middle man by marketing the pooled wheat. The ex-governor made so many speeches advocating the Wheat Poolers that if it should develop at his trial or investigation that he had to use the middle man to market something he entirely controlled it would no doubt convince quite a few of the few who signed that the middle man is a necessity.

This brings us down to the wheat market that since last September has done nothing but make a bear sing:

"It's a Mean, Mean Baby That Always Scratches Its Ma."

Sentiment, while mixed, even at prevailing prices has a lot of supporters on the bull side of the market and to the writer's mind the cash wheat situation never was stronger. Light supplies in the country, coupled with a continued

good milling demand, makes \$2.00 in Kansas City look like a certainty in the very near future.

The bulk of the corn crop has moved and continued strong coarse grain markets can be looked for.—*Tod Sloan, B. C. Christopher & Co., Kansas City, Mo.*

COAST GRAIN PRICES.

Quotations of grain reported by grain exchanges of the Pacific Coast as of Jan. 8, are as follows:

Portland—Merchant's Exchange, noon session, Jan. 8:

	January.	February.
Wheat—	Bid. Ask.	Bid. Ask.
Hard white	\$1.90 \$1.90	\$1.90 \$1.90
Soft white	1.80 1.90	1.80 1.90
Western white	1.78 1.81	1.79 1.82
Hard winter	1.78 1.82	1.79 1.83
Nor. spring	1.80	1.80
Western red	1.73 1.77	1.73 1.78
H. B. bbl.	2.05 2.12	2.05 2.12

Oats—

2 36-lb. w. fd.	41.50	42.00
2 36-lb. gray	40.50	41.00

Barley—

No. 2 44-lb. fd.	45.25	43.00	45.50
------------------	-------	-------	-------

Corn—

3 E. Y. ship.	51.00	52.00	51.25	52.00
Millrun	37.50	39.50	37.50	38.75

Bags—Spot, 11½c bid; July, 12½c bid, 12½c asked; domestic, 12½c bid, 13c asked.

Millfeed—City delivery prices: Millrun, \$43 ton; middlings, \$55; scratch feed, \$69; rolled barley, \$57; cracked corn, \$64; rolled oats, \$53.

San Francisco—Barley Futures—A. M. session, Jan. 7: May barley, \$2.47 asked; April barley, \$2.40 asked; no sales.

Following prices are wholesale for carloads, sacked:

Barley feed, \$2.20@2.27½; shipping, \$2.75 @2.90. Bran, \$32@34. Shorts, \$37@39. Middings, \$45@46. Millrun, \$34@39. Wheat, feed, \$2.70@2.75; milling, \$2.75@2.80. Red oats, feed, \$2.25@2.30. Corn, California yellow, nominal; white, Egyptian, \$2.25@2.30; milo, \$2.15@2.25; No. 1 eastern yellow, in bulk, \$2.25; No. 2, \$2.20@2.30.

Grain bags—Calcutta, June-July bags, 12½c bid, 12½c asked.

Sales—Calcutta, June-July bags, 150,000 at 12½c, 100,000 at 12½c; spot, 50,000 at 12c. San Quentin grain bags, 10½c.

Seattle—Market data as of Jan. 7.—Oats

No. 2 white feed, \$44.50 ton.

Corn—No. 3 yellow, \$51 ton.

Wheat—Soft white, \$1.80 bushel; western white, \$1.78; hard winter, \$1.77; western red, \$1.75; northern spring, \$1.77; Big Bend bluestem, \$2.

Yesterday's car receipts—Wheat, 10 cars; corn, 1; hay, 2; oats, 2; barley, 1; flour, 13.

INLAND GRAIN MARKETS.

Ritzville, Wash., Jan. 7.—Bart, \$1.86; red, \$1.72; rye, \$1.55.

Dayton, Wash., Jan. 7.—Club, \$1.56; red, \$1.50.

Odessa, Wash., Jan. 7.—Bart and bluestem, \$1.86; Turkey red, \$1.72; forty-fold, \$1.58; marquis, \$1.60; club, \$1.54; Jones five, \$1.53.

Pullman, Wash., Jan. 7.—Red, \$1.55; white, \$1.58.

Davenport, Wash., Jan. 7.—Hard white, \$1.80; bluestem, \$1.70; club, \$1.56; marquis and forty-fold, \$1.58.

Lewiston, Idaho, Jan. 7.—Red, \$1.53; white No. 1, \$1.60.

When writing advertisers please mention THE PRICE CURRENT-GRAIN REPORTER.

FUTURE TRANSACTIONS AT CHICAGO.

The volume of sales for future delivery on the Chicago Board of Trade for the days indicated, subject to corrections of minor importance, as reported by J. W. T. Duvel, Grain Exchange Supervisor, were as follows (last three 000 omitted):

1925—					
Jan.	1...	Holiday.			
Jan.	2...	64,224	17,608	14,403	3,083 99,318

Legal, Traffic and Arbitration Decisions

COURT DECISIONS.

Charge that plaintiff had burden of proving that crop from certain field was included in contract held proper. In action for damages for refusal to sell grass seed as agreed, charge that plaintiff had burden of proving that crop from certain field was included in contract held proper. In action for damages for refusal to sell grass seed as agreed, evidence held to sustain jury's finding that certain field was not included in contract.—*C. E. Parks Grain Co. v. Gwynn.* (Court of Civil Appeals of Texas. Amarillo.) 265 S. W. Rep. 1071.

Loss of expected net proceeds from resale of wheat held element of damages for breach of contract to loan money to buy wheat. In action by milling company against bank for breach of contract to make loan, loss of net profits, expected from resale of wheat, and contemplated by party when contract was made, held element of damages, not too remote or contingent. Rule against recovery of uncertain and contingent damages as too remote only applies to such damages as are not certain result of breach, and not those certain to result but uncertain in amount. In action for breach of contract to make loan, evidence held insufficient to show purpose of loan was to furnish funds to purchase wheat for resale so as to support recovery of possible net profits from resale. *National Bank of Cleburne et al. v. M. M. Pittman Roller Mill.* (Commission of Appeals of Texas.) 265 S. W. Rep. 1024.

Liability of common carrier ceases with delivery, according to directions or usage and custom of trade. Liability of common carrier ceases with delivery at point of destination, according to directions of shipper or usage and custom of trade at destination.—*Arkansas Railroad v. Winters.* (Supreme Court of Arkansas.) 265 S. W. 967.

Breach of Pooling Contract. Trials of cases involving charges of breach of pooling contract on the part of members of the Oklahoma Wheat Growers' Association, brought by the association against several members in Kingfisher county, have been continued by the district court until the first term of 1925. These cases were of outstanding interest to wheat growers and grain dealers of the state, since the answers of the defendants made serious charges against officials of the association.

Proceeds of draft drawn by seller on buyer in favor of bank held not subject to garnishment as seller's property. Draft drawn by seller on buyer in favor of bank for price of shipment to buyer became property of bank when it credited amount of draft to seller's checking account, and its proceeds were not sub-

ject to garnishment as seller's property while in hands of bank to whom payee bank had sent it for collection.—*Merchants' Bank of Kansas City v. Searcy Wholesale Grocer Co.* (Supreme Court of Arkansas.) 265 S. W. Rep. 961.

Place for delivery under sales contracts. Plaintiff booked defendant's order for alfalfa meal, to be shipped by June 15. Plaintiff seller's place of business was in St. Louis, and controversy arose concerning its right to ship meal from Garden City, Kan., 700 miles farther away from Birmingham, the destination of the shipment, than St. Louis. Passing upon this point, the Court of Appeals said, in part. "When the plaintiff, a jobber doing business at St. Louis, Mo., accepted the order of the defendant manufacturer of mixed stock feed in Birmingham for five carloads of No. 1 alfalfa meal, the contract being silent as to the place from which the commodity should move, the law will presume that the point of origin of the shipment was St. Louis, Mo., the place of business of the seller."—*National Feed Co. v. Sunny South Grain Co.* (Alabama Court of Appeals.) 101 So. 542.

Question of undue discrimination between interstate and intrastate rates one for Interstate Commerce Commission. Whether an intrastate rate established by a state commission creates an undue discrimination against interstate rates is a question of which the courts have not jurisdiction, but one which, under the transportation act, must be determined by the Interstate Commerce Commission.—*Illinois Cent. R. Co. v. Railroad Commission of Kentucky et al.* (District Court, E. D., Kentucky.) 1 Fed. Rep. (2d) 805.

TRANSPORTATION MATTERS.

Grain Traffic on Erie Canal.

A very substantial increase in grain traffic on the Erie Canal was recorded for the year 1924 as compared with 1923. Wheat handled amounted to 13,336,990 compared with 9,731,822 in 1923; corn, 1,104,840 bus. compared with 1,717,248 bus. in 1923; oats, 1,448,730 in 1924 against 389,044 in 1923; barley, 1,582,730 bus. in 1924 compared with 1,438,721 in 1923; and rye, 5,989,730 bus. against 8,652,350 bus. in 1923.

Great Northern Grain Movement.

According to the records of the Great Northern Railway, 40 per cent of all grain received at the Head of the Lakes. It is also claimed that Great Northern elevator S at Duluth during October handled the greatest amount of grain ever handled by a single elevator in one month in the entire world. The amount was 12,990,298 bus.

Soo Canal Grain Traffic.

The movement of wheat through the Soo in 1924 showed an increase over the previous year, the total being 289,722,607 bus. compared with 282,985,776 bus. Grain other than wheat aggregated 165,476,906 bus., compared with 87,523,341 bus. in 1923.

Grain Tariff Suspension.

Suspension from Jan. 1 until May 1, of schedules as published in supplement No. 34 to joint tariff Countiss' I. C. C. No. 1129, etc. The suspended schedules propose to restrict routing on grain and grain products originating on lines other than the Chicago, Burlington & Quincy Railroad in the states of Colorado, Kansas, Nebraska and Wyoming destined to Pacific Coast territory, when delivered to the Chicago, Burlington & Quincy Railroad at Missouri River cities which results in increased rates.

California Millfeed Rates.

Reduced rates on millfeed from the Middle West to California points will go into effect as ordered by the I. C. C., and the suspension of the new tariffs has been rescinded. Certain California interests were opposed to the reduction, but the protests of millfeed buyers influenced the Commission in ordering the new rates into effect.

Canadian Controversy Over Crow's Nest Pass Rates.

Considerable controversy has resulted from the decision of the Board of Railway Commissioners setting aside the Crow's Nest agreement rates. The cabinet council has over-ruled the railway commissioners and has restored the lower rates pending appeal to the Supreme Court of Canada. Alberta, Saskatchewan, and Manitoba provinces benefited by the lower rates on grain shipments, but the eastern provinces are opposing the old tariff.

New Complaint to I. C. C.

In No. 16520, Otto A. Zimmerman, Minneapolis, Minn., vs. Dir. Gen., it is alleged that rates are in violation of Section 6 on barley from points in South Dakota and Minnesota to Milwaukee, Wis., reconignment made at Minneapolis. Reparation is requested.

COTTON NEWS

Improved Foreign Demand.

The upward trend noted in exports of cotton from the United States from July 1 to October 31 of 1924 was continued during the month of November, when exports totaled 1,343,000 bales, as compared with only 802,000 bales during November, 1923. This brought the total exports from July 1 to November 30 up to 3,601,000 bales, as compared with 2,765,000 bales during the corresponding five months of 1923.

Increased purchases by the United Kingdom, Germany, France, Japan, Italy, Belgium and European Russia accounted for the higher export this year. The United Kingdom and Germany were particularly heavy takers during October and November. There were no exports to Russia during November this year, but total shipments to that market from July 1 to October 31 amounted to approximately 119,000

bales, as against none for the corresponding period of 1923-24. Japan has also been affording a good market for raw cotton. Exports from this country to that market from July 1 to November 30, 1924, totaled 334,000 bales, as compared with 290,000 bales during the corresponding period last year.

Carry-over Will Be Small.

America raises nearly 60 per cent of the world's crop; much of its crop has already been marketed. The carry-over August 1, 1925, it is feared, will again be small. After a good crop the farmer may relax his vigilance as regards the weevil; he is apt to, as everybody knows. Carrying charges have protected the merchant this year; he is secured. The feeling that 1925 is to justify the optimistic hopes is universal.

World's Visible Increase.

The increase in the world's visible supply of all kinds of cotton this week was down to 80,500, against 119,857 last week and 38,287 last year, and a decrease two years ago of 11,815 bales. There was a decrease, however, in the world's stock of American cotton of 26,500 bales this week for the first time since last summer. The world's movement has, of course, been gradually slackening for some time, but no actual decrease in world's stocks of American cotton has occurred since last August. Last week they increased 82,857.

Danger of Losing World Markets.

There is no immediate danger that this country will lose its position of dominance in the world cotton market, but the situation demands more aggressive efforts to stabilize production, the Chamber of Commerce of the United States declared yesterday in a report on conditions suggesting increased yield per acre as a remedy. Steady decline in production and rise in the price of cotton in the United States, the report said, have caused increasing activity abroad to develop other cotton areas.

American Cotton Relatively Cheap in Liverpool.

Spot prices for raw cotton in Liverpool up to December 19 were characterized generally in commercial reports as steady, with the market quiet and spot sales continuing small. Scarcity of long staple, which accounts for the recent strength of Egyptian cotton, continues, although speculative operations have become less pronounced and prices on this class are now lower. On the whole the Liverpool market shows somewhat less strength than American markets, and of all the cottons selling in Liverpool American is now relatively cheapest. It is not only considerably below the price of last year, but even below the price prevailing two years ago. Indian cotton, while not as high as one year ago, is still higher than two years ago, and Egyptian is higher than in either of the last two years for the corresponding period.

WEEVIL KILLER

TETRAFUME

(REGISTERED)

WILL NOT BURN—WILL NOT EXPLODE

Approved by Fire Insurance Co's.

Harmless—Stainless—Leaves No Odor

The Grain and Feed Trade have learned to use Tetrafume. Save Dockage for Live Weevil, and Loss in Stored Grain and Feed Stuff.

Terminal Markets

NEW YORK.

J. M. Nugent, Correspondent.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: T. G. Stone of Buffalo; N. Patterson of Fort William; W. T. Marlow of Montreal; R. P. Lipe and H. Smith, both of Toledo; L. J. Waitzman and A. O. Mason, both of Chicago; H. Galloway of Vancouver, Ward Ames of Duluth, and J. H. McDonald of Winnipeg.

During the greater part of the week the foreign demand for wheat was not active but on one or two days there was a fair amount of buying which in the aggregate amounted to about four million bushels. The bulk of the business appeared to be in American spring and winter wheats, but there were also some scattered sales of Manitobas and some Durums.

Flour Situation.

New York, Jan. 10.—Stronger prices ruled in the local flour market through the week as a result of the upturn in wheat. The feature of the trade is again in the export end where further business with Russia occurred. Total sales since this buying commenced are estimated at thirteen cargoes of which all except three were closed here.

The local demand is very quiet with buyers understood to be holding off even for the balance of their January requirements. Spring patents were quoted at \$9@9.50, soft winter straights \$8.60@8.90, and hard winter straights \$8.75@9.25 per 196 lbs.

DULUTH.

S. J. Schulte, Correspondent.

F. B. Carr, treasurer of the Hallet & Carey Co., was a visitor on this market from Minneapolis during the last week.

H. J. Atwood of the Atwood-Larson Co. here is away upon a West Indies trip. This is the first vacation Mr. Atwood claims to have taken in several years.

A. H. Smith of Winnipeg, a former Duluth grain operator but for the last several years engaged in the trade at Winnipeg, was a visitor on the Duluth Board of Trade during the last week.

M. L. Jenks, president of the Itasca Elevator Co., is spending the remainder of the winter upon a vacation in Florida. He started in at Jacksonville and proposes to visit other winter resorts in that state before returning.

Watson S. Moore of the Moore Grain Co. has announced his intention to return to the New York headquarters of his firm within a few days. He has been in Duluth since early last summer supervising operations at his office here.

The annual nominations of officers, directors and members of standing committees of the Duluth Board of Trade held on Saturday resulted in the nomination of P. H. Ginder as president; George A. Barnum, Jr., vice-president; and directors, Walter McCarthy, George E. Robson and B. Stockman.

Directors of the Board of Trade Clearing Association have been elected as follows: W. J. McCabe, E. N. Bradley, G. H. Spencer, P. H. Ginder, B. Stockman, G. G. Barnum and J. W. Galvin. Officers for 1925 are: E. N. Bradley, president; B. Stockman, vice-president; G. F. Foster, secretary and manager, and S. W. Paine, assistant manager.

Members of the standing committees were re-elected by acclamation as follows: Board of arbitration, G. G. Barnum, Sr., M. M. McCabe and E. A. Vivian, and board of appeals, Thomas Gibson, F. E. Lindahl and W. C. Mitchell. The annual elections of the board will be held on Jan. 20 and failing unexpected developments the slate of officers and directors as nominated will be elected.

Charles H. Thornton of Winnipeg was a visitor on the Duluth market during the week. He expressed himself as bullish regarding the flaxseed market situation on the theory that all the supplies of flaxseed in this country and more will be required to take care of domestic requirements. The extent of the Canadian flaxseed yield of the last harvest he considers to be pure guesswork for the reason that a consider-

able proportion of the crop up there is still under the snow and there is no knowing how it will thresh out.

Flour Trade Better.

Millers reported flour demand in this market to have been in better volume lately with jobbers coming in as a result of an easier market. Patents are 25c off. Prices per bbl. f. o. b. mill in carlots follow:

Family patent, jute, \$9.15; bakers' patent, jute, \$8.90; first clears, \$7; second clears, \$5.50.

TOLEDO.

S. M. Bender, Correspondent.

Ed Colton of the Colton Bros. Co., Bellefontaine, Ohio, was calling on various members of the Exchange the past week.

Shipments for the past year were 5,829,818 bus. wheat, 1,615,768 bus. of corn, 2,524,280 bus. oats, and 1,050,225 bus. rye.

Receipts of grain for the week were 45 cars of wheat, 60 cars of corn, 45 cars of oats, 1 car of rye and 1 car of barley. Total, 152 cars.

Louis A. Mennel of the Mennel Milling Co. is expected back from California in a few days. He spent the holidays there with his family.

E. C. Bennington of the Milwaukee Bag Co. was in Toledo recently calling on the trade and visiting with their local representative, John A. Brewster.

First trade in October clover was made Jan. 9 at \$17.50. Year ago the first trade was made Jan. 24 at \$11.75 and it sold off to \$11.20 on Feb. 26 and up to \$19 on Sept. 29.

Flour output as reported by Toledo mills for the past week was 38,800 bbls., equal to 81 per cent of capacity. The week before it was 29,600 bbls., and a year ago was 23,700 bbls.

Seed shipments for 1924 were 22,559 bags of clover, 6,780 bags of alsike, 11,353 bags of timothy. The year before they were 51,447 bags of clover, 10,849 bags of alsike, 22,756 bags of timothy.

Cars of grain inspected in this market for the year 1924 were 5,980 cars of wheat, 3,278 cars of corn, 3,011 cars of oats, 294 cars of rye and 33 cars of barley. Total, 12,606 cars, compared with 10,206 cars in 1923.

J. Warren Kerrigan, one of the few real he-men in the movies, was an interested visitor on the Exchange floor last week while making his personal appearance at a local theater. Will Annin of W. H. Moorehouse & Co. introduced him to members and entertained him at his home for the week. Mrs. Annin is a cousin of the famous star.

J. D. Hurlbut of the Toledo Grain & Milling Co. was re-elected president of the Toledo Produce Exchange last week; J. C. Husted of the C. A. King & Co., first vice-president; John Wickenhiser, second vice-president; A. Gassaway, secretary, and Fred Jaeger of J. F. Zahm & Co., treasurer, were also re-elected. Harold Anderson, vice-president of the National Milling Co., was elected to the board of directors to succeed his father, David Anderson. Frank Bowes of the Kasco Mills succeeds G. R. Forrester on the committee for arbitration, and C. R. Keilholtz of Southworth & Co. was named on the committee of appeals. Otherwise the membership of various committees was unchanged.

The following, written by the financial editor of the Toledo Blade last week, is herewith reprinted by permission: "Toledo's growth as a grain marketing center is reflected in Toledo Produce Exchange figures of total grain movement for 1924. Receipts of all grains in Toledo for the past year totaled 25,127,000 bushels. In 1923 the total stood at 23,207,000 bushels and the previous year 18,414,678 bushels. Toledo has numbered among its most progressive grain firms a number of houses that see to it that the city's standing as a grain marketing center continues to climb year by year. If the lake boats don't bring the grain the railroads do. The grain business is full of romance. Grain men here can tell you of thrills galore if they will. The grain market moves fast when it moves and only Providence has pity when it moves against you. A year and a half ago we met a natural born optimist. ALL markets were going to the opposite direction to that taken during the last eight or nine months. Stocks were sick. Grains were feeble. Grain houses were closing in various cities. The grain trade was down in the valley even as were the farmers. But our acquaintance was not downcast. Better times were coming, he assured us. The pendulum had swung too far, it would have to right itself. We listened but adopted the Missouri attitude. Our optimist

was Kent Keilholtz. Some of his mail carries the initials K. D., but he is known throughout the trade as Kent. Just naturally an optimist is Kent. Fairly successful at it too. Started in the grain business as an office boy some years ago and now heads one of the oldest grain firms in the city. Never bearish, sometimes cautious, a bull or neutral all the time. He is certain Toledo's star of destiny as a grain center is only rising. Year by year the volume of grain coming here has grown but he looks forward to still greater volume as the country grows."

OMAHA.

Leigh Leslie, Correspondent.

The Lodge Pole Lumber & Grain Co. has been incorporated with a capital of \$200,000. Incorporators: George A. Roberts, 230 Grain Exchange, and others.

The McCaull-Dinsmore Co. has closed its Omaha branch office. The company had been operating here as a member of the Omaha Grain Exchange for some time. L. P. Roberts was manager of the Omaha office.

The value of the flour and mill products made in Omaha in 1924 was \$11,180,808, according to figures compiled by the Omaha Chamber of Commerce. This is an increase of \$2,847,808 over the value of the 1923 production. In 1910 the total output of Omaha's flour mills was valued at only \$2,454,000. Flour and mill products sold by Omaha wholesalers in 1924 were worth \$17,930,335 as compared with \$12,858,085 in 1923—an increase of about 40 per cent for the year.

The plant and business of the Jay Burns Baking Co. has been sold to the Continental Baking Co., a large eastern corporation operating in many cities of the country. At the time of the sale the plant and business of the Jay Burns Baking Company was owned by the Standard Bakeries Corporation of Chicago. The sale price is reported to have been \$600,000. The business was founded by Jay Burns, and is the largest of its kind in Omaha. Mount Burns, son of Jay Burns, will remain with the Omaha branch of the corporation. George Dunn is the local manager.

Secretary Campbell of the Nebraska Millers' Ass'n says that Nebraska elevator owners and operators should take an active interest in the movement to increase the acreage of spring wheat this year, especially in those sections of the state where wheat growing has been decreasing during the period of low prices. "Now is an opportune time to stimulate interest in the business and to get results," Mr. Campbell says, "because of the prevailing high prices, which will be largely reflected into the new crop season. The elevators and mills get to handle practically all of the wheat crop, while a big portion of all other grains are fed on the farms. Spring wheat usually contains a high percentage of protein for which the mills are willing to pay high premiums. For these reasons the elevator men have a peculiar interest in advocating a greater interest in spring wheat as a preliminary to a larger winter wheat sowing this fall, as well as the quick money the spring wheat will bring to the growers."

OKLAHOMA CITY, OKLA.

W. F. Kerr, Correspondent.

Fred Graves, Foss grain dealer, who was here last week, said that little wheat was moving in that territory and that a fair movement of kafir was under way.

Among re-elected vice presidents of the Fidelity National Bank of Oklahoma City is T. C. Thatcher, general manager of the Oklahoma City Mill & Elevator Co.

The W. B. Johnston Grain Co. of Enid is to erect a 50,000 bu. grain elevator at Kingfisher on the site occupied by the recently burned plant of the Farmers Mill & Elevator Co.

Very little if any damage was done to wheat in Western Oklahoma by recent freezes, according to Harvey White, manager of the Hydro Seed and Grain Co., who was here recently.

Several bridges are out on the railroad between El Reno and Guthrie and grain shipments may be delayed from Piedmont for thirty days, according to Oscar Dow of that place, a recent visitor here.

W. D. Henderson of Chickasha and J. M. Henderson and his son of Comanche are incorporators of the Comanche Wholesale Grocery & Elevator Co. of Comanche, recently organized and capitalized at \$12,000.

A normal sale of tags and a normal number of applications for permits to sell feed during the early part of January are reported by the feed bureau of the State Board of Agriculture. Among recent applicants for permits were the Corn Milling Co. of Corn, Okla., and Edward Sweatte of Seminole, Okla.

George Caldwell of Alex, manager of the Pruitt-Caldwell Grain Co., who was here recently, said that probably no more corn would be sold at that station and that feed

would have to be shipped there before the end of the year. He reported an unsatisfactory broom corn market and the broom corn industry in a demoralized condition.

The wheat movement in Oklahoma continued light during the early part of January. Grain dealers predicted that present prices would bring out a better movement of wheat and corn when roads are in better condition and the winter spell has broken. Oklahoma and Texas millers were fair wheat buyers. High prices of kafir made it draggy in Oklahoma.

The Tulsa Feed Co. recently incorporated with a capital stock of \$75,000, has elected Sherman Durrett president; R. A. Hayden, secretary-treasurer, and A. H. McDonald, sales manager. The company succeeds a partnership established in 1921 by Durrett and Hayden. It operates a wholesale plant and two retail stores and is agent for Purina products and the New Era Milling Co. of Arkansas City, Kan.

Soft wheat short patent flour sold in Oklahoma last week at \$10 a barrel, the highest price of the season. Other grades were in the usual proportions. January business was affected by flour resales by dealers who made lower prices than mill prices and advantages held by European mills because of large wheat supplies obtainable at comparatively low prices. Mill run bran sold in Oklahoma at about \$1.70 per bag, straight bran \$1.60, shorts \$2, corn chop \$2.50 and corn meal at 85c for 25 lb. bags.

MILWAUKEE.

D. K. Steenberg, Correspondent.

Privileges of the floor for the ensuing thirty days have been granted to R. Schroeder and G. Krueger, both of this city, by the Milwaukee Chamber of Commerce.

Shipments of grain from Milwaukee last week were 245,588 bu. oats, 63,856 corn, 72,160 barley, 23,991 wheat, 47,080 rye; total 452,675 bu., against 238,940 the preceding week and 696,010 a year ago.

Prices for the week show moderate gains, wheat being up 3@5c for this period, barley 1@2c, rye 3@4c, and oats 1½c, while corn is unchanged. Movement was moderate and the demand was generally good.

Receipts of grain at Milwaukee for the week ending Jan. 10 were 133 cars barley, 134 corn, 116 oats, 18 wheat, 30 rye, 7 flax, 12 miscellaneous; total 450 cars, against 457 the week before, 375 a year ago and 951 in 1923.

Receipts of wheat, barley and rye at Milwaukee in 1924 were greater than in 1923 according to statistics available at the Milwaukee Chamber of Commerce. The opposite was true with respect to corn, oats and flax.

The William Hoffman Co. of Middleton, Wis., has been incorporated under the laws of the state to do a general feed and fuel business with a capital of \$30,000. William, John G. and Albert F. Hoffman are the interested persons.

Announcement of the incorporation of the business of Frank J. Phelan as the F. J. Phelan Co., under the laws of Wisconsin, has been made at the Milwaukee Chamber of Commerce. The company makes a specialty of hedging orders.

Milwaukee milling output last week consisted of 5,200 bbls. of wheat flour as compared with 5,500 the previous week and 3,500 last year. Receipts were 16,450 bbls., as compared with 36,640 bbls. last year, and shipments last week were 15,090 as compared with 14,170 bbls. last year.

John Buerger, head and founder of the Buerger Commission Co. and veteran member of the Milwaukee Chamber of Commerce, is reported to be slightly improved following a minor operation for bladder infection at St. Mary's hospital, this city. Mr. Buerger celebrated his eightieth birthday on Jan. 6.

H. Short of Cleveland, O.; H. E. Tweeden of Buffalo, N. Y.; J. J. Kirckan of Chicago; Fred Stauff of Youngstown, O.; G. Simonsmen of Mapleton, Mo.; B. J. Carter of Minneapolis, Minn.; Robert Sederberry of Chicago; L. J. White of Des Moines, Ia., and C. E. Krundick of Winona, Minn., were among out-of-state visitors at the Milwaukee Chamber of Commerce during the past week.

W. A. Poyer, veteran Ohio grain man, died in this city at the advanced age of 83 years. Mr. Poyer at one time was the owner of the elevator at Norwalk, O., now owned by the firm of Woodward & Fulstow. He also owned two business blocks and considerable other valuable property including the most palatial residence in the city and served as city councilman for many years. Burial was at Norwalk.

Josef Mueller, one of the most popular members of the Milwaukee Chamber of Commerce, was welcomed back to the floor on Thursday after having been confined to his home for more than a week. Mr. Mueller broke two of the bones in his right foot in a fall on an icy pavement near his Shorewood residence but they are now mending nicely and he is able to get

The La Budde Feed & Grain Co. charts are now in printer's hands and will soon be ready for distribution among the trade. The new charts will show the price fluctuations in feeds and grain by weeks throughout the past four years. One line on each graph will also show the four-year average. This last feature was not included on previous charts and should make the new one all the more valuable according to LeRoy LaBudde. In past years the LaBudde firm has received requests for the charts from all sections of the country. This year, according to Mr. LaBudde, they will be mailed to all who ask for them as long as the supply lasts.

MEMPHIS.

George Williamson, Correspondent.

Receipts of corn for the week were 133 cars and of oats 108. Alfalfa meal receipts were 23 cars, slightly larger than recently.

Weather over this territory has been mild all the week and outdoor work in some sections made progress, although it will be some weeks before any plowing will be done.

C. B. Stout of the Dixie-Portland Flour Co. is home after a business trip through Mississippi and Alabama. He found conditions improving and distributors optimistic over the outlook.

No fresh developments are reported from those who entered the large merger of mixed feed manufacturers, and no further announcements will be made until after a charter has been obtained, at which time the list of officers and other details will be made public.

McInnis & Montgomery, dealers in grain, hay and cotton seed products, is the style of a late addition to the trade here. Malcolm McInnis bought one of the Merchants Exchange memberships from W. R. Smith-Vaniz and is associated with Jack Montgomery of Inverness, Miss., with offices in the Falls building.

Business continues quiet in the grain trade although it is admitted that it is slightly better since the turn of the year. Prices during the past few days have shown little change although undertone is steady to firm. Buying continues only for necessities. Cash quotations for No. 3 white corn are \$1.27, No. 3 mixed \$1.25, and No. 3 yellow \$1.30. Oats are firm and No. 3 white quotable at 65¢/65½¢.

The members of the Merchants Exchange at the annual meeting held just after the election Saturday adopted a resolution calling for a change in its membership. It is provided that a limit of 200 active members be set, with 75 associate, annual dues of the former being \$100 and of the latter \$50. The associate members will share in all the privileges of the exchange except that of voting, trading, holding office or participating in any assets.

The annual election of the Merchants Exchange was held Saturday with a fairly active contest. Results showed a pretty even division between the two sides, although lines were not as closely drawn as in many former elections. The new officers are: Sim F. Clark, of Clark, Burkle & Co., president; Joseph J. Wade, Sr., of John Wade & Sons, vice-president; L. B. Lovitt, W. P. Battle, S. E. Rison, J. M. Trenholm, W. R. Smith-Vaniz, J. B. Edgar, S. T. Pease and C. S. Kennedy, directors. It is assured that Walter J. Fransioli will be re-elected secretary at the first meeting of the new directorate. The usual luncheon and musical program was had.

LOS ANGELES, CALIF.

C. G. White, Correspondent.

Miss Mary Balkus, of the J. B. Hill Co., Fresno, Calif., was a visitor in Los Angeles during the holidays.

Miss Nora Clemens, of the Strauss & Co., has been confined to her home the last week, with a touch of la grippe.

The Huffine & Co. have purchased a site in the new Central Manufacturing District, where they will shortly erect a modern elevator.

The Farmers Grain & Milling Co. suffered a disastrous fire last week, the machinery being badly damaged by water. The loss was well covered by insurance.

The Grain & Hay Trade Traffic Association of Los Angeles, are making arrangement to hold a dance on Feb. 12th for their members and friends at the West Ebell Club House.

There was but one casualty reported at the grain battle on the floor of the Exchange New Year's eve, that was "Charley, the Chinaman," peanut peddler, who suffered several bruises on the top of his head. It was several days before he could get up courage to return to the Exchange.

Cash Markets.

There has been little change in the market during the past week on account of the holiday season there has been but little activity. There have been some fluctuations in the wheat market and some sales have been made at a slight advance over last week. No. 2 Western Red Wheat, re-cleaned, is in good demand at from \$3.10 to \$3.15 per hundred. No. 3 Yellow Corn is practically the same and is quotable at \$2.60 to \$2.65, with some sales as high as \$2.66½. No. 2 can be quoted at five cents higher. The grain sorghums market remains practically the same with fairly heavy receipts. No. 2 Kafir Corn is being booked at from \$2.35 to \$2.37 for January shipment and Milo Maize is firm at \$2.35 for local, and \$2.25 for

Eastern. The barley market remains quiet. There have been no sales of any great volume for the past ten days. Mill feeds are in good demand and Utah-Idaho mill run is selling from \$41.00 to \$42.00 per ton. Kansas Bran is being offered at \$38.00, with \$37.00 bid and several sales made at that price. Alfalfa products remain practically the same and medium ground meal of good quality, green in color, is selling at \$33.00, and molasses alfalfa mixed of the same texture at \$31.00 per ton. There is still a better demand for cottonseed meal, which is bringing from \$41.00 to \$42.00 per ton. Rolled barley has taken quite an advance and is now selling at \$53.00 per ton, f.o.b. mill doors.

The hay dealers report a very unsatisfactory market, the receipts have been unusually light, yet there is no scarcity at the week end, which is accounted for by the heavy dealers stating that a large number of the working stock, mules and horses have been put on pasture and require but little roughage. The dairymen are pasturing all that is possible and are placing orders for but very small quantities, altogether which has made rather a sluggish market. There has been no change in the price and No. 1 alfalfa is selling at \$26.00 per ton, No. 2 at \$24.00, No. 1 barley hay at \$28.00, No. 1 oat at \$31.00. Dealers agree that they can see no change immediately in the hay market and believe that the present conditions will exist for perhaps several weeks.

BALTIMORE.

Robert C. Neu, Correspondent.

Henry A. Lederer, of Lederer Bros., grain commission merchants of the district, will leave shortly on a four months' cruise around the world.

Investigation by the Public Service Commission of switching rates charged by railroads in the Baltimore switching district has been postponed indefinitely.

The 70th annual meeting of the members of the Baltimore Chamber of Commerce will be held at the rooms of this organization on Monday, Jan. 26.

Present liberal stocks of rye in the Baltimore elevators, 6,090,000 bus., are expected to be reduced considerably by shipments abroad to be made in January and February.

Among the out-of-town visitors on the floor of the Baltimore Chamber of Commerce last week were W. B. Bell of Federalburg, Mo.; T. W. Seming of New York.

Stocks of all grains in Baltimore elevators on January 7 amounted to 10,530,000 bushels, the largest amount of grain ever in storage at one time in the history of the Baltimore market.

The names of Vilhelm Dichmann and De Royce E. Smith are posted on the official bulletin board of the Baltimore Chamber of Commerce as applicants for membership in this organization.

Effective Jan. 8 the Pennsylvania Railroad, on account of accumulations of grain here, placed an embargo on all rail shipments of grain consigned, reconsigned or intended for export through the port of Baltimore.

The Baltimore & Ohio Railroad Co. at the opening of the new year placed a \$13,000,000 order for new equipment in the way of 3,000 freight cars, 2,500 being placed with the Standard Steel Car Co. and 500 with the General American Car Co.

In an address delivered by M. J. Gormley, chairman of the car service division of the American Railway Association, before the Traffic Club of Baltimore at the Southern hotel, this city, on the evening of Jan. 6, he made the prediction that freight transportation in 1925 will exceed all previous records. In his opinion the only hope for a reduction in freight rates in the near future lies in increased efficiency on the part of the railroads. Mr. Gormley further advocated heavier loading of cars by shippers as one means of saving both to railroad interests and the general public.

SALT LAKE CITY, UTAH.

Fred L. W. Bennett, Correspondent.

The Porter-Walton Co.'s seed and grain store at Richards and West First South street, badly damaged by fire some time ago, is being repaired.

A state-wide marketing organization is being discussed by the Cattle and Horse Growers' Ass'n of Utah. An investigation of the various organizations now operating will be made, it is stated.

The Ogden Union Stock Yards had a record year in 1924. A total of 280,338 hogs were handled as against 256,413 in 1923. The foot and mouth disease in California caused a falling off in the number of sheep handled, it was stated. Cattle handled, however, jumped from 121,939 to 154,997, an increase of 33,004. Manager Lester F. Whitlock said he expected a still bigger business during 1925.

The December crop report of the U. S. Utah crop statistician shows that sowings of winter wheat in Utah this fall amounted to 157,000 acres, compared with 159,000 acres the previous fall, a decrease of 2 per cent. Winter rye sowings amounted to 10,000 acres, compared with 11,000 acres the previous fall.

The heavy falls of snow during December are expected to yield plenty of water for irrigation during the summer months. Last year the crops suffered for want of water, there having been a shortage of snow in the mountains during last winter.

The average prices paid to Utah producers as of December were: Per bushel,

wheat, \$1.30, compared with 91c a year before; oats, 70c, compared with 58c; barley, 87c, compared with 70c; tame hay, \$12, compared with \$8.90; wild hay, \$9.50, compared with \$7.

Willie Ottogary, Indian correspondent from Washakie, Indian village in northern Utah, says in a recent letter: "The hay is scarce here now. It is about \$12 per ton here now. The hay is going to be \$15 per ton here in spring. But it is no work here just now. Some not even buy hay their horses. Mr. Kippetchew Wologan return home from Salt Lake City other day. He was spent Christmas down there...."

The Pacific Coast ban on Utah alfalfa may be lifted in the near future. A public officer from California has been in this state making a study of conditions with this end in view.

The grain business, which was very good in the first half of December, is a little quiet now, not having recovered from the usual slump following the Christmas holidays. The Allred-Beckett Company of the Atlas Block reported business as "considerably better than December, 1923." Mr. Allred said there was a demand for all kinds of grain. In feeding stuffs corn was moving about as well as anything. This company has just advanced price of wheat to the farmers of Utah and Idaho to \$1.74 a bushel in bulk for both red and white wheat. Mr. Beckett of this firm expressed the opinion that that demand among the mills for wheat is such that an actual shortage of white wheat exists at the present time and he expressed the opinion that there will be a shortage of red wheat, too, if demand keeps up before the next harvest.

The following prices are quoted by this firm as of January 1. They are f. o. b. Ogden or Salt Lake City in carlots. For prompt shipment or cars in transit: No. 3 mixed corn, cwt., sacked, \$2.60; No. 3 yellow corn, cwt., sacked, \$2.65; Idaho oats, 38 lb. or better, cwt., sacked, \$2.55; Montana oats, 40 lb. or better, cwt., sacked, \$2.65; whole barley, cwt., sacked, \$2.50; rolled barley, cwt., sacked, \$2.60; white feed wheat, cwt., sacked, \$3.25; mixed feed wheat, cwt., sacked, \$3.10; white mill run, cwt., sacked, \$1.85; blended mill run, cwt., sacked, \$1.80; red mill run, cwt., sacked, \$1.75; bright timothy hay, ton, \$23; first crop alfalfa hay, ton, \$18; second crop alfalfa hay, ton, \$17.

The Farmers Grain & Milling Co., formerly in the Judge building, is now understood to be located in Pocatello, Idaho.

CINCINNATI.

George Mosbacher, Correspondent.

Edward G. Koehl, retail feed dealer, has applied for membership in the Grain and Hay Exchange.

Henry W. Brown & Co. have announced that Edward A. Smith is now associated with the firm in its hay department.

New high levels of the crop continued a feature of wheat trading here this week. No. 1 red sold at \$2.02 and No. 2 at \$2.01 per bushel.

J. W. Howard, son of H. W. Howard, has become associated with his father in the grain business and will hereafter be a daily attendant on the Exchange.

President F. L. Watkins of the Grain and Hay Exchange has appointed the following to act as judges and tellers at the annual election to be held on the Exchange floor, Thursday, Jan. 15: Charles E. Hill, chairman, Andrew Braun and Edward A. Smith.

Total stocks of grain for last week and week previous in Cincinnati elevators are as follows:

	Jan. 9, '25	Jan. 2, '25
Wheat	261,907	262,977
Corn	119,543	118,904
Oats	272,508	295,349
Rye	4,292	3,492

An increase of 10 per cent in the wholesale and retail price of bread after Feb. 1 has been announced by the Cincinnati Merchant Bakers' Club, an organization composed of practically all the large baking concerns in the city. Smaller bakers are also planning to increase their prices in the next few weeks. The advance is attributed to increases in the costs of bread ingredients, especially flour, lard and other shortening and milk, and slight increases in sugar.

President's Annual Report.

F. W. Watkins, president of the Cincinnati Grain and Hay Exchange Co., has prepared his annual report, reviewing the progress of the Exchange and the splendid work of the various departments, to be submitted to the membership at the annual meeting to be held next week: "To my mind the financial standing or stability of your company is of prime import. The treasurer's report shows that we have added handsomely to our surplus. This splendid condition has given rise to comment in some quarters that we should aim to produce less profit and reflect the amount in our service charges. Anything less than 50c a car reduction would not be a reduction, and to reduce that amount would impair our revenue, on a basis of last year's receipts, over ten thousand dollars.

"The renewal of the plug track lease, Nov. 15, 1924, on a yearly continuing basis, subject to termination on sixty days' notice by either party after the first year, is occasion for comment as well as report. The board of directors undertook to learn just what was wanted by the trade before it opened negotiations with the lessors. While we could not gain the desired added

developed in the past year which have been handled by the traffic department in conjunction with other Ohio and Mississippi river crossings.

"The Kansas City interests attempted to secure through Memphis and St. Louis to the Southeast and Carolinas lower rates than would apply through Ohio river crossings, and a petition was filed jointly by Cincinnati, Louisville and Evansville with the object of preserving the usual equalization, which was accomplished.

"The Chicago Board of Trade applied for extension of time for transit purposes on a large tonnage of grain in storage and the resistance of other markets in which we participated resulted in the declination of their request.

"The Southern lines are now attempting to advance grain rates to South Atlantic seaboard cities, which is being protested by our joint interests and it is to be hoped that the present rates will be continued.

"The grain markets have applied to the commission for a hearing in regard to the proposed adoption of through rates from Northern states to Southern territory with the view of maintaining the present basis of equalization through the various Ohio river crossings, and this matter will be followed up.

"We participated in the proceedings of the National Hay Association in attacking the reconsigning charge made by the railroads on shipments of hay refused after placement on private sidings and thence reshipped, the result being that the commission has ordered this charge eliminated.

"Rate adjustments have been made in the way of a reduction in grain rates from all C. A. & S. stations and the opening up of favorable routing to Virginia cities from the L. E. & W. stations. We are now prosecuting before the commission a complaint against the rates to Cincinnati from Illinois Central stations in Illinois and expect to secure a marked reduction in these rates.

"The matter of plug track demurrage charges has been definitely decided by the upper court and the proper measures will be taken to preserve the interests of our members with the status of the track as fixed.

"Assistance has been given by this department to the matter of the inspection charge on plug track deliveries which has been before the court and the decision as just handed down denies the lawfulness of such charges."

Secretary Schuh's Report.

D. J. Schuh, secretary of the Cincinnati Grain and Hay Exchange, presented the following comparisons of grain and hay receipts at Cincinnati for the past year and 1923, taken from records of J. A. Hallam, chief inspector and weighmaster. In 1924 there were 1,349 more cars of grain, 1,369 more cars of hay, and 187 cars of feed received than in the previous year. Analysis of the 1924 "Receipts" figures disclosed some rather interesting sidelights on the movement of grain and hay into this market. During the "First Half" receipts of grain increased 901 cars, while hay increased one car, grain sorghums 7 and feed 90 cars, a total increase of 999 cars. During the "Last Half" receipts of grain increased 434 cars, while hay increased 1,368 cars, grain sorghums 7 and feed 97 cars, a total increase of 1,906 cars.

During the first six months the hay receipts at the plug track decreased 21 cars as compared with the first six months of 1923, while the replugs during that period of 1924 increased 1,027 cars. During the last half of the year the plug track receipts increased 1,223 cars, while the replugs increased 1,183 cars. Net increases in receipts of grain in bushels over last year were 2,012,000 bushels, and shipments 979,800 bushels. Hay increased 15,059 tons over last year, based on an estimate of 11 tons per car, and feed increased 5,610 tons, based on 30 tons per car. Hay inspections on the plug track were 23,635 cars, against 20,476, a net increase of 3,159 cars. Total inbound weighing of grain, feed and hay were 15,953 cars, as compared with 13,510 cars in 1923, a net increase of 2,443 cars.

PHILADELPHIA.**Geo. A. Rudderow, Correspondent.**

Stock of barley, 2,872 bushels on Dec. 1, 1924, and 1,670 bushels January 2, 1924.

Stocks of oats, 115,501 bushels, compared with 189,627 bushels on Dec. 1, 1924, and 163,475 bushels January 2, 1924.

Stock of rye, 194,232 bushels on January 2, 1925; 281,566 bushels Dec. 1, 1924, and 51,889 bushels January 2, 1924.

Stocks of wheat, 2,625,323 bushels, compared with 2,437,770 bushels Dec. 1, 1924, and 2,255,121 bushels January 2, 1924.

The Board of Governors elected were C. J. Ritchie, J. N. Craig, Waldo O. Fehlring, Edward Knighton and A. D. Acheson.

Stock of corn, 76,022 bushels January 2, 1925, compared with 34,556 bushels on Dec. 1, 1924, and 171,440 bushels January 2, 1924.

Exports of grain for the week ending January 8th were: Wheat, 926,180 bushels; rye, 85,715 bushels, and barley, 66,528 bushels.

The stocks of flour and grain in Philadelphia warehouses on January 2, 1925, were 146,273 barrels of flour, compared with 129,059 barrels Dec. 1, 1924, and 181,574 January 2, 1924.

Receipts of flour and grain for the week ending January 10th were: Flour, 55,473 barrels; wheat, 842,928 bushels; corn, 22,137 bushels; oats, 79,936 bushels; rye, 96,739 bushels, and barley, 66,528 bushels.

The firm of A. D. Acheson & Co., flour merchants with offices in the Bourse, has been incorporated and will hereafter be known as the Acheson Flour Co., Inc. Its officers are: Armon D. Acheson, president; Harry G. Randall, vice-president; C. H. Bolinger, treasurer; T. Marshall Holt, secretary.

William P. Brazer, head of the firm of W. P. Brazer & Sons, one of the oldest grain firms in this city, retired from business on January 1st. Mr. Brazer has been in business 47 years. His son, Howard F., who is a director in the Commercial Exchange, will continue the business of the old firm in the Bourse as usual.

W. J. King and S. A. King, trading as King Brothers & Co., succeed M. F. Baringer in the grain and feed business. Mr. Baringer, whose retirement dates from January 1st, will still retain his mill and elevator property at Waverly, N. Y., where business will be conducted as usual. The Messrs. King brothers, who succeed Mr. Baringer, have been with him for many years, having grown up with him from boyhood.

Philadelphia Flour Market.

Philadelphia, Jan. 10.—There is very little change in the flour market to which we can invite special attention, buyers still purchasing sparingly and generally for immediate wants which they mostly find enough of in resale stock to fill their orders. Mills on the other hand are holding firm with the strength of wheat and are not willing to force business at the cost of concessions.

Receipts for the week were 55,473 barrels. We quote per 196 lbs., packed in 140-lb. jute sacks: Soft winter straight, western, \$8.50@8.75; nearby, \$8.25@8.50. Hard winter straight, \$9.00@9.50; short patent, \$9.50@10.00. Spring first clear, \$8.50@9.00; patent, \$9.50@9.75; short patent, \$9.90@10.10. Fancy spring and city mills patent family brands, \$10.45@11.10. Rye flour, \$8.30@8.80 per bbl. in sacks, as to quality. Buckwheat flour, \$4.25@4.50 per 98-lb. sack.

PORTLAND, ORE.

The local wheat market registered firm prices, although exporters have practically dropped out of the market as prices are out of line for export business. Difficulty also has been experienced in obtaining enough wheat to fill out sales. Farmers are holding the grain for higher prices, and it is said will not sell freely until \$2 a bu. can be obtained. Millers are taking small lots from time to time to satisfy immediate requirements, but will not buy for future needs in any large quantity. Stocks on the farms are estimated to be less than half those held at the same time last year.

In the great wheat territory near Pendleton, Ore., there is considerable discussion of the probable damage done to winter wheat. From reports coming from different sections of Umatilla county it seems that spring varieties of wheat which were seeded in the fall have been damaged by the sub-zero weather that visited the county before the wheat fields were covered with a protection of snow, says the Portland Oregonian.

Terminal receipts in cars were reported by the Merchants' Exchange for the season to Jan. 8 as follows:

	Wht.	Bly.	Flr.	Corn.	Ots.	Hay
Portland—						
1924-25	12,405	466	983	345	466	1,155

1923-24	2,388	3	83	4	10	17

WINNIPEG.**Geo. H. Measham, Correspondent.**

The coarse grains have been dull in both the cash and future markets and have followed fluctuations in wheat. Flax has been dull and steady with a moderate liquidation in progress. Seed is in a position to advance on any resumption of demand by the consuming interests.

Buying by the mills has however been one of the mainstays in maintaining prices. Russia has been recently buying flour here on a big scale and one of the big milling companies has had to turn down orders having already grinding booked ahead for all plant can handle between now and first half of March.

The mills generally are beginning to show uneasiness at the outlook for securing the high-grade wheat they will need to keep them going for the balance of the season and are increasing their premiums. In the meantime offerings of cash grain of all kinds are very light and holders very confident of their position. The sales of cash grain reported on Friday were insignificant.

The markets here have maintained a steady-to-firm tone throughout the week

features at any cost, we were successful in bringing about a more favorable contact.

"The board of directors also saw the necessity for revision of our constitution and by-laws, and these proposals are to be voted upon by you at the annual meeting Jan. 15, 1925.

"The changes contained in this revision seemed of vital necessity and should result in enabling your directors and officers to serve you in better fashion than was possible under the present set of by-laws which were drawn to fit a larger organization than ours. The proposed changes are the same as you adopted at the trade meeting on Sept. 4, 1924, with exception of some minor changes made by our counsel to conform with legal requirements. I urge you to not fail to cast your ballot for

adoption so that the new board of directors may start functioning under the changes with the start of their term of office. . . .

"That the regular arbitration committee was not called upon to serve during the year and that the grain and hay inspection committees heard but four cases is a good indication and I am happy to be able to call attention to this since it reflects harmony among our members and is silent proof of their increasing ability to individually cope with the problems that always grow out of transactions in the commodities handled by us."

Report of Traffic Department.

L. W. Perkins, traffic manager of the Grain and Hay Exchange, submitted the following report:

"A few matters of general interest have

CONSIGNMENTS

WHEAT
CORN
OATS

MEMBERS CHICAGO BOARD of TRADE

turning very bullish and strong at the close on Friday. Bears continue to make the most of their argument that prices are too high but the public continues to buy and though export business in Canadian wheat has been on a small scale the market always gets support from the export trade on dips.

The Manitoba Free Press issued Saturday a revised estimate of the grain crops of the prairie provinces based on reports from country points on threshing returns. The wheat yield is cut from 295,858,791 bushels to 268,263,448 or 27,595,342 bushels less than the earlier estimate. Oats and rye are given unchanged. Barley is given an increase from 51,079,892 to 57,943,907 and flax an increase of about a million bushels.

The reports of The Julius Barnes' review of the North American wheat situation were construed as very bullish by the trade. What Mr. Barnes has to say is always interesting and he has the confidence of the trade and general public. Receipts here continue to be light; this may be in part due to the extremely cold weather and bad country roads. Farmers, however, are firm holders and deliveries at country points are small even supposing that recently-published estimates of the reserves on farms to market are approximately correct.

ST. JOSEPH, MO.
N. K. Thomas, Correspondent.
Statistics compiled of the wheat and corn milling operations in this market for the year 1924 show as follows:

	Wheat	Corn
Bushels received	8,135,434	1,720,798
Bushels ground	8,319,193	1,687,065
Barrels flour mfr'd.....	1,836,900	288,894
Tons feed mfr'd.....	69,572	16,576
Barrels flour shipped....	1,866,226	290,999
Tons feed shipped.....	69,781	16,695

The demand for wheat improved somewhat during the past week with mills exhibiting a tendency to absorb available good protein wheat. Prices for hard winter advanced 4c for the week, and soft was 5@6c higher. Offerings of both classes have been light. Corn supplies have been moderate, with demand fairly good; yellow corn is steady with a week ago; white, unchanged to a cent higher, and mixed a cent up. Oats offerings exceedingly light and demand good; prices 1@1½c up for the week.

The annual election of officers and directors of the St. Joseph Grain Exchange was held Jan. 6, 1925. C. L. Scholl was elected president for the ensuing year and S. A. Penney, vice-president. Five directors were chosen, being F. F. Gilbert, R. E. Hastings, E. M. Loutch, F. J. Watts and Ashby Woodson. Holdover directors were M. C. Bruce, W. M. Huff, J. D. McKee, J. W. Carver and J. W. Dailey. Annual meeting of the membership of the Exchange will be held at the Robidoux Hotel Tuesday evening, Jan. 13. Eleven amendments to the rules were voted on Jan. 6 all of which were adopted.

ST. LOUIS.
W. C. Howland, Correspondent.
"Mike" Cooney, for more than 40 years proprietor of Cooney's Cafe in the Merchants' Exchange building, St. Louis, died at his home in this city. He was familiarly known by most of the members.

A test suit to determine whether the Federal Trade Commission has power to compel the production before it of books of an organization suspected of participation in price fixing has been filed in the federal court at St. Louis.

The following memberships in the Merchants' Exchange have been posted for purchase and cancellation: J. Alva Harrison, Harrison Ward & Co., Clinton, Ill.; Fred Morrison, Ramsey, Ill.; E. M. Kelly, Liberty Mills, Nashville, Tenn.; Alex V. Kerns, Kirksville, Mo.; Shepard Barclay, Arthur R. Allison, T. L. Fisher, George W. Clinton and John O. Elliott, St. Louis.

Total receipts of grain at St. Louis in 1924 were 113,160,000 bus., in comparison with 107,276,953 in 1923, and 103,559,500 in 1922. Of this 40,753,770 bus. was wheat, 36,742,562 corn, 471,900 rye and 1,137,600 barley. Total shipments of grain for the year were 81,632,900 bus., compared with 80,206,240 in 1923 and 79,496,445 in 1922. Wheat shipments amounted to 31,017,290 bus.; corn, 23,205,720 bus.; rye, 349,360 bus., and barley, 383,910 bus.

Fire of undetermined origin destroyed the grain elevator of the Security Elevator in East St. Louis Sunday night; 29,500 bushels of grain, valued at approximately \$20,000, stored there, were destroyed and there was a loss to the building of \$60,000. The elevator was owned by the J. B. Horton Grain Co., No. 304 Merchants Exchange building, St. Louis. The grain was entirely and the building partially covered by insurance. According to Mr. Horton, the elevator contained 28,000 bushels of oats and 1,500 bushels of wheat.

In addition to the officers and directors elected at the annual meeting, the following committee appointments were made: Committee of appeals, Robert W. Pommer, Ludwig Hesse, Joshua M. Chilton, W. J. Niergarth, John H. Caldwell, James M. Gettys, A. H. Beardsley, A. C. Bernet, W. H. Toberman, J. H. Watson, Ralph H. Baumgaertner and Charles B. Deibel; Com-

mittee of arbitration, J. M. Fuller, Joseph H. Albrecht, Sylvester L. Fisher, J. D. Mullally, Eugene C. Dreyer, Albert H. Stokes, George L. Kelly, Ward Smith, Arthur T. Leonhardt and Benjamin F. Jostes.

Martin Steps Up in Election.
George C. Martin, Jr., president of Martin & Knowlton Grain Co., St. Louis, was elected first vice president of the Merchants' Exchange at the annual election held on Jan. 7, 1925. As it is the custom of the exchange to move up officers at each election, Mr. Martin is in line for president at the election in 1926. He has been a member of the exchange for 21 years, a former director, and twice second vice president, a record of service to the organization to be proud of. Mr. Martin also was formerly president of the St.

GEO. C. MARTIN, JR.
Louis Grain Club. Before his connection with the Martin & Knowlton Grain Co. he was the head of Goffe & Carkner Co., St. Louis. The other officers and directors elected follow: President, Woodson K. Woods, senior vice president of the Ralston Purina Co., succeeding Samuel Plant, who automatically becomes a director of the exchange; second vice president, Charles E. Valier, of the Valier & Spies Milling Co.; directors, W. T. Brooking, Louis T. Hall, Will J. Klostermann, Herman A. Von Crump and T. Maurice Scott. Following the established custom of the exchange, each man in the office was nominated for a post a step higher. For example, Woods has served successively as a director, as second vice president and first vice president.

In the absence of President Plant, Woods as first vice president presided at the caucus. Roger A. Annan, a former president, was nominated as temporary chairman for the election and Wilbur B. Christy as secretary.

Morwood Clark, Correspondent.
The rumor that Japan will raise her tariff on wheat is not taken seriously by wheat exporters here. During the month of November, 1923, Japan imported via Vancouver 832,359 bus. wheat and 14,248 bbls. of flour against 976,239 bus. wheat and no flour, same month 1924. The annual requirements amount to about 20,000,000 bus.
The erection of a grain elevator at Prince Rupert, British Columbia's northern port, is under consideration by the directors of the Canadian National Railway. Mr. Warren and Mr. Cameron, officials of that line, after a visit of inspection, have reported favorably on the scheme.
Although Spiller's elevator has been in operation since Dec. 6, it appears from a statement issued by the directors of the Terminal Grain Elevator Co., Ltd., a subsidiary of Spiller's, Ltd., that the official

opening will take place on Jan. 12. The City Publicity Bureau is collecting a list of the prairie farmers wintering in Vancouver and neighborhood and all these will be invited to look over the big new plant.

The Royal Commission which toured Canada and the United States for nearly twelve months holding inquiries regarding methods of handling and marketing grains, investigating the grading, inspection and transportation systems, the processes employed in elevators for storing the numerous grades of grain, has at last completed its findings and while it is not expected that these will be made public until after the meeting of Parliament in Ottawa, Feb. 3, information has leaked out that although at all the centers where the commissioners sat, mixing was alleged and denounced in unmeasured terms, without any real evidence being forthcoming, mixing will not be banned, while new measures are promised to ensure consistency of standards, there is little likelihood of pre-

venting a method which has been proved to provide a market for certain grades of wheat which in themselves would be of little value. It is understood that the question of grading and mixing is a very outstanding item in the findings.

It is reported that the commissioners will reiterate their recommendations, made on former inquiries, that all the grain elevators owned and financed by the Government should come under the authority of one regulative body in place of the six or seven different bodies now exercising diverse and in some cases conflicting jurisdiction.

At the beginning of last year Vancouver's elevator capacity was 1,250,000 bus. represented by Elevator No. 1, which during the

crop season handled 53,000,000 bus. Now the local government elevator capacity totals 3,750,000 bus. gross, viz.: No. 1, 1,250,000 and annex 850,000; No. 2, 1,500,000 gross, and Woodward's Lake Elevator with 150,000 bus. No. 3 Government Elevator, which is sometimes included in the estimates, is not built yet, but will be of 650,000 bus. gross capacity when completed. It will be erected in two units, one of 300,000 bus. and the other 350,000 bu. Then there is Spiller's with a gross capacity of 2,400,000 bus., and next of 2,000,000 bus., this brings up the total Vancouver elevator gross capacity to 6,150,000 bus. It is estimated that Vancouver could handle, if the elevators were operated with the same degree of efficiency, 125,000,000 to 150,000,000 bus.

It was unfortunate for Spiller's that the ratepayers turned down the plebiscite to free their elevator property from taxation for a period of 10 years.

Now this impolitic action will cost the elevator owners \$15,000 per annum or \$150,000 during the ten years for which tax exemption was sought.

It was unfortunate for Spiller's that the announcement of an unpopular policy should have wrecked their chances of tax exemption, placing their company under a handicap when in competition with the government elevators, which are tax free.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Oats receipts somewhat larger, with 12 cars. Market was quoted unchanged, No. 3 white selling 57½@58c; No. 4 white, 57¼c.

P. B. Miles, president of P. B. & C. C. Miles Grain Co., departed Friday for Palm Beach, Fla., where he will spend the winter.

Among last week's visitors to this market was Mr. Quick, the grain elevator builder, a member of the firm of Geo. W. Quick & Sons of Tiskilwa.

Offerings of cash corn to this market the past week have been heavy from the northwest sections, the most of which has been at prices which were workable. However, Illinois offerings have been very light.

Commission men report business very good at the local stock yards. Receipts have been heavy and prices fully in line with other western markets. With receipts of 2,000 head Saturday prices were 10@20c higher, with best heavy butcher hogs selling at \$10.85; light hogs, \$9.25@10.50; medium, \$10.50@10.80; heavies, \$10.65@10.85; packers, \$9.65@10. Cattle and veal calves were generally steady, with best calves selling at \$12 down.

It is not at all unusual for members of the grain trade to participate prominently in local politics. Louis Mueller is therefore strictly in line with the past performance of grain men in entering the February republican primaries for mayor of Peoria. He is well fitted to serve in this capacity and with the strong repub-

lican party here is expected to sail through with flying colors.

Receipts of corn at this market considered rather heavy the past week, with 117 cars Saturday. Market was somewhat dull and prices 1@2½c lower. Prices at this market have been higher than other western markets for some time and local industries were inclined to go slow and held out for lower prices. However, the demand was considered fairly good. No. 4 yellow, \$1.17½@1.18½; No. 5 yellow, \$1.11½@1.12½; No. 4 mixed, \$1.16½@1.17½; No. 5 mixed, \$1.11½; sample, \$1.02@1.06.

The addition to the local plant of the Commercial Solvents Co., costing \$425,000, is 35 per cent finished. There has been some delay due to extremely cold weather and ice formation preventing normal building construction. It is hoped, however, to finish the entire addition by the first of March at which time the plant will grind 10,000 bushels per 24-hour day. Major Walker contemplates a third unit equaling the completed Peoria plant and supplementing a similar plant at Terre Haute, the location of which has not yet been settled.

At the annual caucus of the Peoria Board of Trade held Saturday afternoon on the Exchange floor Grant M. Miles was nominated for president and his name did not come as a surprise to his many friends. Mr. Miles is one of the younger members of the Exchange and a member of the well known firm of P. B. & C. C. Miles & Co. Mr. Miles is eminently fitted for the presidency of the Exchange, not only through long experience in the trade, but

GRANT MINOR MILES,
President-Elect,
Peoria Board of Trade.

through participation in executive and official capacities in other walks of life. The most outstanding work of this character, starting during the war and continuing until the present, was in the army. He gave his time and ability without stint for the service, reaching a high place during the war and even now Mr. Miles, as lieutenant colonel in command of the 343rd infantry of the organized reserve corps, is performing a notable service. Nominated on the regular ticket means election in the Peoria market and the trade is solid back of Mr. Miles' administration.

Other officers nominated as follows: Gus A. Peterson, first vice president; H. A. Miller, second vice president; John R. Lofgren, secretary; William C. White, treasurer.

John R. Lofgren has been elected secretary for the last 18 consecutive years, this making his 19th year.

The ten directors named are as follows: Lewis Mueller, H. H. Dewey, F. L. Woods, E. R. Murphy, J. M. Van Nuys, W. T. Cornellison, N. R. Moore, L. H. Murray, Geo. A. Brier, B. E. Wrigley. The committee on arbitration consists of H. F. Casey, A. M. Courtright and R. Coomber.

GRAIN COMMISSION

Members of Principal Exchanges

KANSAS CITY.

T. J. Tanner, Correspondent.

An unusual guest at the Board of Trade Tuesday was Georges Mezher of Beirut, Syria. Mr. Mezher is a silk and grain dealer. He visited the Hall-Baker Grain Co.

In view of political changes in the governments of Missouri and Kansas, new heads of the grain inspection departments of these states are expected in the near future.

Visitors at the Board of Trade this week included J. S. Logan, St. Joseph, Mo.; P. H. Bland, Joplin, Mo.; F. Foltz, Oklahoma City, Okla.; C. C. Kelly, Hutchinson, Kan., and Paul Rauch, Salina, Kan.

H. F. Spencer, a broker, has a bid of \$9,000 net for a membership in the Kansas City Board of Trade. This is \$250 less than the last sale. Nobody seems anxious to sell on the basis proposed.

Excellent wheat conditions in Western Kansas were reported Monday by George Murray of Colby, who visited the Board of Trade. Mr. Murray said: "The acreage is larger than a year ago and there is a better stand. In view of good snows, the crop should winter well."

John Fennelly, vice president and treasurer of the Hall-Baker Grain Co., Kansas City, who has been in the Johns Hopkins hospital, Baltimore, Md., for some time, will go to the Bahama islands for a stay of two or three months in an effort to regain his health. He is accompanied by Mrs. Fennelly.

A record shipment of 112 cars of flour and feed was made by the Rea-Patterson Milling Co., Coffeyville, Kan., Thursday. The train started over the Missouri Pacific railroad, headed by two especially heavy engines. It was destined to Little Rock, Ark., there to be split up and the cars distributed through the southern states.

One of the final acts of Allen Logan before retiring from the presidency of the Kansas City Board of Trade was a proposal to raise a fund for the purchase of a bronze tablet to commemorate the members of the exchange and their employees who fought or died in the world war. Pledges of \$10 soon raised the total of subscriptions to \$500. The tablet will be placed on one of the walls of the trading floor.

The Butler Manufacturing Co., Twelfth street and Eastern avenue, Kansas City, has begun the manufacture of new type of combined wheat harvester and thresher, which will be placed on the market in time for the 1925 crop. Curtis C. Baldwin of Wichita, Kan., is the designer. The inventor asserts that the machine can be operated by one man and a team of horses. It will cut and thresh wheat at an average cost of 10c an acre. The Gleaner Manufacturing Co. has been organized in Wichita to finance the building and distribution of the machines.

In harmony with the elegance of the new Board of Trade building, many Kansas City grain firms have gone to great expense in the furnishing and equipment of their offices. The Logan Bros. Grain Co., in room 1060, has an office arrangement that will be hard to surpass in the beauty of its furniture and pictures and the convenience of its business facilities. One thing in which Allen Logan, head of the firm and retiring president of the Board of Trade, takes pride is an excellent etching of Abraham Lincoln. Mr. Logan says: "Lincoln is good company at all times."

New Corn Mill to Start.

Soon after February 1 the new corn meal and feed mill of the Staley Milling Co., at Armour road and Highland avenue, North Kansas City, Mo., will be in operation. J. H. Staley, president of the company, said this week that bad weather in December and other delays had postponed the completion of the enterprise.

The mill will have a daily grinding capacity of 500 bbls. of corn meal and 200 tons of stock and poultry feeds. It will be driven by electric power. About \$100,000 represents the investment.

CHICAGO

WAGON LOADS RECEIVED

A book for the use of country grain buyers in keeping a record of grain received from farmers.

Its column headings are: Month, Day, Name, Kind, Gross and Tare, Net Pounds, Bushels, Pounds, Price, Dollars, Cents and Remarks.

The book, 9 1/2 x 12 inches, 160 pages, 20 lines to each page, giving room for recording 3,200 loads, is printed on Linen Ledger Paper and is well bound in strong board covers with leather back and corners. Order form 80. Price, \$1.75.

PRICE CURRENT GRAIN REPORTER,

327 So. La Salle St., Chicago, Ill.

With concrete construction, the mill is four stories high. It has in conjunction an elevator of 40,000 bus. capacity. Excavation for the mill began last July.

Mr. Staley formerly was a miller in Carthage, Mo.

The Rosedale Milling Co., in the Rosedale section of Kansas City, Kan., is nearing the completion of a new corn and wheat mill to replace the plant that burned last July. This will add 500 bbls. to the present corn meal capacity of Greater Kansas City. By March 1 the total daily corn meal capacity will be 1,250 bbls. Kansas City's trade in meal is mostly in the southern states, with most of the activity in spring and summer months.

Board Under New Control.

Newly elected officers, directors and arbitrators of the Kansas City Board of Trade were installed Jan. 13. Harry C. Gamage, the only nominee for president, received 177 votes in the election Jan. 6. C. M. Hardenbergh, general manager of the Southwestern Milling Co., won the race for second vice president by a vote of 83 against 81 for Stanley Christopher. L. A. Fuller of the Fuller Grain Co., who served as second vice-president in 1924, advanced under the rules to the first vice presidency.

Among the six successful aspirants for places on the directory of the board the man with the highest vote was Frank A. Theis. He received 154, while the other five registered as follows: F. W. Lake, 122; J. J. Kraettli, 120; W. W. Marshall, 97; J. S. Hart, 90; E. M. Jolley, 80. There are six holdover directors from 1924.

The new arbitration committee consists of Kenneth G. Irons, Paul D. Bartlett, E. C. Meserve, Jr., D. C. Bishop and R. H. Sturtevant.

The Grain Clearing Co., which supervises future trading in grain, elected three directors. They are C. W. Lonsdale, F. G. Crowell and E. O. Bragg.

Cash Grain Markets.

Wheat.—Receipts for the week, 449 cars, against 357 a week ago and 503 a year ago. Strong competition for high-protein samples of hard and dark wheat and high grade soft wheat featured the week's trade. The premium on 15 per cent protein hard and dark went up to 24c over the May price. A net advance of 9c a bushel was recorded on the protein qualities of No. 1 to 4 hard and dark, while the ordinary grain of these grades went up only 1c. Buying was not only by local mills, but on orders from Minneapolis, eastern mills and the Pacific coast. Trade in ordinary quality wheat was somewhat slow. Closing prices were: No. 1 hard and dark, \$1.71@1.99; No. 2, \$1.71@1.98; No. 3, \$1.70@1.97; No. 4, \$1.69@1.96. Forming a small part of the offerings, soft wheat climbed steadily until a car of No. 2 red sold for \$1.98 1/2, the highest price recorded for any sample of wheat on this market this year. Every car of grain on sale was taken by mills or local storage interests. Final prices were: No. 1 red, \$1.91@1.99; No. 2, \$1.90@1.98; No. 3, \$1.88@1.96; No. 4, \$1.85@1.93. It is the opinion of local millers that farm holdings of soft wheat are larger than is generally believed, and that producers are simply holding for extortionate prices. Wheat stocks in Kansas City decreased 783,000 bus. for the week to 14,115,000; as compared with 12,947,000 a year ago. New business for export was denied, but some of the week's shipments went to fill out sales to foreigners.

Corn.—Receipts, 494 cars, against 438 a week ago and 482 a year ago. Without much variation in prices, there was a good demand for the liberal offerings, with both elevator men and shippers buying. Many scattered feeding orders were filled, but the takings of local industries were light. The plant of the Corn Products Refining Co. shows no sign of reopening, but two new corn meal mills will be in operation within the next two months. Manufacturers of molasses-grain feeds are using more corn than before the new year opened. Receipts from Kansas and Nebraska are expected to continue liberal for some time. Big handlers are counting on an increasing demand from Texas as spring approaches. Closing prices here for the week were unchanged to 1/4c lower on white, 1 1/2c higher on mixed and unchanged to 1/4c down on yellow, as follows: No. 2 white, \$1.20@1.20 1/2; No. 3 \$1.19@1.19 1/2; No. 2 mixed, \$1.18@1.18 1/2; No. 3, \$1.17@

CHICAGO.

A membership on the Chicago Board of Trade sold last week for \$8,500, the buyer agreeing to pay the 1925 dues.

L. C. Newsome, of the Newsome Feed & Grain Co., Pittsburgh, Pa., stopped off in Chicago last week on his way to Minneapolis.

The Whole Grain Wheat Co., 1916 Sunnyside Ave., has purchased property at the northwest corner of Synnyside and Ravenswood Aves. for a reported consideration of \$56,000.

Mrs. Mary Crowe, the widow of the late [Please turn to page 19.]

MINNEAPOLIS.

L. E. Brown, of the Brown Grain Co., left last week for a visit in the East.

W. A. Gregory, of the Gregory-Jennison Co., has been in the East on a visit.

A. S. Beltz, millfeed broker, has returned from a visit to his son in Akron, Ohio.

W. D. Gregory, of the Gregory-Jennison Co., will soon leave for a tour of Africa.

Dave Fuller, of the A. L. Goetzmann Co., left last week for a trip to California.

Chester Chapin, of Chapin & Co., Chicago, spent several days in Minneapolis last week.

A. W. Strong, president, Strong-Scott Mfg. Co., Minneapolis, has returned from Florida feeling much stronger after his recent illness.

Leonard S. Allen, one of the partners in Chas. E. Lewis & Co., and well known in the grain and live stock trade, died last week at his home in Minneapolis.

Fay B. Parsons, manager of the Minneapolis office of C. M. Cox & Co., Boston, has returned from his trip in the East over the holidays.

Alfred H. Trettin, formerly secretary of the Imperial Elevator Co., Minneapolis, died at Rochester, Minn., after a long illness. He was 44 years old.

L. C. Newsome, of the Newsome Feed & Grain Co., Pittsburgh, was the guest of honor at a dinner on Jan. 5, tendered him by a group of his Minneapolis friends.

LeRoy Godfrey, formerly in the cash grain trade in Minneapolis, was in the city last week on his way East. Mr. Godfrey

Barley

RECEIPTS OF BARLEY.

Carload receipts of barley last week at different points named, with comparisons, follow:

	Mpls.	Dul.	Chi.	Win.	Mil.
Jan. 5.....	54	1	12	34	24
Jan. 6.....	43	1	16	80	13
Jan. 7.....	35	2	19	18	32
Jan. 8.....	27	1	10	21	19

Jan. 10.....	45	..	11	26	..
Total	247	5	76	198	122

CHICAGO BARLEY PRICES.

Following is the daily range of quotations for spot malting barley quotations at Chicago:

Jan. 5.....\$0.95@1.00	Jan. 8.....\$0.95@1.00
Jan. 6......95@1.00	Jan. 9......95@1.00
Jan. 7......95@1.00	Jan. 10......95@1.00

Receipts of barley at Chicago for week ending Jan. 10, 1925, were 200,000 bus., compared with 125,000 bus. same week 1924; shipments, respectively, 60,000 bus. and 55,000 bus.

BARLEY MARKETS.

MILWAUKEE.—With light receipts, especially with respect to choice grades, barley ruled firm in the Milwaukee market during the past week and quotations closed 1@2 cents higher. There was a good demand from both maltsters and shippers and occasional sales made at shade better than prevailing prices. Receipts were 133 cars as compared with 135 cars the previous week and 74 in 1924. Choice to fancy, 48 to 50 lb. test, quotable at \$1.01@1.02; fair to good, 44 to 47 lb. test, 94c@1; light weight, 40 to 43 lb. test, 90@97c; feed, 85@93c. Iowa quoted 90c@1.02, as to quality; Wisconsin, 90c@1.02; Minnesota, 90c@1.02; Dakota, 90c@1; feed and rejected, 85@95c.

NEW YORK.—There was a moderate trade in barley early in the week, but later the foreign demand for this article fell off.

DULUTH.—Trade was light in the barley market during the last week. While five cars were on track three of them were applied on contracts and some grain was taken from the elevators to fill the current demand. Prices closed unchanged at from 74c to 90c.

KANSAS CITY.—Three cars of barley were recorded in the week's receipts, the first fresh offerings from the country in some time. They were well taken at unchanged prices. No. 3 sold at 90@91c and No. 4 at 88@90c. About 5,000 bus. were withdrawn from store, reducing the local stocks to 19,000, against 489,000 a year ago. Shipments were principally to feed manufacturers.

PORTLAND, ORE.—Barley market draggy. Local consumers are stretching their requirements as much as possible owing to the high prices and demands upon dealers are very limited.

CHICAGO.—Top prices of the season were paid last week for barley, a local maltster paying \$1.03 a bu. for good quality. Demand was excellent, but offerings were light. Another important factor tightening the situation is the resumption of heavy buying by export interests. Market was firm for all grades. Germany was reported to be the principal buyer of American exports. Maltling at the close was quoted \$0.95 @ 1.00. Exports from the principal Atlantic ports for the week ending Jan. 10 were 1,448,000 bus., against 514,000 bus. last week, and 372,000 bus. a year ago.

MINNEAPOLIS.—Offerings were too small to fill orders most of the week, and prices were in consequence very strong. The close, however, was easy and prices were lower. Closing prices were 78@93 cents.

Don't let your subscription lapse; you may lose valuable numbers.

RYE MARKETS

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending Jan. 10:

Jan. 10.....	1.44½	1.47½	1.51	1.46	1.49

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending Jan. 3:

	May.	July.
Jan. 5.....	\$1.49½@1.53½	\$1.31½@1.34½
Jan. 6.....	1.49½@1.53½	1.32½@1.36
Jan. 7.....	1.53½@1.55½	1.36½@1.38
Jan. 8.....	1.53½@1.55½	1.36½@1.37½
Jan. 9.....	1.54½@1.55½	1.37½@1.38½
Jan. 10.....	1.55½@1.57½	1.37½@1.39

Receipts of rye at Chicago for the week of Jan. 10, 1925, were 99,000 bus. vs. 31,000 bus. same week of 1924; shipments were 819,000 bus. vs. 87,000 bus. same week of 1924.

RYE MARKETS.

MILWAUKEE.—Rye quotations in this market varied considerably during the past week in manner which is generally characterized as choppy but closed with a spurt of strength in the last few hours 3@4 cents higher. Offerings continued mostly off-grade and with high moisture content and discounts were liberal. Shippers were the most active buyers. Choice Wisconsin was scarce and wanted. Receipts were 30 cars as compared with 36 the previous week and 16 in 1924. The market closed at \$1.47½@1.49½ for No. 2, inside for Wisconsin, ranging at 7@9 cents under May price.

NEW YORK.—Export business in rye amounted to around two to three million bushels in all positions, principally to Norway, Finland and Germany.

DULUTH.—A reversal of form came about in the rye market during the last week. Fresh exporters' interest turned up and some Duluth rye afloat at Buffalo was sold for prompt shipments to Germany. Receipts showed a falling off, indicating that farmers have generally disposed of their season's crops. Spot No. 1 rye closed 2½c up at \$1.47½.

CHICAGO.—Although the market opened easy under pressure of profit-taking and weakness in wheat, later in the week it rallied with wheat and reports of better export demand. Commission houses with eastern connections were good buyers on the breaks. Scandinavian countries and Germany were reported to have taken considerable quantities. Exports of rye from the principal Atlantic ports during the week ending Jan. 10, were 234,000 bus., compared with 193,000 bus. last week, and 284,000 bus. a year ago. The closing price for No. 2 was \$1.51.

MINNEAPOLIS.—Rye prices moved in sympathy with wheat, being easy early in the week and later becoming firm. Demand from millers was good, but export business continues relatively small compared with the heavy shipments early in the season. However, traders hold the belief that exports in volume will be resumed in the near future. No. 2 to arrive was quoted at the close \$1.44½.

The Italian Council of Ministers has decided to continue temporarily the abolition of the import duty on wheat and other cereals. It also decided to continue the prohibition against the exportation of wheat flour.

HOUSTON, TEXAS

Beans and Potatoes

WELL CLEANED UP.

BIG RAPIDS, MICH.—Beans are pretty well cleaned up out of the farmers' hands in our locality.—*Lester J. Stimson.*

BEAN CROP SHORT.

COLORADO SPRINGS, COLO.—Consider the situation as to pinto beans quite strong. Crop is considerably short, we believe, of early estimates, and stocks in reserve not heavy. We look for very firm market balance of the season.—*The Seldomridge Grain Co.*

BEAN MARKET FIRM.

IMLAY CITY, MICH.—Scarcely know what to say about the bean situation. It looks to us as though 75 per cent of the crop had left the farmer's hand, and I do not think the average country elevator is loaded with very many. The market seems to be firm and steadily advancing. Have no advice to offer.—*Lewis Steele.*

BEAN CROP LIGHT.

LAMAR, COLO.—Our bean crop was very light here last year and all the beans have moved from the farmers' hands and have been shipped out of the country.

Do not believe there is another car in the lower Arkansas Valley to be had. In fact, we have not been cleaned up on beans so completely in the last ten years as we are this season and it will crowd us to have enough for local use.—*Strain Brothers, Ralph Strain.*

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Jan. 10:

Beans—
Boston—Car lots, per 100 lbs. N. Y. and Mich. Choice h.-p. pea beans, \$6.75@7; fair to good, \$6.25@6.25; Calif. sm. wh., \$8.25@8.35; yellow eyes, extras, \$7.00@7.25; red kidneys, \$9.75@10; Calif. limas, \$14@14.25; native green peas, \$7.25@7.50; Canada, \$6@6.25; jobbing prices, 25 to 50 cents above car lots.
Chicago—Market firm on light receipts and good demand. Spot navy, Mich., \$6.50; brown Swedish, \$6.50; red kidneys, \$9.50.
Minneapolis—Latest quotations in pounds, including sacks. Beans, fcy. h.-p. navy, 5c; lima, Calif., 18c; brown, 5c; peas, green, fcy., 8c; yellow, fcy., 6c; marrow-fat, 9c.
New York—Stocks continued to move slowly and values showed no material change, though pea beans, red kidneys and California limas showed a greater degree of firmness and values tended to advance. Beans—Domestic—Marrow, \$9.75@10.25; pea, choice, h.-p., \$6.75; pea, screened and prime, \$6.25@

CHICAGO PROVISION REVIEW.

CHICAGO, Jan. 12.—Liquidation was on in provisions, particularly lard, stop loss selling being a feature and investment buying was not as large as of late, although there was considerable buying on the decline in prices, causing fair rallies. Packers were sellers on hard spots against the output of their packing houses and buyers on the break. There were sales of more than 2,000,000 lbs. of loose lard by packers which were taken by carriers and sold for future delivery. The lard will be tierced and probably delivered on future sales.

Packers are making all the lard possible, and have been mainly responsible for forcing the liquidation. Cash demand of both lard and meats has been disappointing, and the future market furnishes an outlet for the packers to absorb the big run of hogs and sell or hedge the product by sales of futures. January deliveries so far this month have been 43,250,000 lbs.

Exports from the seaboard were large, but it was said to be mainly consigned product as buying from abroad of late has been limited. Shipments from Chicago for the week were larger than the previous week and last year on both lard and meats, while receipts were also heavy. Packers are getting more hogs better suited for the manufacture of lard, and were good buyers of this class throughout the week, while the real light weights in pigs were more or less neglected. The run of hogs here and at western packing points was heavy, especially at St. Paul and Sioux City.

A good rally followed the break on lard and ribs, while bellies were only up moderately from the inside figures. Net losses on lard futures for the week were 40 to 45c; short ribs, 10 to 22½c,

and bellies 57½ to 75c, compared with a week ago.

The range of prices for week, the December range and range previous to December follow:

MOVEMENT OF CATTLE.

Weekly receipts and shipments of cattle and calves at 6 Western centers the week ending Jan. 10, 1925, and totals with comparisons for corresponding time last year, compiled by THE PRICE CURRENT-GRAIN REPORTER:

News of the Country Grain Trade

ARKANSAS.

Blytheville, Ark.—The Oberst Feed Co. was entered recently and \$35 was taken from the cash drawer in the office.

CALIFORNIA.

Los Angeles, Cal.—The Thomas Milling Co. will rebuild its plant early this year. The former one was destroyed by fire in December, the loss being covered by insurance.

CANADA.

Blackie, Alta.—The Pioneer Grain Co. was destroyed by fire. Thirty thousand bushels of grain were in the elevator, including 20,000 of wheat. Loss estimated at \$60,000.

GEORGIA.

Decatur, Ga.—The Decatur Feed and Grain Co.'s building and material were damaged by fire of undetermined origin to the extent of \$10,000. The loss is partially covered by insurance.

ILLINOIS.

Blue Mound, Ill.—The local elevator is for sale by Charles Moore of Decatur.

Springfield, Ill.—Plans are progressing nicely for the new stock yards here.

Stonington, Ill.—The local elevator is for sale by Charles Moore of Decatur.

Mansfield, Ill.—Jesse Polk has succeeded C. L. Ekiss as manager of the Farmers Grain Co.

Gibson City, Ill.—It is reported that E. E. Hammon is offering his elevator at Cooksville for sale.

Walker Station, Ill.—Homer Andrews is the manager of the recently incorporated Andrews Grain Co.

Findlay, Ill.—Men are at work repairing and rebuilding the old mill building, which was burned during October.

Ransom, Ill.—C. W. Willman has succeeded H. A. Schadewaldt as manager of the Farmers Elevator Co. here.

Colfax, Ill.—The property of the bankrupt Colfax Grain Co. will be sold by the trustee Wednesday, January 21, at 2 o'clock.

Latham, Ill.—The Kantz & Maus Grain Co. has been purchased by Frank Beale of Niantic, who took possession January 1.

Grand Ridge, Ill.—The Grand Ridge Co-operative Grain & Supply Co. will hold their annual meeting on January 23. H. L. Grubbs is manager.

Decatur, Ill.—The Decatur Terminal Elevator, 518 East Gault St., has been incorporated with a capital of \$100,000 to deal in grain and operate a grain elevator. Incorporators: O. I. Ferris, M. E. Murphy and E. E. Stuart.

Galesburg, Ill.—On January 1, the name of the Anderson Grain & Coal Co. was changed to the Hewitt Fuel Co., although retaining the same management and telephone number. R. E. Hewitt has managed the company for the past twelve years.

Astoria, Ill.—The new directors of the Farmers Grain & Service Co. are: J. E. Mummert, Frank Beaty, C. G. Bucher, W. J. Danner, D. T. Rach, Ralph Shawver, George Stambaugh, A. N. Price and W. L. Justus. J. E. Mummert has been elected president, A. N. Price vice president and C. G. Bucher, secretary-treasurer.

INDIANA.

Moscow, Ind.—Fire destroyed a feed mill here owned by John Nipp. No insurance was carried.

Franklin, Ind.—Roy C. Bryant has purchased the old Dunlap & King elevator from the Farmers Elevator Co.

Walkerton, Ind.—Mr. and Mrs. Jesse Dolman of Pinola have purchased a milling business four miles south of here.

Vincennes, Ind.—Roy Coldfelter, Oak-town grain dealer, was sentenced from two to fourteen years imprisonment on a charge of grand larceny.

Sulphur Springs, Ind.—The Wilson Grain Co. has been organized to deal in grain, coal and merchandise, with a capital of \$15,000. Directors: Elpha I. Wilson, Carl T. Wilson, James H. Trimble.

IOWA.

Eldridge, Ia.—The Farmers Elevator Co. will operate a co-operative livestock shipping company in connection with its elevator.

Dumont, Ia.—The Farmers Grain Co. is the new name for the Farmers Inc. Co-op. Society. The capital has also been increased.

Davenport, Ia.—The old Purity Oats plant here has been purchased and will be operated by the Kellogg company of Battle Creek.

Albia, Ia.—The Union Supply Co., formerly owned by Harry Young, has been purchased by E. J. Turner. The firm deals in general feed, seed and farm implements.

Onawa, Ia.—Fire believed to have been caused by dust explosion totally destroyed the mill and elevator of J. C. Roush. In addition to the building and machinery, 10,000 bushels of wheat and 5,000 50-pound bags of flour were destroyed.

KANSAS.

Clayton, Kans.—The erection of the 22,000-bushel elevator for the C. E. Robinson Elevator Co. is well under way.

Glen Elder, Kans.—R. W. Dockstader has purchased the Glen Elder mill and elevator for a consideration of \$23,000.

Moundridge, Kans.—The Moundridge Milling Co. contemplate enlarging their plant by the addition of steel storage tanks with a capacity of approximately 80,000 bushels.

Hoyt, Kans.—The Hoyt Elevator, owned and operated by F. W. Hall & Son, was completely destroyed recently, together with 2,000 bushels of corn and 1,200 bushels of oats.

Newton, Kans.—A meeting will be held here February 7 by operative millers of Kansas and Oklahoma to discuss methods of improvement in the milling industry in the two states.

McPherson, Kans.—C. A. Heibert, age 52, prominently known in milling circles of the middle west, died at his home here recently. He was general manager of the Wall-Rogalsky Milling Co.

Humboldt, Kans.—A. F. Roberts has completed the Humboldt Elevator Mills' 16,000-bushel elevator, having over 4,000 feet of floor space for warehousing. C. D. Drake is manager and part owner.

Satanta, Kans.—Approximately 700,000 bushels of wheat, 400,000 of maize and kafir and 60,000 of corn have been

KANSAS CITY, MO.

B. C. Christopher & Co

Handling Consignments and Futures 46 Years.

Buyers and Shippers Kafir, Feterita, Milo Maize, Mill Feed.

KANSAS CITY

MISSOURI

RUSSELL GRAIN COMPANY

Over 40 years in business.

Specializing now in Millfeeds and Chicken Wheat.

Members: Grain Dealers' Nat'l Assn., Kansas City Board of Trade.

KANSAS CITY, MO.

shipped out of Satanta this season, the four large elevators having to be enlarged.

KENTUCKY.

Pikeville, Ky.—W. E. Johnson is now actively engaged in the management of the Poage Milling Co., having purchased an interest in the company.

Columbia, Ky.—A feed store has been opened by J. B. Barbee on the corner opposite Buchanan-Lyon Co. Corn, hay, oats, bran and cotton seed meal will be handled.

Mayfield, Ky.—Circuit Judge W. H. Hester will decide the outcome of the suit of the Mayfield Milling Co. against Covington Bros. & Co., in which the mill asks that the wholesale firm be enjoined from further selling of "Trenton Cream" flour, which trademark they claim is similar to their "Jersey Cream," which has been manufactured and sold here for thirty-five years.

MICHIGAN.

Mount Clemens, Mich.—A warehouse is being erected here by the Farmers Milling Co.

Dimondale, Mich.—The mill of the Dimond Milling Co. here has been rented to G. W. Sherman and son of Mason.

Charlotte, Mich.—The L. H. Shepherd Grain Bean & Milling Co. has donated 200 pounds of feed for pheasants and quail in this section.

Port Huron, Mich.—The insurance policy on the Grand Trunk Elevator Co. to the extent of some \$365,000 on grain and \$78,000 on the building, was carried by the Grain Insurance Assn. Some grain belonging to the Grain Marketing Co., was in the elevator when it burned.

MINNESOTA.

Kasota, Minn.—Ralph W. Woolhouse is superintendent of the Kasota Grain Co.'s elevator, recently acquired by the Banner Grain Co. of Minneapolis.

St. Paul, Minn.—E. R. McDonald, formerly manager of the Fair-Hinshaw Milling Co. of Tonganoxie, Kans., is now connected with the Coles Milling Co., who have a mill at Starbuck.

MISSOURI.

Bowling Green, Mo.—W. A. Meyer has taken charge of the fuel and feed business which he recently purchased from Ed. Biggs.

Marston, Mo.—Grain, hay, feed, etc., is being stored in the Southern Supply & Storage Co.'s 50x100 feet warehouse, under the management of J. M. Betts.

Norborne, Mo.—Herbert Standley was elected manager of the Farmers Union Elevator Co., to start his duties January 6. He succeeded George N. Cies.

Simonds-Shields-Lonsdale Grain Co.

QUALITY and SERVICE

Kansas City, Missouri

Eldorado Springs, Mo.—The annual meeting of the stockholders of the Producers Exchange No. 165 and Farmers Elevator No. 7 was held here Saturday, January 10.

Bragg City, Mo.—E. L. Johnson, John M. McTeer and R. Nelson have incorporated the Bragg City Gin Co., capital \$10,000, to own and operate elevators, warehouses, cotton gins, flour and grist mills and deal in farm products.

Nebraska.

Hastings, Neb.—The Hastings Flour & Feed Co., at 323 West Second St., has been purchased by B. F. Plum and Perry C. Shaefer, who have taken possession.

Potter, Neb.—The newly organized Farmers Grain & Milling Co., with \$25,000 capital stock, has taken over the leased plant operated by the North Platte Flour Mills last year. The mill has a daily output of 100 barrels.

NEW YORK.

Solsville, N. Y.—Fire from unknown cause slightly damaged the warehouse of G. W. Hinman.

Buffalo, N. Y.—The Russell Miller Milling Co. suffered slight damage recently caused from a hot box in a conveyor in the mill.

Brooklyn, N. Y.—H. Hayward, Inc., has been formed with a capital of \$5,000 to deal in grain, hay, etc. Directors: R. H. Hayward, W. H. Hayward and H. Hayward, 244 11th St., Brooklyn.

NORTH DAKOTA.

Fargo, N. D.—George W. Wilder and C. W. Ross, both of Grand Forks, have resigned as members of the board of managers of the state mill. Their resignations practically assure Governor-elect Sorlie of control of the mill and elevator.

Bismarck, N. D.—The state bonding department has received notice of bonding to be filed for C. E. Austin as general manager of the state mill and elevator at Grand Forks for a two-year period ending December 31, 1926. The bond is for \$50,000.

Lostwood, N. D.—An organization has been formed here for the formation of a farmers' co-operative elevator, to take care of the business next year. Either a new elevator will be built, or

the one now here will be purchased. Officers are: J. B. Lepp, president; A. F. Lehman, vice president; O. S. Hauge, secretary-treasurer.

OHIO.

Greenville, Ohio—The E. A. Grubbs Grain Co. has leased space in the Pickering building here.

Norwalk, Ohio—Dr. Phil H. Fulstow has purchased from Ralph W. Mead his entire interest and holdings in the firm of Mead & Woodward.

Canton, Ohio—The Ohio Builders Supply Co. and the Canton Feed and Milling Co. have consolidated under the name of the Ohio Builders & Milling Co., the officers of which are: C. G. Herbruck, president; C. S. Lothamer, vice president; I. W. Royer, secretary-treasurer and general manager. They have taken over the elevators formerly controlled by the old feed company.

OKLAHOMA.

Enid, Okla.—E. R. Humphrey, who has purchased the four elevators located at Dacoma, Helena, Goltry and Lahoma, from the Enid Milling Co., has opened a grain brokerage and wholesale office here.

Kingfisher, Okla.—The old Farmers Mill & Elevator property has been bought by the Johnson Elevator Co., of Enid, who will erect a large elevator on the site of the former elevator, which burned down some time ago.

TEXAS.

Plainview, Texas—Fire caused a heavy loss to the Farmers Elevator Company on January 8.

Houston, Texas—Curtin Mill Supply Co. has decreased its capital stock from \$50,000 to \$35,000.

Humble, Texas—The building housing the United Grain Co. was completely destroyed by fire of unknown origin.

San Antonio, Texas—B. Martinez Sons Co., chartered with \$20,000 capital by Wenceslao Martinez, V. R. Martinez and Jose B. Martinez for the purpose of manufacturing corn dough.

WASHINGTON.

Spokane, Wash.—H. J. Beneke and two sons have opened the Farmers Seed & Supply Co. at 913-17 First Ave. They will handle all lines of farmers' supplies, seed, plants, fertilizer and orchard and poultry equipment.

WISCONSIN.

Kenosha, Wis.—A new flour and feed grain warehouse, etc., has been opened by Peter Jacobs & Co. at 807 Elizabeth St. and 806 Connerton Ct.

mentations along this line, and perhaps the comment referred to is simply by way of general discussion. But this trend of thought is nevertheless deplorable for the simple reason that it is unsound. The intention may be good, and undoubtedly only a phase of the government's desire to help in the more orderly marketing of farm products. But the fact remains that any such policy strikes at the very fundamentals of the exchange. For as is well known, without unlimited action we would restrict the free operation of the law of supply and demand. Anything in the way of limiting the prices of grain up or down is a movement to keep buyers and sellers out of the market. Such a movement is unhealthy."

Trade Opinion.

There is very little outside interest in the coarse grain markets, but influential local traders give good support, especially to corn, assuming that the present cash situation will ultimately correct itself. At the present time daily receipts are considerably more than sufficient for industrial uses and what little shipping demand there is; the result is that the poorer sorts are slow sale at increasing discounts. We doubt if there will be any pronounced or permanent strength until there is a considerable improvement in the distributing trade.—Thomson & McKinnon.

The apparent domestic disappearance during the past six months, assuming the government estimate of production and our estimate of stocks to be correct, were approximately as large as last year, notwithstanding the estimate of heavy live stock feeding last year. Although the milling business has been fairly active, flour stocks are not accumulating, stocks reported by the Daily Trade Bulletin in ten cities on Jan. 1 being 13 per cent less than a year ago, reductions being noted in 8 of the 10 cities.—Clement, Curtis & Co.

While latest statistical estimates of the world's situation show a closely adjusted position, it does not seem that the world is facing an actual shortage. The export demand for our wheat is by no means as keen as it was during the first months of this season, for several reasons. Lower prices and the fact that North America was the only country that had an available surplus were the strong features. Now prices are much higher and the surplus of the Southern Hemisphere is available and it comes into competition with America. Under these conditions it is but natural that importers use more than ordinary discrimination in making purchases.—Bartlett-Frazier Co.

Speculative support in corn futures is chiefly local. Shippers report moderate sales to Eastern distributors. The absorption of the low grade NEW was accomplished only by further recessions in price, establishing new record discounts under the May for this season; at that, going prices seem attractive, moisture and quality considered.—Pope & Eckhardt Co.

COMING CONVENTIONS.

Jan. 20-22, Farmers' Grain Dealers Assn. of Iowa, Fort Dodge, Ia.

Feb. 10, 11 and 12—Farmers Grain Dealers Ass'n of Illinois, Peoria, Ill.

Feb. 12.—Tri-State Country Grain Dealers' Assn's, Nicolett Hotel, Minneapolis.

Mar. 25-27. North Dakota Farmers' Grain Dealers' Assn., Bismarck, N. D.

American Feed Manufacturers' Ass'n, New Orleans, La.—Date undecided, but will probably be held the first part of May, 1925.

Oct. 12-14, 1925.—Grain Dealers' National Ass'n, Hotel Muehlebach, Kansas City, Mo.

Oct. 12-14, 1925.—U. S. Feed Distributors' Ass'n, Kansas City, Mo.

IMPORT NEEDS OF SPAIN.

There has been considerable contracting by Spain for grain both from the United States and Argentina, for delivery in January and February. This is in anticipation of relaxation at that time of the government prohibition against imports. If such action is not taken the grain will have to be resold elsewhere. It is estimated that the total production of wheat in Spain this year will be about 136,000,000 bus., although no official statistics have yet been published. However, there are some authorities who estimate the crop at 124,000,000 bus. It is believed that the shortage, if any, will be small as millers and dealers have reduced their demands.

Hazel Green, Wis.—Fire of unknown origin destroyed the J. F. Splinter feed mill, causing a loss estimated at \$4,000, partly covered by insurance. It will be rebuilt at once.

Clinton, Wis.—The Associated Farmers Elevator here was completely destroyed by fire believed to have been caused by crossed wires. The loss is estimated at \$15,000. The elevator was managed by Eugene Foley.

TERMINAL MARKETS.

[Concluded from page 15.]

Michael Crowe, pioneer commission merchant and Board of Trade member, died last week. Mrs. Crowe was 80 years old at the time of her death.

The Chicago Board of Trade has raised the membership dues to \$250, or \$75 over last year's. The increase is necessitated by the expenses due to the opening of the cotton exchange and other features which require more money.

The Corn Products Refining Company will show for 1924 a balance of approximately \$3.60 a share (par \$25) on 2,530,000 shares of common equal to \$18 a share on the old stock, and compared with \$17.54 on the old stock in 1923.

Robert W. Roloson, a retired grain commission merchant and one of the older members of the Chicago Board of Trade, died on Jan. 11 in Winter Park, Fla., after an illness of less than a week. He was formerly a member of R. W. Roloson & Co., a director of the Diamond Match Co.

John C. Ross, a veteran in the grain trade, who retired some time ago and lives at Rochelle, Ill., distinguished the voice of C. D. Berry in the Board of Trade pit over the radio. He wired Mr. Berry as follows: "Hello, there, Berry, I hear your voice in the pit." Rochelle is 75 miles from Chicago.

Farm reserves of wheat on Jan. 1 were 17 per cent, as compared with 24 per cent in a normal year, according to Nat C. Murray, of Clement Curtis & Co. There is 8 per cent of the crop in local mills and elevators, against 12 per cent in a normal year. Total wheat stocks in all positions in the United States are estimated at 387,000,000 bus., compared with 420,000,000 bus. last year. Corn reserves on farms are 55 per cent, against a normal of 60 per cent, and oats, 46 per cent, against a normal of 48 per cent.

The annual report of the board of directors of the Chicago Board of Trade contains the following regarding government regulation: "There seems to be running through some government reports a leaning toward limiting the range to which a market may go from day to day. Of course, there have been no hard-and-fast recom-

Sn. 1924-5.	7,314	3,810	14,106	3,449	838	4,237
Sn. 1923-4	10,379	8,640	8,078	13,082	2,028	6,026
Sn. 1922-3	31,299	5,713	14,525	8,435	1,504	6,890

Stocks in Toledo Jan. 10 show 13,022 bags red clover; 7,300 bags alsike and 15,610 bags timothy. Exports of timothy from New York last week were 400 bags; Baltimore imports of clover, 1,840 bags.

	Clover.	Alsike.	Timothy.
This week.....	900	100	100
Season 1924-25....	3,950	2,200	9,064
Season 1923-24....	6,700	7,400	6,134

ST. LOUIS SEED MARKET.

Quote Timothy fair to good clean seed at \$5.75 to \$6.25, dark and low-grade at \$3.00 to \$5.00; Clover—clean seed at \$28.00 to \$30.00 (high grade clean Northern seed at \$31.00), slightly weedy lots, \$25.00 to \$27.00, and heavily weedy at \$16.25 to \$24.00. Alsike at \$15.00 to \$20.00; Alfalfa at \$16.00 to \$20.00; Redtop at \$10.00 to \$11.00 for clean seed—chaffy at \$4.00 to \$8.50; Hog Millet at \$2.60. Early Fortune at \$2.65@2.70 and Siberian at \$2.20 to \$2.30 bulk basis.

Yellow, black and brown soy beans at \$1.75 to \$2.75, according to variety and quality. Sunflower Seed—During week, two small cars sold at \$3.40 and \$3.50 per 100 lbs., not previously reported.

KANSAS CITY SEED MARKET.

KANSAS CITY, Jan. 10.—Local seed houses are expecting the convention of the Western Implement and Vehicle Dealers' Association, next week, to mark the beginning of spring trade in field seeds. Many members of this organization handle seeds in connection with their main business. While here they will be solicited for orders.

Trade in seeds thus far in the new year has not shown much expansion. Activity usually is postponed until the last half of January or the first of February. The tendency of prices is upward, especially in the case of millet seed. Country offerings have been so light that scarcity is feared. Bids to farmers were raised 25c to \$1 per cwt. this week in the hope of starting an inward movement. For fancy German seed \$3.50@4 was bid and \$3@3.50 was offered for choice of the same variety. Common, as from first hands, was quoted at \$2@2.50; Siberian and hog, \$1.75@2. It is believed that plenty of cane seed is in sight, but that farmers have not threshed much, owing to bad weather and dissatisfaction with prices. Houses are bidding up slightly. They are paying \$1.65@1.75 for red top, \$1.60@1.70 for orange, and \$1.60@1.70 for amber. A good southern inquiry is reported. Interest in Sudan seed appears to be light. Little is moving inward and sales from here are light. In a wholesale way the seed is offered at \$5@6 per cwt. Bids to the country on uncleaned seed are \$3.50 to \$4.25.

Sales of alfalfa seed are moderate and fresh arrivals are light. The market has a firm tone. Cleaned seed is held by local dealers at \$17@22 per cwt.

Inquiry for red clover seed is increasing, while stocks are light. It will soon be time for sowing in wheat fields. Seed of different qualities is selling from \$20 to \$34 per cwt. Sweet clover seed is offered at \$10@13.

Blue grass seed is firmly held, at \$17 @28 per cwt., according to weight and color. A good spring demand is looked for, but present trade is quiet, consisting of scattered orders. The timothy seed market has not developed special activity, though it is expected to show more life as spring approaches. Houses are offering the seed at \$6.50@7.

A good demand exists for the black Wilson and brown varieties of soy beans, while other kinds are quiet. Farmers have been holding for higher prices. Dealers are bidding \$2.50 a bushel for black Wilson and \$2.75 for brown. Prices offered for other kinds are \$1.50@1.75.

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending Jan. 10, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rcts.	Shpts.	Rcts.	Shpts.	Rcts.	Shpts.
Week ...	336	278	460	299	409	378
Prev. wk.	238	466	341	42	82	349
1924	35	53	88	373	742	398
1924-25.	27,515	17,202	6,004	3,025	11,390	10,438
1923-24.	26,299	11,465	4,979	3,085	14,624	4,191
1922-23.	26,547	19,983	6,644	5,018	17,755	3,914

Timothy—Market firm. Fair country run at \$5.75@6 per 100 lbs.; good country run about \$6.25@6.40 and high grades at \$6.50@6.75.

Alfalfa Seed—Steady. Recleaned country lots, \$21@23 per 100 lbs.

Clover Seed—Dull. Country lots, \$24 @26.75 for 100 lbs.; good, \$27.25@28.25; choice, \$28.75@29.75; fancy, \$30@31, and Mammoth, \$28@32.

Alsike—Firm. Average country lots, \$20@20.75 per 100 lbs. Fair seed, \$16@17, and poor, \$11.25@13.25.

Flax—Firm. No. 1 Northwestern closed nominally at \$3.13¼@3.17¼ per bu. of 56 lbs.

Other Seeds—Domestic Hungarian millet, \$3.25@3.75. German, \$3.50 for poor, \$4@4.25 for choice, and \$4.75@5 for fancy Southern; Siberian, \$2.50@2.75. Common millet, \$2.50@3; good to choice, \$2.50@3.35; Jap, \$3.50. Feed millet—broom corn and early fortune millet, \$2.15; choice, \$2.25; fancy, \$2.35. Sunflower seed, \$3.75.

TOLEDO SEED MARKET.

TOLEDO, O., Jan. 12.—Clover seed lost some of its strength the past week and declined twenty-five cents for the cash and thirty cents on the February and March. Only a moderate volume of trade was carried on during the week. The real cash demand is just ahead and some of the seedsmen are already feeling the first tug at their supplies. The market is far from showing any weakness and all setbacks are met with a very active buying power. Present levels are supposed to discount the short crop and the next move if higher will be a reflection of the cash demand. Buying throughout the country has been delayed the last few years by high prices so that the stocks may be slow in moving until nearer spring. Toledo stocks of clover are estimated to be around 13,000 bags and this small amount could easily be cut to nothing with a normal demand. Prime clover inspected the past week was 900 bags, season to date 3,950 bags, compared with 6,700 bags last year. Receipts this week, 822 bags; shipments, 1,222 bags.

The first trade in October clover was made on Friday at \$17.50. Trading in this future usually starts early as the new crop with all its long road to go before it is safe offers unusual trading opportunities. Low last year was \$11.20 in February and \$19 high in September, expiring at \$18.40.

Alsike and timothy were both firm with timothy only gaining ten cents for cash during the week. Trade was light

OPENING SEED DEPARTMENT.

JACKSON, MISS.—We are just now opening up a seed department in connection with our grocery business.—Fein Moore Seed Co.

TOLEDO SEED PRICES.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy for the week ending Jan. 10:

	Range for wk.		Close Jan. 10.	Close Jan. 3.
	High.	Low.

March	3.50	3.42½	3.42½	3.45

WANT GOOD SEED.

WINCHESTER, IND.—We have changed our opinion of the seed situation quite a bit within the last ten days. We did think that the farmers would not buy the high priced red clover but we were all wrong. They are buying it now. After all, the farmer who has a crib of corn or a couple hundred bushels of wheat, is able to buy clover seed at \$30 per bushel. Our shipping demand from nearby dealers is very good. They want good seed free from noxious weeds and will pay the price for it. They would not be interested unless their own farmers were buying.

We don't believe there will be enough good medium and mammoth clover to go around.

and cash demand is needed just as it is in clover to bring about a more active market.

LITTLE SEED MOVING.

McGREGOR, IA.—There has been very little timothy seed moving in this territory for the past two months, and doubt if there will be for some time unless the prices advance. There is some seed back, but farmers are all holding for higher prices. Very little clover in this territory.—*Gilchrist & Co., by F. G. Bell.*

1925 SEED SELLING SEASON OPENS.

Seedsmen are anticipating a good demand for field seeds mainly because farmers, in general, are in better shape financially than a year ago and country dealers seem to be more optimistic. Although the selling season for spring sowing requirements usually opens shortly after the first of the year heavy shipments of seeds from large seedsmen to smaller dealers usually do not begin until the latter part of January or the early part of February.

Prices of a majority of the seeds are higher than last year at a corresponding time. The following kinds are being quoted at higher prices than last year: Red clover, alsike clover, white clover (some markets), alfalfa, redtop (some markets), Kentucky bluegrass, all millets, rape, Canada field peas (some markets), cowpeas, soybeans, and seed grains.

Lower prices than last year were being quoted on crimson clover, sweet clover, timothy, orchard grass, meadow fescue, vetches and sorghos.

The seed trade in general has shown greater interest in red clover and alfalfa than in any other kinds of seed. The small crop of red clover in this country, together with a much smaller crop than last year in most of the surplus producing European countries, has been largely responsible for a 50 per cent increase in prices over those quoted last year on Jan. 5. The red clover seed market in Europe was dull during the first three weeks of December, mainly because the large export demand from this country expected by many European seedsmen failed to materialize. On Dec. 15 f. a. q. French red clover was being offered at about \$25 per 100 lbs. c. i. f. New York. Better grades were offered at \$26@27. During the week ending Jan. 3 over 500,000 lbs. of red clover, subject to the seed importation act, arrived at New York mostly from France. About 120,000 lbs. of white clover arrived from Holland.

DULUTH FLAXSEED MARKET.

DULUTH, Jan. 10.—Trading in the flaxseed market was slow, and its price range narrow during the last week. The price tendency was a shade easier, generally, but prices gained at the week end. The rank and file of specialists in the trade here as a rule expressed themselves as bullish regarding the long-pull outlook. Spot seed closed ¼ cent up, January ¼ cent up, and May ½ cent up as a result of the six days' operations.

What is regarded as evidence of a strong situation in the trade is that crushers are willing to pay premiums extending up to 4 cents over May for spot seed. Buyers for crushers' interests here have admitted that they are being pressed to obtain seed supplies in sufficient quantity to fill linseed oil contracts, and failing an unexpected reversal of form a higher market level is looked for. The few cars of seed that have been coming in lately have found prompt distribution with crushers waiting to pick them up.

It was regarded as interesting in trade circles to note that some seed was shipped from the elevators here down to Chicago during the last ten days. That is regarded as indicating that the linseed oil interests on that market are finding themselves short of seed supplies.

Some seed shipped from here down

the lakes before the close that was not directly owned by crushers, was reported to have been sold during the last few days. The movement of flaxseed this way is not expected to increase to any extent in the near future, as farmers are holding for higher prices and to determine their probable seeding requirements next spring.

Receipts of flaxseed during the week were 111,955 bushels, and with shipments of 53,875 bushels, stocks remaining in the elevators aggregated 1,093,000 bushels.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and the same period last year were:

	Saturday.	Wk ago.	Yr. ago.
On track.....	\$3.05-09	\$3.04½-08¾	\$2.46-50
To arrive....	3.05-06	3.04½-05¾	2.47
January	3.05	3.04½	2.46
May	3.06½	3.05½	2.49½

ALFALFA SEED DISAPPOINTING.

GRAND JUNCTION, COLO.—The alfalfa seed crop in this section has been exceedingly disappointing this year and do not believe the total outturn will be over 40 per cent of last year's crop.

There has been a very keen demand for seed recently and the market has advanced from \$3 to \$4 per hundred.—*Grand Junction Seed Co., R. B. Dessert, Secretary.*

UTAH HAS SEED LABORATORY.

A law providing for a state seed laboratory to be located at the capitol of Utah and operated under the direction of the state board of agriculture was recommended by the crop and pests inspector in his biennial report. This recommendation was made owing to the fact that the alfalfa seed industry is growing at a rapid rate and demands have been made upon the state for seed analysis and certification.

BROOM CORN MARKETS.

Activity in the field is noted principally in northwestern Oklahoma, the district tributary to Liberal, Kan., and in New Mexico sections, as reports from districts south of the Canadian River in Oklahoma indicate that crops have been rather well thinned out and there is no appreciable amount of corn that can be secured in any one of these dwarf districts.

Prices to the growers now range principally from \$60 upwards to \$100 with \$70 to \$90 paid in Northwest districts the past week for both standard and dwarf. In the Lindsay standard district corn is taken principally from around \$75 to \$100 with crops obtained, both above and below, but not in quantity.

A steady demand is noted for corn in the Central Illinois district, as buyers have been picking up crops as a result of orders placed by factories. The larger end of sales by the farmers were made around \$100 and a shade above, with \$130 and \$135 paid on best crops. Short late corn has been secured under the \$100 price.—*Broom Corn Review.*

FT. WORTH A CONSIGNMENT MARKET.

Once in a while, we hear discussions, pro and con, as to the advantage of consigning grain to various markets. Consigning is relatively new in Texas but has been in vogue for many years in other primary markets. This method of selling is now well past the experimental stage in Texas. During the month of December about one thousand cars were sold on consignment in this market, an accomplishment worthy of your serious consideration. These cars were not consigned here for any other reason than to gain the advantages that are to be found here. We are told that commission charges here are the lowest existing in any terminal market. When you consign to Fort Worth, you can figure to the penny just what it is going to cost you to dispose of your ship-

NEW YORK OATS MARKET.

Oats receipts, 58,000 bushels bonded; 86,000 bushels domestic. Prices moved more or less in sympathy with other speculative values with only a slight change from the close of a week ago. Receipts at primary markets are considered liberal, while the visible supply is now at record figures, being three and one-half times greater than that of the same date last year. As prices for shipment at Western markets continue above a parity with this market and vicinity, dealers obtain their supplies mainly from spot offerings and ex-lake Northwestern oats, the premiums for which, though slowly advancing, are still below those asked for shipment. The large amount now on winter storage at Buffalo will probably prolong the time when a parity will be reached. Spot holdings have been reduced considerably with premiums showing an advance toward a higher level. There was a better cash inquiry which enhanced values moderately, with a prospect of their being fairly well maintained under existing conditions. Except for the lower grades prompt disposition is not readily accomplished, aside from carlot quantities, because of limited consumptive requirements.—*L. W. Forbell & Co.*

DISCONTINUED PUBLISHING CARDS.

The Transit Grain & Commission Co. of Ft. Worth, Tex., announced that they have discontinued publishing their daily market cards, giving the reason that there were so many cards being sent out they considered it duplication, and that all Ft. Worth market prices will be published hereafter in the Ft. Worth Star Telegram, Ft. Worth Record and Dallas News.

Transfer of the Packers and Stock Yards Administration from the Department of Agriculture to the Federal Trade Commission is provided for in a bill introduced in the Senate last week by Senator Frazier.

DECEMBER COTTONSEED REPORT.

The Department of Commerce has issued the following report for December showing the amount in tons of cottonseed received, crushed, and on hand, and cottonseed products manufactured, shipped out, on hand, and exported during the month of November, 1924, and 1923:

	1924.	1923.
Cottonseed—		
Received at mills*	3,023,385	2,359,000
Crushed*	1,853,456	1,567,672
On hand Nov. 30	1,184,803	803,947
Cake and meal—		
On hand Aug. 1	41,620	49,766
Produced to Nov. 30 ..	847,793	717,115
Shipped out*	747,139	587,300
On hand Nov. 30	142,274	179,581
Exported	166,119	50,511

*Since Aug. 1, 1924.

FARMERS TURN TO ALFALFA.

On account of the high price of clover, many farmers are turning to alfalfa as a substitute. The clover market has had everybody guessing, especially the man who has had clover seed to sell. The same holds true of any company that has to buy clover seed. Reports of a short crop of clover all over the country have made a very strong market, with almost continually rising prices. Lately reports from Europe indicate a very short crop on the other side. The crop of alfalfa seed, however, is said to be good.

Feedstuffs

The Allen & Wheeler Co. of Troy, Ohio, report a good demand for feed stuffs.

The Splinter Feed Mill at Hazel Green, Wis., which was recently burned to the ground, will be rebuilt.

Speaker Bros., Richmond, Ill., have sold their feed, flour and custom grinding business to G. F. Strand, who will operate under his own name.

A. W. Bosworth, manager of the Memphis office, Cereal Byproducts Co., has returned from St. Louis, where he attended a meeting of the board of directors. The concern specializes in cereal by-products and alfalfa meal to mixed feed manufacturers. Mr. Bosworth reports good prospects for business in 1925.

The Smith-Estes Brokerage Co., Atlanta, Ga., has been organized as a partnership firm composed of W. B. Estes and W. C. Smith. A brokerage and storage business in feed, grain, hay, and flour will be done by the new firm. The address of the firm will be Curtis street at 260 Peter street and Southern Railway tracks.

The Feed Dealers' Association Credit Bureau of Kansas City, Mo., at its annual meeting January 8, elected officers as follows: B. D. Nathan, president; George W. Sellers, vice president; L. C. Worth, treasurer; F. R. Warrick, secretary; J. R. Blacker, N. H. Vaughan, Oscar Bauer, John Weise and C. S. Scott, directors.

THE CANADIAN FEED MARKET.

TORONTO, CAN.—Mill feed prices continue to advance, although actual trading is reported to have fallen off somewhat, according to retail information. Retailers claim that prices have advanced to such a height that trade is curtailed. Millers claim, however, that there is little likelihood of lower prices, as the export demand is likely to remain strong owing to the recognized shortage of corn and other principal feeds in the United States. Coarse grain prices are firm also, with a tendency to rise: Toronto and Montreal dealers report a fair demand.

The demand for hay is duller than usual, both in the domestic and export markets. Only the best quality hay is marketable at the present time. Toronto and Montreal cash prices of car lots of mill feeds, bags included, ex-track, are quoted as follows:

Bran, \$35; shorts, \$37; middlings, \$43; feed flour, \$54; No. 2 timothy hay, baled, ex-track, Toronto and Montreal, \$13.50 to \$15.50 per ton; oat straw, \$9 to \$10.

In the Maritime Provinces it is reported that the farms were never in better shape for spring cropping. Winter weather came sufficiently late to permit farmers to finish fall ploughing and other necessary fall work. The demand for feeding stuffs is dull in all the Maritime Provinces, prices for same being considered altogether too high by the farmers. The tendency is to feed crushed oats of home production, with turnips in place of mill-feeds.

In Quebec in the dairy districts mill-feeds, oil cake and rough grains are in fair demand, and shipments of hay and grain are general now that sufficient snow has come to make good sleighing. There are reported large quantities of

hay for sale throughout rural Quebec, but the trade is interested in only the best qualities.

In Ontario the cold weather and snow falls has resulted in greater demand for feeding stuffs throughout the province. Mill-feeds, oil cake and rough grains are selling freely. Hay and straw of the best qualities and rough grains are being shipped from the central and Eastern parts of the Province.

COTTON SEED MEAL.

KANSAS CITY, Jan. 10.—The only new feature in the cotton seed meal and cake market this week was a let-up in the Galveston export demand, with consequent larger offerings northward by Texas mills. The Texas carlot price was reduced \$1 a ton, to \$39. Oklahoma mills were not out of the predicament they got into by overselling for December delivery, but there was some reselling by holders of Oklahoma contracts, which broke prices 50c a ton, to \$40.50@41. Different points in Arkansas had plenty of meal for sale. They made a concession of 50c and offered at \$38.50@39.50. It could not be said that the feeding demand had recovered the activity it lost just before and during the holidays. Evidently the big stocks secured have not been used up. This is fortunate for feeders, as the recent mild weather has made bad roads for hauling meal or anything else.

There is practically no change to report on the linseed meal situation. Prices remain too high for cattle feeders. Minneapolis asked \$47.50@48 a ton, or a shade more than a week ago. Kansas City dealers offered the product at the old price, \$51.80 for carlots. Very few sales were reported.

Tankage was in fair request. Hog feeders paid the previous price, \$60 a ton for carlots. Ton lots were \$5 more. Meat scrap was steady, at \$70 and \$75, according to quantity.

MINNEAPOLIS LINSEED MARKET.

MINNEAPOLIS, MINN., Jan. 10. — We have had some violent fluctuations in the flaxseed markets of the Northwest this last week. May seed has been as high as 3.12 and as low as 3.01. At the moment of writing it is 3.07, or one cent lower than a week ago.

The Argentine has also been up and down during the past week, and is three cents lower than a week ago. Shipments of seed from Argentina are not large, with small quantities coming to the United States.

There has been an increase in the acreage in India of 138,000 acres. Shipments of seed to Europe from India in 1924 were 13,096,000 bushels and 14,876,000 bushels in 1923. Russia, which

some time before the war exported from 10,000,000 bushels to 15,000,000 bushels per year, has since the revolution only shipped small quantities, and this year it will only amount to a few hundred thousand bushels.

In the early fall every one thought with a thirty million bushel crop of flaxseed we would have low prices, but seed has gone up without a hitch to more than three dollars. The crop has been easily absorbed and the crushers are now looking around for additional supplies, and with a much smaller crop in Argentina, it looks as though we will have keen competition with Europe for our spring and summer needs.—*Archer-Daniels-Midland Company.*

FUNK REPRESENTS FARMERS.

An interesting outgrowth of the activities of the United States Grain Growers, Inc., recently appeared in the appointment of E. D. Funk as representative of 63,000 farmers to the chairmanship of a sub-committee to investigate the desirability of purchasing stock in the Grain Marketing Co. His associates on the committee are Charles B. Stewart of Lincoln, Neb., and W. R. Crowther of Golden City, Mo. Their report will soon be ready, but prior to its completion, comment is being invited from those who wish to be heard, addressing E. D. Funk at Bloomington, Ill.

WEEKLY LINSEED REVIEW.

NEW YORK, Jan. 12.—*United Kingdom:* The linseed situation during the past week has been somewhat easier with more selling pressure in evidence from Indian shippers, while Plata seed has been meeting with only a slow trade.

Linseed oil trade has been variable, but the consumers' buying appeared better toward the close of the week.

Cotton oil supplies are scarce, but the demand for this article is very small.

India: Crop prospects in this country are reported as generally good. Shipments of linseed this week amount to 172,000 bushels compared with 52,000 bushels last week.

Argentina: Markets for linseed in this country have been quieter. Country offers are increasing and the interior movement of seed is enlarging with port stocks gradually increasing. Clearances are expected to be larger from now on. The foreign demand recently has been less active.

SOY BEANS.

The growing popularity of soy beans as a farm crop and soy bean meal as a standard ingredient in mixed feeds has earned deserved prominence in this column. A situation has arisen, particularly in Missouri and southwestern states, where the crop has been almost entirely consumed as hay and feed, resulting in a consequent shortage in seeds. It has been necessary to buy from outside markets the popular varieties, Laredo and Ootatan, at prices ranging up to \$13 per bushel. Virginia and southeastern states are likewise paying high seed prices up to \$6 a bushel. Developments of soy bean production have shown the importance of selecting seed of a proper sort for various localities. Early yellows go well in Kentucky, but Mississippi, Georgia and such states prefer Laredos and Ootatans, with some demand for Sables, Wilsons and Ebonies.

In the middle west, the early popularity of Hollybrooks has changed to Manchus, which are not quite so late. Present prices for them are about \$1.70 per bushel for good grades.

Comment has been made here rela-

tive to government soy bean grades which are intended to cover moisture, weed seeds, splits and dockage. These tentative grades, on which the Department of Agriculture is working, are now being used in some places and their purpose is to encourage growers and handlers, showing leniency in the trade and hence, little disturbance of present marketing methods.

OIL MEAL MARKET.

Demand for oil meal has been fair although not exceedingly heavy. Export demand is light and foreign markets are somewhat lower. It is rumored that some Canadian linseed meal has been offered in Minneapolis at a shade under domestic prices, but in spite of these conditions mills are holding their prices firm. Our quotations however, are on the same basis as last week and are under mill prices.—*The Bertley Bulletin, Chicago, Jan. 10.*

FEED MARKETS.

BOSTON.
Boston, Jan. 10.—Prompt shipment, per ton: Spring bran, \$39.50@40; winter bran, none offering; middlings, \$42.50@45; mixed feed, \$41@47; red dog, \$51; gluten feed, \$49.75; gluten meal, \$53.70; hominy feed, \$55.50; stock feed, \$52.50; oat hulls, reground, \$18.50; cottonseed meal, \$43@49.75; linseed meal, \$52@52.50.

MILWAUKEE.
Milwaukee, Jan. 10.—Despite the fact that the millfeed market here was oppressively quiet last week, quotations closed firm and generally stronger with the exception of the brans, which recorded declines of approximately \$1 each. The consumers seem increasingly reluctant to buy at present high prices and predictions are that the present level will not only be maintained but increased throughout the winter. Current quotations are: Winter bran, \$32@33; spring bran, \$32@33; standard middlings, \$35.50@36; flour middlings, \$38.50@39; red dog, \$42@43.50; rye feed, \$33@33.50; linseed oil meal, \$47.50@49; cottonseed meal, \$43.50@47.50; hominy feed, \$48@48.50; reground oat feed, \$13@14; gluten feed, 30 days, \$40.80; all in 100-lb. sacks, f. o. b. Milwaukee.

CINCINNATI.
Cincinnati, Jan. 10.—The millfeed market was quotable firm during the week, due mainly to the relatively higher prices asked by mills, but the demand hardly warranted any advance as the market was extremely dull and draggy. Offerings on track sold very slowly and retail dealers here and at country points especially complained of slower buying and that consumers were feeding more hay and all cheaper feeds which they had on hand. Quotations represent 100-lb. sacks: Soft winter wheat bran, \$35.50@36; hard winter wheat bran, \$35.50@36; standard middlings, \$38.50@39; soft wheat middlings, \$39.50@40; gray hard middlings, \$39.50@40; mixed feed, \$37.50@38; No. 1 alfalfa meal, \$30@31; hominy feed, \$51@52.

NEW YORK.
New York, Jan. 10.—Advances approximating 50c to \$1 per ton were named in both city and Western feeds. While business was not heavy, Western mills were understood to be sold on contract for the balance of the month and were asking a premium of \$1 to \$2 per ton for February delivery. City bran was quoted at \$39, middlings \$42 and red dog \$51, while Western bran ruled at \$39, middlings \$42 and red dog \$50.25@50.50 per ton.

MEMPHIS.
Memphis, Jan. 10.—The feed market continues quiet and in some sections is showing easiness. Cottonseed meal continues in disappointing demand and quotations today were reported as about \$38 for 41 per cent and \$40 for 43, both asked prices, with bidders trying to do a little business about a dollar cheaper. Millfeed has been quiet and only a shade better than the recent low, when wheat bran sold at \$33 and gray shorts at \$38. Asked prices are now \$33.50@34 for the former and \$38.50@39 for the latter, but buyers are showing little interest.

BALTIMORE.
Baltimore, Jan. 10.—Values on wheat feeds and hominy feed continue firm under light spot offerings and a fair demand in a jobbing way. Gluten feed is firmer, but selling sparingly. Dried beet pulp in fair demand. Alfalfa meal quiet. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$38@38.50; Western middlings, per ton, 100-lb. sacks, \$39@39.50; city mills winter wheat bran, per ton, 100-lb. sacks, \$39.50@40; hominy feed, per ton, \$50@51; gluten feed, per ton, \$47.50@48;

alfalfa meal, per ton, \$32@33; dried beet pulp, per ton, \$38@40.
PHILADELPHIA.
Philadelphia, Jan. 9.—The market for foodstuffs is dull and weak with prices in most instances a shade lower. Offerings are moderate, but demand is limited. Buyers in the country are not operating, but holders at Buffalo and vicinity are loosening up and are making concessions from current quotations in order to stimulate business, hence the unsettled condition of the market. We quote soft winter bran at

\$38.50@39.50; winter middlings, \$42; spring bran, Western shipment, \$38; standard middlings, W. S., \$41; flour middlings, W. S., \$44@46; red dog, W. S., \$49@50; low grade flour, W. S., \$59@60; rye middlings, W. S., \$40; reground oats feed, \$16@27; fine yellow hominy, W. S., \$51.70@52; fine white hominy, W. S., \$54@55; cottonseed meal, 36% protein, W. S., \$43; cottonseed meal, 41% protein, W. S., \$45.75.

DULUTH.
Duluth, Jan. 10.—Apart from bran prices in millfeeds gained from 50c@1 on this market during the last week. Ground feeds are unchanged. Dealers experienced a better demand from over the territory, with cattle feeders coming in more freely. Productions of the mills were in good volume. Closing prices per ton follow: Bran, \$32; shorts, \$35; red dog, \$43.50; Boston mixed, \$35.50; flour middlings, \$38; ground oats, \$37; No. 1 ground feed, \$43.50; No. 2 ground feed, \$41.75; No. 3 ground feed, \$40.25; cracked corn, \$46.75; coarse corn meal, \$46.75.

COLLIS PROCESS PURE DRIED BUTTERMILK

SHOULD BE A PART OF ALL POULTRY MASH FEEDS

Feed Manufacturers who keep in touch with the experimental work conducted by the Agricultural Colleges and Poultry Feeding Experts in the scientific feeding of poultry, realize what a prominent place Dried Buttermilk has taken as part of all Mash Feeds fed.

If you are manufacturing mash feeds for growing, developing baby chicks, egg production in hens and pullets, and for fattening without **Collis Process Pure Dried Buttermilk**, you are doing so contrary to all present day teachings.

Buy your requirements now from the largest producers of Dried Buttermilk in the world.

Buttermilk dried by the Collis Process retains all feeding value and Lactic Acid found in fresh churned pasteurized buttermilk.

An Essential

Experimental feeding and the facts thus established have proved that a perfectly balanced ration must contain protein, vitamins and minerals. Tomco Calcium Carbonate Dust is now recognized by leading feed manufacturers as ideal for mixtures. It supplies the essential mineral content—it is of highest purity—it is powdered exceptionally fine and is absolutely free from moisture, being artificially dried.

CHAMBER OF COMMERCE
MILWAUKEE WIS.

MRS. W. O. GREENE DIES.

Mrs. W. O. Greene, wife of W. O. Greene, president of the Cereal By-Products Co., passed on Jan. 10th at St. Luke's Hospital in St. Louis, after a short illness. The trade generally know "Bill" Greene and are sorry to hear of his loss. Mrs. Greene is to be buried at her old home, Urbana, Ohio, Tuesday, Jan. 13th.

NEW PACKING PLANT AT SIOUX FALLS.

Operations have commenced in the new \$200,000 beef house of John Morrell & Co., packers at Sioux Falls, S. D. This is the second large addition to be completed this year, a \$150,000 unit being opened last summer. The company also announced excavation had been started on a \$150,000 pork plant to be completed next spring.

ARKANSAS LARGE FEED BUYER.

About \$20,000,000 a year for millfeeds and mixed feeds is spent by Arkansas, according to the annual report of James G. Ferguson, commissioner of agriculture for the state. Most of these feeds

come from Oklahoma, Kansas and Missouri. Manufacturers and distributors are urged by the commissioner to observe the Arkansas law with reference to guarantees of protein, fat, fiber, and weights. A very strict supervision is kept over shipments.

FEEDSTUFF SITUATION.

Standard middlings are a little firmer and bran a little weaker, flour middlings and red dog remain steady. The grain markets at this writing are much firmer and mill feeds sympathize with them in some respects especially for certain grades of mill feeds. The demand for bran in particular is anything but good. There is a little better demand for standard middlings.

MINNEAPOLIS.—Bran, \$30; standard middlings, \$34; flour middlings, \$37; red dog, \$41 to \$42.

CHICAGO.—Bran, \$32.60; standard middlings, \$36.60; flour middlings, \$39.60; red dog, \$43.60 to \$44.60.

KANSAS CITY.—Bran, \$30.25; gray shorts, \$34.

ST. LOUIS.—Bran, \$32.65; gray shorts, \$36.40.

ALFALFA MEAL.

HOLDING FIRM. Limited selling and limited buying but the hay market has tendencies to hold the meal market steady. Nominally quoted second hand bag basis, choice, \$30; No. 1, \$28.75; No. 2, \$25.75, Chicago basis. Fine ground grades, \$3 per ton more in most cases.

REGROUND OAT FEED.—Mills are not very willing to sell unless they can get substantial premiums over what resellers are asking. Resellers are asking nominally reground oat feed, \$13; unground oat hulls, \$14 for prompt 30-day shipment. 50c additional for each succeeding month asked.

LINSEED OIL MEAL.—Market unchanged, with some of the mills asking slightly higher prices than the week previous. Retailers are making the most attractive offers. Nominally Chicago basis, \$47.75; Minneapolis basis, \$46.75 to \$47. Mills are ranging from \$1 to \$2 a ton higher dependent upon who quotes and how anxious they are to sell. In bulk, where available, \$2 per ton less.

GLUTEN FEED.—Eastern demand is not nearly as heavy as it was the same time a year ago. Other sections of the country, however, report a very satisfactory business. Mixed feed manufacturers have not ordered beyond January shipment, and are only taking the product as it is required. Quotations follow: Gluten feed in bulk \$38 a ton, sacked \$40.80; gluten meal of 40 per cent protein \$46.80 in sacks, \$44 in bulk.

DRIED BUTTERMILK.—With production cut down sharply, stocks are now in strong hands and prices are steady. Demand is very satisfactory. Quotations are as follows: Creamery in carlots at 6½¢ per lb. and L. C. L. up to 8 cents.

COTTONSEED MEAL.—There has been no change in this market, demand continuing slow and prices are easy. A large cotton crop with resulting heavy production of seed and surplus stocks are the main influences in the market. Meal is nominally quoted for 43 per cent protein, Chicago basis, at \$46.

PACKERS' PRODUCTS.—Demand is steady and market continues firm, although no change in prices has occurred as yet. Prices are as follows: Meat scraps in carlots f. o. b. Chicago, \$65 @ 70 a ton; 60 per cent protein digester tankage, \$60; raw bone meal, \$55.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35 @ 50 per ton, standard units of 50 lb., burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

Alfalfa Department

ALFALFA MEAL MARKET.

KANSAS CITY, Jan. 10.—Manufacturers reported continued fair buying of alfalfa meal this week, with orders from mixed feed interests for January, February and March shipment. Choice was held firmly at \$28@29 per ton in car lots. Evidently No. 1 had been quoted too high, as it was offered 50c lower, at \$25.50@26.50. The range on No. 2 was from \$22.50 to \$23.50 and No. 3 sold at \$22@23. Consumption of hay stocks has been going on during the period of light receipts. Millers are anxious to see a larger run of hay from the country, with possibly reduced prices.

In the molasses-grain feed trade fair buying of poultry, dairy, horse and other feeds was announced by manufacturers. There has been a distinct improvement in the new year, yet the mills are not rushed. Most prices were unchanged, but there were instances of weekly advances of 50c to \$1 a ton. Feeds in carlots were quoted as follows: Dairy, \$37@49; cattle, \$38@47; hog, \$45@54; pig, \$73; horse and mule, \$33.50@48.50; alfalfa-molasses, \$27.50@35; scratch poultry, \$49.75@56.25; mash poultry, \$54@81.50.

ALFALFA CAMPAIGN IN WISCONSIN.

Barron county, Wisconsin, among other sections of the state, has underway a campaign to increase the alfalfa acreage and to emphasize the value of lime to sweeten the soil in preparation for alfalfa. At a recent meeting Western Woodward, of Bloomer, Wis., discussed the subject of alfalfa as follows: "Sow alfalfa with a nurse crop of barley, three to four pecks to the acre. If the season has a large rainfall, cut the barley for grain. If a dry season is present it is best perhaps to lose the barley rather than to risk the alfalfa crop, and in this case cut the barley for hay. Be sure to inoculate, as right here may be the source of failure. After inoculating, plant the seed as soon as possible, not later than twelve hours at the most. Do not let sunlight strike the seed at any time after inoculating and cover at once after planting, dragging only lightly, however, so as not to bury the seed too deep."

FLOUR FROM ALFALFA.

An almost unbelievable number of foods and other products can be made from alfalfa. A westerner who is interested in the manufacture of breakfast foods some time ago made the startling announcement that he could make at least seventy-five different kinds of candy from alfalfa. It is also contended that an excellent grade of sirup can be made from this legume. The man mentioned is so enthusiastic with respect to his experiments with alfalfa that he is reported to be planning to establish a mill for the manufacture of alfalfa flour, which, he claims, will be found to be superior to all other flours for baking. At the present time, this man has been turning out a balanced ration for live stock from alfalfa at his mills in Montana.

HANDLING ALFALFA FOR HAY.

It is of primary importance in cutting alfalfa for the hay markets that the leaves must be saved. By cutting late, after the alfalfa is in full bloom, there is a loss on two crops; the late cut hay is stemmy because the leaves have fallen off, and woody because it is too ripe; cutting the new set of shoots delays the next crop, and allows the weeds to get a start. The leaves are much more easily saved if the hay is cut early, as they do not drop off so

readily. When the alfalfa plant is mature the leaves drop off the same as from trees in the fall. Late cutting and careless handling often reduce the value of the crop one-half. Alfalfa should be cut just as the new shoots are well started. The leaves of alfalfa contain nearly four times as much protein as the stems, a ton of dried alfalfa leaves containing as much protein as 2,800 pounds of bran.

Better Than Corn — Costs Much Less — Produces Better Results

With corn at its present high cost—much of it soft and immature and only about 50 per cent efficient in food value, every farmer and hog raiser will be keenly interested in the letter below. It is from a prominent farmer who years ago found a profitable way out of a similar situation, a way which cut down his feed cost and produced better results, not only when corn was high, crop poor or short, but better at all times. Just read his letter:

The Quaker Oats Company,

Gentlemen: "I have been feeding Sugared Schumacher Feed to my pigs this year just as I have done for several years past and they are doing splendidly. Last year I was tempted to go back to the old style of feeding them corn, but now I am qualified to say that Sugared Schumacher Feed is not only a great deal cheaper on the basis of cost of gains, but it also gives better results, in that it tends to grow the hogs at the same time it fattens them, which has a great deal to do with economy of feeding."

GEO. HENNING, Springville, Iowa.

Mr. Henning is one of thousands who have broken away from the old fallacy that corn alone is the best and ONLY feed you need to raise hogs. They have found that Sugared Schumacher Feed, fed alone to growing pigs and with corn to fattening hogs, materially lessens the feed cost and produces much better results.

You don't need to worry about the soft corn situation or the shortage and high price of corn, as far as feeding hogs is concerned. Sugared Schumacher Feed is "the friend in need" and will enable you to get your hogs to market much quicker and at far less cost than you can do it on corn alone. The reason for this is because Sugared Schumacher Feed is a variety feed, a blend of choice products of corn, oats, wheat, barley and the right amount of molasses. It is tasty, palatable—contains lime, phosphorus—a balanced feed which supplies all the necessary essentials not contained in corn alone, and as Mr. Henning says: "tends to grow hogs at the same time it helps to fatten them."

The way to solve this present feed problem is to start feeding Sugared Schumacher Feed RIGHT NOW, with corn if you have it, and see for yourself how much cheaper and better your results will be. Your dealer can supply you, if not, write to us.

The Quaker Oats Company

Dept. CB, — Address Chicago, U. S. A.

H-18

Mr. Feed Dealer:—

Above we show the first of a series of advertisements on Sugared Schumacher Feed that will appear each month in a big list of farm papers and hog papers. A similar big campaign will be run on Sugared Schumacher Feed for dairy cows. Our 1925 advertising campaign will be fully 100% greater than last season.

This means that Sugared Schumacher Feed is going to be a big factor in the GREATER business and GREATER profits of the wise dealers who sell Sugared Schumacher Feed. If you are not handling Sugared Schumacher Feed now, write us for our attractive proposition for dealers.

The Quaker Oats Company Address **Chicago, U. S. A.**

Hay Department

MORE HAY THAN USUAL.

MOIRA, N. Y.—There is more hay than usual in this section this year but it is moving very slowly. The average quality would not grade in the city markets over No. 3 but most of the hay here that is sold goes to the lumber camps and other Adirondack points.—C. E. Brush & Son, Inc., E. G. Brush.

HAY MAN RETIRES.

T. A. Jennings, of the well known firm of T. A. Jennings & Sons, Inc., Lynchburg, Va., and for the past 31 years actively identified with the firm, has retired. A new firm has been organized by Clyde Jennings, one of the sons, and reincorporated under the firm name of T. A. Jennings Sons and capitalized at \$75,000. The officers of the new firm are: Clyde Jennings, president; J. Dillard Jennings, vice president, and Irwin G. Trent, secretary-treasurer.

CHICAGO HAY NOTES.

Demand continued firm throughout the week on all sound grades of tame hay and also on prairie. A feature of the market was the excellent business done in No. 2 and 3 grades. Buyers are after the cheaper hays of sound quality, as grain prices are high, and the economies are being made in hay. This is a desirable situation from the standpoint of Chicago handlers, because much of the hay arriving has been short of No. 1 quality and it will help to relieve them of these stocks. No. 1 quality hay always has a market, as there is not very much of it arriving, and the normal demand for this quality easily absorbs the receipts. Straw receipts were more liberal and the market was easier. Marsh hay was in de-

mand. Choice alfalfa was wanted, but there is only a moderate inquiry for other grades.

Bridge & Leonard reports that the run of hay last week was rather good in quality. Demand was good for the fairly heavy receipts. Country loading continues moderate in volume, making a firm market.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

It is said that stocks of alfalfa hay put up in Kansas City last fall remain liberal, though some holders report a fair reduction.

J. A. Brubaker reports an expanding southern demand for timothy hay, with New Orleans and Mobile the best buyers. Mr. Brubaker is a believer in an early spring this year, as an offset to the late one in 1924. "In this event," he said Thursday, "brown alfalfa hay will go begging. There is a large amount of this hay yet to be moved."

G. F. Kellogg, in charge of the Kansas City branch office of the hay, seed and feed division of the Department of Agriculture, announced this week that a hearing on the tentative grades of alfalfa hay would be held in the near future. The date may be set for the latter part of January. An expert from Washington will take the testimony. The grades will not become effective until after the 1925 harvest.

"Twenty dollars a ton for No. 2 alfalfa hay is an attractive price to a farmer," say Ray O. North Wednesday. "If the country roads freeze up again there will be a big movement, especially from Nebraska. I don't believe present prices would stand the pressure. However, the roads since the January thaw developed have become very bad. If this condition continues, we need not expect much hay. Of course, prices

North & Company

Receivers—Shippers

Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

will remain firm in the face of scarcity, and they might go higher."

Only twenty votes were cast in the annual election of the Kansas City Hay Dealers' Association January 6. Newton C. Campbell was the unanimous choice for president. This year will make five and one-half terms for him. J. D. Cole graduated from the second to the first vice presidency. B. F. Tyler was elected second vice president without opposition. Three directors were chosen, as follows: C. M. Funk, J. M. Hail and G. E. Curtis. There are three hold-overs. The arbitration committee will consist of Paul Campbell, P. H. Crane and E. A. Fitzgerald.

WASHINGTON HAY MOVEMENT HEAVY.

Shipments of hay from the Walla Walla district of Washington are above normal due to the demand elsewhere, and a shortage is feared by March unless shipments are reduced. No. 1 first cutting alfalfa is bringing \$17 per ton, an advance of \$1 during the past month.

MISSOURI HAY REPORT.

Missouri hay acreages in all classes was increased and the state average yield was better in 1924 than last year, increasing the total tonnage. Hay crops in the southern counties were good, but not so satisfactory in the northwest.

The leading hay counties are Harrison, Sullivan, Macon, Johnson, Bates and Putnam in acreages, and the best yields were secured in Pemiscot, Mississippi, Atchison, Buchanan, Holt, Andrew and Jackson, all counties in which a large portion of alfalfa is raised in the total hay acreage.

The leaders in total hay production are Harrison, Livingston, Cass, Chariton, Sullivan, Bates and Lafayette.

These statistics are subject to revision in certain counties when final reports shall have been received on acreage listings from the township and county assessors under the returns period by Farm Census law ending February 1.

HAY MARKET REVIEW.

Wintry weather prevailing over a large portion of the United States had a strengthening influence of the hay market during the week ending January 10, according to the Department of Agriculture. Snow over most of the range in the great Western grazing districts caused a continuation of rather heavy feeding in that territory. Pastures showed some improvement in the Southeast by reason of abundant rains during the last few weeks but continued poor to only fair in the Central and Western Gulf states, resulting in an increased demand for hay in that territory.

Bad condition of the country roads caused by the snow and wintry weather was reflected in lighter receipts at practically all the markets. Good grades of timothy hay were scarce and wanted and even the lower grades were well absorbed, with the exception of one or two markets.

At Boston there was some accumulation of hay which was lower than No. 2 grade, but the market was firm for the better grades. Buyers, however, were confining their purchases to their immediate needs. Receipts at New York were scarcely equal to the requirements of the market and prices were advanced \$1 per ton for the best and medium grades. Heavy snows prevented the delivery of hay by truck and dealers' stocks were running very low.

WESTERN UPLAND ALFALFA AND TIMOTHY

Receipts of hay at Cincinnati and Pittsburgh were very light and the market held firm but prices were but little changed. Recent cold weather caught dealers with light stocks and shippers were being pressed to fill their contracts. All grades were in good demand at Cincinnati, but preference was shown for No. 2 and No. 3 hay, because of the discount at which these hays were selling under the higher grades.

The market at Chicago and St. Louis was also very firm because of light receipts and best grades of timothy sold at slightly higher prices. Prairie hay was also in good demand at these markets and receipts of all kinds were readily absorbed.

Alfalfa markets were more active because of the increased demand from all sources. Mills advanced their prices and took more hay than earlier in the season. Dairies were also active buyers, while feeders took the medium grades and the brown feeding alfalfa. There was a better demand at Kansas City for alfalfa from the south and southeast, while western feeders took good amounts of both prairie and alfalfa with markets in that territory. Some Washington state alfalfa was being shipped into California for local consumption and also for shipment to government posts over seas.

A GREAT PUZZLE.

"The Great Puzzle"—Not the Cross Word variety but the future hay values and the amount of hay held back for higher prices is indeed a great puzzle.

Judging from the number of letters coming to us, each advising fifty to three hundred or more tons of hay for which they are trying to find a market indicates a greater surplus than we had anticipated. This together with prospects of an early spring gives one a rather bearish feeling, but if we were assured the winter would be prolonged as it has been doing we would have something definite on which to base an opinion.—J. A. Brubaker & Co.

STATE HAY GRADES USED IN WASHINGTON.

At the present time, the State of Washington is using its own grades for hay, instead of the federal grades placed into effect on February, 1924. The inspection of hay at shipping points is stated to be a beneficial and highly popular state service. Fees are charged, covering all costs of the inspection, which are turned back to the state treasury, fully offsetting appropriations for this work. During the first six months of the year there were 3,389 carloads of hay inspected. The same inspection service also has supervision over warehouses licensed by the state. During the period of July 1, 1922, to June 30, 1923, there were received in these licensed warehouses 20,909,133 bushels of wheat; and from

HAY MARKETS.

MILWAUKEE.

Jan. 10.—The Milwaukee hay market continued comparatively inactive throughout the past week. Receipts were very small and the demand almost negligible. Current quotations per ton are: No. 1 timothy, \$17@18; No. 2 timothy, \$15@16; No. 1 mixed, \$16@16.50; No. 2 clover mixed, \$15@16; sample hay, \$8@10; marsh feeding, \$12; packing, \$11; rye straw, \$10@10.50; oat straw, \$10@10.50.

TOLEDO.

Jan. 12.—The hay market remains in the rut it has been in for several weeks and dealers are not very optimistic about the future. Prices have been maintained at the same levels for months. Terminal markets are getting a little trade just now, though the demand here is very quiet. Too much hay, say dealers, and about all that can be done is to sit tight and await developments.

Prices for the past week were as follows: No. 1 timothy, \$15; No. 2 timothy, \$13; No. 1 light clover mixed, \$14; No. 1 heavy clover mixed, \$13; No. 1 clear clover, \$13; No. 1 first cutting alfalfa, \$17; No. 1 second cutting alfalfa, \$23; sound dry wheat straw, \$9; sound dry oats straw, \$9.50, f. o. b. Toledo, per ton.

CINCINNATI.

Jan. 13.—The hay market was materially strengthened this week by light receipts and a broadened demand caused by the recent cold weather and generally low stocks of consumers, and prices for timothy, light mixed and clover advanced from 50c@1¢ per ton. The demand from shipping interests with contracts to fill was especially pressing, but buying for local consumption was also much improved. An unusual condition was noted in the spirited bidding for ordinary quality, and neglect of top grades, and the preference shown by buyers for No. 2 and even No. 3 grades because of the difference in price. High grades, however, were scarce and accounted to some extent for the improved buying of the ordinary kinds. Country shippers in attendance at the sales this week reported considerable hay still on farms, but expressed the thought that the consumption generally would be heavier during the winter and spring from the fact that other feeding material was so high as to make hay more economical of use. Timothy—No. 1, \$19@19.50; No. 2, \$17.50@18.50; No. 3, \$15@16.50; threshed, \$10@12; no grade, \$11@13. No. 1 heavy clover mixed, \$16.50@17.50; No. 1 light clover mixed, \$18@19. Clover mixed—No. 1, \$17@18; No. 2, \$14.50@15.50; no grade, \$11@13. Clover—No. 1, \$18.50@19.50; No. 2, \$15@17; no grade, \$10@12. Second cutting alfalfa—No. 1, \$26@28; No. 2, \$22@24. First cutting alfalfa—No. 1, \$18@20; No. 2, \$16@18. Sound sample grassy hay, \$13@15. Straw—Wheat, \$10.50@11.50; oats, \$10@11; rye, \$12@13.

MEMPHIS.

Jan. 10.—Receipts of hay for the week totaled 59 cars and stock here is slightly larger, the trade estimating that sales and shipments have not been that much. Buying continues only for necessities, although the market is steady at full quotations. No change has been made for the past week or so. Quote: Timothy—One, \$24@24.50; standard, \$23@23.50; two, \$22. Alfalfa—Choice, \$32; one, \$31; standard, \$28@29; two, \$23@23.50.

NEW YORK.

Jan. 8.—The New York Hay Exchange Ass'n has issued the following weekly report with latest quotations:

	Hay.	Straw.
Receipts for week, tons	1,023	31
Receipts last week	611	32
Receipts from Sept. 1	26,055	340

Receipts have continued light at all harbor points and prices show a further improvement over the week, especially at Brooklyn, where offerings are way below requirements and buyers bidding for necessary supplies.

At Manhattan offerings are likewise very light and prices have improved accordingly, he stocks on hand being barely equal to demand.

The heavy storm at the close of last week, during which eleven inches of snow fell in the Metropolitan district, has made rucking exceedingly difficult and in consequence the movement of hay from railroad terminals has been greatly restricted. The straw situation continues weak and lull, with values nominal.

Federal grade quotations for large bales follow: Timothy—No. 1, \$27; No. 2, \$25@26; No. 3, \$23@24. Light clover mixed—No. 1, \$25@26; No. 2, \$23@24; No. 3, \$20@21. Medium clover mixed—No. 1, \$23@24; No. 2, \$20@21. Light grass mixed—No. 1, \$25@26; No. 2, \$23@24; No. 3, \$20@21. Heavy grass mixed—No. 1, \$20@21. Rye straw, \$15@16.

KANSAS CITY.

Jan. 10.—An all-around increase in hay receipts this week raised the total to 722 cars, nearly double those of a week ago. The movement was 202 cars larger than the total reported a year ago. In view of the bad country roads the arrivals were surprising, but recent higher prices were responsible.

Alfalfa started the week with 106 cars and the total for six days was 474. The initial pressure of offerings was too much for the demand and a 50c reduction in prices followed. There were fairly free sales thereafter, with dairy grades scarce and wanted. On Saturday the whole mar-

ket became slow and grades from No. 1 downward suffered a further loss. For the week the decline was 50c@1 a ton.

Prairie arrivals were 183 cars, as against 99 a week ago. Including some shipping business, there was an active demand for sound hay, with good color. Stock yards interests were the best buyers and they seemed to have been filled up by the final day. No price changes were recorded.

Varieties of tame hay offered, exclusive of alfalfa, made receipts of 65 cars. Timothy comprised the bulk. There was a slight improvement in the southern demand for this hay. Clover mixed and clover sold well. Prices generally were unchanged.

Straw to the amount of 18 cars arrived. As the total was twice as large as a week ago, the market weakened nearly 50c a ton. Stock yards people and packers were the main buyers.

Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City.

Alfalfa—Select dairy, \$27@28.50; choice, \$24.50@26.50; No. 1, \$22.50@24; standard, \$19.50@22; No. 2, \$17@19; No. 3, \$14@16.50.

Prairie—No. 1, \$11.50@12.50; No. 2, \$10@11; No. 3, \$8@9.50; packing, \$6.50@7.50.

Timothy—No. 1, \$16.50@17.50; standard, \$15.50@16; No. 2, \$14@15; No. 3, \$12.50@13.50.

Clover mixed—Light, \$16.50@17; No. 1, \$15@16; No. 2, \$12@14.50.

Clover—No. 1, \$16@18; No. 2, \$12@15.50.

Straw—Wheat, \$9.50.

PITTSBURGH, PA.

Jan. 12.—Receipts of hay were again light this past week and the demand was not of a pressing nature, but the market as we go to press is firm and like the weather is quite healthy.

The cold weather has increased the demand for coal in a generous manner and we can now sell mining hay at fair figures.

The demand for feed store timothy, standard or better, continues while the No. 1 clover mixed and greenly cured clover are steady and firm as quoted.

Hay receipts, 79; straw, 15.

Quotations: Timothy—No. 1, \$21@21.50; standard, \$19.50@20; No. 2, \$17@18; No. 3, \$15@16. No. 1 L. C. mixed, \$19@19.50; No. 1 H. C. mixed, \$19.50@20. Clover mixed—No. 1, \$19.50@20; No. 2, \$14.50@16.50. Clover—No. 1, \$19.50@20; No. 2, \$14@16.

Straw—Receipts of straw are fairly liberal and sufficient for the existing demand. Quotations are unchanged, but represent outside values on the several grades. Quotations: No. 1 wheat, \$13@13.50; No. 2, \$12.50@13; No. 1 oat, \$13@13.50; No. 2, \$12.50@13; No. 1 rye, \$14@14.50; No. 2, \$13.50@14.

PHILADELPHIA.

Jan. 10.—Baled hay and straw: The hay market rules firm under light offerings, but there is not much doing, the snow remaining in the streets rendering hauling difficult. Timothy hay grading better than No. 2 brought a premium over quotations. Straw is in moderate supply and quiet, with preference being given to straight rye.

Hay (federal grades): Timothy—No. 1, nominal; No. 2, \$20@21; No. 3, \$18@19; sample, \$10@12. Light clover mixed—No. 1, \$20@21; No. 2, \$17@18; No. 3, \$12@14. Medium clover mixed—No. 1, \$17@18; No. 2, \$14@15. Heavy clover mixed—No. 1, \$16@17. Light grass mixed—No. 1, \$19.50@20. Straw—No. 1 straight rye, \$15@16; No. 2 straight rye, \$14@15; wheat, \$15@16; oat, \$15@16.

BALTIMORE.

Jan. 10.—There has been a slight tightening up in hay values here during the past week under the influence of wintry weather and heavy snow curtailing the nearby receipts. For the better grades of timothy and choice light clover mixed hay there is a fair demand at quotations. Low grade and inferior stuff is dull and of uncertain value.

Straw of all descriptions steady and unchanged. Quotations follow, hay, per ton: Timothy—No. 2, \$21@21.50; No. 3, \$17@19. Light clover mixed—No. 1, \$19.50@20. Clover mixed—No. 1, \$19@19.50; No. 2, \$17@18. Straw—No. 1 straight rye, \$15@19; No. 1 wheat, \$12@13; No. 1 oat, \$13@14.

OMAHA.

Jan. 9.—Prairie hay: Light receipts of prairie continue to prevail. Demand only fair. Prices steady. Alfalfa hay receipts increasing. Alfalfa in fair demand for all grades. Market firm at slight advance in prices. Prices below are for carload lots:

Upland prairie—No. 1, \$12@13; No. 2, \$10@11; No. 3, \$8@9. Midland prairie—No. 1, \$11@12; No. 2, \$9@10; No. 3, \$7@8. Lowland prairie—No. 1, \$9@10; No. 2, \$7@8. Packing hay, \$5.50@7.50. Alfalfa—Choice, \$20.50@21.50; No. 1, \$19@20; standard, \$16@18; No. 2, \$14.50@15.50; No. 3, \$12.50@13.50. Straw—Oat, \$7.50@8; wheat, \$7@7.50.

DULUTH.

Jan. 10.—Marked improvement has come about in the hay trade on this market during the last few days as a result of better inquiry from loggers and dealers in the towns finding it necessary to replenish their stocks. Market is holding steady with moderate receipts. Quotations per ton are unchanged as follows: Timothy—No. 1, \$17; No. 2, \$15. Mixed timothy—No. 1, \$16; No. 2, \$12. Prairie—No. 1, \$16; No. 2, \$14; No. 3, \$12. Midland—No. 1, \$11; No. 2, \$9. Straw—Rye, \$9; oat, \$8.50.

PORTLAND, ORE.

Jan. 8.—Buying prices f. o. b. Portland: Alfalfa, \$19.50@20 ton; valley timothy, \$19@23; clover, \$16.50@17.50; oat, \$19@20; eastern Oregon timothy hay, \$16@17; oat and vetch hay, \$17.50@18.50; straw, \$7.50 per ton.

SAN FRANCISCO.

Jan. 7.—Wheat, \$23@26; tame oat, \$23@26; wild oat, \$20@22; barley, \$22@24; alfalfa, \$23@26; damaged alfalfa, \$13@15; straw, \$13@15.

MINNEAPOLIS.

Jan. 7.—There was a very moderate movement of hay for the week, with a demand nearly normal for the season; prices of hay are about steady for the week.

Timothy—No. 1, \$18; No. 2, \$17. Mixed, different grasses—No. 1, \$17; No. 2, \$16. Clover, mixed—No. 1, \$17; No. 2, \$13.

Upland—No. 1, \$17; No. 2, \$16; No. 3, \$14. Midland—No. 1, \$14; No. 2, \$11. Packing hay, \$8.50.

Straw—Rye, \$9.50; oat, \$9; wheat, \$8.50. Alfalfa—No. 1, \$24; standard, \$20; No. 2, \$17.

MONTREAL.

Jan. 9.—The feature of this market has been the firmer feeling in good No. 2 timothy hay and prices are fully 50c per ton higher. This is due to the fact that this grade of hay is none too plentiful throughout the country, which the demand is principally for, and recent sales of car lots were made at \$14.50@15 per ton, but prices for No. 1 timothy are unchanged at \$12.50@13 per ton, f. o. b. cars here.

ST. LOUIS.

Jan. 12.—The receipts of hay on both sides of the river were quite liberal for a Monday. The market continues steady on the best grades of choice and No. 1 timothy, as well as light clover mixed—other grades a little easier, with outlook for lower prices on medium grades.

Clover—Choice qualities in fair demand—medium and lower grades hard to sell.

Alfalfa—Choice qualities wanted at strong prices—medium grades steady.

Prairie—Market overstocked and lower prices ruling—medium grades difficult to place even at low prices.

Straw steady.

Timothy—No. 1, \$23@24; standard, \$20@22; No. 2, \$16@18; No. 3 and sample, \$10@12. Clover mixed—No. 1, \$18@20; No. 2, \$16@17; heavy mixed, \$15@18. Clover—No. 1, \$18@19; No. 2, \$15@17. Threshed hay, \$12@14. Alfalfa—Choice, \$26@28; No. 1, \$23@25; standard, \$20@22; No. 2, \$17@19. Prairie—No. 1, \$15@16; No. 2, \$13@14. Straw—Rye, \$9@10; wheat, \$8.50@9.50.

CHICAGO.

Jan. 12.—Receipts and shipments of hay in tons in the Chicago market for the week ending Jan. 10, also the total receipts and shipments from Jan. 1 follow:

	Jan. 10, 1925.	Jan. 3, 1924.	Jan. 12, 1925.
Week's receipts	2,684	2,124	1,971
Week's shipments	198	213	87
Rcts. since Jan. 1	4,808	2,124	3,254
Shpts. since Jan. 1	411	213	310

Receipts on Monday morning were 96 cars, consisting of 71 timothy, 2 prairie, 3 packing and 20 straw. Demand good for timothy and prairie.

	No. 1.	No. 2.	No. 3.
Timothy	\$22@24	\$18@21	\$13@18
Timothy and Clover			
Light Mixed	20@23	17@19	12@16

Proposals are general throughout Europe for the opening of large credits by these governments for the purpose of maintaining permanent reserves of wheat to counteract grain market manipulation. The French credit will probably be 150,000,000 francs. It remains only to fix the amount of the German funds, according to a news dispatch.

American Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

Complete descriptive catalog sent free for the asking.

PRICE CURRENT-GRAIN REPORTER, 309 S. La Salle St., Chicago, Ill.

MICHIGAN BEAN JOBBERS OPPOSE FEDERAL GRADING AND INSPECTION.

Michigan bean men, in convention at Saginaw, Jan. 15, expressed themselves as unanimously opposed to the federal bean grading and inspection proposal, which in all probability will go through unless united disapproval is shown.

Tentative grades already promulgated were characterized as unnecessary, inasmuch as grades throughout the various bean-producing states have been established for years, are recognized by wholesale grocers and canners as most satisfactory. Inspection and arbitration machinery is in operation in each state, and the inauguration of federal inspection would see chaos in the bean industry, according to most bean shippers.

The Michigan Bean Jobbers' Association voted to send a committee to Washington, if necessary, to protest against the adoption of federal grades and inspection, and this committee will have complete authority to join with other state associations in the move to prevent the adoption of the federal regulations.

One of the objections that comes from Michigan is in the matter of moisture content. In years when heavy rains come right at harvest time, the beans may conceivably have higher moisture content than that specified by the federal grades, and with no flexibility in the regulations, no provisions to take care of such contingencies, the state's industry would suffer. Another objection is that beans vary with the different states and there are different methods of preparing for market. Michigan beans have little in common with Colorado pintos, or with the colored beans of California, and even in white beans there are the Michigan navies, the California small and large whites and the Montana and Idaho great northens, each one a distinct variety of bean. A regulation can scarcely cover all of these varieties and be fair to all.

Bean Advertising Gets Attention.

Considerable time was devoted to the Michigan convention to the advertising fund that has been in process of collection since Oct. 1. Not all elevators are coöperating in the plan, which contemplated the collection of one cent from the grower and one cent from the elevator for every bag of beans purchased, the funds thus collected to be used in an advertising campaign to boost the sale and consumption of Michigan beans. Efforts will be undertaken to enlist more elevators in the campaign, and it was decided to publish the names of those elevators contributing to the fund, and the amounts collected each month. So far, approximately \$4,000 has been collected.

Other Matters Before the Convention.

One of the speakers, Perry Shorts, president of the Saginaw Chamber of Commerce, rode some of the Michigan jobbers pretty hard, characterizing them as speculators rather than merchandisers. He pleaded for more common sense in the bean business, better organization, less ruinous competition, and more thrift and hard work. His address was the high spot of the meeting.

A. L. Chamberlain of Port Huron gave a tribute to Christian Breisch, who passed away last November. Mr. Breisch was president of the Michigan association during five of its most trying years, during the war and immediately afterward, and Mr. Chamberlain's paper brought out many facts of his life and work that were heretofore unknown to many of the members of the association.

The traffic committee of the association was instructed to represent at a hearing to be held in Lansing those shippers along the Detroit, Bay City & Western Railroad whose interests are being damaged by the decision of the railroad to suspend operations. Shippers in towns along this railroad line, including Decker, Snover, Peck, Rosebush and Watertown, will be left without means of transporting their beans to market.

Michigan Holds Commanding Position.

It was reported by President Nowlin that fully half of Michigans' bean crop has now been marketed, and with short supplies in the other bean producing states, Michigan will be able to control the movement and prices of beans during the present season. With two years in succession of good yields and high prices, Michigan and New York state farmers and also growers of other varieties of beans in the west, will undoubtedly plant heavier to beans in 1925 than for several years past.

W. I. Biles of the Saginaw Milling Co. led the discussion of the "Cost of Elevator Operation," and E. W. Burkhart of Fowlerville, chief inspector of the association, had as his subject "What Is a Good Member of the Michigan Bean Jobbers' Association?"

MONTANA, ITS WONDERFUL RESOURCES AND POSSIBILITIES.

The Governor of Montana welcomes investors and home builders in the following words:

"Montana wants the approving judgment of her sister states only in the degree to which her record of progress and her future promise entitle her. The truth about Montana, her resources and her opportunity is what we want known and appreciated. Montana needs men and women adapted by nature and experience, and equipped with capital to achieve permanent success here. To their effort we pledge the assistance of every public agency."

It is interesting to note that the cash value of the farm income of Montana in 1924 exceeded \$110,000,000; that the corn acreage has increased from 70,000 acres in 1915 to 550,000 acres in 1924; that in 1923 the dairy cattle increased 12 per cent and the hogs 20 per cent, and that 74.4 per cent of the Montana wheat graded No. 1 during the years 1920 to 1922, and that the acreage of winter wheat sown fall of 1924 is 767,000 as compared with 683,000 acres the previous year. The acreage of winter rye sown fall of 1924 is 169,000 acres as compared with 125,000 acres sown the previous year.

In water power, mineral wealth, oil and forests the treasures of Montana are yet untouched awaiting the man with capital and vision. A new land awakening to the dawn of a new world market across the Pacific.

One-tenth the potential minimum hydro-electric power of the United States is located in the state of Montana.

The value of the mineral production of the state in 1923 was \$57,812,970.

The lumber cut of the state in 1923 amounted to 426,739,000 feet.

In 1915 the oil production of the state of Montana was only 44,917 barrels. In 1924 the production amounted to 4,000,000 barrels of oil.

It is represented that the State of Montana is the third largest state in size of coal measures.

Fishing, big game, parks, the Rockies where the tourist, artist, naturalist and author may find scenes with the romance of frontier history to captivate the interest and opportunity for sport and recreation.

CORN BORER ON THE INCREASE.

During the past year, the European corn borer showed an extensive spread in Pennsylvania and a noticeable increase in the density of the infestation, according to Dr. C. H. Hadley of the Department of Agriculture. At present the infestation is spread over several counties, including all of Erie, all of Crawford, parts of Mercer and Warren. The area included within the total infested territory comprises 1,999 square miles in Northwestern Pennsylvania. A campaign for repression and limitation of the spread of this insect is now being carried on by New York, Ohio, Michigan, and Pennsylvania in cooperation with the Federal government.

COTTON NEWS

Exports for Week.

Exports of cotton for the week ended Jan. 3 amounted to 179,597 bales, compared with 361,185 bales the previous week and 102,744 bales for the corresponding week in 1924, the Agricultural Department reports.

Sanctions Cotton Standards.

A provision designed to make clear to the international cotton trade that Congress considers that all action taken by the Secretary of Agriculture in promoting the use of the official cotton standards as universal standards and the agreements with the foreign exchanges, as having been authorized under the cotton standards act, was added to the agricultural appropriation bill. The provisions written into the bill are counted upon to reassure the foreign exchanges that have co-operated with the department.

Boll Weevil Doomed.

Extermination of the boll weevil, scourge of the South's cotton fields, within a few years, is predicted by Dr. E. N. McIndoo, of the United States Bureau of Entomology, as a result of discoveries made by the bureau.

The World's "Visible."

The world's visible supply has really started on the downward incline. The stock of all kinds fell off 34,854 bales this week, against an increase of 80,500 last week, an increase of 119,857 two weeks ago and a decrease of 19,593 this week last year. In American cotton the world's decrease this week is 53,854 (New York figures), against a decrease of 26,500 last week, an increase of 82,857 two weeks ago and an increase of 59,593 this week last year. The total visible supply of all kinds in the world is 6,114,093, against 4,871,317 a year ago in an American crop failure year. Of American cotton the world has 4,926,093 bales, against 3,281,317 last year. Public warehouses, etc., have 4,625,863 bales in the United States, against 4,914,219 a month ago and 3,526,164 on Dec. 31, 1923.

Mounting Spinners' Takings.

The world's spinners' takings of American cotton reached up to 425,600 bales this week, as against expectations of 390,000 to 400,000. Last week they were only 406,603 (New York figures); two weeks ago only 338,678; three weeks ago 398,826; this week last year only 289,146 bales. Thus far this season there are 7,463,403 bales, or 990,000 more than up to this time last year. The world is evidently taking American cotton with increased readiness.

EUROPEAN WHEAT AND RYE

Winter seedings of wheat in Europe reported to date to the United States Department of Agriculture by the International Institute of Agriculture at Rome are below last year, reports from 7 European countries showing a reduction of about 4 per cent.

The decrease in Europe, however, is not sufficient to offset the increase in areas seeded in the United States and Canada, the department says, the area seeded in 9 countries totaling 64,469,000 acres as compared with 62,698,000 acres last year. This represents about one-third of the total wheat area of the Northern Hemisphere outside of Russia and China.

Estimates of winter wheat acreage seeded in European countries reported to date as compared with last year are: Roumania, 5,886,000 acres against 6,631,000 acres; Bulgaria, 2,385,000 acres against 1,989,000 acres; Lithuania, 185,000 acres compared with 179,000 acres; Belgium, 373,000 acres compared with 343,000 acres; Spain, 9,870,000 acres against 10,158,000 acres last year. The acreage of England and Wales is reported as 89 per cent of last year and that of Italy as but slightly greater than last year.

The condition of winter seedings in the United Kingdom in general is not good, according to the reports. Germination in England and Wales has been

slow and the plant is thin and weak, particularly in heavy soils. Seeding in Scotland was carried out under favorable conditions. In the Irish Free State extremely wet weather retarded winter sowings, winter wheat is thin, backward and suffering from prolonged wet weather. The condition of winter wheat in Italy is reported as generally satisfactory. In Egypt the condition of the crop is reported to be 100.

The winter rye acreage of 10 countries reported to date including Canada and the United States is 12,959,000 acres against 12,894,000 acres reported for the same countries last year, an increase of 65,000 acres or less than 1 per cent. This represents more than one-fourth of the total rye acreage of the Northern Hemisphere outside of Russia.

Recent estimates of winter rye in the countries of Europe received from the International Institute are: Bulgaria, 383,000 acres against 350,000 acres last year; Roumania, 474,000 acres compared with 507,000 acres; Lithuania, 1,315,000 against 1,415,000 acres; Latvia, 678,000 acres against 658,000; Belgium, 578,000 against 563,000 acres; Spain, 1,957,000 against 1,872,000 acres; Czechoslovakia, 2,027,000 as against 2,008,000, and Finland, 583,000 as against 578,000.

No estimate of acreage for Russia is yet available, but a recent cablegram from the International Institute stated that the area sown to winter cereals is not larger than last year.

CANADIAN ELEVATORS INCREASING IN NUMBER.

Grain elevators in Canada now number 4,071, which represents a considerable increase in the past year. Illustrating the rapid growth in the grain handling system, the Saskatchewan Coöperative Elevator Co., Ltd., erected 52 new elevators in 1924, bringing the total of that company up to 435, with a capacity of approximately 14,000,000 bus. The total capacity of all elevators in Western Canada is in excess of 120,000,000 bus., counting one in Ontario, five in British Columbia, 684 in Manitoba, 984 in Alberta, and 2,433 in Saskatchewan. In 1914 there were 3,000 line elevators. To these must be added 98 terminal elevators with an approximate storage capacity of 100,000,000 bus.

PREDICT BILLION BUSHEL WHEAT CROP FOR CANADA.

In a recent address before the Rotary Club in Montreal, Sir Henry Thornton, president of the Canadian National Railways, said that the day is not far distant when Canada's wheat production alone will exceed a billion bushels annually. The commercial development of Canada is paralleling the development of the United States west of the Mississippi river after the Civil War. Canada's sole problem at present is one of population. The Dominion could easily support a population of 100,000,000.

CASH PRICES OF SHORT RIB SIDES.

Following is the monthly range of cash prices of short rib sides at Chicago for a series of years (fractional $\frac{1}{2}$ c omitted):

25c Per Printed Line Each Insertion

MACHINERY BARGAINS.

WE OFFER you a select list of elevator and seed equipment, in new and used machinery. Write for our bargain prices. STANDARD MILL SUPPLY CO., 501 Waldheim Bldg., Kansas City, Mo.

MACHINES FOR SALE.

FOR SALE CHEAP—Latest Type Strong Scott Pneumatic Air Pump, complete. WINTERS DUMP CO., 240 So. 4th St., Minneapolis, Minn.

ELEVATOR AT AUCTION.

BYRON, ILL.—22,000 bushel, round vitrified tile elevator, coal sheds and complete modern equipment to be sold at auction on Saturday, January 31, 1925. Located on C. G. W. R. R. in good stock, Grain and Dairy district of Illinois. Population 1,000. For particulars address Ray Barrick, Sec., FARMERS GRAIN COMPANY, Byron, Illinois.

MILLS FOR SALE.

FOR SALE—One hundred barrel flour mill in very best of condition. All new machinery and new power plant. Engine of the finest and absolutely reliable. Have 20,000 bushel capacity elevator and 6,000 barrel capacity fireproof warehouse. Excellent frame building for mill. Situated on the Mississippi River and Frisco Railroad in Missouri. Railroad spur running into the mill. A splendid bargain. Address MILL, care Price Current-Grain Reporter, 309 S. La Salle St., Chicago, Ill.

ENGINES FOR SALE.

FOR SALE—Oil Engines. Slightly used. 60 H. P. Fairbanks Morse. 50 H. P. Fairbanks Morse. 40 H. P. Fairbanks Morse. 40 H. P. Otto. 25 H. P. Fairbanks Morse. 32 H. P. Fairbanks Morse. And all small sizes. These engines are in first-class condition and operate on low grade oil. Write for prices today. A. H. McDONALD, 543 W. Monroe St., Chicago.

HELP WANTED.

WANTED—Brokers in Iowa and Minnesota to sell feed products for large manufacturers. Address BROKER, Box 27, care Price Current Grain Reporter, 309 So. La Salle street, Chicago, Ill.

SITUATIONS WANTED.

POSITION WANTED—As manager of Farmers' Elevator, or will join anyone who wants an experienced buyer to operate a country elevator. Address N. J. RODENBERG, Cathay, N. D.

SEEDS FOR SALE.

FOR SALE—White seed corn, fully matured, planted in April. Car lots or less. COLE SEED SAVER CO., Newbern, Tenn.

ELEVATORS FOR SALE.

FOR SALE—Iron clad elevator, 40,000-bu. capacity; only one competitor; good grain territory; a 400-car station doing good profitable business; electrically equipped, in good running order; storage for 10 cars of hay, 10,000 bu. of ear corn; located on best shipping R. R. in Ohio. Good reason for selling. Address H. G. POLLOCK, Middle Point, Ohio.

FOR SALE—Terminal elevator and Kansas Line. Terms Bargain. ALLIN GRAIN CO., Coffeyville, Kans.

ENGINES FOR SALE.

FOR SALE—30 H. P. Foos Gas Engine priced right. Address E. C. WEGENER, Minco, Okla.

MILLING PLANT FOR SALE.

OHIO—RECEIVER'S SALE—5 grain elevators and 1 corn meal mill, known as the "Heffner Mill," and one flour and meal mill, known as the "Crites Mill," situated in Circleville, Ohio, and vicinity, together with certain brands and the good will of said mills respectively, will be offered for sale by order of Court, by the Receivers of The Dixie Mills Co., at public auction at the door of the Court House in Circleville, on Thursday, January 29th, 1925, at 1 p. m. Opportunity of a lifetime to acquire valuable milling and elevator properties cheap. Full particulars will be furnished upon request. Address Chas. Gerhardt and Edwin C. Wright, Receivers of THE DIXIE MILLS CO., Circleville, O.

ATTENTION, MILLERS!

What you need for your mill we probably have. Full line of new equipment at very complete stock of used machinery and prices that will interest you. Everything from the receiving elevator to the packers. Write us today.

W. R. LEATHERS,
9 S. Clinton St. Chicago, Ill.

GRAIN FOR SALE.

KAFIR—CANE.

White Kafir, Red Top or Sumach Cane Seed in carlots. THE L. C. ADAM MERC. CO., Cedar Vale, Kansas.

HAY FOR SALE.

ALFALFA or anything you want in dairy hay. Write or wire for prices. HARRY D. GATES COMPANY, Jackson, Mich.

PLANT FOR RENT.

Kewanee Grain Spout RENEWABLE BOTTOM

Use a Kewanee Renewable Bottom Spout and when the bottom wears slip in a new one. We guarantee each Kewanee section to wear out 12 bottoms and the bottoms are made from a special analysis steel—tough and long wearing. If you wore out a set of bottoms every year the replacement cost would be little—renewable bottoms for 8" size and smaller cost about 37 1/2 cents. And it's far less expensive to buy new bottoms than to replace entire spouts or try to patch them. ORDER ONE ON TRIAL—Give us the outside diameter, or outside rectangular measurements of your down spout, and length of spout wanted. We will ship you a Kewanee. Use it a month, six months or a year. If it's not satisfactory to you return it and we'll refund your money.

Kewanee Implement Company
KEWANEE, ILLINOIS

PROPAGANDA FOR IOWA WAREHOUSE ACT.

Newspapers throughout the state of Iowa have been publishing articles which purport to show that the Iowa Warehouse Act has been the means of greater profits to those who used the facilities. All the articles are so identical that they appear to be part of an extensive propaganda to make the act popular in the state.

Grain shipments from Vancouver, B. C., during the crop season to date are approximately thirteen million bushels, and five million more bushels are booked for shipment during the next two months. The total grain movement of the port is considerably below last season's but is approximately the same proportion of the entire western yield.

A Splendid Value

—At A Splendid Saving

Save money on grain sample envelopes! Our big stock of No. 1 quality All Spruce Kraft Envelopes insures immediate delivery. P. D. Q. Grain Sample Envelopes assure greatest strength linked with sales-building appearance.

Whether you need one or ten thousand, they are offered you at the 10,000 quantity price—a remarkably low price—with only a negligible handling charge added for smaller quantities.

CO-OP. COUNCIL MOVES TO WASHINGTON.

At the last session of the National Council of Farmers' Cooperative Marketing Assns., it was decided to move the headquarters from Chicago to Washington. The executive committee, headed by Robert W. Bingham, of Louisville, Ky., was re-elected. The conference went on record as opposing any sort of government aid, subsidy or special favoritism for cooperative marketing associations. Federal or state legislation to aid research work and education in agricultural economics and cooperative marketing in the state agricultural colleges, however, was endorsed.

MORE HOGS RAISED IN CANADA.

As a result of a campaign in Canada to raise more hogs, which was started about 1915, there has been a steady increase in the number of hogs. In 1924, a half million more hogs were raised than in 1923, a gain in which all eight provinces shared. Government authorities are of the opinion that hog raising has been profitable since 1920.

VISIBLE SUPPLY OF GRAIN.

What a Monarch Will Do!

As Written by
an Operator of a
26" Attrition
Mill.

"It will handle four and one-fifth tons of pure oat chops per hour, ground to a consistency almost unrecognizable. Eating cob corn at the rate of two hundred pounds per minute is no mean feat, we contend. We have no bother with slipping, tearing, or out-of-tram belts; in fact, not a cent of expense except some good oil and the power and labor to operate it."

Burkholder & Hooper, Inc.
New Holland, Pa.

A copy of our Booklet Q-10 describing the MONARCH in detail awaits your request. Write for it.

BUSINESS AND TRADE CONDITIONS

THE spirit of the year in agricultural circles is unquestionably found in the official and private efforts being made towards fuller coöperation.

Various state farmers' organizations are meeting this month in a natural effort to continue the present prosperity and to build up their fences at certain weak points. The special commission appointed last Fall by the President to define a program for farm relief legislation is now directing their activities in this field of coöperation.

They will, indeed, be good men if they can separate theoretical coöperation of the "hullabaloo" type from the practical sort of coöperation which the President believes will alone solve the economic problems of the farmer. It has been proven so often that legislative action will not bring and cannot continue prosperity, that such procedure to this end will surely not be undertaken by the present administration. It is believed that the President does not contemplate the granting of general loans to agriculturists and further that he does not consider farm coöperation mysterious or essentially different from unionism or similar coöperative activities in other walks of life.

Business and Politics to March 4.

Organized business, as well as national and state administration interests are lining up their activities for the next three months, culminating in the eventful 4th of March. Corporation directorates and the official personnel of business over the entire country are undergoing considerable change, which is mainly in the line of progress, with department heads stepping up to minor official positions, and officials in several capacities moving up to the next higher notch.

In governmental circles, the retirement of Secretary Hughes from the State Department starts what may be many similar events of critical importance to the nation. The significance of resignations of this sort is often broader than the consequent elevation of governmental heads or the appointment of new men in such capacities. Too often, reasons are ascribed to such resignations which have no basis of fact.

Fair minded leaders of either political party credit Mr. Hughes with ability, perception and knowledge, of both legal and diplomatic training, of a very high order. It is anticipated that Ambassador Kellogg will step into the State Department chair with a rather definite understanding of his personal scope and the assurance that President Coolidge will assume a strong position in determining policy developments. Foreign nations will watch with the keenest interest the manner in which old policies are continued or terminated and the trend of the new business of the office.

President Coolidge.

Washington news credits the President with very definite and forceful plans for the next several months, entirely consistent with his past record and yet cause for no concern to the business interests of the country.

His veto last Spring on the postal wage bill has grown into a matter of considerable importance, including in the ripples which emanate from the central vortex, the revival of an old controversy on postage rates for second class mail. It would appear that the President, in his very proper assumption of the full powers of his office, is well able to contend with any further congressional approval of the postal

bill, and that Mr. Coolidge will stand pat on his veto, successfully contesting its passage over the veto.

As stated here recently in considering our foreign affairs, we look to the executive and legislative departments of the Government for the closest coöperation. This is favored through firm and, of course, constructive leadership on the part of the President himself, and we should not be at all surprised to see during the next several years, the administration of rather painful doses, forced down the throats of political leaders both large and small. The

MARKETABLE FARM SUPPLIES

THE percentage of marketable farm surplus of wheat that has been sold ranges from 75 in Minnesota to 93 in Oklahoma, with an average for the 11 wheat producing states of 84. While the percentage of oats ranges from 58 in South Dakota to 82 in Kansas, with an average of 71. The lower percentage of oats is perhaps due to the fact that farmers consider the price of oats as being too low as compared with corn and this, coupled with the growing scarcity of corn, will mean an unusually heavy farm consumption of oats.

As a matter of fact, there is not, in many sections of the corn belt, enough corn to fatten the hogs, in consequence of which farmers are moving them to market light weight, rather than to ship in corn at high prices.

President has the guaranty of an unusually large popular majority in the political elections of November fourth, and it will be truly in line with his reputed and proven personal character to observe him carrying out his pledges with Puritanic honesty and a courageous disregard of petty politics.

Finances for the Week.

Forecasts of the day predict a period of large building and construction enterprise, particularly in public utilities, transportation systems, and such projects.

Even though the present likelihood of credit restriction is made effective, building activities of this character will not be particularly effected. It is among general business and especially lines associated with exchange operations that credit restriction invites the attention of the public. It is believed that the reserve banking system is shaping up to keep speculation in hand and to anticipate the slowing up of certain kinds of business which is inevitable. Whether this reduced volume of business shall be experienced during the Summer or next Winter or later on, is open to discussion, but it is a wise business man indeed who prepares for the slump during periods of advancing prices and increased business volume. From a strictly banking standpoint, the "punch" of any real restriction which may be possible through the federal reserve system will be found among their outside member banks. If

the latter group is able to check a natural desire to secure profits through their operations, and thus correspondingly effect beneficially their immediate territory, then the federal system as a whole may accomplish the contraction of credit.

We have had a steady upward swing in stocks since election day with very natural periods of declines from time to time, one of which was experienced last week. It was credited to the impending increased rediscount rate of the Federal Reserve Bank which did not materialize, although such possible action hangs over the market.

Bonds likewise showed a downward tendency with both banks and individual investors turning to stocks. Money rates were somewhat increased, thus further reducing purchases.

The total of gold shipped abroad for the week was \$21,217,000, and for January, a total, through Saturday the seventeenth, of \$46,167,000. For the entire month of December, gold shipments were \$44,133,000.

Transportation, Motor Trucks and Automobiles.

The steel highways of the country and railroad transportation is finding an ever increasing form of competition through motor truck deliveries from the shipping platforms of the manufacturer, dairy-men, and many other trades to the doorway of the consumer. Interurban passenger and freight service is likewise considerably expanded and the determination of equitable service rates a subject of general interest.

During January, when the great automobile shows are held, the public is impressed with the part this industry plays in civic life. Statistics are advanced showing that in the twenty-seven million families in this country, seventeen million automobiles are in use. There are, of course, many thousand families owning more than one car and industrial and commercial interests employ thousands of others.

Although a prosperous year is anticipated in the trade, automobile manufacturers are increasing the quality and strength of their product and thereby extending the term of service from a probable average of three years to five or six years. Estimates in the tire trade show roughly an increased service from one year to two years. It must be apparent, therefore, that automobile interests shall find continued success in developing new users and hence depending less upon replacements among present owners.

In both private and business life, the automobile has long been a necessity and with the enormous volume of raw materials entering into the trade, automobile production ranks foremost with the major industries of the country.

HANDLING POOL GRAIN

ONE of the numerous interesting questions discussed at the meeting of the Indiana grain dealers at their convention in Indianapolis last week was that of the handling of pool grain and the importance to the elevator man of reading and of understanding his contract was emphasized.

It was developed that farmers at some points had loaded their grain directly into the cars and in that way earning for themselves the handling charge instead of its going to the elevator man, and while there is nothing in the letter of the contract to prevent such a practice, it is unquestionably against its spirit and future contracts should we believe contain a clause to meet the situation.

Motor trucks, good roads and the proximity of perhaps several contract elevators as well as personal

friendships and other factors combine to make restricting a territory impossible, and the elevator men can therefore have no way of checking the matter up, but the mere fact that the problem is difficult, does not mean that no effort should be made to solve it.

FREIGHT RATE SITUATION

IN REVIEWING the freight rate decisions of 1924 affecting grain and grain products, it is found that there have been very few instances where rates were raised and a number of cases where they were lowered, although none of the rate decisions involved a change in the whole rate structure of the country. The I. C. C. last summer refused to consider general reductions in rates on grain and hay on the grounds that no emergency existed and present rates were not unreasonable. This decision practically closes the question of general reductions, and the grain trade cannot expect any marked reductions for some months to come.

Another important development in the freight situation has come to the front. Increased tariffs have been filed by many railroads on grain, but the I. C. C. has in nearly every case suspended the rates for later hearings. This move on the part of the railroads seems to be a clever piece of diplomacy to forestall demands for rate reductions. Financial conditions on many roads improved remarkably during the past year, and some of the stronger systems have announced larger earnings. Under these conditions it is a questionable practice to file higher tariffs, only with the object of preventing concerted action by shippers for lower rates. The shippers rightly resent even the semblance of such tactics, and the needless expense involved in fighting these cases.

Instances where railroads themselves have instituted action for reduced rates are very rare, but there are numerous cases where the preponderance of evidence was in favor of the shipper and if the carriers had reduced the rate voluntarily with the permission of the Commission, much friction and expense would have been eliminated. It is to be hoped that railroads and grain shippers will come to a better understanding which will remove hostility and reduce the economic waste of fighting rate cases.

BALANCING CORN AND HOG PRICES

ECONOMISTS in every field of work are trying by the aid of statistics and in the light of past experience to point out the ideal situation. The trouble with their systems, however, lies in the fact that this old world of ours, from an economic standpoint, is very unstable and every industry must change its plans to meet every new condition. This holds equally true for the grain industry and farming.

One of the subjects confronting economists interested in agriculture is the proper balance between corn and hog prices. Theoretically, a bushel of corn is equivalent to 10 lbs. of pork in feeding value, and according to that rule hog prices are now too low. This has resulted in heavy marketing of light, unfinished hogs to save high priced corn.

Dr. C. L. Holmes, of Iowa State College, in discussing this situation says:

"There have developed two general philosophies as to how the farmer should meet the difficulty. The one is that the conservative farmer should adopt a fixed program as to the proportion between hog and corn enterprises, breeding practically the same number of sows every year and depending upon striking a favorable ratio at least half the time and of having on the average the minimum amount of the high priced product for sale when prices are most favorable. The other plan is that of attempting to forecast the changes far enough in advance of their actual occurrence to take maximum advantage of them; that is, to have a maximum amount of pork to sell when pork prices are at the peak and to have very few hogs to feed when corn prices are high, in order to realize the maximum from the corn crop through direct sales."

The trouble with these very good theories is that economic changes occur much quicker than an adjust-

ment in hog production can be made, and the vagaries of weather with its effect on the corn crop is always present. There is much merit, however, in the suggestion that farmers raise the same average number of hogs every year and not indulge in "plunging" operations. The Department of Agriculture issued a bulletin some time ago pointing out the financial losses caused farmers by raising a large number of hogs one year under the influence of high prices and the next year dropping out of the business almost entirely due to low prices for hogs.

FOR BETTER SEED

FARMERS in time gone past have given more attention in their farm operations, to care and selection in their live stock rather than in the selection of seed for the growing of their crops. It has been proven by agricultural experiment stations that the selection of pure bred seed adapted to soil and climatic conditions is a profitable investment and many grain farmers do so. Country grain dealers should make a study of seeds and the crops best adapted to their community.

In so doing he will benefit his patrons and indirectly profit himself. Better seed and right soil means larger crops and less chance of crop failure. The profits of a country elevator are based primarily on the volume of grain handled, therefore any effort made to stimulate larger production of better quality will reflect itself immediately in more profits for the business.

Prosperous farmers mean prosperous grain dealers and a busy and contented community in which to live. All grain dealers associations have for years urged their members to take an interest in this phase of farming and to be prepared to bring in pure bred seed and supply the needs of the community. Opportunity for live ones is always at hand to benefit yourself by benefiting others.

THIS COUNTRY IN 1890

RECENT estimates are that the population of continental United States will have increased to 175,000,000 by 1890, or, to put it in another way, the next 55 years will find this country with 65,000,000 more people to feed, clothe, amuse, etc.

Perhaps no one who is in business now will still be actively engaged when that time comes, but an increase of 65,000,000 people in 55 years means an average annual increase of more than a million mouths to feed, and taking that kind of a look into the future should give American business men and the grain trade a feeling of optimism which would be irresistible.

MORE THAN A PROBLEM OF WASTE

IN a recent address before the American Dairy Federation, Secretary of Commerce Hoover, in speaking of coöperative marketing, outlined at length its faults and past causes of failure and stated that the whole problem consisted in the elimination of waste.

Word comes from Montana that one of the problems encountered there is the failure upon the part of many farmers to live up to their contracts. Sales through some member of the farmer's family or through some neighbor who was not a member of the association, farm leasing and other subterfuges have been resorted to, to get badly needed cash for wheat, and the announcement is made that legal steps are to be taken to enforce contracts fully in all cases.

Coöperative selling cost one farmer in that state more than three hundred dollars to market his 1924 crop, and circumstances of that kind constitute another problem for advocates of co-operative marketing.

Still another problem comes from Minnesota where strenuous complaint is made against the provision providing for a fine of five hundred dollars for buy-

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	Jan. 17, 1925.	Jan. 10, 1925.	Jan. 19, 1924.
Wheat—			
Primary receipts	5,288,000	4,097,000	3,491,000

ing farm products from association members.

The buyer of course has no absolutely sure way of ascertaining who are and who are not members and may easily be made the innocent victim either of cupidity or spite.

WATCH OUT FOR FIRE

A PERFECTLY good elevator in Montana was destroyed by fire recently caused from an over-heated stove. We have cautioned our country readers time and again to go over their heating equipment and see that it is in first-class shape and properly installed so that fires may not start from this cause. Recently, we published an illustrated article showing how to set up a stove and stove pipes in a safe manner. The loss by fire of a country elevator is a calamity to any community and makes the loss doubly hard to bear by the owner during the height of the grain moving season. Care and attention to these details always pay big dividends.

ECONOMIC LAW PREVAILED

SENATOR SHIPSTEAD should be interested in the news that a carload of wheat recently sold way over two dollars, the season's record price. It should put him in bad with his former friends, for it will be remembered his campaign slogan was that Wall Street was keeping the price of wheat to win farmer votes for Coolidge.

CHICAGO, JANUARY 21, 1925

GRAIN TRADE REVIEW

WHEAT prices were in new ground for the season to date, and it is doubtful if they ever sold as high under normal conditions as at the present time. There are no signs of war, manipulation or anything untoward in the present situation other than the world's prospective scarcity before another crop is harvested to explain the persistent advance in values. Not only are prices the highest of the season, but it is estimated that nearly 50 per cent of the exportable surplus of the southern hemisphere has already been absorbed by importers and the market has persistently advanced in the face of the immense business, with ocean charters estimated made late in December to take out around 75,000,000 bu. of grain. With Russia again in the market for flour, and estimated to need 9,000,000 bu. of seed grain there is a growing belief in some quarters that the estimates as to world's import needs will have to be revised upwards, but there is nothing in sight at the present time to confirm the theory that the American crop has been overestimated. In fact, the present situation is one in which the more wheat America has for export the better it will be for this country and the world in general. It will take further developments to convince many traders that the entrance of Europe into the market as a liberal buyer of North American wheats late in the week at a big premium over Argentine as based on heavy rains in parts of the latter country, and while the domestic and foreign trade has been talking about what would happen when the new crops in Argentina and Australia were sold, the grain has been absorbed without causing even a temporary setback, the breaks which have been experienced of late being due almost entirely to the technical position. There is a growing scarcity of red winter wheat in all markets, as shown by the high prices paid with No. 1 red at St. Louis selling up to \$2.14, or about 25c over Chicago May. The scarcity is due entirely to the shortage in the crop of this variety, and farm reserves generally are regarded as light so that mills have been forced to come to terminal markets for supplies much earlier in the season than expected. Even ordinary No. 2 hard is selling at May price or better in the

leading markets, and if the demand were as slow as many claim an explanation should be made as to why the grain is not selling at a carrying charge discount under the future.

World Situation Complex.

The world's wheat situation is so decidedly complex, and so many new features are constantly developing that many traders have found it almost impossible to sell out their grain and get back into the market again at a profit, as prices have advanced very rapidly after each break, and each bulge has carried values to a new high for the season. As yet the outlook for the new crop is not a material factor in the situation, although it will become of major importance as soon as there has been a period of growing weather. The ice pack still continues over a wide area, but whether there has been any damage or not cannot be determined. The International Institute of Agriculture at Rome estimates the foreign winter wheat acreage at 4 per cent less than last year for the 7 countries reporting, while the French acreage is around 13,750,000 acres, or 30,000 acres in excess of 1924. Crop reports from abroad are irregular.

Movement of new crop wheat is getting under way from Argentina and Australia and will be heavy from now on. However, as much of this grain was sold for forward shipment the effect on the market has probably been felt. It would not be surprising if the demand for North American grain fell off somewhat after the southern hemisphere crop commences to arrive abroad in volume, but it is hardly probable that the combined aggregate of the two countries will equal the average weekly needs of importers, especially as part of the Australian wheat will go to Japan, which has been a good buyer, and some relief work in Chosen seems highly probable, due to the shortage in the crops in that country.

Coarse Grains.

Corn prices are the highest of the season in the face of a killing discount for low grade cash grain and a slow eastern demand with a persistent increase in the visible supply. Part of the grain received at terminals grades low on account of its weight and it is a question if it can be made into contract grain. This theory has had some effect on the May delivery which went to a premium over the July late last week. Liquidation of livestock continues, and feeding demand is being curtailed, although the Government report suggesting a reduction of around 19 per cent in the number of pigs raised in 1924 in the corn belt as compared with the preceding year was about in line with the reduction in the corn crop itself.

Under normal conditions the visible supply continues to increase until about the opening of lake navigation after which it disappears rapidly. This year is not expected to differ materially from an average year even though the price is high. Those who have placed hedges in July corn when it was a premium over the May have not fared well, and should the latter continue to gain on the deferred delivery there may be some changing over on account of the premium. The oats market has been rather dull for some weeks with the pressure of cash grain a factor in preventing a full response to the upturn in corn. Oats are selling at about the widest discount under corn of the season which tends to create bullish enthusiasm in some quarters. Foreigners have been good buyers of cash rye of late but the visible is not decreasing as rapidly as would be expected.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Jan. 17, 1925.	Jan. 10, 1925.	Jan. 19, 1924.
Wheat	5,227,000	4,114,000	3,445,000
Corn	5,984,000	7,838,000	6,279,000
Oats	5,104,000	4,959,000	3,941,000

Combined primary receipts of wheat, corn and oats for the past week and

for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week.....	19,315,000	13,665,000
Preceding week.....	16,911,000	11,605,000
Since July 1.....	747,250,000	670,810,000

All deliveries of wheat sold at a new high on the crop the past week, and finished within a fraction of the top with net gains of 5½¢@9½¢ with July leading, the latter gaining 1½¢ on the May as the result of closing of spreads. Heavy profit taking was on at times, and the movement of prices was most erratic, with foreigners coming in as free buyers of cash grain as well as futures toward the last. A change in the general character of the news from abroad was largely responsible for the upturn, although there were fairly liberal quantities of wheat sold to domestic mills. Argentine movement is delayed by rains while a dock strike hampers loading in Australia.

Corn showed independent strength the greater part of the week, and all deliveries were in new ground for the season closing with net gains of 5½¢@6¼¢ with May leading, the latter going to a fractional premium over the July after having been at a discount for some time past. The strength in wheat had considerable influence, but there was no material pressure on the market at any time, and offerings were well absorbed with some enlargement in outside speculative interest.

Oats market held within rather narrow limits, and in the main reflected the action of corn, closing ½¢@1½¢ higher. The large stocks of cash grain at terminal markets was the main depressing influence, although speculative interest is not large. Rye was fairly active and closed 3½¢@4½¢ higher with a revival in the export demand. Range of prices the past week follows:

	Close	Jan. 17, 1925.	Jan. 10, 1925.	Jan. 19, 1924.
Wheat—High. Low.				
May	\$1.88½ \$1.80¼	\$1.88½	\$1.807½	\$1.08¼
July	1.63½ 1.53½	1.63½	1.54½	1.06½

WORLD'S WHEAT EXPORTS.

Exports of wheat last week compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Jan. 17, 1925.	Jan. 10, 1925.	Jan. 19, 1924.
American	6,882,000	7,032,000	9,294,000
Argentine	4,199,000	2,461,000	2,842,000
Australian	2,784,000	3,552,000	1,928,000
Indian	880,000	600,000
Russian	176,000
Others	80,000

Total

Of the above total wheat from America there cleared in the form of flour 1,660,000 bus.

The total export of wheat since Aug. 1, the commencement of the European crop year, compared for three years:

	1924-25.	1923-24.	1922-23.
American	257,883,000	231,453,000	262,366,000
Argentine	41,710,000	39,970,000	38,573,000
Australian	23,320,000	21,752,000	12,400,000
Indian	19,344,000	5,864,000	4,148,000
Russian	328,000	11,738,000
Others	2,504,000	17,392,000	3,287,000
Total	345,089,000	328,169,000	320,774,000
Season	753,195,000	662,698,000

WORLD'S CORN EXPORTS.

Exports of corn last week, compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Jan. 17, 1925.	Jan. 10, 1925.	Jan. 19, 1924.
American	16,000	16,000	575,000
Argentine	3,040,000	2,688,000	944,000
African
Russian	213,000
Others	493,000	765,000	782,000

Total

Exports of corn since Nov. 1, 1924, compared with last year and year before:

	1924-25.	1923-24.	1922-23.
American	264,000	2,394,000	20,768,000
Argentine	36,188,000	16,012,000	46,496,000
African	544,000	4,629,000
Russian	859,000	419,000

WORLD'S OATS EXPORTS.

Exports of oats last week, compared with the previous week a year ago, as reported to the Broomhall service and forwarded to this paper:

	Jan. 17, 1925.	Jan. 10, 1925.	Jan. 19, 1924.
American	263,000	131,000	763,000
Argentine	1,330,000	126,000	693,000
Others	20,000
Total	1,593,000	277,000	1,456,000

Exports of oats since Aug. 1, 1924, and comparisons for three years:

	1924-25.	1923-24.	1922-23.
American	13,717,000	10,800,000	22,231,000
Argentine	23,226,000	9,818,000	6,671,000
Russian	180,000
Others	1,604,000	580,000	2,270,000
Total	38,547,000	21,378,000	31,172,000
Season	67,500,000	65,765,000

CANADIAN GRAIN IN U. S.

The following table exhibits the quantities of bonded grain in the United States reported last week compared with previous week and one year ago:

	Jan. 17, 1925.	Jan. 10, 1925.	Jan. 19, 1924.
Wheat	18,129,000	17,769,000	28,179,000
Oats	1,625,000	1,651,000	1,473,000
Rye	1,565,000	1,392,000
Barley	2,111,000	2,791,000	276,000

INDIANA GRAIN DEALERS MEET

Interesting Meeting—President Horner of National Association Speaks—Strong Resolutions Adopted—Officers Elected.

THE meeting of the Indiana Grain Dealers' Association, in the rooms of the Indianapolis Board of Trade on Jan. 15 and 16 was unanimously voted one of the best that organization has held in its 24 years' history.

About 200 members were in attendance and their frequent applause and outspoken comment showed their interest and appreciation.

President's Address.

The president, Mr. Elmer Hutchinson, in his opening address, said he was impressed by the fact that there were a lot of good dealers throughout the state who were not members, but who he believed should be, and he was sorry he, during his administration, had not been able to increase the membership 50 per cent.

Speaking of contracts, he said he felt that they should be scrupulously lived up to and he only wanted to warn elevator men to be sure of what they were signing. As to the standard contract, there is nothing in its wording to prohibit a farmer from loading his own wheat, but he felt it to be in violation of its spirit.

He said the association was not opposed to a fair cooperative marketing bill, but it was opposed to any legislation which would penalize one man for doing what it authorized another man to do.

Secretary's Report.

The secretary, Chas. B. Riley, in his report, stated that illness had prevented his getting ready the detailed report he had planned, but he outlined in a general way what had been done and he said the net loss in membership had been just one, 22 new members having been received and 23 having been lost.

National President's Address.

Mr. Fred G. Horner, president of the Grain Dealers' National Association, in beginning his address, paid tribute to the Indiana association and referred to its members as pace makers.

As to cooperative marketing, he said the grain dealers had no quarrel with the plan so long as it gave them a square deal and an opportunity to do a legitimate business.

He felt that the time must soon come when the farmers would recognize that their best advice and greatest help came from the grain dealer, and he urged the greatest care in giving counsel and advice. He said that while he welcomed real leadership among grain farmers he felt that there was no place in our economic program or scheme for so-called leaders who were as a rule agitators for personal reasons and personal profits.

Referring to proposed legislation, he said the Capper-Williams bill was not as drastic as the McNary-Haugen bill, but that the results in the end would prove just as unfortunate for the grain men.

He reported that the National association had recently taken up the problem of unification of rules and while it was felt that without pressure, effort should be made to bring all of them more nearly in line, conditions were so different as to make complete unification impossible.

Weather Bureau Facts.

J. H. Armington, meteorologist U. S. Weather Bureau at Indianapolis, said many of our weather rhymes had no more value than that they were pleasing couplets, but others had an established value and he cited a red sky at night the sailor's delight, a red sky in the morning the sailor's warning as being in the latter class.

He spoke of the value of the barometer and paid tribute to Benjamin Franklin for his thorough investigations concerning storm laws and he said Prof. Abbey of Cincinnati, in cooperation with the Board of Trade of that

city in 1848 made the first weather chart, having arranged with the Western Union Telegraph Co. to wire in to him from Boston, Cleveland, Chicago, New Orleans and four or five other cities wind directions, weather conditions, and the facts were mapped.

This idea was later taken over by the Government and now observation is taken at 225 different stations at 7 a. m. each day and within three-quarters of an hour all of these have been relayed and maps or charts are finished by 8 and predictions may at once be made from them.

Referring to barometer readings and their meaning he said that a difference of one inch meant a difference in air pressure of more than a million tons per square mile.

Speaking of the uses of weather reports he said that new uses for them were being brought to the attention of

E. K. SOWASH,
President-elect,
Crown Point, Ind.

the bureau almost every day and he invited their widest possible use.

Referring to reported permanent changes in our climate he said that actual records showed quite the contrary to be true, the past fifteen years, for example, showing an average of one inch more of snow than a like period fifty years ago.

Address of I. L. Miller.

I. L. Miller of the Department of Weights and Measures, said the first state law was passed in 1911 and that quite a number of cities and counties had laws of a similar nature, with the result that last year about 225,000 inspections were made by state, city and county inspectors and that their chief province was one of instruction rather than prosecution. Their experience had been that a very large percentage of the scales were within the legal tolerance, but that sometimes glaring inaccuracies were found. He said it had been proposed to do away with all bushel weights and he cited corn in the ear, buckwheat, corn meal and other commodities as having varying bushel weights, all of which would be done away with by adopting the hundred pound or weight basis, and he was favorable to such a proposal.

Observations of a Real Farmer.

Hon. Raymond C. Morgan said the northern hemisphere produced four-fifths of the world's supply of wheat and this was marketed at a time when world supplies were lowest. He said the McNary-Haugen bill was a price fixing bill and he was opposed to it. As he sees it, union labor with its high costs is one factor and competition from low labor costs abroad is another contributing to the farmer's troubles. He said the farmer was largely to blame, poor seed being used year after year without

change. He was positive in the statement that Indiana was a soft wheat state and he did not believe in trying to raise hard wheat, except in the one little patch where it had come all right. He quoted figures to prove that too little fertilizer was the rule and he was confident it was very frequently not the right kind and he favored tests on the ground to find the actual results.

Address of Seed Growers' President.

W. D. Littlejohn, president Indiana Seed Growers' Assn., said he had just come from a meeting of about 1,500 farmers who were interested in growing better crops and he said the seed corn problem was a big one, the seed during the past few years being bad, corn not matured, farms deteriorating, improperly balanced plant food being used for fertilizers, etc. He asked those present to urge farmers to test seed for root rot and germination. He made a detailed report of the seed corn situation throughout the state, by counties, and this report showed that while the southern part of the state had a surplus the north part was short and he urged caution in the use of southern grown corn which might not, as a rule, mature in the north.

He advocated the installation of a seed tester in every corn growing community.

Wheat Grading.

Referring to the subject of growing hard wheat in Indiana Mr. Jenkins said hard wheat had no place in the state, but he would have grain graded carefully and where No. 1 wheat was found, to pay the farmer on that basis. He said that since they had adopted that plan their No. 1 wheat had increased from 15% of their total to 90%, which meant more money for the farmers and added prosperity for the community.

Friday Morning Session.

J. A. Morris of the Cincinnati Regional Advisory Board, explained that the first board organized was in the Northwest to take care of the grain situation, that no railroad men were on them, that they were voluntary organizations and that they were for the benefit of shippers.

He said the American Railway Association felt that if any shipper within the past two years had not received service, the fault was with the shipper. The old hard boiled railroad man with the attitude of "the public be damned" is gone forever. He said the carriers were not now advocating the repeal of any of the transportation laws, but they were asking to be let alone for awhile at least. In his district alone there are now in white lead, awaiting business, more than 500 locomotives. He said the next meeting of the advisory board for this region would be held at the Sovereign Hotel in Indianapolis on Feb. 10 and he invited all of the men present to attend, and he was seconded in the invitation by Mr. J. Vining Taylor, secretary of the National Hay Association, and others.

Mr. Banta of Indianapolis, president of the local board, urged shippers to take up with him any local matter and he promised that if he could not iron the matter out he would take it up with the regional office and secure a definite ruling.

Ex-National President Welcomed.

Mr. Fred Watkins of Cleveland, Ohio, ex-president of the National association, was introduced and expressed his pleasure at being present.

Question Box.

But one question from the Question Box was asked and that was as to the handling of one particular brand of fertilizer, and the only answer that came was from one of the members, which was to the effect that he had not been very successful with any fertilizer.

The Past, Present and Future of the Grain Business, by V. E. Butler of Indianapolis.

Mr. Butler began his address by visualizing the development step by step of the mill and elevator business in Indiana. Continuing he spoke of the

period after the civil war when line elevators, station pools and railroad rebates combined in a great period of speculation, and referred to this situation as forming the foundation for much of the protest existing even to the present day against our present marketing system.

To Mr. Butler the great harm from line elevator control came through the fact that there was a constant change in elevator management and in grain buyers, strange buyers appearing at country markets each year and often, many times during the year, with the result that the confidence of the farmer in his home market was destroyed.

Following the history of the business, he said that line elevators dominated the local market during the 80's and 90's, but dissolution began in the period from 1895 to 1900 and was in full force by the latter date, when the farmers' elevator movement began to be a real factor in grain marketing, a movement which reached its crest in 1920 and is now a permanent factor.

Mr. Butler stated that during the transition period, agricultural production reached its maximum per capita and by 1890, due to a demand for diversified farming, began to decline until at the present time, in many sections of the country, there are elevators which cannot be maintained from the profit on the grain handled.

Speaking of governmental investigations he said that although the grain business had been under investigation by one or more departments of the National government, they had failed to find any general bad practices or extortionate profits, but that they had found and published some very interesting findings.

Mr. Butler said that the Federal Trade Commission had made a survey of the country grain trade in Minnesota, North Dakota, South Dakota, Iowa, Wisconsin, Michigan, Indiana and Ohio and their report for the crop year 1915-16, which would doubtless be representative of the whole country, showed the average volume through 967 elevators to be 99,000 bushels. In 1916-17 it was 81,000 bushels through 1,271 elevators and in 1919-20 it was 70,000 through 1,091 houses. This report showed a wide variation in the different states ranging from 228,000 bushels per elevator in Illinois down to 41,500 in Wisconsin, and while the average profit per house ever the 14 states was very uniform, a marked difference was shown in capital account.

Invested capital, excluding borrowed money, ranging from \$33,850 in Indiana down to \$11,400 in Oklahoma, the above average for Indiana being the investment of those reporting, who handle side lines in connection with the grain business and representing the value of the plant and merchandise, less borrowed funds.

Continuing his review of this report, Mr. Butler said the expense of operating an elevator was remarkably uniform, but that the margin per bushel was wide, ranging from 3.52 in Iowa to 14.7 in Montana, with the lowest gross margins showing in Iowa, Illinois, Ohio and Indiana caused by the large volume handled in Iowa and Illinois and by the operation of side lines in Indiana and Ohio.

Mr. Butler would not attempt to prophesy for the future, but he was confident whatever condition the future might bring, they would be met as they had been in the past.

Mr. Butler reviewed briefly more recent history, beginning with the old Bureau of Markets, the organization of the Grain Dealers' National Association, and the World War, with prices and distribution controlled and stated that today elevator equipment is better than ever before, investments larger, expense of operation greater than ever before, railroad transportation adequate to move the crops as fast as delivered, margins satisfactory but volume of business is dropping from year to year and there are too many elevators in some sections of the growing country. In many sec-

tions the entire crop can be handled in three months or less and Mr. Butler advocated diversification and he cited one Ohio elevator that ten years ago had a blackboard price list of 10 items while it now shows 115.

He spoke of the 350,000 farmers that had become interested in marketing their products through their own organizations and said that if the pooling system of handling wheat was successful it would be extended to other grain crops.

Concerning the combination of the large baking institutions and the formation of the Grain Marketing Co., he said their influence was as yet unknown, but that they appeared to be forces with which foreign buyers must deal as they wielded a dominating influence over terminal markets.

In conclusion, he said he was optimistic for the future of the grain business, which he said was passing from a highly speculative period to one of more fixed profit and he urged the trade to bend every effort to increase production and to broaden its activities to meet the demands of the times.

Open Forum.

As was the plan of the program committee, the meeting was then opened for the specific discussion of the address of Mr. Butler or of any other matter in which they might be interested.

Side Line Figures.

Mr. C. O. Wise of Connersville, the first speaker in this part of the program, had an interesting story of their side lines. He said that their gross business last year amounted to a little over \$142,000, wheat forming 48% and that giving them 35% of their gross profits; 2½% of their total gross profits were made on coal, 6% on jobbing flour, 3% on hay, 6½% on middlings and bran, 1½% on potatoes, 8% on feed, 2% on seed, 2½% on tankage, 6½% on oyster shells, straw, fertilizer, etc.; 11% on retailing corn, and 3½% on retailing oats.

Service First.

Chas. Stephenson of Cyclone said he was not accustomed to think or to talk very much about the past for that was gone, but his thought was largely about the present and future and he thought that service was the chief asset of the grain man. He is going to put on a campaign to sell fertilizer to 100 men to put under corn and he is always talking drain tile. He said the day of the truck was here and that unless elevator men were progressive their elevators up-to-date and ready to render good service, the trucks would not stop at their place.

He stressed the desirability of keeping posted on interesting and important current news and of talking to farmers about such matters.

He suggested a central buying agency for coal used by the Indiana elevators as well as perhaps some of the side lines.

He said he did not believe the wheat pool idea was going to die a sudden death and he felt that the best way to combat it was to render a superior service.

Figure Overhead.

P. E. Goodrich of Winchester said that in eastern Indiana where he operated, fully 50% of their profits came from the handling of side lines.

He felt that overhead was one of the things many elevator men lost sight of and he said that the overhead should be spread over side lines as wheat was already carrying all it could and that the day of selling coal at a dollar a ton above its cost had gone.

He felt that if elevator men were to live they must go on a cash basis, there being no reason, so far as he could see, why they should give two, three or perhaps six months to others and pay the banks 6% or 7% for money with which to pay their bills.

Resolutions.

The Resolutions Committee, being at this time ready to make its report, was heard and the following resolutions which it presented were adopted:

WHEREAS, It has been, and is, the policy of the grain trade to cooperate in every way possible to conserve the interest of agriculture in every conservative movement that is for its benefit; and

WHEREAS, The officers and members of the Indiana Grain Dealers' Association has put forth every effort possible to better the condition under which agriculture is conducted; and

WHEREAS, There has now appeared in our Legislature S. B. 18 and H. B. 15, which, in our opinion, will bring forth many diversified opinions under which the grain business shall be conducted in the future; therefore, be it

RESOLVED, That we pledge the support of the officers and members of the Indiana Grain Dealers' Association to an intelligent and careful study of every suggestion that has for its purpose the creating of better production, better markets, better business methods; and be it further

RESOLVED, That the members of the Indiana Grain Dealers' Association stands four square upon the principles of equal rights to all and special privileges to none; and we deprecate the fact that it seems to be necessary to penalize the grain trade for the purpose of advancing the spirit of cooperation.

In the discussion of the grain business before this convention, it has been developed that the handling of grain is only a small percentage of business in many sections of the state, and believing that the further development of the business in this state is along the lines of merchandizing; therefore, be it

RESOLVED, That we recommend to the consideration of the officers of this association the appointment of a committee to make a thorough study of efficient methods through which a greater buying power may accrue to the country dealer.

Experience has shown that approved written codes of ethics or standards defining and governing business relations of men in general and associations of business men in particular are essential, if progress in the development, pleasure in the administration and success in the realization of life's highest ideals in the business world are to be attained; therefore, be it

RESOLVED, That we offer for your consideration and adoption the following code of ethics:

First. My business dealings, ambitions and relations shall cause me to take into consideration my highest duty as a member of society, and my chief thought and purpose shall be to fill that responsibility and discharge the duties incident thereto, so that when I have ended each of them I shall have lifted the level of human ideals and achievements a little higher than I found them.

Second. My aim and purpose shall be to exert my utmost endeavors to elevate the standards of my vocation and so conduct my affairs that others thus engaged may find it wise, profitable and conducive to success and happiness and emulate my example.

Third. I realize that as an ambitious business man, worthy of success, I should and do recognize the importance of personal qualifications which contemplate private morality, sobriety, sincerity, truthfulness, integrity and honor, and as an ethical man I wish no success that is not founded on justice, honesty, morality and fair dealings.

Fourth. I hold to the doctrine that the exchange of my goods, my services and my ideals for profit is legitimate and ethical, provided all parties in the exchange are beneficiaries thereof.

Fifth. In appreciation of my opportunities and duties to society I shall endeavor to conduct my business in a manner that will afford a high degree of perfect service and at all times equal to or better than my competitors, if possible, of accomplishment.

Sixth. I consider it my duty to cultivate my talents and improve myself physically and mentally, to increase my efficiency and enlarge my service, thus attesting by faith in the fundamentals of good citizenship and the doctrine, "He profits most who serves best."

Seventh. As one of the greatest assets of a business man is his friends, any legitimate and proper advancement gained by reason of true and merited friendship is ethical so long as such friendship is maintained on an unselfish, reciprocal, frank and honorable basis, demanding nothing of anyone that permits an abuse of confidence for profit, business, social or other gain or advancement.

Eighth. I hold that no personal success is legitimate which is secured by taking selfish advantage of certain opportunities in the social order that are completely denied others, nor such opportunities to achieve material success that others will not take because of the questionable morality involved.

Ninth. I am committed to that philosophy of life which contemplates the approval of the doctrine that "money shall be used to build up man, not man to build up money." Both man and money are necessary, in a civilization like ours, if society is to be perpetuated and the highest ideals of man realized.

Tenth. Believing in the universality of the Golden Rule, "All things whatsoever ye would that men should do unto you, do ye even so unto them," we contend that society best holds together

and meets its complete requirements when equal opportunity is accorded all men in reference to natural rights, privileges and resources, and that mankind is justified in proceeding only on the theory that the doctrine of man's "privileges, not rights," underly and sustain the structure of organized society.

Eleventh. As an ethical man I contend that the growing complexity of our industrial and social life requires the determination of an economical system based upon a proper conception, and recognition of the rights of the individual and the maintenance of individual initiative rendered effective by proper cooperation, projected on the theory of obligations and privileges as a member of society.

BE IT RESOLVED, That the election of officers at this convention, and that at all elections hereafter, the term of office for such elected officers begin March 1 following their election.

RESOLVED, That we tender our sincere thanks to all the speakers who have contributed in making this an unusually profitable meeting; be it further

RESOLVED, That this convention extend its special thanks and appreciation of the dinner and entertainment supplied to them through the courtesy of the grain men of this market and the Indianapolis Board of Trade, because of its refinement and the intensive development of the Russian question by the Hon. Jas. P. Goodrich.

The Red on the Ledger.

H. W. Reiman of Shelbyville reported that they had found it absolutely necessary to handle side lines in order to cut out the red on the ledger. He said one of their problems was occasionally what to handle and what to let alone and he mentioned buttermilk as being one they had at first passed up and later taken on with profit.

He felt that the grain trade had come to the place where they were willing to place their cards face up on the table and to tell their customers their margin of profit.

The Proposed Marketing Law.

E. E. Elliott of Muncie said that in his 25 years in the business he had never had so serious an insinuation put up to the grain men as those in the proposed marketing law and he hoped the resolutions that had been adopted would be lived up to by every member.

Don't Fear Coöperative Markets.

Walter C. Moore of Covington spoke of farmers' elevators, coöperative marketing, etc., and he said they didn't have to reduce feed selling prices to meet those of the coöperatives. He told of 150 men who each put in \$10 to start a coöperative market and within a year the money was used up and they were ready to quit.

Grain Business Not Only Bad One.

G. G. Davis of Tipton said he was operating three elevators, owned three farms and was financially interested in a manufacturing business and it was taking more time and energy to put and keep the farms and the manufacturing business on a paying basis than the elevators.

He had put electricity into his elevators and he felt that to be a step in the right direction. He said that the chicken business was growing rapidly and he believed the encouragement of this business would be a wise move.

From Buyer to Seller.

Charles Northlane of Union City said that to his mind the problem for the grain man was changing from that of buyer to that of seller, and he was confident costs of doing business must be taken into careful consideration and a fair margin of profit must be made on each side line. Speaking of legislation he said he felt more interest should be taken in proposed legislation along all lines and constructive suggestions made to senators and representatives.

Chicken Business Two Sided.

E. K. Sowash of Crown Point said that while a previous speaker had said that the women were making a lot of money in the chicken business, up in his section the chicken business was costing the men a lot of money.

He would have grain dealers remember that membership in the association was profitable and he cited an instance where legislation sponsored by it had meant \$260 to him.

Election of Officers.

The nominating committee made its report at this time; its report was adopted and the following were declared elected for the ensuing year:

President, E. K. Sowash, Crown Point; vice-president, W. C. Moore, Covington; board of governors, Jesse Doan, Clarks Hill, and George Arnold.

Proposed Marketing Bill.

The specific sections of the proposed new coöperative marketing law, to which exceptions were vigorously taken, both in the formal resolutions and from the floor, are Nos. 24, 25, 26 and 27, and they are as follows:

SEC. 24. INDUCING BREACH OF MARKETING CONTRACT. Any person or persons, or any corporation whose officers or employees knowingly induce or attempt to induce any member or stockholder of an association organized hereunder to breach his marketing contract with the association, shall be liable to the association aggrieved in a civil suit in the penal sum of five hundred dollars (\$500) for each such offense.

SEC. 25. SPREADING FALSE REPORTS. Any person or persons, or any corporation whose officers or employees maliciously and knowingly spread false reports about the finances or management of any association organized hereunder shall be guilty of a misdemeanor and be subject to a fine of not less than one hundred dollars (\$100) and not more than one thousand dollars (\$1,000) for each such offense, and shall be liable to the association aggrieved in a civil suit on the penal sum of five hundred dollars (\$500) for each such offense.

SEC. 26. PERSONS LIABLE FOR DAMAGES FOR ENCOURAGING OR PERMITTING DELIVERY OF PRODUCTS IN VIOLATION OF MARKETING AGREEMENTS. Any person, firm or corporation conducting a warehouse or elevator or other receiving place or otherwise dealing in any agricultural products within the state of Indiana, who solicits or persuades, or who permits any member of any association organized hereunder to breach his marketing contract with the association by accepting or receiving such member's products for sale or for auction or for display for sale, contrary to the terms of any marketing agreement of which said person or any member of the said firm or any active officer or manager of the said corporation has knowledge or notice, shall be liable to the association aggrieved in a civil suit in the penal sum of five hundred dollars (\$500) for each such offense; and such association shall be entitled to an injunction against such warehouseman or other person to prevent further breaches and a multiplicity of actions thereon. In addition, said warehouseman or other person shall pay to the association a reasonable attorney's fee and all costs involved in any such litigation or proceedings at law.

SEC. 27. ASSOCIATIONS ARE NOT IN RESTRAINT OF TRADE. Any association organized hereunder shall be deemed not to be a conspiracy nor a combination in restraint of trade, nor an illegal monopoly; nor an attempt to lessen competition or to fix prices arbitrarily or to create a combination or pool in violation of any law of this state; and the marketing contracts and agreements between the association and its members and any agreements authorized in this act shall be considered not to be illegal nor in restraint of trade nor contrary to the provisions of any statute enacted against pooling or combinations.

During the closing moments of the meeting the question of handling pool wheat was quite generally discussed and the point was again made that the contract be carefully read before it was signed, and then that it be carefully complied with and no more and no less.

GRAIN IMPORTS.

The following is a statement of grain imports in November and 11 months ended with November (final 000 omitted from last two columns):

	November—	11 months—
	1923.	1924.
Corn, bu....	29,613	355,420
Oats	54,706	117,661
Wheat	5,264,199	347,666
Flour, lbs....	3,942,762	19,275
Hay, tons...	27,597	9,592
Oil cake, lbs.—		
Bean	4,797,492	4,818,398
C'nut	6,801,933	3,023,199
Other	2,492,444	1,724,403
Bran, etc.		
tons	25,266	81,597
Beet pulp ..	5,252	7,405
Beans, lb....	2,103,111	4,351,280
Peas	1,777,617	4,043,226
	18,186	22,019

BRITISH FOOD POSITION

Flour Prices Rising—"Dirt Cheap" American Supplies Have Disappeared Forever—Royal Food Commission Making Enquiry.

By JACK BROOKS.

LONDON, Jan. 3.—One of the first commodities that the Royal Commission on Food Prices has tackled is flour as applied to breadstuffs and from the mass of data that is being compiled by the commission on the subject it would seem that flour and bread is to become dearer as time goes on, the chief reason cited being the disappearance of the "dirt cheap" American wheat supplies. One of the principal reasons why the four-pound loaf today costs from 20 to 22 cents is advanced by Sir Leo Chiozza Money, former M. P. The British food position, desperate in war, is growing precarious in peace, he says, and the establishment of a system of Imperial purchase and supply is imperative. Wheat and flour prices, he told the Commission, were rising prior to the World War, due to the growth of the world's population. In the main, he said, the high prices now paid for flour and bread are not the result of profiteering so much as they are the outcome of serious alterations in economic factors. Wheat as it used to be produced in virgin fields, he said, was dirt cheap. America used to supply 60 per cent of the wheat used in Britain. In 1898 the United States sent 62,000,000 hundredweights of the 94,000,000 imported by Britain. In 1901 she sent 67,000,000 of the 101,000,000 imported by Britain. But the United States of America grew so rapidly in population that her virgin supply ceased to exist and in 1904 she sent Britain only 18,000,000 hundredweights of the 118,000,000 imported by that country. In 1905 she contributed only 14,000,000 hundredweights. Since then, Sir Leo told the Commission, the American supplies have recovered under the influence of higher prices, but that "dirt cheap" American supplies have disappeared forever. Sir Leo said the first thing to do was to achieve maximum wheat production in Britain and for the Imperial government to import what outside supplies are necessary by bulk purchases, thus obtaining the greatest cheapness consistent with maximum security. Thus, he said, the loaf would consist partly of relatively dear home-grown wheat and partly of relatively cheap colonial and foreign wheat. A system of Imperial purchase and supply should, he said, be entrusted to a new department of state which would be charged with the responsibility of budgeting. It would obtain wheat supplies in advance and cooperate with the British wheat grower and the Dominion grower. The wheat jobber, or wholesaler, would thus disappear. But he would be called in to help organize the scheme. The loaf, he said, has already risen from nine cents to 21 cents and he saw nothing to prevent it going to 35 cents in the next generation. Sir Auckland Geddes, chairman of the Food Commission, said what Sir Leo had told the Commission was very interesting but it did not show how the great difficulties of state wheat purchases were to be met. Sir Leo said he could not foresee any international complications as a result of it. He could not, for instance, see how open-handed dealing with the Argentine should lead to strained relations with North America. International complication, he said, usually arose out of private dealing.

In 1894 British wheat was \$5.70 per quarter. In 1914 the price was \$8.70. Today it is \$3 a hundredweight. The idea of profiteering is dismissed by the editor of the *Miller*. He says each individual consumes 12 quarter loaves a year which is made from 200 pounds of flour costing retail \$15. The miller, he says, must grind five bushels of wheat at 60 pounds per bushel to allow for loss in cleaning and the cost of this to the miller is \$11. The labor cost is 14 cts. The miller sells his 200 pounds of flour

to the baker at just over \$9, or less than it has cost him, but he has 65 pounds of offal to sell and so can make up his capital outlay, expenses, overhead, interest, etc., getting the tiniest picking out of each loaf.

For growing the wheat, says the editor of the *Miller*, the farmer gets three cents, carriage, elevator and middleman charges add another two cents, flour milling costs one cent and baking and distribution 14 cents. If the millers worked for nothing their one cent would not be deducted from the loaf. Cornering, on a large scale is impossible, says the *Miller*, and monopolies do not exist in either milling or baking.

The Royal Food Commission has a lot of evidence yet to hear on the wheat and flour and bread question and it will sit for several months. The Commission was appointed by Premier Baldwin following the big victory of the Conservative Party at the polls.

COAST GRAIN PRICES.

Quotations of grain reported by grain exchanges of the Pacific Coast as of Jan. 15, are as follows:

Portland — Merchant's Exchange, noon session, Jan. 15:		January.		February.	
Wheat—		Bid.	Ask.	Bid.	Ask.
Hard white	\$2.00	\$2.00	\$2.00	\$2.00	\$2.00
Soft white	1.86	1.86	1.86	1.86	1.86
Western white	1.84	1.84	1.84	1.84	1.90
Hard winter	1.83	1.83	1.83	1.83	1.90
Northern spring	1.89	1.89	1.89	1.89	1.89
Western red	1.79	1.85	1.89	1.89	1.86
B. B. bluestem	2.14	2.14	2.16	2.16	2.16
Oats, No. 2—					
36-lb. w. fd.	42.00	42.00	42.50	42.50	42.50
33-lb. gray	41.00	41.00	41.50	41.50	41.50
Barley, No. 2—					
44-lb. feed	45.00	45.00	45.50	45.50	45.50
Corn, No. 3—					
E. Y. ship	51.00	52.50	51.50	52.50	52.50
Millrun	38.25	40.00	38.50	40.00	40.00
Bags—July, 1925—11½ cents bid, 12½ cents asked; domestic, 12 cents bid, 12½ cents asked.					

Montana millrun—February, 38½ cents bid, 39½ cents asked; March, 38½ cents bid, 39½ cents asked; April, 39½ cents asked.

Special bids—3 cars dark northern spring Montana, basis 13% protein, \$2.17 bid, \$2.23 asked. Millfeed—City delivery, prices: Millrun, \$43 ton; middling, \$55; scratch feed, \$70; rolled barley, \$57; cracked corn, \$65; rolled oats, \$55.

San Francisco, Jan. 15—Barley Futures—No sales or quotations.

Following prices are wholesale for car loads asked:

Barley, feed, \$2.35@2.40; shipping, \$2.65@2.85. Bran, \$32@34. Shorts, \$42@43. Middlings, \$45@46. Millrun, \$41@43. Wheat, feed, \$3.05@3.10; shipping, \$3.10@3.20. Red oats, feed, \$2.25@2.30. Corn—California yellow, nominal; white, Egyptian, \$2.25@2.30; milo, \$2.15@2.25; No. 1 eastern yellow, in bulk, \$2.25; No. 2, \$2.20@2.30.

Grain bags—Calcutta, June-July bags, 12½c asked.

San Quentin grain bags, 10½c.

Seattle—Prompt bid quotations on the Seattle Grain Exchange Jan. 15 follow:

Oats—No. 2 white feed, \$44.50 a ton. Corn—No. 3 yellow, \$51.50 a ton.

Wheat—Soft white, \$1.85 a bushel; western white, \$1.84; hard winter, \$1.84; western red, \$1.81; northern spring, \$1.88; Big Bend bluestem, \$2.10.

Yesterday's car receipts—Wheat, 1 car; corn, 4 cars; hay, 3 cars; oats, 1 car; flour, 9 cars.

INLAND GRAIN MARKETS.

Odessa, Wash., Jan. 14.—Bart and bluestem, \$1.94; Turkey red, \$1.78; forty-fold, \$1.65; marquis, \$1.68; club, \$1.62; Jones Five, \$1.60.

Pullman, Wash., Jan. 14.—Red, \$1.59; white, \$1.62.

Lewiston, Idaho, Jan. 14.—Marquis, \$1.70, the record price of the season; lower grades, \$1.63.

Colfax, Wash., Jan. 14.—White, \$1.58; red, \$1.54; barley, \$35; oats, \$32.

Davenport, Wash., Jan. 14.—Hard white, \$1.88; bluestem, \$1.78; club, \$1.60; marquis and fortyfold, \$1.63.

Dayton, Wash., Jan. 14.—Club, \$1.62; red, \$1.60.

ANOTHER ATTACK ON GRAIN MERGER.

Demand has been made by the Illinois Agricultural Assn. for a public inquiry into the "legality and public policy" of permitting the merger of the grain companies, whose assets now form part of the Grain Marketing Company. Gray Silver, president of the Grain Marketing Co., stated in answer to the action of the association that "the purchase of the old line grain companies was and is entirely legal."

STATEMENT TO AGRICULTURAL COMMITTEE

Economic Life Interdependent — Agricultural Production Should Be Balanced — Economic Waste Corrected by Collective Action.

SECRETARY HOOVER of the Department of Commerce has just made a statement to President Coolidge's Agricultural Committee, which is in part as follows:

"As about 60 per cent of our commerce and industry revolves around the production of American farms, it is obvious that the welfare of the commercial and industrial activities of our country is closely interlinked with the welfare of our agriculture. Every segment of our economic life is interdependent. The farmer is as much interested in the price of what he buys as he is in the price of what he sells. Therefore, the Secretary of Commerce is as deeply interested in the commercial phases of agriculture as he is interested in any branch of industry, finance, or transportation.

"As for myself, after seven years of constant study and practical dealing on an unprecedented scale with the broad economic currents of production and distribution, I have the conviction that the first thing needed in aid of the American farmer is a positive long view national policy for better setting of agriculture in our whole national economy. If we could determine what were the long view policies then emergency policies could be better directed to these ends.

"Generally the fundamental need is a balancing of agricultural production to our home demand. That problem is not the farmer's alone. It touches every class. Everyone suffers because of the lack of balance in agriculture. We import agricultural produce that we could better produce at home. We export foodstuffs and other agricultural products. Our farmers are caught both ways. They suffer in both directions from competition of cheaper labor and lower standards of living abroad.

"Farmers' products must be given the same value in tariff for stimulation of consumption of domestic production as has been the case in industry. We can build up a higher standard of living and therefore larger consumption of agricultural products at home by a nationally organized drive to better efficiency in our whole production and distribution system and the elimination of its great wastes."

After pointing out the desirability as he sees it of balancing insofar as is possible, agricultural production to meet home demands, Mr. Hoover referred to certain economic policies which would be necessary to bring about this balance, included in which were, "to maintain a tariff on agricultural products on such a basis as will stimulate domestic production . . . and the development of increased domestic consumption of agricultural products per capita of population."

Particular emphasis was laid on the elimination of waste which he enumerated as follows:

"I wish at once to make it clear that in speaking of waste, I do not mean waste in the sense of willful waste, but economic waste, which is the natural outgrowth of a competitive system, I do not mean the waste that any single individual can correct by his own initiative, but the waste that can only find remedy in collective action. Our industrial and distribution services are individually of the highest efficiency in the world. It is in their collective action that we can find progress.

"The kinds of waste that cause costly losses may be partly catalogued:

"1. Waste from speculation, relaxation of effort and extravagance of booms with the infinite waste from unemployment and bankruptcy which comes with the inevitable slump.

"2. Waste from excessive seasonal character of production and distribution.

"3. Waste caused through lack of in-

formation as to national stocks, of production and consumption with its attendant risk and speculation.

"4. Waste from lack of standards of quality and grades.

"5. Waste from unnecessary multiplication of terms, sizes, varieties.

"6. Waste from the lack of uniformity of business practices in terms and documents, with resultant misunderstandings, frauds and disputes.

"7. Wastes due to deterioration of commodities.

"8. Waste due to inadequate transportation and terminals, to inefficient loading and shipping and unnecessary haulage.

"9. Waste due to disorderly marketing, particularly of perishables, with its attendant gluts and famines.

"10. Waste due to too many links in the distribution chain and too many chains in the system.

"11. Waste due to bad credits.

"12. Waste due to destructive competition of people who are in fact exhausting their capital through little understanding of the fundamentals of business in which they are engaged.

"13. Waste due to enormous expenditure of effort and money in advertising and sales promotion effort, without adequate basic information on which to base sales production.

"14. Waste due to unfair practices of a small minority.

"15. A multitude of wastes in use of materials, in unnecessary fire destruction, in traffic accidents and many other directions.

"These wastes are not the small change of industry and commerce. There is scarcely a step in this accomplishment of squeezing out waste which does not interpret itself in millions of dollars of annual saving.

"In a wider sense of eliminating waste—and increasing national efficiency, there are other equally important items to the farmer and our people in general. For instance:

"The consolidation of our railways into larger systems will allow a more sure readjustment of rates in favor of the farmer because wider diversification of traffic, greater economy in operation, greater financial stability and better handling of terminal problems by the railways.

"The development of central generation and interconnection of electric power companies will decrease costs and give greater assurance of supply of power which will affect all industry and production costs.

"The construction of the St. Lawrence and other waterways, the improvement of the Columbia and Colorado Rivers, will contribute in various directions to decrease costs of transportation and increase the volume of water power and the security of irrigation communities.

"A systematic large scale and vigorous handling of the development of synthetic nitrates at Muscle Shoals will contribute to the cheapening of fertilizers.

"I do not believe it is possible to carry out a great national program for the elimination of waste on any other basis than voluntary cooperation. I do not believe it can be done by regulation and law. The government can do an enormous service by the erection of such agencies as will stimulate cooperation not only in the field of marketing farm products but in all the fields. It can do a great deal through its service of expert advice, of information, removal of legal barriers and above all by organized leadership. The Department, in response to the wish of the commercial community has given leadership to organization, furnished information and given expert advice. The results already accomplished are large and daily growing, and they constitute a contribution to the farmers' welfare of the first order.

"Nor am I talking about abrogating the Sherman Act in relation to manufacture and the trades."

When writing advertisers please mention THE PRICE CURRENT-GRAIN REPORTER.

The Letter Box

Expect to Make Repairs.

Price Current-Grain Reporter: We deem one of the most important things at this time is the present rise in the market and how best to keep posted on its hedges. We expect to make some repairs at our plant next summer and have installed a new dump and a new main lift.—Carbury Farms Elevator Co., Carbury, N. Dak.

Erecting a New Feed Mill.

Price Current-Grain Reporter: We thought it might interest you to know that the Corcoran Mill & Warehouse Co. of Corcoran, Kings County, Calif., of which John T. Bell is general manager, is erecting a new feed mill for the manufacture of a complete line of mill feeds under the trade name of "Feed Rite" products. It has been our pleasure to plan and install the complete plant which will have a capacity of about one thousand tons per day of a general variety of feeds.—John P. Gray, Inc. per John F. Hunt, Pres., San Francisco, Calif.

Editorial Interesting.

Price Current-Grain Reporter: In your issue of Jan. 14 appears an editorial, "Much Ado About Nothing," which is interesting to me. This refers to an article in Wallace's Farmer about the "huge profits" made by the packers. In the Nov. 27 issue of the Youth's Companion is an article entitled "The Consumer and His Dollar," which should be brought to the attention of the Wallace's Farmer. This article gives the results of the investigations of the Smithsonian Institute, Washington, D. C., and shows the portion of the consumer's dollar which goes to the farmer, referring to bread, meat, oranges, and rolled oats. It shows that considering meat, the farmer gets more of the dollar than he does when considering the other commodities mentioned.

This article is a good one also to use when discussing marketing problems with the agitator who claims all the high cost of living is due to the present "expensive marketing" system.—Farmers' Union Grain Co., Aberdeen, S. D., C. G. Anderson, Mgr.

Corn Movement Continues.

Price Current-Grain Reporter: The Illinois state report assures us that little if any damage was done to our winter wheat by the great ice glaze of Dec. 18, which paralyzed our wire service for so many weeks.

The movement of corn from farms to country elevators continues in good volume. The fact that most Illinois stations during the week went to one dollar and ten cents per bushel for this damp corn has induced some further selling on the part of the grower.

Those farmers who have hung onto their hogs in the face of difficulties and prospective loss are gratified to see the recent advances in swine prices and will welcome more of the same variety.

If oats have any friends they are observing the adage, "That silence is golden." We note an improvement in the domestic demand for this cheap cereal, which should continue strong in view of prevailing corn prices. Export demand so far disappointing.—H. I. Baldwin & Co., Decatur, Ill.

Situation in Montana.

Price Current-Grain Reporter: It is our opinion that the percentage of winter wheat sown this year is somewhat in excess of the acreage sown last year—perhaps ten per cent.

So far as we are able to ascertain, the condition of the fall wheat is good. Most of the farmers believe that the wheat is coming through the winter in good shape, although there are scattering reports of damage from blowing and dry weather earlier.

SIM. F. CLARK, PRESIDENT-ELECT, MEMPHIS MERCHANTS' EXCHANGE.

THERE is usually a most active contest in the election of exchange officials in the Memphis market but this year, competitive lines were not as closely drawn and Sim F. Clark was elected president for the ensuing year without much competition. He is a member of the old time firm of Clark, Burkle and Co., extensive dealers in

grain, hay and feed. Mr. Clark and his firm stand for the highest principals in commercial transactions and the same procedure will dominate his activities in directing the affairs of the Memphis Merchants' Exchange. THE PRICE CURRENT-GRAIN REPORTER joins his many friends in wishing him merited success in the administration of the office.

There is probably ten per cent of the Montana crop still in the farmers' hands. We should say that approximately fifty per cent of the wheat shipped outside of the state went to the west coast, and from now on, the movement of shipments to the west coast will likely increase.

We should estimate that approximately twenty per cent of the Montana crop will be used by local milling interests.

There is a marked improvement in the feeling in agriculture; in many sections all of the available land has been leased for next year, which is the reverse of the situation during the past three and four years, many farm owners having difficulty in getting their land cropped.—Montana.

CHICAGO GRAIN STOCKS.

Wheat stocks in all positions in Chicago decreased 434,000 bu. last week, rye 438,000 bu. and barley 32,000 bu., while corn increased 948,000 bu. and oats 558,000 bu. Details follow, last three ciphers omitted except in the totals:

	Public.	Private.	*Total.	Last yr.
Wheat	2,953	5,590	8,765,000	16,260,000
Corn	3,221	7,195	10,508,000	2,446,000
Oats	6,123	14,169	21,443,000	3,084,000
Rye	1,721	262	1,983,000	1,397,000
Barley		321	321,000	331,000

*Includes 1,222,000 bu. wheat, 92,000 bu. corn and 1,151,000 bu. oats afloat.

MAY AMEND CANADIAN GRAIN ACT.

It is reported that Judge Turgeon of the Grain Enquiry Commission has been requested to draft a bill to amend the Canada Grain Act in accordance with the recommendations in the report submitted to the cabinet. Although it is realized by the grain trade that there may be room for improvement in this act, it is felt that an opportunity for full discussion and representation of the interested parties should be allowed before submitting a bill to the government.

CANADIAN VISIBLE.

Canadian visible supply of wheat decreased 684,000 bus.; oats increased 29,000 bus.; rye, 49,000 bus.; barley decreased 263,000 bus. These statistics represent terminal stocks only.

	Jan. 17, 1925.	Jan. 10, 1925.	Jan. 19, 1924.
Wheat	30,357,000	31,041,000	52,241,000
Oats	16,856,000	16,827,000	10,128,000
Rye	1,861,000	1,812,000	
Barley	5,893,000	6,056,000	1,644,000
Afloat—Wheat, 8,679,000 bus.; oats, 1,258,000 bus.; barley, 838,000 bus.; rye, 140,000 bus.			

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

RANGE OF CONTRACT GRAIN PRICES.

Following is the daily and weekly range of quotations for contract grain prices at Chicago in December, the November range and the range previous to November 1 of the deliveries indicated:

Legal, Traffic and Arbitration Decisions

COURT DECISIONS.

Co-operative association held entitled to delivery of crop, though it refused to advance money, and crop was mortgaged to another. Under marketing agreement providing that if grower placed mortgage on crop co-operative association had right to take delivery of tobacco, and pay off all or part of mortgage, and charge growers' account, held that association was entitled to delivery of crop, though it refused to take mortgage or advance money, and crop was mortgaged to a third party.—*Redford et al. v. Burley Tobacco Growers' Co-op. Assn.* (Court of Appeals of Kentucky, 266 S. W. Rep. 24).

Carrier may look to consignee for payment and may waive lien by delivery, and still hold consignor liable on contract of shipment. Carrier, contracting with shipper to transport goods, has right to look to consignor for payment of freight, and may waive its lien on goods by delivering them to consignee, and still hold consignor liable on contract of shipment. Stipulation in bill of lading that goods are to be delivered to consignee, "he paying freight," or any similar provision, are for benefit of carrier and delivery to consignee without collection of freight will not release consignor from liability therefor, in absence of special stipulation to contrary. On interstate shipments carrier can compel shipper to pay difference between legally established interstate rate and lower rate quoted or collected by mistake or otherwise. A carrier cannot depart to any extent from its published schedule of rates for interstate transportation on file, without incurring penalties of act of Congress. Where contract of shipment of cut stone provided for rate less than published schedule filed with interstate commerce commission, carrier could recover difference, since scheduled rate formed part of contract of shipment by operation of law, and parties could not contract for less rate than schedule filed with commission.—*Missouri Pac. R. Co. v. Pfeiffer Stone Co.* (Supreme Court of Arkansas, 266 S. W. Rep. 82.)

Contract to deliver car for interstate shipment on certain date held void. Railroad could not make valid contract to deliver car for interstate shipment to shipper on certain date, though car was to be furnished such railroad by other railroad pursuant to other railroad's contract with shipper; such obligation being greater than that imposed by published tariffs.—*Tennessee Egg Co. v. Nashville, C. & St. L. Ry.* (Supreme Court of Tennessee, 266 S. W. Rep. 106.)

Stipulation requiring filing of claims within certain time cannot be waived by company or agent. Stipulation in telegrams, providing for filing of claims within a certain time, being a limitation

of liability formally adopted and filed and approved by Interstate Commerce Commission, pursuant to federal act, became lawful condition, upon which messages were received and sent, and hence could not be waived by company or its agent.—*Western Union Telegraph Co. v. Woods, et al.* (Court of Civil Appeals of Texas, 266 S. W. Rep. 179.)

Orders for cars must be placed with agent in writing. Henderson, a shipper of cattle, brought suit in a state court of Arkansas against an interstate carrier then under Federal control. The cause of action alleged was failure to furnish a car within a reasonable time after notice. The carrier defended on the ground that the shipper had not complied with a rule, approved by the Interstate Commerce Commission, and contained in its tariff, which provided that orders for cars must be placed with the local agent in writing. Written notice was not given. The plaintiff was permitted to testify that he had notified the station agent orally and that the latter had accepted his oral notice. The trial court refused to instruct the jury that the shipper could not recover without proving a notice in writing. Exceptions were duly taken. The plaintiff got the verdict; and the judgment entered thereon was affirmed by the highest court of the State. (157 Ark., 43.) The carrier brought this writ of error; and, also, filed a petition for a writ of certiorari, consideration of which was postponed until the hearing on the writ of error. The former must be dismissed. Act of Sept. 6, 1916, c. 448, sec. 2, 39 Stat. 726. The writ of certiorari is now granted. There is no claim that the rule requiring written notice was void. The contention is that the rule was waived. It could not be. The transportation service to be performed was that of common carrier under published tariffs. The rule was a part of the tariff. *Georgia, Florida & Alabama Ry. Co. v. Blish Milling Co.*, 241 U. S., 190, 197; *Missouri, Kansas & Texas Ry. Co. v. Ward*, 244 U. S., 383, 388; *Davis v. Cornwell*, 264 U. S., 560, 562. Writ of error dismissed. Writ of certiorari granted. Judgment reversed.—*Davis v. Henderson*, U. S. Supreme Court.

TRANSPORTATION MATTERS.

Southwestern Grain Case Hearing.

Representatives of railroads carrying grain and grain products between Nebraska, Kansas and Eastern Colorado points of production and Mississippi Valley markets recently testified before Examiner Wm. A. Pique of the I. C. C. in defense of a proposed increase of railroad rates on those commodities. The increase has been temporarily stopped on the petition of eight chambers of commerce and trade boards in various cities affected. The petitioners are the Southwestern Millers' League and boards of trade of Kansas City, Atchison, St. Joseph, Wichita, Omaha and Sioux City. The carriers maintain that the proposed increase in the rates will enable them to maintain the same rates to smaller market points that are granted to the larger centers, and will also enable them to make short hauls on the same scale as the long. The opposi-

tion to the rate increase contended that the equalization of rates as between smaller interior points and the larger markets can best be accomplished by a general lowering of the rates, which they consider too high.

Grain Embargo at Baltimore.

Movement of grain into Baltimore was virtually checked on Jan. 13, when the Baltimore & Ohio Railroad, following a similar action by the Pennsylvania and Western Maryland, declared an embargo on all further shipments. Approximately 11,500,000 bus. of rye and wheat stored in the port elevators of the three railroads has exhausted all available storage space. Only grain consigned directly to the elevators for immediate exportation will be received by the roads. Permits will be issued to western shippers to permit the movement of through consignments.

Mostly Parcel Lot Shipments from New York.

Slightly more than 18 per cent of the wheat exports from New York in 1924, went in full cargo lots, according to statistics prepared by the New York Produce Exchange. Out of 63,991,000 bus. of wheat shipped out, 11,545,341 were provided for in the charter market; out of 1,125,000 bus. of corn, 41,784. Of the 11,614,000 bus. of oats exported, the charter market took 1,526,565. Rye exports totaled 13,176,000 bus., of which 2,833,693 were by cargo lot; barley exports, 15,832,000 bus., of which 1,530,406 were by charter market.

Argument in Favor of St. Lawrence Waterway.

The following information on the probable cost of carrying grain from Chicago or Duluth to Liverpool by the proposed St. Lawrence waterway as compared with the present routes is taken from the report of the special committee appointed by the Associated Industries of Massachusetts to study the question. "At present a bushel of wheat is carried by water from either Chicago or Duluth, 1,000 miles to Buffalo, for 2 cents or less; and on the same mileage basis, with due allowance for delays in canals and locks 3 or 3½ cents would be a fair rate to Montreal. The lowest rate at which grain can now be carried from the above mentioned western ports to tidewater is 2 cents to Buffalo, and 12 cents from Buffalo to New York or Boston, a total of 14 cents. This shows a saving to tidewater of at least 10 cents per bushel via the St. Lawrence route; and as ocean rates from New York and Montreal to Liverpool are the same, this means an equal saving on the through rate. What holds true of grain will also hold true of many other western products destined for European ports."

Conference Will Consider Freight Rates.

Chairman Robert D. Carey, of the agricultural conference, recently testified before the appropriation committee of the House of Representatives supporting a request for an appropriation of \$50,000 for use in defraying the expense of the conference, and made the statement that to make a thorough study of freight rates would take an indefinite time.

Continuing, Mr. Carey said that while freight rates would be considered, it was felt that any attempt to recommend a complete readjustment of freight rates was beyond the province of the committee which was appointed by President Coolidge.

Montreal Has Record Grain Movement.

A new record for the amount of grain handled in one year has been established by the port of Montreal. The total for 1924 was 165,139,396 bus., as compared with 120,107,990 in 1923 and 155,035,817 in 1922, the best previous year. Grain received by water amounted to 112,023,275 bus. as compared with 74,631,578 in 1923, and by rail 28,353

MEN!

120 South Jefferson Ave.
Peoria, Illinois

cars, or 53,116,121 bus., as compared with 27,631 cars, or 45,476,412 bus. in 1923. Stocks now in the elevators at Montreal amount to 9,460,714 bus.

Ocean Rates to Go Up.

In a recent review of the grain vessel rate situation, Lunham & Moore says, "While the grain business has not yet reached a cargo basis, except for the Mediterranean, those who waited the turn of the year to secure January tonnage found it necessary to pay up, as shown by the fixture in London of the Melpo, 7,500 tons, range to Greece, at 21½c, January.

Permission to Intervene.

The Kansas City Board of Trade has been permitted to intervene in No. 16501, *Sioux City Grain Exchange vs. A. & W. Ry.* et al.

DIGEST OF ARBITRATION DECISIONS.

In a decision by the arbitration committee of the Grain Dealers' National Ass'n, the following principles were announced:

In *George W. Cole Grain Co., Peoria, Ill., vs. Albert Commission Co., Omaha, Neb.*, plaintiffs bought of defendants ten thousand \$2 corn through Neal Grain Co., brokers. Broker's confirmation specified Peoria terms. Plaintiff diverted corn to Chicago without consent of defendant. Held by virtue of Rule No. 28: "Diversion of the grain by the buyer to some point beyond the said destination shall constitute an acceptance of the grain."

These proceedings arise over the fact that the Cole Grain Company, the plaintiffs, diverted the corn to Chicago without the consent of the defendants. Both plaintiff and defendant made and send confirmations, differing in some details. Neal Grain Company, the brokers in this transaction, sent both the plaintiff and defendant a confirmation. Section B of Rule No. 4. Trade Rules of the Grain Dealers' National Association, provides that in an instance of this nature the broker's confirmation governs. The broker's confirmation specified Peoria terms, consequently the plaintiff and defendant must abide by that confirmation.

The plaintiff's action in diverting the grain to some point beyond Peoria constituted an acceptance of the grain, as specified by Rule No. 38. The plaintiff asks for \$355.62 from the defendant. The major portion of this amount is occasioned by car No. 114515 grading sample grade in Chicago. This car was discounted 24 cents a bushel. It contained 1,327 bushels, making \$318.48, amount of discount owing to grade. The balance of the amount asked for, namely, \$37.14, is caused by difference in weight, etc., between the defendant's loading weights and Chicago official weights.

Under our rules and basis the evidence submitted, the plaintiff is entitled to this \$37.14. We therefore direct that the defendant pay to the plaintiff the sum of \$37.14, and that the costs of these proceedings be shared equally by the plaintiff and defendant.

U. S. GRAIN IN CANADA.

The Canadian Bureau of Statistics reports the following amount of grain in store in Canada on Jan. 9:

	Jan. 9, 1925.	Jan. 2, 1925.	Jan. 11, 1924.
Wheat	2,690,608	2,649,920	365,678
Oats	1,728,343	1,728,343	50,372
Barley	396,512	396,512
Rye	4,285,613	4,269,352	843,560
Corn	1,288,602	1,319,002	136,591

Barley

RECEIPTS OF BARLEY.

Carload receipts of barley last week at different points named, with comparisons, follow:

	Mpls.	Dul.	Chi.	Win.	Mil.
Jan. 12.....	13	1	14	32	50
Jan. 13.....	13	1	31	71	26
Jan. 14.....	40	1	16	32	17
Jan. 15.....	99	1	4	30	38
Jan. 16.....	32	1	11	43	19
Jan. 17.....	58	1	11	14	25
Total	414	4	87	222	175

CHICAGO BARLEY PRICES.

Following is the daily range of quotations for spot malting barley quotations at Chicago:

Jan. 12—\$.95@1.00; Jan. 15...\$.95@1.01
Jan. 13....\$.95@1.00; Jan. 16....\$.95@1.01
Jan. 14....\$.95@1.00; Jan. 17....\$.95@1.01
Receipts of barley at Chicago for week ending Jan. 17, 1925, were 201,000 bus., compared with 211,000 bus. same week 1924; shipments, respectively, 73,000 bus. and 87,000 bus.

BARLEY MARKETS.

MILWAUKEE.—Good malting grades were steadily absorbed throughout the week and Wisconsin for pearling sold at new high figures of \$1.03½ on Tuesday and \$1.04 on Wednesday. Shippers were also active and all receipts were practically cleared before the close. Prices for the week closed 1@2 cents higher. Receipts were 175 cars as compared with 133 the previous week and 100 in 1924. Choice to fancy, 48 to 50 lb., quotable at \$1.02@1.03; fair to good, 44 to 47 lb. test, 95c@\$.1.01; light weight, 40 to 43 lb. test, 92@98c; feed, 85@96c. Iowa quoted 92c@\$.1.02, as to quality; Wisconsin, 92c@\$.1.03; Minnesota, 92c@\$.1.02; Dakota, 92c@\$.1.01; feed and rejected, 85@95½c.

DULUTH.—Trade was slow in the barley market during the last week as a result of limited offerings, only 6 cars coming on track during the week and some of them applied on contracts. Some seed was loaded out of the elevators during the week to fill orders. Closing prices are unchanged at from 74c to 90c.

FT. WORTH, TEX.—Receipts of barley have been very light with a better demand, showing prices are some firmer, with No. 3 barley worth today \$1; group 1, No. 4 barley, 99c; 48-pound barley, 98c.

NEW YORK.—Besides the above business, there was a fairly good trade in barley and export sales of this article for the week amounted to about ¾ million bushels, with Germany the principal buyer.

KANSAS CITY.—A good inquiry from feed manufacturers, absence of country offerings and the strength of corn and Kafirs forced barley prices above the dollar mark this week. The closing quotations were 10@11c per bushel higher, with No. 3 at 99c@\$.1.02 and No. 4 at 98@41c. Sales out of store reduced the local stocks 5,000 bus. to 14,000, against 468,000 a year ago.

CHICAGO.—The market was strong at the opening, but weakened later on profit-taking sales by longs and lack of demand. At the close, however, the market rallied and went to higher levels on the strength in wheat and reports that contracts based on possible Russian exports had to be filled in this country as the Soviet government would not ship out any rye until the new crop. Carlots were in good demand, but sales were few owing to the lack of offerings. The closing prices for No. 2 were \$1.54½@1.55½. Exports from the principal Atlantic ports for the week ending Jan. 17 were 265,000 bus. compared with 234,000 bus. last week, and 17,000 bus. a year ago.

MINNEAPOLIS.—The milling demand was good for choice quality and the offerings were light. No. 1 was quoted at May price to ½c under and No. 2 at ½@1c under.

RYE MARKETS

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending Jan. 17:

	Mpls.	Dul.	Chi.	Win.	Mil.
Jan. 12.....	16	34	8	5	9
Jan. 13.....	10	23	30	3	2
Jan. 14.....	12	16	10	3	2
Jan. 15.....	16	37	6	3	3
Jan. 16.....	9	25	11	3	6
Jan. 17.....	11	9	4	2	5
Total	74	144	69	19	27

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending Jan. 17, were:

	Mpls.	Dul.	Chi.	Win.	Mil.
Jan. 12\$1.46½	\$1.50	\$1.52½	\$1.47½	\$1.53	
Jan. 13 1.48½	1.51½	1.54½	1.49½	1.55	
Jan. 14 1.47½	1.50½	1.53½	1.47½	1.53	
Jan. 15 1.46½	1.49½	1.54½	1.47½	1.53	
Jan. 16 1.47½	1.50½	1.52½	1.46½	1.52	
Jan. 17 1.49½	1.52½	1.54½	1.51½	1.54½	

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending Jan. 17:

	May.	July.
Jan. 12.....	\$1.57 @1.59	\$1.38½ @1.39½
Jan. 13.....	1.58½ @1.62½	1.39½ @1.42
Jan. 14.....	1.58½ @1.61	1.38½ @1.40½
Jan. 15.....	1.57½ @1.60½	1.39 @1.40½
Jan. 16.....	1.56½ @1.59½	1.38½ @1.39½
Jan. 17.....	1.60 @1.61½	1.40 @1.42

Receipts of rye at Chicago for the week of Jan. 17, 1925, were 95,000 bus. vs. 39,000 bus. same week of 1924; shipments were 712,000 bus. vs. 15,000 bus. same week of 1924.

RYE MARKETS.

MILWAUKEE.—The Milwaukee rye market was stronger throughout the past week and quotations closed 4@5 cents higher for the period. Cereal mills as well as shippers were active in the market. Offerings were chiefly offgrade, with high moisture content and discounts were liberal, while some No. 2 Wisconsin sold at a premium. Considerable Wisconsin was sold on a forward shipping basis but on arrival grades were slower. Dry was scarce and wanted. Receipts were 27 cars as compared with 30 cars the previous week and 16 in 1924. Market closed at \$1.52½@1.54½ for No. 2, inside for Wisconsin, ranging at 7@9 cents under May price.

NEW YORK.—Export business in rye for the week was estimated around 2½ to 3 million bushels in all positions. Germany and Scandinavia were identified as the main buyers.

DULUTH.—Quotations in rye were advanced 4½c during the last week. The market was active and prices covered a wide range. Export buying was a bullish factor, good trade being reported in that department. Receipts from the country were moderate, stocks in the elevators of 4,132,000 bus., showing an increase of 132,000 bus. in the week. Spot No. 1 rye closed 4½c up at \$1.52½.

PORTLAND, ORE.—Barley stocks comparatively heavy here and only occasional cars are being received from the east. Not much demand locally, and the heavy stocks eased prices considerably. The trade is slow in taking hold, and as a result conditions generally are unsatisfactory.

CHICAGO.—Offerings were light and demand was strong during the past week, prices going to the highest level of the season. In fact, demand is far in excess of supply with both domestic maltsters and foreign buyers bidding for the small offerings. Germany and Denmark again were reported as taking large quantities. Closing prices for malting were \$0.95@1.01. Exports during the past week from the principal Atlantic ports were 987,000 bus. compared with 1,448,000 bus. a week ago, and 483,000 last year.

MINNEAPOLIS.—There was a good and general demand and prices were up 1 cent and even more for good plump grain. Market quoted at 81@94c.

If this paper pleases you kindly recommend it to your neighbors in the trade.

SIGMOND ROTHSCHILD CO.

HOUSTON, TEXAS

BROOM CORN MARKETS.

Activity in other Dwarf districts has been rather pronounced, buyers in increased number driving, with field activity and effort noted particularly in northwest Oklahoma and adjacent sections in southwest Kansas and north-east New Mexico. The field run of average prices a week ago was considered as ranging from \$60 to \$100 on bulk of corn obtained, while the past week prices paid are according to field reports, running from \$65 and \$70 to \$100 with larger end being secured at \$70 and above.

In the Lindsay Standard district also there appears more of a desire to take corn than was noted heretofore. The top price paid this week was \$120 for 100 bales, with other corn bought from \$75 to \$100. Growers with better than the average crops are holding for \$125 to \$150 and not at this time showing any interest in offers at a lower figure.

There has been quite an activity on the central Illinois since the first of the New Year. Prices in the district paid the farmers range from \$100 to \$150 with quite a number of sales made from \$115 to \$135 and \$140. Farmers in numerous instances have refused offers at the above range of prices.—*Broom Corn Review.*

DISTRIBUTION OF GRAIN EXPORTS.

Complete Department of Commerce figures for November show that the tonnage movement from American ports was evenly distributed, and the largest importers were England, Italy, Holland, and Japan. The principal increase in grain exports for the month in 1924 as compared with 1923 was in wheat, although rye and barley also showed increases. Atlantic port shipments of wheat in November, 1924, were 8,640,628 bus.; Gulf port shipments, 9,904,016; and Pacific Coast, 4,333,580 bus.

Beans and Potatoes

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Jan. 17:

Beans—
Boston—Car lots, per 100 lbs., N. Y. and Mich.: Choice h.-p. pea beans, \$7.00@7.25; fair to good, \$6.50@6.75; Calif. small white, \$8.50@8.75; yellow eyes, extras, \$7.25@7.50; red kidneys, \$10.25@10.50; Calif. limas, \$14.25@14.50; native green peas, \$7.25@7.50; Canada, \$6.00@6.25; jobbing prices, 25 to 50 cents above car lots.

Crop Reports

Compiled by GEO. A. WELLS

CROP AND MARKETING CONDITIONS.

The general reports of our correspondents as given below indicate that there is no corn moving to terminal markets except in central Illinois and to a very limited extent in the states of Indiana, Iowa and Kansas. There is considerable corn being moved to the mountain and Pacific Coast territory from western Nebraska. In many sections of the corn belt there is not sufficient corn to fatten the hogs and farmers have been moving them to market light weight rather than to ship in corn at high prices. Hogs are being shipped to market light weight to a large extent because of the fact that the farmers do not have the corn. It is not altogether because the value of corn is above feeding value.

The farmers continue to feel bullish on oats and are not selling very much. Oats look too cheap to them as compared with corn and the farm consumption of oats because of the scarcity of corn will no doubt be very heavy and farm reserves may not be as large as generally estimated. Country elevator stocks of oats being carried in store are generally heavy for this time of the year.

WINTER WHEAT: The wintering condition of the winter wheat crop is almost entirely "favorable" throughout the entire winter wheat belt except a few localities in the states east of the Missouri River.

FARM SURPLUS: The percentage of the marketable farm surplus of wheat that has now been sold by the farmers according to averaged reports from each state is as follows: Ohio 82, Indiana 85, Illinois 86, Missouri 91, Iowa 82, Minnesota 75, North Dakota 80, South Dakota 85, Nebraska 82, Kansas 87 and Oklahoma 93.

OF OATS: Ohio, 69, Indiana 71, Illinois 66, Missouri 74, Iowa 70, Minnesota 62, North Dakota 77, South Dakota 58, Nebraska 71, Kansas 82 and Oklahoma 80.

GENERAL REPORTS: The general reports given below as to whether or not corn is being shipped by country grain elevators to terminal markets, also as to the disposition of farmers to sell oats on basis present market values are self explanatory.

OHIO.

Sidney, O. (2): No corn now being shipped to terminals from this section. Farmers holding most of the balance of their oats for a little higher price. We are paying 56c, but want 60c.

Bucyrus, O. (4): No corn is being shipped from here at all. Oats are being held for feed, as corn is scarce in this locality.

Lima, O. (1): Very little, if any, corn is being shipped by grain elevators to terminal markets. Some oats is sold at present prices.

Blanchester, O. (3): No corn is being shipped from this section to terminal markets.

Middletown, O. (3): Wheat had poor start on account of dry weather seeding time and looks very bad.

INDIANA.

Bloomington, Ind. (3): Very little good corn in our county this year. Are shipping corn in for our farmers' and our own supply. Farmers feeding their oats. Not selling any oats.

Decatur, Ind. (7): No corn to ship. There are not many oats moving.

INDIANA.

Rushville, Ind. (8): Elevators are shipping some corn this year, the first in some time. Farmers are not selling oats but feeding them.

Lawrenceburg, Ind. (9): Very little corn being shipped to market. Farmers are holding oats.

Rensselaer, Ind. (1): What little local corn that is moving is going to terminal

and interior markets. Not much to sell. Farmers are not moving but very few oats. Most feeding their surplus or holding for summer feed.

Monticello, Ind. (1): A good snow now covers the ground in this locality and wheat is in good condition. Very little corn going to terminal markets.

Frankfort, Ind. (2): No corn moving to terminal markets from this territory. Farmers will need practically all oats for feed.

Angola, Ind. (7): No corn is ever shipped out of the vicinity when grown, and but very few oats. Not selling oats at present prices.

Kendallville, Ind. (7): We have no corn to ship out, in fact, are shipping corn for our farmers.

Brook, Ind. (1): Corn in this territory will all be fed to livestock.

Winamac, Ind. (1): Little corn being shipped or available. Little marketing of oats.

ILLINOIS.

Ashton, Ill. (4): Corn is moving freely to terminal markets. Oats movement fairly liberal.

Mt. Carroll, Ill. (4): Farmers buying shipped in corn and holding oats.

Mt. Pulaski, Ill. (5): Corn is going to terminals and interior mills. Small feeder demand. No oats selling. Interior points giving better discounts on low grade corn.

Freeport, Ill. (4): Very little surplus corn here. Shipping some in from Kansas. Movement of oats fair.

Riggston, Ill. (5): Some corn is being shipped to the market. No oats here. Very few oats raised here.

Odell, Ill. (7): Elevators are shipping corn to near markets. Farmers not selling many oats at present.

Lexington, Ill. (5): Quite a little corn has been moved. Not much oats sold.

Nashville, Ill. (3): No surplus corn here.

Eureka, Ill. (1): Some movement of corn. Fairly well satisfied with prices.

MISSOURI.

Bethany, Mo. (1): Shipping in corn here.

Springfield, Mo. (3): Corn generally going into southern markets for consumption. Very few oats offered and mostly consumed by local users.

Carrollton, Mo. (2): No corn shipped to terminals. No oats here, will ship in. Seed corn will be scarce.

Sedalia, Mo. (5): Sleet has damaged growing wheat. Most of our small crop of oats being fed on farms, there is none to sell.

Lamar, Mo. (3): Corn is being shipped to terminal markets. There are no oats here for shipment, some oats being shipped in.

Salisbury, Mo. (4): Farmers are selling very little corn. No oats being sold.

Higginsville, Mo. (2): Wheat fields have ice covering. Too early to state what damage, if any, the ice has caused.

Chillicothe, Mo. (1): Corn and oats being shipped in here.

Columbia, Mo. (5): Farmers are selling their surplus corn as fast as they can. The surplus oats are all sold.

Sparta, Ill. (6): No corn being shipped out.

IOWA.

Clemons, Ia. (5): Corn will be consumed by feeders. Oats will be fed more extensive than other years but will have some oats to ship to terminals, but not much, if any, corn.

North Liberty, Ia. (8): Shipping in corn. No wheat sown here. Not any corn or oats to be shipped out.

Onawa, Ia. (2): Nearly all corn is shipped to terminal markets. No oats left except for seed.

Whitten, Ia. (4): Shipping some corn to terminal markets. Fair movement of oats at present prices.

Williamsburg, Ia. (8): For the first time in 40 years we are shipping in

Hubbell Building

Des Moines, Iowa

LIGHTNING PROTECTION

If lightning rod protection could be installed on every grain elevator on which this Company carries insurance, it would not only affect a reduction of ten cents in the rate but also a reduction in fire losses paid by this Company. This would also affect a lower cost of the insurance which would be reflected to the policyholder in an increase in the dividend rates.

oats. Farmers continue to buy corn at rate of about 3,000 bushels per week.

Moulton, Ia. (6): No corn to ship out. Feeders taking the corn. The corn crop is of very poor quality. Oats a poor No. 3.

Hamlin, Ia. (2): There is but very little corn to ship out this year. There will be none at all at this station.

Wall Lake, Ia. (2): No corn shipped to terminal markets. Are shipping in corn for feeders. Not many oats being marketed. Feeders are buying a good many.

New Sharon, Ia. (5): No corn shipping out, some shipping in altogether. Enough here to supply demand, if farmers would sell. No oats selling.

Belmond, Ia. (4): Corn is being shipped in small amounts. Not much corn for sale. Farmers buying from each other.

Jefferson, Ia. (5): Very little corn moving. Light crop. Farmers are very bullish. Oats are being fed.

Osceola, Ia. (6): Very little corn being shipped to terminal markets. Farmers feeding oats and offering some low grade corn at above prices.

Indianola, Ia. (6): No corn being shipped out. Enough selling among farmers to supply local demand.

Randolph, Ia. (3): Not over 10% of corn going to terminal markets. Farmers selling sparingly of corn.

Lowden, Ia. (8): No corn to ship out. Have already shipped in 5 car loads. Dozens of cars have gone to nearby towns. There is not enough grain in this territory to feed the stock. Much corn must be shipped in.

Marcus, Ia. (1): Farmers feeding oats heavily to all livestock. Corn surplus about cleaned up. That what is left on the farms is selling over market prices. Hogs getting cleaned up. What corn left is in strong hands. Not many cattle left.

MINNESOTA.

Donnelly, Minn. (2): Farmers are selling corn and oats freely on present prices.

Warren (1): No corn shipments. Farmers holding oats for better price.

Wells, Minn. (6): Very little corn is being shipped. Farmers looking for higher prices on oats later on. Corn very poor quality.

Albert Lea, Minn. (6): Local corn is retailed out about as fast as received. Oats is being marketed freely at present prices.

Prior Lake, Minn. (6): Have heard of no corn being offered for market.

Minneota, Minn. (3): There has been a good movement of corn the past 30 days, as bulk of corn will have to be moved during cold weather. Corn grad-

ing No. 5 and No. 6. Not disposed to sell oats under 50c here. Balance of oats in hands of those able to hold.

Hayward, Minn. (6): No corn shipped out from here.

Hutchinson, Minn. (6): No corn being shipped out of here and very little oats will be shipped.

Eden Prairie, Minn. (6): There is no corn sold to speak of around here. It is all ground up and fed to milk cows.

NORTH DAKOTA.

St. Thomas, N. Dak. (7): Corn all used locally. Farmers believe oats will hit higher levels.

Fargo, N. Dak. (8): Very little corn being shipped. Oats selling by farmers quite freely.

Ashley, N. Dak. (6): No corn to be shipped out of this part of the country.

Carrington, N. Dak. (5): There is no corn here for sale. Most of the farmers are selling oats at present prices.

Monango, N. Dak. (9): No corn will be shipped as the yield was only 50% and it of poor quality and all will be feed.

Lakota, N. D. (7): Corn is fed on farms. None sold at elevator. Very few oats sold. They are held on the farms.

SOUTH DAKOTA.

Brookings, S. Dak. (8): We will have only a few ears of corn to ship out. Farmers still bullish and not selling oats freely. Some coming in and put in storage.

Brentford, S. Dak. (7): Shipping freely of corn. Not disposed to sell oats at present prices.

Bridgewater, S. Dak. (8): Very little corn will go to terminals from this territory. Oats movement slow as they are the cheapest feed at present.

Canton, S. Dak. (9): Practically no corn going out. Five or six cars shipped out but will have to ship in later. But little oats left to sell.

Beresford, S. Dak. (9): Some corn being shipped to terminal markets, but small per cent of the usual amount. Farmers not disposed to sell oats at present market values.

Flandreau, S. D. (8): Winter severe with bad roads, which makes it impossible to ship much corn, but new

HENRY RANG & CO.

Grain Merchants

CHICAGO MILWAUKEE
SIOUX CITY

corn thus far shipped has gone to terminal markets. Farmers are holding oats.

NEBRASKA.

Neligh, Nebr. (7): Corn is being all picked up by feeders. None has been shipped to terminal markets.

Nebraska City, Nebr. (9): Some corn is being shipped to terminals. Feeders are also taking corn right along. Oats will be fed. Look for very few to be sold at all.

Roseland, Nebr. (9): Not much corn going to terminal markets here.

McCook, Nebr. (6): Corn from this section is all moving to western feeders or to the Pacific coast.

Superior, Nebr. (9): No oats and very little wheat for sale. A little corn being sold. Mostly going west and south.

Superior, Nebr. (9): Corn being sold but not for shipment to terminals. No oats sold locally. No surplus.

Beatrice, Nebr. (9): Farmers selling some corn. Keeping oats for feed.

Orleans, Nebr. (6): Our corn has been going west but now selling at the interior markets.

Humphrey, Nebr. (8): The weather now is steady. Cold ground covered with snow. Very little grain for sale on account of a poor crop.

Winnetoon, Nebr. (7): No corn to ship.

Ashland, Nebr. (9): Unusual for farmers around Ashland, Nebr., to sell oats any year. Corn moving very slow. About 25,000 bushels taken here for seed corn. About 60% of the crop moved.

KANSAS.

Oberlin, Kan. (1): Snow and bad roads. No corn moving the past month and for some time to come.

Uniontown, Kan. (9): Corn is being shipped as fast as it is husked. No oats for sale here.

Logan, Kan. (4): No corn moving to terminal markets, being used for home consumption. Very small amount of oats in country.

Wellington, Kan. (6): Little corn moving but no surplus here to speak of.

Greensburg, Kan. (6): Corn is offered freely at \$1.05 for mixed corn net to farmer. No oats offered.

Minneapolis, Kan. (4): There is no surplus of corn or oats to ship. We are shipping in corn and oats now.

Pittsburg, Kan. (9): Heavy coating of sleet and ice has not been very favorable for winter wheat. Too early to tell just what the effects have been. Farmers not selling corn freely. Prices run from \$1 to \$1.05 per bushel.

Wichita, Kan. (6): Very little corn moving in this territory. None going to terminals.

Belle Plaine, Kan. (4): Feeders taking all corn.

Belleville, Kan. (4): Most of our corn is being sold outside of terminal markets. We have a short crop of oats around here. There will be no oats shipped out.

Hillsboro, Kan. (5): As far as we know the corn is sold locally and to stations where feeding is going on. We have not shipped any corn to terminal markets. Very little oats moving at present prices.

Madison, Kan. (9): Corn shipped to terminal markets. Oats are all sold.

Neodesha, Kan. (9): Corn is selling to terminal elevators and being shipped direct most of it. No oats to ship.

Ashland, Kan. (3): Not enough corn and oats raised to take care of local demand. Believe we have a better prospect for wheat than we had this time last year.

Junction City, Kan. (7): Corn is being marketed freely and is moving to terminal markets and to Iowa.

Mahaska, Kan. (4): Corn is going to country elevators where there is a feeder demand.

OKLAHOMA.

El Reno, Okla. (5): Farmers are holding oats to sell for seed. Very little corn being sold.

Enid, Okla. (4): Corn is not being shipped to terminal markets but direct

to elevators to resell. Oats is being sold for consumption.

Marshall, Okla. (5): No corn to ship to terminal markets. Very few oats offered for sale on the market.

Driftwood, Okla. (1): Some corn is being shipped out. No oats for sale. What are here will be consumed here.

Kingfisher, Okla. (4): There is about corn enough here to supply home demand. Weather is pretty cold.

Enid, Okla. (4): Some corn being shipped but it should all be held for local consumption.

Geary, Okla. (2): Not moving to terminal markets. Good demand from country points.

Oklahoma City, Okla. (5): Corn all being consumed within state. Farmers selling freely at present prices.

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grain from the principal ports of the United States to foreign countries during the week ending Jan. 10, 1925 (000 omitted):

Articles and countries.	Week ending Jan. 10, 1925.	Jan. 12, 1924.	Since Jan. 10, 1924.

FROM MONTANA.

W. L. Robbins of Kremlin sold a carload of Early Baart spot wheat at \$2

per bushel, f. o. b. Kremlin. This is believed to be the top price for 1924 spring wheat in Montana.

According to advices from Great Falls, the Columbus pool, representing portions of the wool-clip in Carbon, Stillwater and Sweetgrass counties, have sold to Silbermann & Co. of Chicago, the 1925 wool on 60,000 sheep, or about one-half a million lbs., for future delivery at 50c per lb. and \$1 a head down, without interest, upon the contract.—Lauzier, Wolcott & Co., Butte, Mont.

LATE FIRES.

Among fire losses over the week end are the following:

Zacker Milling Co., DuQuoin, Ill.; total loss of \$25,000 on Jan. 19.

E. C. Varney Flour Mills, South Lineville, Mo.; total loss of \$8,000 on Jan. 18.

Canadian Mill & Elevator Co., Banner, Okla.; total loss of \$5,000 on Jan. 17.

H. Fose Grain Co., Russell, Kans.; a small loss on Jan. 13.

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range of cash prices for grain as mentioned in the leading markets of the country for week ending Jan. 17:

WHEAT—	CHICAGO.	ST. LOUIS.	KAN. CITY.	OMAHA.	MILWAUKEE.	M'POLIS.
No. 2 red	193	@200½	204	@210	199	@204
No. 3 red	176	@197½	202	@206	196	@202
No. 2 hard	181½	@188	181	@185½	173	@196
No. 3 hard	175½	@187	172	@195
No. 1 north	172	@195
No. 2 north	171	@176
CORN—						
No. 3 mixed	120	@122½	123	@127	117	@120½
No. 4 mixed	116	@120½	118	@120	116½	@118½
No. 5 mixed	109	@115	115	@118½	107	@115

Minneapolis: Corn—No. 3 yellow, \$1.23 @ 1.30½. Oats—No. 2 white, 55½ @ 56½c; No. 3 white, 54½ @ 55½c; No. 4 white, 52¼ @ 54¼c. Rye—\$1.46½ @ 1.49½. Barley—79 @ 93c. Flaxseed—\$3.09 @ 3.16½.

Terminal Markets

MILWAUKEE.

D. K. Steenberg, Correspondent.

Shipments for the week were 158,600 bus. oats, 83,848 corn, 74,000 barley, 42,250 wheat, 25,670 rye; total 384,368 bus., against 452,675 the preceding week and 513,483 a year ago.

Receipts for the week were 175 cars barley, 183 corn, 140 oats, 22 wheat, 27 rye, 10 flax, 17 miscellaneous; total 574 cars, against 450 the week before, 426 a year ago and 907 in 1923.

Bentley Dadmun of the Dadmun Co. at Whitewater, Wis., was a visitor in Milwaukee last week attending the annual meeting on Thursday of the Dadmun-La Budde Co., operators of a feed warehouse at North Milwaukee.

S. M. Eggleston, associated in the F. J. Phelan & Co., this city, was elected to membership in the Milwaukee Chamber of Commerce at a meeting of the board of directors of that organization which was held on Tuesday, Jan. 13.

Price movement generally continued upward in the Milwaukee market during the past week and wheat closed 5@9c higher for the period, corn 4@5c, barley 1@2c, rye 4@5c, and oats unchanged. The movement was larger and the demand generally good.

Milwaukee milling output last week consisted of 6,800 bbls. as compared with 5,200 the previous week and 3,500 last year. Receipts were 15,700 bbls. as compared with 32,870 last year and shipments were 22,570 bbls. as compared with 21,860 last year.

Regular January meeting of the Milwaukee Flour Club will be held at the Milwaukee Athletic Club at 6:30 p. m. on Wednesday, Jan. 28. The meeting was postponed to that date so as to give the members of the Wisconsin State Millers' Ass'n, who will be in session during the morning and afternoon Jan. 28 at the Hotel Pfister, a chance to attend.

Visitors at the Milwaukee Chamber of Commerce during the past week included August Kroehne of Grafton, Wis., Joseph Straub of Lima, Wis., H. and M. Hanovitz of Mosinee, Wis., George Moody and E. C. Howard of the Weyauwega (Wis.) Milling Co., Curtis Richardson of Oconomowoc, Wis., V. Follett of Coloma, Wis., F. J. Soellerm of South Milwaukee, Wis., J. F. Besley of Planwell, Mich., A. D. German of Richland Center, Wis., David Rosenheimer of Kewaskum, Wis., William Schissler of Sheboygan, Wis., Henry Lawrentz and Thomas Wilson of Hartland, Wis., and M. E. Grant of Minneapolis, Minn.

Clifford D. Thorsen, traveling representative with the consignment department of the Froedert Grain & Malting Co., this city, has severed his connection with that firm and is now associated with the J. M. Riels Co., one of the oldest and largest institutions operating in the Milwaukee market. Mr. Thorsen will make his headquarters at Fort Dodge, Ia., and will do a general consignment and to-arrive business, traveling in the Middle West. Prior to his connection with the Froedert company Mr. Thorsen was associated with the Updike Grain Corp. for seven years. He is well liked by the trade in Iowa and Minnesota among whom he is well acquainted.

The annual Green Bay (Wis.) Hay and Grain Show, which was held this year under the direction of J. N. Kavanaugh, Brown county agent, closed its three-day session at the American Legion building on Wednesday, Jan. 21. Merchants of the city co-operated to the fullest extent with the committee in charge and besides offering a premium list that proved very attractive to exhibitors, they made it possible for every visitor at the show to win prizes ranging in value from \$1 to \$5. Entertainment features on the program included an address by J. P. Riordan of the Wisconsin Manufacturing Ass'n at Madison, Wis., and one of the most popular and widely known farmers in the state, selections by the Green Bay high school's band, and drawing for prizes.

The final 1924 report of the federal government on the clover seed yield reveals that Wisconsin sustained the greatest decrease in 1924 as compared with 1923 of any state listed. In 1924 Wisconsin's yield

was 94,000 bushels, a 50 per cent reduction from the 1923 yield of 188,000 bushels. In 1923 Wisconsin was the greatest clover seed producing state in the nation but last year Ohio ranked first and Wisconsin fifth.

Carl Houlton, manager of the grain department of the La Budde Feed & Grain Co., John Murphy of the Cargill Grain Co., Edward Hiemke of the L. Bartlett & Son Co., and A. L. Flanagan of the Fraser Smith Co. were among Milwaukeeans who attended the Iowa Grain Dealers three-day convention which closed at Fort Dodge on Wednesday, Jan. 21. Mr. Houlton is visiting the La Budde branch offices at Spencer and Algona, both in Iowa, en route home.

Leonard J. Keefe—New Firm.

Announcement has been made by the Froedert Grain & Malting Co., this city, that it will discontinue operation of its consignment business on Jan. 31. The change is being made, according to announcement, so as to permit the company to concentrate its efforts on its larger operations. The cash grain and malting departments will be maintained as in the past and the company will continue to operate its Milwaukee, Winona, Minn., and Red Wing, Minn., elevators. Leonard J. Keefe, manager of the consignment department of the Froedert company, will take over its business and operate independently and under his own name commencing on Feb. 1. Mr. Keefe has been a member of the Milwaukee Chamber of Commerce for more than twenty years and during that time has been associated with several of its leading firms. For two years prior to his connection with the Froedert company Mr. Keefe was resident vice-president of the Updike Grain Corp. During the past five years he has been a director of the Chamber. Mr. Keefe's connections both within the Chamber and among the shippers on the various roads leading into Milwaukee are excellent as he spent five years of his twenty in the grain business on the road and he is widely and favorably known among the trade of this territory.

DULUTH.

S. J. Schulte, Correspondent.

Application has been posted for the transfer of the Duluth Board of Trade membership of C. C. Baker to Robert Hanson of the Occident Terminal Elevator Co.

Julius H. Barnes, of the Barnes-Ames Co., was a visitor on this market during the last week, having come here from his firm's New York office to study conditions. He expressed himself as bullish regarding the future of the grain markets during the coming year and the outlook for business generally. In his view the present course of the wheat and other grain markets is fully warranted by the world's supply and demand conditions.

The Russell-Miller Milling Co.'s interests here are continuing to keep this market stirred up through their purchases of spring wheat and durum. They are claimed to have contracted for considerable grain for shipment at the opening of lake navigation through the Occident Terminal elevator. Representatives here of other eastern milling interests have also been in the market more actively during the last few months than in any other year in the history of the trade on this market.

Stocks of all grains in the elevators at Duluth and Superior now aggregate 26,266,000 bushels, an increase of just 266,000 bushels during the week. Wheat stocks aggregate 9,290,000 bushels, a decrease of 32,000 bushels during the week. On account of the light movement of grain from the country millers have been finding it necessary to take some wheat from the elevators to keep them going. Millers have been good bidders for the better grades, as high as \$2.17½ being paid by a miller for a car of amber durum running high in price.

Movement of oats from over western Minnesota points this way is continuing in fair volume and supplies of that grain in the elevators have reached a new high at 11,534,000 bushels. The spot basis on oats on this market now stands at 6¼c under the Chicago May price and from advances being received receipts of them are expected to be maintained at a heavy aggregate during the next few weeks. Some of the elevators that have been taking in oats to the greatest extent this season are getting plugged up so that they are not in position to bid for anything. As an example of the way storage conditions are being curtailed, an official of one of the houses with a capacity of 3,500,000 bushels asserted that it had space for only around 300,000 bushels more grain available.

Flour Trade.

Millers reported a slow flour trade on this market lately, with jobbers and bakers

confining their orders to an immediate requirement basis as a result of the current high level of prices. Patents were advanced 10c during the week, making closing prices in carlots at the mill as follows: Family patent, jute, \$9.25; bakers' patent, jute, \$9; first clears, \$7; second clears, \$5.50.

NEW YORK.

J. M. Nugent, Correspondent.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: R. Mair and B. A. Lockwell, both of Chicago; W. W. Hall and R. W. Hall, both of Winnipeg; C. F. Brown of Boston; C. H. Weir of Toronto; Charles Williamson of Buffalo; G. Grace of Philadelphia, and T. Lockwood of Montreal.

Late in the week there was an improvement in the foreign demand for wheat, and despite the advancing prices for futures a fair business was consummated. Export sales for the week amounted to around five million bushels of all varieties of wheat. Most of the business comprised durums and American winters, but there were also some sales of Duluth spring wheats and some scattered business in Manitobas. The continent was the principal buyer.

Flour Situation.

New York, Jan. 17.—The main features in the flour market during the past week were the advances from both the northwestern and southwestern milling centers of an increased demand for cash wheat. Locally no change in milling conditions occurred, practically all mill agents reporting routine operations.

In export circles another steamer was chartered for Russian flour, this being on old business. Late in the week there were advices of Germany and Finland buying both wheat and rye flours at practically the top levels of the season.

Spring patents were quoted around \$9.40 @10, soft winter straights \$9@9.25 and hard winter straights, \$9@9.50 per 196 lbs.

CINCINNATI.

George Mosbacher, Correspondent.

Frank Maguire, who spent several weeks at Asheville, N. C., following the death of his wife, has returned to his duties.

The annual election of the Cincinnati Chamber of Commerce was held Wednesday with greater activity and enthusiasm than has been manifested in the chamber's elections in many years. There were several independent candidates who were elected.

Total stocks of grain for last week and week previous in Cincinnati elevators are as follows:

	Jan. 16, '25.	Jan. 9, '25.
Wheat	256,135	261,907
Corn	144,510	119,543
Oats	230,898	272,508
Rye	3,142	4,292

Charles B. Nieman of Nieman & Nieman, well known flour and feed dealers, with offices in the Provident Bank Bldg., who is visiting the firm's mill connections in an extended trip throughout western states, attended the funeral services of C. A. Hiebert, president of the W-R Milling Co., whose death occurred at McPherson, Kan., last week. Mr. Nieman en route home will call on the milling trade in St. Louis, Chicago, Indianapolis and other cities.

Dr. C. H. Bailey, head of the Dept. of Chemistry of Minnesota, has been in Cincinnati this week discussing the technical processes of yeast fermentation in the interests of the grain and baking industry. Dr. Bailey says that millions of dollars could be saved annually by bakers in the United States if a method for cutting the time of yeast fermentation in bread making could be devised. He is experimenting in an effort to formulate such a method at the chemical laboratories of the Strietmann Biscuit Co.

The annual election for directors of the Grain and Hay Exchange was held Thursday on the Exchange floor without any unusual demonstration and resulted in the election of John De Molet, George A. Dietterle, Frank L. Watkins, Harry E. Niemeyer and Frank J. Currus. President F. L. Watkins read his annual report, which was printed in part in last week's issue of the Price Current-Grain Reporter. The annual statement of Executive Secretary D. J. Schuh, Treasurer Ralph H. Brown and Secretary Elmer H. Helle were also read. The election of directors also included a vote by secret ballot on a new constitution and by-laws which were carried unanimously and will become effective Feb. 1st. The principal changes in the new constitution will be in the system of government. The power will still be vested in the Board of Directors, but the Executive Committee will have authority to act in the majority of cases. The plan of arbitration also will be changed. The Arbitration Committee will be comprised of three members and will not be limited to

members of the Exchange. The committee consisted of seven members before. The first meeting of the new board of directors will be held Tuesday, Jan. 27, when officers will be chosen to serve for the ensuing year. John E. Collins, Jr., as notary, will serve in the new directors. The services of Frank L. Watkins, who served as president the past year; John De Molet, ex-president, and Harry E. Niemeyer, director, whose terms expired this year, were honored by re-election.

Cash Markets.

The cash wheat situation here was quiet but firm with scarcity again extending premiums over the option advances. The demand, however, was only fair and mostly confined to January contract shipments to mills who have flour sales hedged against them. Elevators absorbed most of the arrivals. No. 1 red winter, \$2.09@2.10; No. 2, \$2.07@2.08; No. 3, \$2.04@2.06; No. 4, \$2@2.04; No. 5, \$1.95@2.

Corn options received support largely because of higher wheat, but the advances were not fully reflected in the local cash market, which was again inclined to drag with low grades especially difficult to dispose of. Receipts were materially increased and were in excess of the corresponding time last year. There was some shipping demand from millers and feeders, but the best buying was almost entirely from local sources. Top grades continued very scarce and in good demand, and No. 3 sold easily at 2@4c premiums over No. 4.

No. 2 white, \$1.31@1.32; No. 3, \$1.29@1.30; No. 4, \$1.24@1.26; No. 5, \$1.22@1.23; No. 6, \$1.12@1.16. No. 3 yellow, \$1.30@1.31; No. 4, \$1.26½@1.28; No. 5, \$1.22½@1.24; No. 6, \$1.14@1.17. No. 3 mixed, \$1.28@1.29; No. 4, \$1.23@1.24; No. 5, \$1.20@1.22; No. 6, \$1.12@1.16; sample grade, 95c@1.15.

Scarcity kept the oats market firm. The demand was only fair for ordinary but urgent for No. 2 white suitable for seed, for which premiums were extended. No. 2 white, 65@66c; No. 3, 63@63½c; No. 4, 61@63c. No. 2 mixed, 62½@63½c; No. 3, 60@61c; No. 4, 58@60c.

LOS ANGELES, CALIF.

C. G. White, Correspondent.

Joseph Powers of Oxnard, Calif., was a visitor on the floor of the Exchange today as a guest of Balfour, Guthrie Co.

The Huffine & Co. announce that they will open new office quarters in the central manufacturing district on or about the first of February.

R. F. Yowell, representing the Wallingford Bros. of Wichita, Kans., has been in the city several days on business and will leave for home the latter part of the week.

G. F. Norris, formerly connected with the Midland Elevators at Idaho Falls, Ida., has accepted a position as assistant traffic manager of the Great Western Milling Co.

G. C. Keeney of the San Diego Poultry Ass'n, San Diego, Calif., motored up from the southern city last week. Mr. Keeney reports business in his city as being exceptionally good for this time of year.

J. E. Huffine of the Huffine & Co., will leave tonight for Kansas City. Mr. Huffine expects to be absent from the city for the next 30 days during which time he will visit Salt Lake City, Denver, Omaha and Kansas City.

C. G. Flammer, representative of the S. C. Dunlap Co. on the floor of the Exchange, was operated on for tonsillitis this week and is reported to be well on his way to recovery and we hope to see him back on the floor again in the very near future.

O. W. Dillinger, federal inspector of the Los Angeles Grain Exchange, spent two days last week in Calexico, Calif., making inspections on wheat. Mr. Dillinger states that conditions in the Imperial Valley are very good and that the weather at this time of year is ideal.

E. W. Thompson of the Pasadena Milling Co., Pasadena, Calif., was in the city one day this week on business and while in the city called on the Exchange. Mr. Thompson reports that his mill during December of last year increased its business just double and that at present it is working two nine-hour shifts.

Miss Gertrude Brown of the Balfour Guthrie Co. has tendered her resignation to become effective Feb. 1. We have been unable to learn the reasons for this resignation but we have strong suspicions to believe that she is about to take a position as life partner with a handsome young man whom we have seen her with a great deal this winter.

Cash Markets.

Having again settled down to business after the holidays the market has taken on a much firmer tone in nearly all commodities of grain, mill feeds and hay. The receipts of grain for the past week have been a little better than for the corresponding week of 1924, and prices for nearly all commodities are very firm to a substantial advance on some of the popular grains and feeds. run is selling at \$42 per ton, \$1 advance over the last week. Kansas bran, \$40. Alfalfa meal, medium ground, shows a decline of \$1 per ton, this being accounted for by green pastures now being stocked to some extent. Alfalfa molasses meal, mixed, \$31 per ton. Whole grains are showing a slight advance. No. 3 yellow corn is easily quotable at \$2.63 per hundred. No. 2 western red wheat is being offered at \$3.15, with \$3.12½ bid. No. 2 feed barley is selling at \$2.37½@2.40 per hundred-weight. White oats are again coming into the market and are being offered at \$2.42. Cottonseed meal has shown an advance of \$2 per ton and is now selling at \$44. There has been no change in rolled barley during the past week and the best grade is selling at \$53 per ton while the inferior grade, mixed slightly with other grain and off in color, is selling at \$50 per ton. There has been a good demand throughout the week for nearly all commodities and there remains but few cars on track at the week end.

Condition of the hay market has taken an unexpected turn upward, and No. 1 alfalfa has advanced \$1 per ton within the last few days and is now safely quotable at \$27 f. o. b. cars this point. No. 2 at \$25 per ton. Grain hay remains practically the same. No. 1 barley hay selling at \$28 and No. 1 oat hay at \$31 per ton. Dealers advise that there is a strong demand for alfalfa hay at the present time and they are having some trouble in securing a sufficient amount of this commodity to supply the trade and there are practically no cars left on track this Saturday night.

TOLEDO.

S. M. Bender, Correspondent.

Receipts of grain for last week were 48 cars of wheat, 74 cars of corn, 47 cars of oats and 3 cars of rye. Total, 172 cars.

Kent Keilholtz took his organization out to the Toledo Club for dinner last Monday night and completed the evening with a box party at Keith's theater.

Flour output of Toledo mills for the past week was 33,800 bbls., equal to 81 per cent of capacity. The week before it was the same as last week and a year ago was 25,600 bbls.

Among the visitors on the exchange floor the past week were Phil Horn, Monroeville, Ohio.; Bill Pickard, Bowling Green, Ohio.; Del Lloyd and son of Waterville, Ohio, and Sam Rice, Metamora, Ohio.

Mr. and Mrs. David Anderson and Mr. and Mrs. K. D. Keilholtz left last Saturday for an ocean trip to Cuba, Porto Rico and the Panama Canal Zone. They will be gone about six weeks and return via the same route.

The Michigan State Millers' Association will hold their annual meeting at the Porter Hotel, Lansing, Mich., Jan. 27-28. A closed meeting for millers will be held Tuesday evening and the open meeting the following morning.

The annual dinner of members of the exchange will be held at the Toledo Club the evening of Jan. 21. Many out of town firms are expected to be represented and a fine program of speeches and fun has been arranged.

Reports received from the country indicate that farmers are holding their remaining wheat for \$2 or better. The present weather is not considered good for new wheat as it is freezing and then thawing in most sections of northern Ohio. Country flour and feed business is thriving for this time of year.

Toledo firms all enjoyed a good year and are ready for another with prices on the up grade and demand for grains continuing active. Corn has been the only laggard lately and this is considered due to the heavy primary movement at this time. The milling demand for wheat is good and flour trade shows improvement. Feeds have also been moving fairly well with bran leading in amount of sales.

MEMPHIS.

George Williamson, Correspondent.

J. L. Anderson, of the Afro-Corn Milling Co., St. Louis, and C. J. Ward, of Peoria, Ill., were exchange visitors Thursday.

M. W. Krehbiel of the Mound Ridge, Kan., Milling Co., was a recent visitor at the office of the Dixie-Portland Flour Co.

Receipts of grain and feedstuffs were larger here during the past week than in a long time, indicating preparations for better business. Corn receipts were 277 cars, oats 191, hay 112 and alfalfa meal 31.

Frank Kammerdiener of the Garrison Milling Co., Oklahoma City, was registered on 'change by E. W. Sommer on Wednesday.

J. F. Bess, feed merchant of Gastonia, N. C., and J. H. Allen, Greenville, S. C., representative of a local concern, were registered as visitors at the Merchants Exchange Saturday.

The first meeting of the new board of directors of the Merchants Exchange was held Saturday and one of the things done was to re-elect for the seventh successive time Walter J. Fransioli to be secretary-treasurer. Others re-elected were M. B. Houseal, chief of the inspection department; James B. McGinnis, grain and hay traffic commissioner, and John S. Hampton, official auditor. President Sim F. Clark named the following committees: Finance, S. T. Pease, J. J. Wade, Sr., and W. P. Battle. Membership, J. B. Edgar, W. R.

Smith-Vaniz and L. B. Lovitt. Inspection department, J. B. Edgar, S. E. Rison and C. S. Kenney. Traffic department, L. P. Cook, W. R. Smith-Vaniz, John M. Trenholm, S. E. Rison and E. E. Anderson. The retiring president, Vernon L. Rogers, was given a vote of thanks for his efficient administration. Other standing committees will be named at a later meeting.

Business is slowly improving in grain and feedstuffs, but buying is only of hand to mouth sort yet. The trade expects it to be thus for the season, as prices are so high and financial conditions are not of the best. During the week white corn became relatively scarce and for a day or so it sold practically as high as yellow of the same grade, after having been several cents lower. On Saturday cash quotations were: \$1.33 for 3 white, \$1.29 for 3 mixed and \$1.35 for 3 yellow. Oats have been firm, but are not up in proportion to corn. Cash 3 white is quoted at 65½¢@66¢. Track 3 white kafir is up to \$2.15 and 3 yellow milo at \$2.25.

BALTIMORE.

Robert C. Neu, Correspondent.

Stocks of grain in Baltimore elevators on Jan. 15 totaled 10,830,000 bushels, and with the quantity in cars on tracks in the railroad yards this figure would easily reach a million bushels more.

Henry A. Lederer of Lederer Bros., grain commission merchants of this market, sailed from New York on Jan. 19 on the steamship "California" on a four months' cruise around the world.

Ernest J. Sponseller of Englar & Sponseller, millers of Westminster, Md., who, with his wife, was painfully injured in an automobile accident late in November, has completely recovered and on 'Change here again last week. Mrs. Sponseller is still confined to her bed.

The local hay market has shown a decidedly firmer tone during the past two weeks due to the fact that the snow covered roads completely cut off the receipts of nearby hay by motor trucks, and this has forced the trade to visit the railroad terminals for its supplies.

Among the out-of-town visitors on the floor of the Baltimore Chamber of Commerce last week were W. C. Reilly, Charles-town, W. Va.; W. B. Bell, Federalsburg, Md.; E. Pennington, Washington, D. C.; C. R. McClave of the Montana Flour Mills Co., Lewiston, Mont.; R. C. Creager of New York.

Walter A. Frey, a well known member of the Baltimore Chamber of Commerce and vice-president of the Baltimore Flour Club, was tendered an "appreciation dinner" by the executive committee of the "Quality-Service Stores" (an organization of retail grocers of this city) at the Emerson hotel on the evening of Jan. 14. Mr. Frey is president of Frey's Associated Houses, the largest wholesale grocery establishment in Baltimore.

In order to correct any possible misunderstanding concerning the status of the Baltimore market, now that all three of the leading trunk lines having their termini here have placed an embargo on all rail shipments of grain to this market because of temporary accumulations at their export elevators, it might be well to state that the gates to Baltimore have not been tightly closed to further business on account of these embargoes; on the contrary, permits are being issued by the railroads to bring grain forward in all cases where the name of the steamer in port or near at hand to take the grain out can be furnished. In this connection it might also be added that stocks here promise to be sharply reduced in the next few weeks by the withdrawals of grain now going aboard four steamers loading and others to follow.

Unusual conditions require unusual measures for their relief. This is the maxim of Superintendent J. A. Peterson of the Western Maryland Grain Elevator at Port Covington, this city. The heavy run of grain to this market during the past six weeks, greatly taxing our elevator storage room, has resulted in hundreds of cars being strung out on the tracks in the railroad yards. These cars all have to be sampled and the individual sample bags carried to the laboratory to be analyzed. Being beyond human capacity to lug all of these samples from distant points in the railroad yards to the elevator laboratory, Mr. Peterson hit upon the bright idea of acquiring a small donkey, which the elevator employes named "Rudy," to help out in relaying the sample bags of grain from the yards to the elevator laboratory. This donkey has been placed at the disposal of the grain samplers and inspectors who now tie their sample bags in pairs and throw them across "Rudy's" back. Everything goes well until some engineer with a train of cars gets ready to pull out of the yards and blows the engine whistle or rings his bell. Having been reared in an atmosphere of quiet, "Rudy" can't stand an engine whistle, and several times this week ran away and caused all kinds

of excitement. Superintendent Peterson is now at work trying to invent ear muffs for the donkey to shut out the noise.

OKLAHOMA CITY.

W. F. Kerr, Correspondent.

The Hablequah Mill & Elevator Co. has amended its charter and reduced its capital stock from \$21,000 to \$15,000.

The Rosenbaum Grain Corporation of Chicago has notified the Secretary of State of its dissolution as a corporation.

The Hacker Flour Mills, Jefferson, Okla., and Ballard & Palmer, Fairfax, Okla., have applied to the feed bureau for permits to sell millfeeds.

Flour mills and grain elevators will have to pay an occupation tax in Oklahoma if a mill introduced in the legislature by Representative Thorn of McCurtain county is adopted.

A newly patented device for handling grain at the elevator, after the fashion of a fanning mill, was displayed at the W. B. Johnston elevator at Enid recently by Philip Schlund, inventor.

W. H. P. Trudgeon of Oklahoma City, who was the founder of the Purcell Mill & Elevator Co., has announced that he is an applicant for appointment as United States marshal of the western district of Oklahoma.

A state charter has been granted to the Tishomingo (Okla.) Milling Co., capital stock \$2,500; incorporators, O. P. Trammell, L. C. Burris and W. M. Lucas, all of Tishomingo. Mr. Trammell, who is general manager, has made application to the feed bureau of the state board of agriculture for a permit to sell milled feeds in the state.

Flour millers reported that a promised revival in flour trade failed to materialize because of high mill prices being out of line in the countries interested. Short patent soft wheat flour was quoted here at \$10.50 per bbl. and hard wheat short patent at \$10.10. Domestic trade was normal and mills operated at about 65 per cent of capacity. Millfeed demands continued heavy and millers look for a shortage and higher prices in February.

The failure or refusal last year of a majority of the leading milling and elevator concerns of the state to take advantage of the bonded warehouse law relating to grain storage has caused Senator Harry Cordell of Tillman county, a leader of the farm group in the upper house of the legislature, to introduce a bill making it imperative that the law be complied with under certain conditions. The bill provides that it shall be unlawful for any person, firm or corporation to accept or hold for storage any grain, other than that self owned, in any elevator, mill or warehouse longer than five days without first having complied with requirements of the state bonded warehouse act. The bill assesses a minimum fine of \$100 for a violation provides also for a prison sentence.

NEW ORLEANS.

M. L. Davis, Correspondent.

R. C. Jordan, superintendent of the Central Elevator & Warehouse Co., is on a business visit to Chicago.

Stocks in elevators as of today, Jan. 17: Wheat, 1,864,000 bus.; corn, 465,000 bus.; oats, 256,000 bus.; rye, 36,000 bus. Cars on track: Wheat, 2; corn, 1.

Price of blackstrap molasses has been advanced to 15c per gallon f. o. b. tank cars New Orleans; light blackstrap is quoted at 16c. Supplies are nearly exhausted.

A. Horcasitas has been appointed commercial agent of the National Railways of Mexico for the territory comprising Alabama, Louisiana, Mississippi and Tennessee. Mr. Horcasitas has opened offices in the Whitney Central Bank Bldg.

Old crop blackstrap molasses is very firm at 14½¢@15c per gal. f. o. b. tank cars New Orleans for standard, and 16c for light blackstrap. Supplies are very meagre. Prices on new crop blackstrap for March-April shipment are now being quoted at 13c for standard and 14½¢ for light.

The Southern Pacific Steamship Lines have just added a palatial steamer, the Bienville, for service between New Orleans and New York. The Bienville is the finest and largest of the Southern Pacific fleet and was launched at Tacoma, Wash., last July and arrived here Jan 8th, completing her maiden voyage.

A new record was made this week when the largest cargo ever shipped from a gulf port was loaded on the Dutch S. S. Tjibesar. The cargo consisted of 501,000 bus. of No. 2 hard wheat destined for Rotterdam, Holland. The "Tjibesar" is owned by the Java-China-Japan Line of Amsterdam; is 501 feet long and 14,600 dead weight tons. The local agents of the vessel are Texas Transport & Terminal Co.

Stocks in elevators as of today are: Wheat, 1,878,000 bus.; corn, 518,000 bus.; oats, 272,000; rye, 36,000. Cars on track —Wheat, 2; corn, 8. Export shipments

tic rates on grain and grain products from west side points to New Orleans and Mississippi Valley points. St. Louis, Cairo, and Memphis have been granted preferential rates which enables them to ship into southern and southeastern territory cheaper than the rates from New Orleans to the same territory. A determined fight is being made by the grain interests of New Orleans to prevent this discrimination.

DENVER, COLO.

F. R. Houlton, Correspondent.

Receipts of grain at Denver the past week were 265 cars.

Jack Kratke, elevator foreman of the Crescent Flour Mills, passed away last week and J. F. Kelly has been appointed foreman.

The Denver market has had a very prosperous year. Our total receipts for the calendar year of 1924 were 10,009 cars, being an increase of about 1,500 cars over 1923. This is due to the gradual enlargement of our territory and to the large demand in the western states.

The Consolidated Mills broadcasted a very interesting program from the radio broadcasting station at Hastings, Nebr., last night. Mr. Kinney, the president, delivered an extremely inspiring talk outlining the processes of flour milling, the marketing of wheat and a general outline of ordinary marketing which contained much valuable information for the producers. This talk was heard in all of the western states and is a subject of much comment this morning.

FORT WORTH, TEX.

G. E. Blewett, Correspondent.

Weather.

Weather in Texas the past two weeks has been seasonable, and the drought continues except in some sections where rain and some snow has fallen, but of insufficient amount to be of material benefit. While no complaint is noted so far, it is apparent that wheat needs rain badly, but of course it can hold on during the winter providing sufficient moisture comes in the growing period. Just what damage has resulted by the severe freeze during Christmas has not been determined but it is safely estimated that 15 to 20 per cent loss has resulted, which may be increased later on.

Winter oats were, of course, entirely killed out and while some acreage will be planted in spring oats the total acreage in next year's crop will be sharply reduced over previous years.

Business.

Business has been phenomenally heavy over the entire state the past two weeks with a steady demand, especially for country wheat and corn, but the receipts of these have been insufficient to supply the demand and elevator stocks of all classes have been sharply reduced. Mills report an active flour demand and while some of the small mills are reduced to daylight run, the larger mills report full-time operation with flour sales at \$1.80 per barrel basis high patent. Shipping orders are being received on old bookings, which are gradually being cleaned up, and as new business comes in mills are showing an inclination to purchase wheat accordingly.

Wheat.

Wheat receipts in Fort Worth the past two weeks have been extremely light and premiums have widened over the bids, but this does not induce sufficient offerings from the country to supply the demand, and elevator stocks have been called on to a large extent to fill requirements, and a great many mills having wheat in storage at Fort Worth have ordered their wheat shipped out for grinding.

Red wheat and mixed, 75% or more red wheat, has been very active owing to the high premiums over hard wheat, which has caused the mills to reduce the percentage of their mixture, and most of their purchases the past two weeks have been confined to hard wheat owing to the fact that Kansas City is quoting very cheap prices on hard wheat. There has been a large amount of hard wheat worked from Kansas City to the Texas mills, but they continue to buy all the Oklahoma and Texas hard wheat offered at a premium from 1 to 2 cents a bushel over Kansas City prices.

Based on today's (Jan. 17) market the following values prevail here, basis delivered Texas common points and Texas group 3 points: No. 2 soft red winter wheat,

\$2.15; No. 1 mixed, 80% red, \$2.12; No. 1 mixed, 65% red, \$2.08; No. 1 dark hard, \$2.03; No. 1 hard, \$2.01; No. 1 durum, \$1.98.

Corn.

Receipts of corn have been rather light and country offerings disappointing and prices here sharply higher with an active volume of trading, especially in mixed and yellow, while the demand for white has been steady and the premiums for white over the option has been somewhat reduced, prices here gradually working to the terminal market basis, and it is believed that in the near future corn will be shipped here from the terminal markets and based on today's market No. 2 white corn is worth \$1.41, No. 2 yellow \$1.40, No. 2 mixed \$1.37 group 1, while some No. 3 could be worked at a cent a bushel less.

There has been some stocks being accumulated in No. 2 grades of corn for April and May shipment at prices that almost reflect a full carrying charge basis.

Owing to the high prices on corn products the feed dealers report a very slow demand for their products, as other commodities can be bought cheaper.

Oats.

Receipts of oats the past two weeks have been very light and country offers extremely slow and the premiums are holding steady and an active demand for deferred shipments, and as most re-sellers are about cleaned out it is expected that a better demand will soon appear.

Basis Texas delivered Group 1, No. 3 white oats are worth 70½c January, 71c February, 72c March.

Red oats are moving very slowly with light receipts, as farmers are feeding them to the stock, and No. 2 or better red oats are selling at about a cent a bushel premium over white oats prices.

Milo Maize and Kafir.

Milo maize and kafir receipts the past two weeks have been very light and owing to the continued inclement weather country offerings have been very slow with an active demand which results in a sharp advance in values with bids being raised daily. There has been a good demand from the out of state points and some dealers report heavy bookings for February shipment, and today No. 3 or better milo is worth \$2.13, No. 3 or better white kafir \$2 delivered Texas common or Texas group 3 points, which is equal to 5 cents a hundred less group 1.

Maize and kafir heads receipts have been very light and an active demand, but prices have advanced sharply with a ready market for all offered and today sound, dry maize heads are selling here at \$37 per ton. Kafir heads \$34 per ton basis Texas delivered common or group 3 points.

Cane Seed.

Cane seed receipts have been rather disappointing and country offerings light, with an active demand prices have advanced sharply, but all offered find a ready sale and today country run red top is selling at \$2.35. Black amber is selling at around \$2.25 per hundredweight delivered Texas common or group 3 points.

News.

Fort Worth Elevator Co. have increased their capital stock to two million dollars and announce that in the near future they will make a large addition to their storage capacity at Fort Worth.

Charters were issued this week to the Panhandle Milling Co. Incorporators: J. Perry Burrus, McKinney; G. Caldwell, McKinney, and Charles Newman of Fort Worth. They will start construction at once and will have a 300,000-bushel storage capacity mill at Plainview, Tex.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending Jan. 17 were: Wheat, 517,967 bushels, and barley, 33,311 bushels.

Receipts for the week ending Jan. 17 were: Flour, 54,676 barrels; wheat, 587,385 bushels; corn, 11,817 bushels; oats, 18,772 bushels; rye, 1,907 bushels; barley, 33,311 bushels, and 360 tons of feed.

The following out of town visitors were registered at the Commercial Exchange: H. M. Smedley, Bridgeton, N. J.; E. S. Hann, Swedesboro, N. J.; F. D. Winter, Chicago; W. R. Kitchner, Bridgeton, N. J.; J. R. Price, Warwick, Del.; E. C. Brant, Long Island, N. Y.; H. F. Reiser, Leesport, Pa.; J. S. Whittington, New York City; J. R. Eddington, Federalsburg, Md.; W. H. Strickler, Lebanon, Pa.; M. D. Smith, Minneapolis.

Nominations for officers and directors of the Commercial Exchange were made on Saturday, Jan. 17, and are as follows: President, Hubert J. Horan, present incumbent; Geo. M. Richardson, for vice-president, and Emanuel H. Price, for treasurer, present incumbents, also had no opposition. The following nominations for directors to serve for two years, six to be elected: E. R. Rockafellow, B. C. Dickenson, Howard F. Brazer, Daniel J. Murphy, Albert L. Hood, Walter K. Woolman, E. H. Cooke, Jesse L. Shephard, Charles Devlin,

Philadelphia Flour Market.

Philadelphia, Jan. 17.—The flour market continues firm in response to the sharp advances in wheat and prices on desirable brands are higher. Buyers are not disposed to operate in excess of present wants and generally make up their supplies from resales which they are able to secure at slight concessions from current mill quotations, while the mills hold firm and are not making sacrifices in order to urge business. Receipts of flour during the past week were 54,676 bbls. We quote per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, western, \$8.75@9; soft winter straight, nearby, \$8.60@9; hard winter straight, \$9.40@9.60; hard winter, short patent, \$9.75@10.15; spring first clear, \$8.65@9.15; spring patent, \$9.65@9.90; spring short patent, \$10.05@10.25; fancy spring and city mills patent family brands, \$10.75@11.40. Rye flour, \$8.45@8.95 per bbl. in sacks, as to quality. Buckwheat flour, \$4.25@4.50 per 98-lb. sack.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

W. T. Brooking of St. Louis was a visitor on the St. Joseph Grain Exchange the fore part of the week.

Receipts of corn and wheat at St. Joseph for the week ending Jan. 17 continued to materially exceed the corresponding figures of 1924. Offerings of wheat have been rather light and corn moderate. Oats supplies extremely light. Wheat prices advanced 7@9c on hard winters during the week and soft wheat 8@10c. Corn is 4@6c up for the week. Oats prices have shown little strength, and the demand appears to be only fair; prices today were unchanged to 1/2c under a week ago.

Visitors on the St. Joseph Grain Exchange during the past week included: H. A. Baker, Mound City, Mo.; J. D. Aherns, Corning, Mo.; N. S. Shannon, Kansas City; R. Stanton, King City, Mo.; T. D. Hudson, King City, Mo.; A. N. Jones, Beattie, Kans.; D. R. Scoll, King City, Mo.; J. P. McAuliffe, St. Marys, Neb.; P. Crews, Craig, Mo.; J. R. Lewan, Craig, Mo.; W. S. Gottschall, Union Star, Mo.; W. H. Swim, Severance, Kans.; J. G. Hinkle, Fortescue, Mo.; C. T. Watson, Stewartsville, Mo.; Benton Van Horn, Rea, Mo.; Arthur Mallen, Plattsburg, Mo.; J. M. Roberts, Hemple, Mo.; D. J. Garrahan, Frazier, Mo.; W. K. Kienzie, Leona, Kans.; Wm. Wells, Hopkins, Mo.; J. T. Baldwin, Buffalo, Kans.; R. I. Brown, city; Sherman Estes, Bolckow, Mo.; A. E. Rullman, city; C. H. Mette, Memphis, Tenn.

WINNIPEG.

Geo. H. Measham, Correspondent.

The end of the week has witnessed a somewhat reactionary sentiment prevailing in the grain trade. Close observers are inclined to the belief that the market is somewhat top heavy and while there is general belief in ultimately higher prices, the time has come to stand by and wait developments. Under the circumstances a trading market with \$1.90 as the pivotal point for May looks logical.

On Friday during the early part of the session there was considerable weakness and the price sank to \$1.90. There was, however, a quick recovery from this level and the bulk of the morning's business was transacted round \$1.92 while the close was strong with plenty of demand for wheat at \$1.92 1/2. If there are any genuine bears around they cannot be said to be making much headway.

Reports of the speeches of Mr. Hoey, M. P., have attracted considerable attention. The speaker's claim that the Canadian farmer has been able to secure from 8 to 15 cents a bushel higher price for his wheat than his United States competitor is not born out by the fact that for over six weeks No. 1 dark northern has been selling over the \$2 mark and Winnipeg No. 1 northern has never sold over \$2 on this crop. At the close on Friday Winnipeg No. 1 northern was quoted at \$1.92 and Minneapolis No. 1 dark northern at \$2.21 1/2.

The Sanford-Evans statistical service has issued a statement giving the estimated quantity of wheat in farmers' hands yet to market. On Jan. 9, 1925, on a basis of 245,306,000 bushels the government figures for the crop, the amount still in farmers' hands to come out is placed at 31,430,000 bushels or 15.7 of the year's total marketable. Last year 72,400,000 or 18 per cent and 44,700,000 or 14.5 per cent in 1923. In store and in transit Fort William and west 54,000,000 or 32.2 per cent of quantity already marketed. Last year 103,000,000 bushels or 31.2 per cent and 58,500,000 or 22 per cent in 1923.

The Globe Grain Co., Ltd., president and general manager, J. A. Robb, will from now on carry on a general commission and brokerage business dealing in grain, provisions, cotton, stocks, etc. The Globe has membership on the Chicago Board of Trade and connected with the Lamsons as its correspondents. J. A. Robb is well known

in Chicago and New York as well as in western Canada and is one of the most popular members of the Winnipeg grain trade.

KANSAS CITY.

T. J. Tanner, Correspondent.

The fund being subscribed by members of the Kansas City Board of Trade to honor the memory of those of the exchange who served in the world war now amounts to \$600.

The Dutch steamer Tjibesar, which took a record cargo of Kansas City wheat out of Galveston last fall, is credited with having set a new high mark at New Orleans, clearing with 501,000 bus.

P. W. Hinsen, a former member of the Kansas City Board of Trade, died Thursday night at Grand Island, Neb. Mr. Hinsen was the father of Guy W. Hinsen, a member of the exchange, and also of Hugh Hinsen of Jackson Bros. & Co.'s Kansas City office. He was 79 years old. Funeral services were held at the home, 1615 East Seventy-seventh street terrace, Kansas City.

E. J. Rall of Fort Worth, Tex., elevator man and grain dealer, who was in Kansas City Friday, said winter killing had been more effective in oats than in wheat, so far as Texas crops were concerned. He added that wheat stocks in Texas were holding out well, though mills were grinding heavily.

Asserting that Houston, Fible & Co., stock, bond, cotton and grain brokers, were unconsciously bankrupt three years before the failure, in 1923, J. W. Perry, trustee, has asked the federal court for permission to file a claim for the recovery of \$300,000 paid as income tax before the insolvency was declared.

Official reports from local mills to the Board of Trade show a total production of 5,218,021 bbls. of flour in Kansas City last year. This is an increase of 331,246 bbls. over the manufacture in 1923. Receipts of country flour were 689,325 barrels. Total shipments from Kansas City were 6,060,275 bbls.

Members of the Board of Trade will vote Jan. 27 on proposals of the directory to abolish the rules regarding trade in hay, alfalfa meal and provisions. These products are no longer subject to control by the exchange. An amendment to the rules regarding inspection and sampling fees on flour and grain will be submitted for approval.

Among the week's visitors at the Board of Trade were L. F. Gates, A. T. Martin, H. S. Ballard and E. F. Thomson, Chicago, Ill.; Max F. Orthwein, St. Louis, Mo.; F. C. Riebe, Minneapolis, Minn.; W. C. Van Horn and R. C. Moore, Hutchinson, Kan.; E. T. Wenzel, Bert Campbell and Ed Kelly, Wichita, Kan., and R. A. Hedding, Burlington, Colo.

Following the installation of officers of the Board of Trade for 1925, W. R. Scott was re-elected by the directors as secretary and transportation commissioner of the exchange. Others re-elected by the directorate were: W. H. Frazell, Jr., assistant secretary; H. F. Hall, treasurer; E. D. Bigelow, assistant to the president. Harry C. Gamage, the new president, submitted a list of standing committees which met approval. R. A. Jeanneret was made chairman of the transportation committee.

Thomson & McKinnon, Chicago grain and stock brokers, will close their Kansas City branch office in the new Board of Trade building Feb. 1. Other western offices of the house will cease operations at the same time and efforts will be concentrated on Chicago and eastern business. The branch was opened here in 1918 with W. M. Giles as manager. Since Mr. Giles' death, a year or more ago, the office has been managed by E. W. McClintic.

The United States Supreme court is expected to render in the near future a decision on the constitutionality of section 3 of the future trading act raised in a case brought by H. P. Trusler of Emporia, Kan. The section imposes a tax of 20 cents a bushel on all grain involved in "privileges," "bids," "offers," "puts and calls," "indemnities" or "ups and downs" bought or sold on grain exchanges. Trusler lives at Emporia. It is said that several large grain firms are back of the suit, though their names do not appear.

Cash Grain Markets.

Wheat—Receipts for the week, 525 cars, against 449 a week ago and 516 a year ago. Stimulated by further bullish developments in futures and by the withdrawal of 1,114,000 bus. from store, the market for hard and dark made another incursion into new ground. On Wednesday a car of No. 2 dark hard sold for \$2 a bushel, the highest since 1920. The grain was taken

by a shipper on a mill order. Generally the market for hard and dark wheat closed with a net advance of 1¢, leading grades being quoted as follows: No. 1, \$1.78@2; No. 2, \$1.77@2; No. 3, \$1.75@1.98; No. 4, \$1.73½@1.97. In addition to the local mill and elevator demand, there was a shipping business for account of northwestern, eastern and Pacific coast mills. Exporters declared their gulf bids were several cents out of line, but late in the week some workings were reported in New Orleans. Doubtless some of the wheat that went out of Kansas City was moved to the gulf ports to fill old sales as well as new. The first crossing of the two-dollar mark was on Tuesday when No. 2 soft wheat sold at \$2.02. On Thursday the same grade

struck \$2.04 and No. 1 was quoted nominally as high as \$2.06. There were extremely few offerings. While the mill demand was limited it was urgent. One local shipper stood ready to take offerings. Nominal prices at the close were 7¢ higher than a week ago, with No. 1 at \$2.02@2.05, No. 2 at \$1.99@2.05, No. 3 at \$1.97@2.04, and No. 4 at \$1.96@2.01. Reports indicate very small holdings of red wheat back in the country, mostly in Missouri. Estimates on farm reserves of hard and dark also are low in most instances. At the end of the week the elevator stocks of wheat in Kansas City were down to 13,001,000 bus. as compared with 12,710,000 a year ago.

Corn—Receipts, 532 cars, against 494 a

week ago and 464 a year ago. Corn also soared into a new price region since 1920. Both No. 2 white and No. 2 yellow sold for \$1.25½. The week's general advance in corn was 3¢, the principal grades closing as follows: No. 2 white, \$1.25@1.25½; No. 3, \$1.23@1.25; No. 2 mixed, \$1.21½@1.22½; No. 3, \$1.20@1.21½; No. 2 yellow, \$1.25@1.25½; No. 3, \$1.23½@1.24½. Demand for both storage and shipping accounts was active. There were fair scattered feeding orders. Texas was a buyer in southern and western Kansas, paying within 1½¢ to 2¢ of the Kansas City basis. Dealers here said it would be only a question of time until Texas would come into this market for supplies. Stocks in the elevators increased 351,000 bus. for the week, to 4,593,000, against 344,000 last year.

Oats—Receipts, 87 cars, against 44 a week ago and 82 a year ago. Trade in white oats was slow with little outside demand, but there was a good inquiry for the red variety, which is wanted for seed. Shipments of white to the South were moderate, whereas they should be active at this time. Prices declined 1¢ early in the week but there was some recovery later. White oats closed unchanged to ½¢ lower than a week ago, while red oats were up 1½¢ to 2¢, as follows: No. 2 white, 61½¢@62¢; No. 3, 60¢@60½¢; No. 2 red, 61½¢@62¢; No. 3, 60½¢@61¢. Local stocks increased 27,000 bus., to 2,193,000, against 1,219,000 a year ago.

Kafir and Milo—Receipts, 159 cars, against 100 a week ago and 67 a year ago. The increased offerings were well absorbed in filling orders from feed manufacturers, vinegar works and local storage interests. In fact, a very strong tone prevailed with the discount under the corn level being narrowed. Comparison shows a net advance for the week in kafir of 16¢@18¢ per cwt., while milo is up 14¢@16¢. Final prices were: No. 2 white kafir, \$2.01@2.05; No. 3, \$2.01@2.03; No. 4, \$1.98@2.01; No. 2 milo, \$2.13@2.15; No. 3, \$2.12@2.14; No. 4, \$2.09@2.12. Stocks in the elevators increased 12,000 bus. for the week, to 226,000, as compared with 80,000 a year ago.

PORTLAND, ORE.

The new Seattle Chamber of Commerce building will be dedicated Jan. 24.

N. A. Leach, manager of Kerr, Gifford & Co., Portland, is making an automobile tour of California this winter.

Wallace H. Foster, manager of the Seattle office of the Bunge Western Grain Corporation, is now in New York on business.

J. K. Smith has been appointed manager of the grain department of the Sperry Flour Co., largest Pacific Coast milling concern.

Frank L. Shull, president of the Portland Merchants' Exchange, and Mr. Lewis, of the Lewis Grain Co., Brady, Mont., were recent Seattle visitors.

Theodore Harmon, manager of the Eugene Mill & Elevator Co., Eugene, Ore., a subsidiary of Kerr, Gifford & Co., Inc., visited the headquarters office last week.

A. A. Housman & Co., Portland, Ore., has purchased a membership in the Winnipeg Grain Exchange, Winnipeg, Can. C. F. Avery will be in charge of their Winnipeg office.

The Portland Merchants' Exchange last week re-elected the board of directors, who are as follows: F. L. Shull, D. A. Pattullo, C. E. Dant, J. C. Settle, John H. Burgard, R. B. Wilcox, Edward Ehrman, F. H. Page, N. A. Leach, George Powell, Clayton R.

Clement Curtis & Co.

Jones and F. C. Knapp. Election of officers will be held in the near future.

D. E. Harris, recently appointed manager of Dodwell & Co., Ltd., Vancouver, B. C., importers and exporters of grain, will open connections at Portland, Ore., Seattle, Wash., and San Francisco, Calif.

Wheat shipments from the Columbia River district to California for the 1924-25 cereal year up to Dec. 31 were 1,614,912 bus., as compared with 849,717 bus. for the first half of the 1923-24 season.

The local market for wheat moved up sharply last week under the influence of the eastern markets, but there was also a good local demand from dealers and mills. Montana dark northern spring, 13 per cent protein, was sold at \$2.20, the highest price paid for wheat in this market in five years.

Terminal receipts in cars were reported by the Merchants' Exchange for the season to Jan. 15 as follows:

	Portland—	Wht.	Bly.	Flr.	Crn.	Ots.	Hay.

ST. LOUIS, MO.

W. C. Howland, Correspondent.

W. T. Ingles, for the past 26 years manager of the grain elevator at Marthasville, Mo., owned by the Valier & Spies Milling Co., St. Louis, died suddenly from heart disease while sitting in his automobile.

A political fight has developed over the appointment by Governor Hyde of Chas. P. Anderson of Kansas City as state grain and warehouse commissioner for Missouri. W. O. Atkeson is the present incumbent.

Robert McCormick Adams, a pioneer of the Middle West and the oldest member of the Merchants' Exchange, died last week in El Paso, Tex. Mr. Adams was born in Virginia in 1847. In 1869 he came west and settled in St. Louis, where he organized a grain brokerage company.

All of the executive officers of the St. Louis Merchants' Exchange were reappointed and the standing committees for the year 1925 submitted by President W. K. Woods were approved by the board. The feed committee is composed of Robert F. Deibel, chairman; A. C. Berner, John H. Caldwell, E. C. Dreyer and Chas. E. Valier. The grain committee comprises George C. Martin, Jr., chairman; W. J. Niergarth, vice-chairman; F. W. Seele, Wm. E. Henry, J. E. Dixon, J. M. Chilton and J. Paul Berger.

At the annual meeting and election of officers of the St. Louis Grain Club the following officers were elected: Louis S. Schultz, president; John H. Caldwell, vice president, and Eugene J. Chrissier, secretary and treasurer. The following were elected members of the executive board: Harry Beckman, J. C. Horton, Paul C. Knowlton, Fred C. Orthwein, Jr., and Oliver Schwarz. At a dinner that preceded the election, which was attended by about 100 members, short talks were made in reference to the betterment of the grain market and the additional devices that are being made to the manufacturing of grain products.

Louis F. Schultz was elected president of the St. Louis Grain Club at the recent annual meeting. The other officers are as follows: J. Handley Caldwell, vice president; E. J. Gissler, secretary and treasurer; and directors, H. F. Beckmann, J. B. Horton, P. C. Knowlton, Fred C. Orthwein, Jr., and O. H. Schwartz. During the past year the membership was increased by 29 and now is 152. Woodson K. Woods, newly elected president of the Merchants' Exchange, in addressing the meeting called attention to the fact that the Exchange will have occupied the present structure

OMAHA.

Leigh Leslie, Correspondent.

There has been a considerable increase in the movement of corn to this market in the last week. Receipts now are moderately heavy, with prices high and the demand good.

L. P. Roberts, who has been manager of the Omaha office of the McCaull-Dinsmore Co., which was recently closed, has accepted a place in the organization of the Hynes Elevator Co.

The millers of Nebraska have set on foot a movement to increase the spring wheat acreage in the state. It is pointed out that not enough spring wheat is being raised in Nebraska to supply the normal milling demand.

The highest price paid for hard winter wheat in this market in a long time was paid on the floor of the Omaha Grain Exchange last Thursday when the Carlisle-Burns Grain Co. paid Frank C. Bell of the Updike Grain Corporation \$2.02 a bushel for a car of No. 1 dark hard winter containing 13.31 per cent of protein.

C. J. Osborn of Sidney, president of the Farmers' Educational and Co-operative State Union of Nebraska for the last four years, was defeated for re-election at the annual convention of the association in Omaha Wednesday, Jan. 14. H. G. Keeney of Cowles, who has served on the board of directors for the last seven years, was elected to succeed Mr. Osborn. The convention voted to reduce the president's salary from \$4,000 to \$3,200, plus traveling expenses.

MINNEAPOLIS.

P. L. Byrnes, for 40 years in the grain business at Iona, Minn., died last week.

The Reliance Feed Co., Minneapolis, is now issuing a daily market letter to a selected list of customers.

The Minnesota Farmers' Grain Dealers' Ass'n annual meeting will be held in Minneapolis Feb. 17 to 19.

The Edward F. Berner elevator at Sleepy Eye, Minn., was burned to the ground on Jan. 13 with a loss of approximately \$75,000.

C. E. Thayer, vice-president of the Electric Steel Elevator Co. and of the Occident Terminal Elevator Co., is spending a month's vacation in Florida.

Frank O. Lowden, former governor of Illinois and spokesman for the pooling movement, addressed the conference for the prevention of grain rust held last Mon-

Its column headings are: Month, Day, Name, Kind, Gross and Tare, Net Pounds, Bushels, Pounds, Price, Dollars, Cents and Remarks.

The book, 9½x12 inches, 160 pages, 20 lines to each page, giving room for recording 3,200 loads, is printed on Linen Ledger Paper and is well bound in strong board covers with leather back and corners. Order form 80. Price, \$1.75.

PRICE CURRENT GRAIN REPORTER, 327 So. La Salle St., Chicago, Ill.

day at the Minnesota University farm at St. Paul.

Benjamin H. Woodworth, president of the Woodworth Elevator Co., was slated to become head of the Civic and Commerce Ass'n of Minneapolis but he declined the honor owing to the press of personal business.

O. L. Spencer, former superintendent of the North Dakota State Mill & Elevator, Grand Forks, has been appointed general manager, succeeding C. E. Austin, resigned. Herbert Strauss of the Bertley Co., feed jobbers, Chicago, visited mills and feed shippers in Minneapolis last week.

VANCOUVER, B. C.

Morwood Clark, Correspondent.

The outlook for the agriculturalist in this province has improved lately owing principally to the rise in the price of grains and potatoes.

Farmers are well pleased with prices but are loud in their denunciations against the high assessments put on their lands, leading to a state of unbearable taxation.

Vancouver as a wheat exporter is in the leading position on the Pacific coast of North America, but is a long way behind as a flour port. Now that ample storage capacity has been provided in the erection of splendid elevators, it is hoped that this development will be followed by the erection of flour mills of large capacity. Millers can be assured of a ready local market for all their offal, and the Orient takes large quantities of flour when the price is not too high.

A new grain act will be drafted by Mr. Justice Turgeon of Saskatchewan who spent some considerable time in Vancouver last summer hearing evidence as chairman of a Royal Commission. An entirely new grain act will be submitted to parliament in the coming session, which opens on Feb. 3, and much of it will be based on the evidence submitted to the Royal Commission. The report of the commission is very exhaustive, covering 500 pages and dealing with twenty different subjects.

Last year Vancouver shipped 55,873,788 bus. wheat, while Puget Sound and Columbia River ports together did not export half that amount. Of flour, Washington and Oregon shipped five times as much as British Columbia, which exported 936,033 bbls., approximately 2,800,000 bus. of wheat, whereas Puget Sound ports exported 2,365,688 bbls. and Columbia River 2,162,190 bbls., representing a total of approximately 13,000,000 bus., but if you combine the total exports of flour and wheat, Vancouver during last year exported more grain and grain products than all the ports of Puget Sound and Oregon combined.

Fall plowing—taking 100 as the area intended for next year's crop—represents 55% against 37% year ago and 48% two years ago. Fall grains are looking well, mild weather and gentle showers helping nicely. Pasture for this time of the year is good and live stock is in excellent condition. The total acreage sown to fall wheat is 16,100 against 15,600 last season, and the condition is 101% against 100 a year ago and 102 in 1922. Last season fall wheat production was 330,000 bus. from 15,600 acres, or 21 bus. per acre, against 357,000 bus. in 1923 from 14,139 acres, or at the rate of 25.3 bus. per acre, and the average price for British Columbia wheat was \$1.41 in 1924 and the estimated total value of the crop \$1,341,000, against \$1.19 and \$1,329,000 value for 1923, and \$1.22 per bu. and total value of \$1,264,000 in 1922.

PEORIA.

L. L. Eckard, Correspondent.

Offerings of corn to arrive not so heavy, especially from Illinois territory.

Cattle prices continued unchanged with the veal calf market a little lower, selling at \$12.50 down. Receipts were very light.

Grain Dealers

Oats receipts remain light with 12 cars Saturday. Market was quoted unchanged, but a good demand was in evidence. No. 3 white sold at 58c, destination weights. The greater portion of the oats sold the past week have gone south.

Receipts of corn at this market were fairly liberal the past week with 71 cars Saturday. Buyers and sellers were slow to get together, but once under way offerings were readily sold at prices 1½ to 2c higher. The offerings were heavy, but there was a good demand from local industries, who cleaned up the tables. No. 5 white, \$1.17@1.17½; No. 4 yellow, \$1.21; No. 5 yellow, \$1.17½; No. 5 mixed, \$1.17½; sample white, \$1.04@1.09.

Hogs at the local yards continued on the decline Saturday and prices were 5 to 10c lower than Friday's average. An extreme price of \$10.50 was paid for one load of 270-pound average. With a practical top of \$10.40 reported the bulk of good hogs sold from \$10.10 to \$10.40, with packing sows \$9.50 to \$9.85 on the bulk of sales. Receipts were 1,000 head and trading was fairly active. Light hogs, \$8.75@10.05; medium, \$10@10.40; heavies, \$10.25@10.50; packers', \$9.35@9.85.

CHICAGO.

J. M. Phiel, feed and flour dealer of North Collins, N. Y., was in Chicago last week.

Herbert R. Strauss of the Bertley Co., feed brokers, was a Minneapolis visitor a week ago.

During the past week there has been immense closing of spreads between Chicago and the Northwestern markets.

A recent sale of a membership in the Chicago Board of Trade was at \$8,325 net to the buyer, the highest in more than a year.

Chas. J. Peters, Illinois state grain inspector and a local political leader, was injured in an automobile accident last week.

Jacob F. Willrett, a very progressive farmer of Malta, Ill., also a handler of mill feeds in carload lots, called on the trade in Chicago Jan. 19; also visited the stock yards.

George E. Marcy, one of the operating managers of the Grain Marketing Co. and formerly president of the Armour Grain Co., left last week for Florida. Later, he intends to go to California via the Panama Canal, returning about April.

Representatives of grain and milling interests at Minneapolis, Duluth, Kansas

CORN WANTED

Track, Rockford, Ill.

Chicago Grain Products Co.
139 N. Clark St. Chicago, Ill.

City, Buffalo and other points met in Chicago on Jan. 8 to consider the application of Minneapolis milling and grain interests for a reduction of 6c a cwt. on grain and grain products in eastern territory.

As a reflection of the high prices of grain, flour prices moved up sharply in Chicago last week, the highest since the war. Special brands were \$9.80 in carlots and \$10.60 to the local trade. Hard winters were \$8.90@9 and soft winters \$8.90@9.10 per bbl. Rye flour was \$7.75@7.85 for white patents.

Standing committees appointed by President Frank L. Carey, of the Chicago Board of Trade, are as follows: Membership, Directors Lobdell, Norton and Brosseau; market reports, Doern, Lobdell and Wynne; rooms, Wynne, Norton and Begg; executive, Lewis, Alstrin and Rumsey; finance, Riordan, Payne and Norton.

Byron L. Kabot, secretary and manager of the Menomoneie Milling Co. of Menomoneie, Wis., was a Chicago visitor Jan. 19, calling on the wholesale grocery trade in the interest of sales of barley products, and also interviewed the feed trade in the interest of barley feed and other specialties manufactured from barley, of which the Menomoneie Milling Co. are large manufacturers.

Funeral services of Robert W. Roloson, for many years a member of the Chicago Board of Trade, were held on Jan. 16 at his home in Chicago. The honorary pallbearers included the following prominent men: John J. Mitchell, John Jay Abbott, J. B. Jones, C. H. Markham, W. R. Linn, Thomas Hinde, J. A. Capps, John Stuart, Albert Booth, John Cameron, J. H. Douglas, Frederick T. Haskell, Edward F. Swift and James B. Lord.

Trade Opinion.

From the low price of last week the wheat market has advanced some 15 cents, solely on the theory that our surplus has been exhausted. It is difficult to substantiate this theory if ideas are based upon estimates of yield of previous home requirements. Last year's crop, together

News of the Country Grain Trade

ARKANSAS.

Marshall, Ark.—A new flour and feed store has been opened by Wallace Bros., of Harison.

Little Rock, Ark.—The George Neimeyer Grain Co. has reduced its capital stock from \$100,000 to \$25,000.

Walnut Ridge, Ark.—A custom grinding and feed crushing plant has been opened by J. T. Wooldridge & Son here.

Monticello, Ark.—The building housing the Drew Flour & Feed Co. was partially destroyed by fire. Their stock of goods was damaged.

CALIFORNIA.

Vidal, Cal.—The Overton Mining & Milling Co. will build the first fifty-ton unit of their plant.

Ventura, Cal.—Plans for the erection of a new grain warehouse by Caane & Orr have been started.

San Francisco, Cal.—The Fontana Food Products Co. of South San Francisco has installed an automatic blending and filling outfit.

Madera, Cal.—The Valley Feed & Fuel Co. has installed a new feed grinder, a larger motor and a dust collection system, with which they will grind their own feed, in addition to custom grinding.

COLORADO.

Farmers Spur, Colo.—Fire of unknown cause totally destroyed the Mosher & Parker elevator.

IDAHO.

Oakley, Idaho.—The Oakley Milling & Elevator Co. has increased its capital stock from \$15,000 to \$75,000.

ILLINOIS.

Galesburg, Ill.—Fire destroyed the Tenon & Meyers Grain Elevators, causing a loss of \$32,000.

Bridgeport, Ill.—A grain firm of Decker, Ind. has recently purchased the Cooper Elevator Co.'s elevator.

Chatsworth, Ill.—The Gray Produce Co. will conduct a flour, feed and produce business here in a building purchased of John Bergan.

Lexington, Ill.—Ill health is thought to have been the cause for the suicide of Eugene G. Hayward, former Cooksville grain dealer, who shot himself on a street here recently.

E. St. Louis, Ill.—Fire damaged the Security Elevator Co. grain elevator here and destroyed 29,000 bushels of grain, resulting in a loss of \$80,000. The grain was insured, the value being \$20,000.

Alta, Ill.—Fire, believed to have been caused by a spark from a locomotive, completely destroyed the farmers' elevator at Alta, together with 10,000 bushels of grain, at a loss of \$20,000, fully insured.

Lincoln, Ill.—At the annual meeting of the East Lincoln Farmers Grain Co., Frank Myers of Lincoln was re-elected president, Thomas Green was elected a new director, and Albert Ahrends was re-named secretary-treasurer.

Decatur, Ill.—Owing to financial difficulties the Citizens' National Bank of Decatur, three Clinton banks and one Peoria bank have taken over the control of the Harrison & Ward Co.'s elevator here, under which arrangement it will be operated under the name of the Decatur Terminal Elevator Co. A new company was incorporated for \$100,000, with Robert I. Hunt, president and

treasurer, W. H. Barnes, vice-president and manager and Lloyd W. Snerley, secretary.

Madison, Ill.—A certificate of dissolution was filed at the office of Secretary of State Emmerson at Springfield by the F. W. Hilker Feed & Coal Co. A firm formed in 1917 as the Hilker Supply Co. will carry on the business.

Sullivan, Ill.—Fire starting in the clogged cob chute of the Sullivan Grain Co.'s concrete elevator destroyed about 30,000 bushels of corn and damaged the building, causing a loss of about \$50,000. There was very little insurance on the building.

Lane, Ill.—The late W. T. Lane will be succeeded by his son, Shumway Lane as manager of the Lane Co-operative Grain Co. here. Bland Lane, his brother, will have charge of the stock shipping department. A radio has been installed in their grain office.

Moweaqua, Ill.—At a recent meeting of the directors of the Farmers Co-operative Elevator Co., M. C. Elcan of Sioux Falls, Minn. was appointed manager for the coming year, succeeding Charles Ahl whose health has been failing and who is planning a trip to California to recuperate.

INDIANA.

Poneto, Ind.—The Farmers Elevator Co. here has filed dissolution papers.

New Albany, Ind.—Fire slightly damaged the mill of the Zabel Milling Co.

Lafayette, Ind.—The 1925 convention of the Farmers Grain Dealers Ass'n of Indiana will be held at the Fowler Hotel, Feb. 17 and 18.

Silver Lake, Ind.—J. C. Grubb will, in the near future, make some improvements on the elevator recently purchased from J. E. Gall.

Elwood, Ind.—Kiefer's Feed & Supply Co. have leased the Harting & Co. elevator and feed mill which they will operate along with some new lines.

Muncie, Ind.—The mill building and the machinery of the Andrews Flour Mills was destroyed by fire caused from a heating stove. Loss estimated at \$18,000.

IOWA.

Bingham, (Shenandoah R. D.) Ia.—Oscar and Ira Dougherty of Norwich have purchased the J. Auracher elevator.

Tama, Ia.—A receiver will take over the Farmers Coop. Co. here, the company having suffered heavily from fire loss several years ago.

Bristow, Ia.—Several directors of the Farmers Elevator here bought the elevator at a sheriff's sale, as individuals and not for the company.

Alton, Ia.—Casper Steckler has purchased the Alton Elevator Co.'s elevator, which he will operate under the name of Steckler Elevator, Grain & Seeds.

Toledo, Ia.—The manager of the Mesquakie Milling Co. reports a good year's business in 1924, during which they operated under the change of ownership, the month of December being largest of any month previous.

Auburn, Ia.—Notice is given that the Farmers Grain Co. here will receive sealed proposals for the purchase for cash of its elevator building together with fixtures and machinery, up to January 26th, 1925, at 10 a. m., each bid to be sent to J. H. Reynolds, Sec'y, accompanied by a certified check for 10 per

cent of the amount of bid. All checks accompanying bids not accepted, will be returned.

Keokuk, Ia.—J. C. Hubinger Bros. has incorporated with a stock of \$1,000,000 to manufacture starch, sugar, syrups, corn, oil feed stuffs and other corn products. Incorporators: Mathew A. Day and Joseph M. Hadden, both of Keokuk.

KANSAS.

Bronson, Kans.—The Bronson Grain Co. is planning on putting in a feed grinder.

Falun, Kans.—The Farmers Union Coop. Grain, Livestock & Merc. Ass'n have installed a motor in their elevator.

Hugoton, Kans.—The Hugoton Warehouse Co.'s warehouse has been purchased by the Security Elevator for storing and shipping broomcorn.

Hanover, Kan.—C. M. Reist is the new manager of the Farmers Union Elevator, starting work the first of the year and succeeding J. M. Hart, who is leaving Hanover.

Salina, Kans.—W. C. Smith, age 70, was suffocated by smoke when his home here burned recently. He had long been a grain dealer, having operated, for many years, an elevator at Portis, Kans.

Junction City, Kans.—The local elevator here is installing a Hammer mill for cracking, polishing and handling corn and several thousand dollars worth of other improvements. A two story addition is being added to the feed department.

KENTUCKY.

Greenwood, Ky.—The 60,000 bushel elevator owned by the Larmon Milling Co. was blown four feet off its foundation by a windstorm a short time ago.

MICHIGAN.

Harbor Beach, Mich.—Capt. G. G. Scranton, age 62, head of the Huron Milling Co., died of heart trouble.

Port Huron, Mich.—The 500,000 bushels of salvaged oats from the recently burned Grand Trunk Elevator has been purchased by Hay Bros. of Listowel, Ont., Canada.

St. Louis, Mich.—Two mills have been added to the new elevator erected here for Hart Bros. of Saginaw which increase their handling facilities. Also, about 48 bean picking machines have been installed.

MINNESOTA.

Iona, Minn.—P. L. Byrnes, an old grain dealer here, died recently.

Appleton, Minn.—The W. J. Jennison Company was slightly damaged by fire caused from a piece of metal going through a grinder in the mill.

crete elevator of 100,000 bushels storage capacity, to be built for the Eagle Mfg. Co., which will include a 2,000 bushel hopper scale. Work will begin shortly.

OREGON.

Eugene, Ore.—Kenneth Spencer is now manager of the Grangers' Eugene warehouse succeeding W. R. Lord.

Portland, Ore.—The Pacific Flour Export Co. has filed notice with the federal trade commission of its intention to operate in the export trade under the export trade law with headquarters here.

SOUTH DAKOTA.

Redfield, S. D.—H. W. Speight will install a new scale and truck dump next spring.

Ward, S. D.—The Farmers Elevator Co. has dissolved, following the burning of its elevator.

TENNESSEE.

Knoxville, Tenn.—The Security Mills is the new name for the Security Mill & Feed Co.

Nashville, Tenn.—The McKay-Reece Co. has moved to its modern new building at Chestnut St. and the N. C. & St. L. Ry., with enlarged facilities for handling seeds and grain.

TEXAS.

Alvin, Tex.—A. J. Robertson has bought the Alvin Grain Co. formerly owned by R. H. King.

Dallas, Tex.—The Milam Grain Company at 2825 Ross Ave. was robbed of \$45 recently by a lone bandit.

Bryan, Tex.—Mrs. Daisy Brogdon has sold the R. I. Brogdon feed business to John Collins and Dr. H. G. Wickes, who have taken charge of same.

Lockhart, Tex.—The Lockhart Antone Seed Co. has incorporated with a capital stock of \$5,000 by N. F. Harrell, C. P. Ross and F. J. Reinlander.

Houston, Tex.—The bids for the construction of the proposed \$1,000,000 grain elevator have again been rejected, account of the amounts being too high.

UTAH.

Ogden, Utah—Fire destroyed the grain elevator of the Utah Cereal Food Co. together with one hundred and fifty thousand bushels of grain, causing a loss estimated at \$200,000.

Salina, Utah—The Sevier Valley Milling Co. who owns mills and receiving stations at Richfield, Elsinore and Junction, have entered into a contract with Wm. Johnston whereby they will purchase and take over the mill here.

WASHINGTON.

Davenport, Wash.—Recently local quotations for hard white wheat reached \$1.80 per bushel, the highest point during the war.

Tacoma, Wash.—The wooden structure at 5404 Puget Sound Ave. in which the Kentworthy Grain & Milling Co. started business, is being torn down.

Spokane, Wash.—According to a report which shows that the national increase in grain values amounted to \$550,000,000, the Washington farmers realized \$30,000,000 more on their co-wheat and oats this year than in 1923.

WISCONSIN.

Plainfield, Wis.—John A. Blaire of Starks & Blair Potato & Grain buying business, died here.

Hurley, Wis.—James Meade has pur-

chased the warehouse of Vezzetti & Galdabini and will engage in the wholesale flour & feed business here, carrying a complete line of flour, feed, hay, etc.

Middleton, Wis.—The Wm. Hoffman Co. has incorporated with a capital of \$30,000, to operate a general feed and fuel business. Incorporators: Wm. Hoffman, John G. Hoffman and Albert F. Hoffman.

Amherst, Wis.—The Jackson Milling Co. elevator here has been taken over by the Pagel Milling Co. of Stevens Point, who are stocking up with flour and feeds of all kinds and will soon have the mill running to its capacity. H. A. Wilson has been retained as manager.

TERMINAL MARKETS.

[Concluded from page 25.]

with the surplus remaining from the previous crop, gives a total of 974,000,000 bus.; statistics for a series of years show average feed and seed requirements for ourselves at 604,000,000. Accepting these figures, we find 370,000,000 surplus; of this surplus we have actually exported about 190,000,000 up to the first of January, thus leaving 180,000,000 to meet export demand of the next six months and provide a normal carryover at the end of the crop year; a comfortable carryover is 75,000,000.—Thomson & McKinnon.

The visible supply of wheat reached its maximum 100,000,000 bus. Nov. 29, earlier in the season than usual. Since then it has been decreasing steadily, the decrease in the past week of 4,659,000 being unusually sharp. Six weeks ago the visible was 29,000,000 bus. In excess of the corresponding week the year before. Now the excess is only 14,000,000 bus. This trend gives support to the belief that supplies at the end of the season will be reduced to a minimum.—Clement, Curtis & Co.

Perhaps the most prominent feature of the general situation has been the substantial increase in the demand for cash wheat from domestic sources as a result of which premiums have advanced still further. There has been more or less export demand but naturally it is not of the proportion that was witnessed during the early months of the season. In view of the availability of the surplus of the Southern Hemisphere, this is quite natural. However, it does not exclude a continued European demand for our wheat. In fact, it is conservatively estimated that importers will have to take an average of three to five million bushels of our wheat weekly for the remainder of this crop year in order to fill their needs.—Bartlett-Frazier Co.

The undertone of the corn market was strong last week. Houses with eastern and country connections were on the buying side of the market. There was also buying of corn against sales of wheat by locals. There appears to be good accumulation of corn on the weak spots and we would prefer to take that side of the market, particularly should wheat prices hold steady.—J. J. Badenoch Co.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

TOLEDO SEED PRICES.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy for the week ending Jan. 17:

	Range for wk.		Cash	Cash
	High.	Low.	Jan. 17.	Jan. 10.
Clover—				
Cash	\$19.85	\$19.50	\$19.65	\$19.50
Jan.	19.85	19.50	19.65	19.50
Feb.	20.00	19.60	19.75	19.60
March	20.10	19.60	19.75	19.60
Oct.	17.35	15.50	15.50	17.50
Alsike—				
Cash, new.	13.35	13.20	13.20	13.25
Jan.	13.35	13.20	13.35	13.25
March	13.50	13.10	13.50	13.45
Timothy—				
Cash	3.35	3.35	3.35	3.35
Jan.	3.35	3.35	3.35	3.35
March	3.12 1/2	3.10	3.10	3.12 1/2

MILWAUKEE SEEDS.

Movement of timothy seed and clover seed at Milwaukee as reported for THE PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce for the week ending Jan. 17, 1925:

	Receipts—		Shipments—	
	Tim.	Clover.	Tim.	Clover.
1924	60,000	72,690	215,120	170,143
1925	90,000	78,092	9,340	100,640

Field and Grass Seeds

Soy beans continue to show light receipts, though a good crop was reported in Missouri. Brown beans are wanted at \$2.75 a bushel and Black Wilson at \$2.50, while other kinds fetch \$1.50@1.75.

Wholesale prices of grass seeds are as follows, basis of carlots, except red clover: Blue grass, per cwt., \$17@28; timothy, \$6.50@7; alfalfa, \$17@22; red clover, small lots, \$20@34; sweet clover, \$10@13; Sudan, \$5@6.

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending Jan. 17, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rets.	Shts.	Rets.	Shts.	Rets.	Shts.
Week ...	729	139	264	317	355	502
Prev. wk.	336	278	460	299	409	378
1924	277	204	73	422	626	492
1924-25.	28,244	17,339	6,268	3,342	11,745	10,940
1923-24.	26,576	11,669	5,052	3,507	15,250	4,683
1922-23.	26,584	20,412	6,956	5,330	18,125	4,041

Timothy—Market has upward tendency. Fair country run \$5.75@6.15 per 100 lbs., good country run about \$6.25@6.40 and high grades at \$6.50@6.75. Small sale of common seed at \$6 late yesterday.

Alfalfa Seed—Steady. Recleaned country lots \$21@23 per 100 lbs.

Clover Seed—\$1 higher. Country lots \$25@27.75 for 100 lbs., good \$28.25@29.25, choice \$29.75@30.75, fancy \$31@32 and Mammoth \$29@33.

Alsike—25c up. Average country lots \$20.25@21 per 100 lbs. Fair seed \$16.25@17.25 and poor at \$11.50@13.50.

Flax—1 3/4c higher. No. 1 Northwest-ern closed nominally \$3.14 1/4@3.17 1/4 per bu. of 56 lbs.

Other Seeds—Per 100 lbs.—Domestic Hungarian Millet \$3.25@3.75. German, \$3.50 for poor, \$4@4.25 for choice and \$4.75@5 for fancy southern; Siberian, \$2.75@3, common \$2.50@3, good to choice \$2.50@3.35; Jap, \$3.50. Feed Millet—Broom corn and early fortune \$2.40, choice \$2.50, fancy \$2.60. Sunflower seed, \$3.75.

IOWA SEED SITUATION.

CEDAR RAPIDS, IOWA.—It seems that most of the seed trade in Iowa has protected themselves with a limited quantity of field seeds for their spring trade, but most of the dealers have bought very sparingly. This would apply largely to clover, alfalfa, etc.

There still seems to be a fair tonnage of timothy being held in the country, held for higher values. It seems there is very little timothy moving at this time as most of those who are holding anticipate higher values with the approach of the active seeding season.—Hamilton Seed & Coal Co., Henry L. Kling, Secretary and Manager.

TOLEDO SEED MARKET.

TOLEDO, O., Jan. 19.—Clover seed reached new high early part of last week and sold off on profit-making sales the latter part. Hedges against purchases of foreign seed were also plentiful and aided in the decline. While France and other countries were reported to have had a smaller crop the past season the amount of seed on the way over here would seem to indicate they have plenty of clover for export. Our prices are very attractive with the present rate of exchange and this is the big factor in determining where they will send their seed. The future trend is largely a matter of cash demand and volume of imports. Seedsmen say there are already indications that the spring trade will be heavy. Farmers are ready to pay the price this year as they have realized better prices for their grain

and will feel more inclined to sow clover.

Alsike and timothy were steady to higher during the week. Both these seeds have been neglected for a long time and should enjoy more activity when the cash demand improves. Stocks of all seeds are considered fairly liberal with the exception of clover which was a short crop. The next few weeks should see the opening of spring trade with greater activity in all seeds.

Receipts of clover for the week were 1,120 bags and shipments 1,453 bags. Prime inspected, 250 bags, season to date, 4,200 bags.

Receipts of alsike, 220 bags, and shipments, 174 bags. Prime inspected this week, 200 bags, season to date, 2,400 bags.

Receipts of timothy, 1,198 bags, and shipments, 122 bags. Prime inspected this week, 650 bags, and season to date, 9,714 bags.

MISSOURI FEED LAW INTERPRETED.

According to a ruling by Jewell Mayes, of the Missouri State Board of Agriculture, the local miller or mixer of livestock and poultry feeds must register each brand or name of feed and tag it in accordance with the law, even if such miller or mixer sells only from his own door or place of business.

NEW SEED ASSOCIATION.

The name of the Soy Bean Growers' Association has been changed to the Seed Growers' Association at a recent meeting held at the headquarters in Sedalia, Mo. This change was made in order to include the raisers of other seed crops. Officers elected for the ensuing year are as follows: George Fichter, president; S. W. McClure, vice-president; and M. D. Norton, secretary-treasurer.

DULUTH FLAXSEED MARKET.

DULUTH, Jan. 17.—Business in the flaxseed market was slow from a speculative point of view during the last week. Operations were hampered by the light receipts and the apparent improbability of any material improvement being shown in the near future. Specialists are of the opinion that recent estimates that surplus supplies remaining on farms and in interior elevators over the Northwest aggregate around 2,500,000 bushels will come close to the mark. With Minneapolis crushers bidding actively for supplies to keep them going operators here fully recognize that they would require to advance their premiums substantially to increase the flow of seed this way to any extent during the next few weeks.

In the meantime speculative operations are being directed to the Winnipeg market, where stocks of approximately 2,700,000 bushels afford a cushion to take care of May deliveries.

Crushers are figuring that a spread of around 10 cents exists in favor of the Winnipeg market over Argentine imports, so that eastern crushers were asserted to have been governing themselves accordingly in their future commitments recently.

Operators are claimed to be awaiting developments as regards the linseed oil demand during the spring and summer months before making any further substantial purchases of seed. Should consumption of linseed oil come up to present estimates during the first half of the year, it is realized that a bullish situation would exist in the flaxseed market, while in the event of any curtailment in new construction the demand for linseed oil might be expected to fall off correspondingly.

January.....	3.07	3.05	2.49½
May.....	3.08	3.06½	2.51½
July.....	3.07

URGE SEED CORN TESTING.

On account of the poor corn crop last year, agricultural authorities are urging farmers to test their seed corn and not to use it if the seed tests less than 90 per cent germination. It is an easy matter to test seed for germination. All that is necessary is to place a known number of seed in a moist cloth, keeping it at a temperature of about 60 to 70 deg. for 7 to 10 days, seeing that the cloth does not become dry during the entire time. By testing 100 seeds and counting the number that germinate, you have the percentage of germination which may be expected from the sample you are testing.

LESPEDeza SEED MOVING MORE FREELY.

From 75 per cent to 80 per cent of the lespedeza seed in northern Alabama and western Tennessee had been sold by growers up to Dec. 30, according to reports to the U. S. Department of Agriculture. Movement was slower in northern Mississippi and in Louisiana where only 20 per cent and 30 per cent, respectively, have been sold. Production in northern Mississippi is reported to be less than last year. Most of the supply in this section is being marketed coöperatively. The crop was a near failure in Louisiana.

SMUT-PROOF SEED WHEAT.

By the year 1926, there should be sufficient seed available for planting of the smut-resistant wheat, Redit, originated at the Washington State College in 1915. This wheat is not only free from smut, but compares well in yield with standard varieties. It was originated by crossing Turkey and Florence wheats. This cross was made in 1915, and four ears were consumed in isolating and purifying the various sorts resulting from the cross.

The exportation of wheat has been prohibited by the Roumanian government from January 15. The decree authorizes the requisitioning of internal supplies for the army and civil needs at price approximating \$45 a metric ton. It is believed that adequate supplies are available to carry the country along until the next harvest. It is said the farmers are reluctant to sell wheat. Before the war old Roumania exported around 1,000,000 tons of wheat annually.

Commission business in Ft. Worth is like watching or trying to watch a five-ring circus. The air is full of business and trading.—Federal Commission Company, Fort Worth, Tex.

HARBOR COMMISSIONERS RETAIN ELEVATOR.

Reports that Woodward's lake elevator, now in the possession of the Vancouver Harbor Commissioners, will not be taken over by the British and Oriental Grain Company owing to certain difficulties having arisen in connection with legal formalities.

It is most probable that this elevator, which has had a somewhat checkered career ever since the building was started by Messrs. Woodward of Minneapolis and Winnipeg—the first grain merchants who started to develop the export grain trade here—will remain in possession of the Harbor Board Commissioners owing to general conditions here.—Morwood Clark.

WHEAT POOL TROUBLES.

Managers of elevators in Montana have been asked by the Montana Wheat Growers' Association to comply with the contractual agreement existing between the association and farmers in that state and in order that elevator managers may know who the members are, the names of the members in their territory are supplied them together with a copy of the association agreement.

This campaign is being started to enforce the contract as to members and to collect penalties for violation. Suits have already been filed in Flathead County, and it is stated that similar action will be taken in several other localities at once. The association says that, generally speaking, elevator managers have been courteous and fair, but that they have found some antagonism from certain banks that have counseled their patrons to dispose of their wheat by selling direct to elevators for cash with which to liquidate debts due to the banks and loan companies.

It has been found, however, that the banks are not the chief offenders in contract breaking, in some sections at least, as members in instances have disposed of wheat in the name of some member of the family, or sold it ostensibly to a nonmember in order to get the cash immediately. It is reported that in some cases members who had signed the long term contract have since leased their farms with the view to escaping their contract liability.

The association announces that it proposes to have the question of contractual liability judicially determined and to enforce the contract fully in all cases. It has been the disposition of the management until recently to allow farmers some latitude in handling urgent debts, but with the present financial situation somewhat eased up, the only fair method is to make all members deliver their wheat to the pool.

The action, it is understood, is to combat the complaint of some of the supporters of the pool who have been criticizing because they received from 8c to 14c bu. under the going price at their local elevator at the date they delivered to the pool.

COMING CONVENTIONS.

Jan. 20-22, Farmers' Grain Dealers Ass'n. of Iowa, Fort Dodge, Ia.

Feb. 10, 11 and 12—Farmers Grain Dealers Ass'n of Illinois, Peoria, Ill.

Feb. 12.—Tri-State Country Grain Dealers' Ass'n's, Nicolett Hotel, Minneapolis.

Mar. 25-27. North Dakota Farmers' Grain Dealers' Ass'n., Bismarck, N. D.

American Feed Manufacturers' Ass'n., New Orleans, La.—Date undecided, but will probably be held the first part of May, 1925.

July 28, 29, 30.—National Hay Association, Cedar Point, Ohio.

Oct. 12-14, 1925.—Grain Dealers' National Ass'n, Hotel Muehlebach, Kansas City, Mo.

Oct. 12-14, 1925.—U. S. Feed Distributors' Ass'n, Kansas City, Mo.

A private report indicates a large acreage planted to corn in Portuguese East Africa and Rhodesia. Planting in these countries is done in November and December and the harvest season is from May to July.

AUSTRALIA ADOPTING ELEVATOR SYSTEM.

Formerly all wheat in Australia was handled in the form of bags, but the elevator system of handling grain in bulk is spreading rapidly. It is expected that 19 per cent of the crop this season will be handled through elevators or "silos," as they are called in Australia. For receiving and loading wheat into cars the elevators charge 3 cents per bushel. A fee of 4 cents per bushel is charged for handling and storing wheat at terminal elevators. This charge last season covered the storage of the wheat from the time received until Aug. 31. After that date a fee of one-eighth of a cent per week was charged for storage. Fees this season are to be slightly higher than last and free storage will not be given after July 31.

FUTURE TRANSACTIONS AT CHICAGO.

The volume of sales for future delivery on the Chicago Board of Trade for the days indicated, subject to corrections of minor importance, as reported by J. W. T. Duvel, Grain Exchange Supervisor, were as follows (last three 000 omitted):

1925—	Wheat.	Corn.	Oats.	Rye.	Total.

TRAIN LOAD OF FEED TO THE SOUTH.

It is significant to note the enormous volume of mixed feed sold from comparatively small mills. It is also true that we read about such business in train load shipments in news items in THE PRICE CURRENT-GRAIN REPORTER as it concerns the business of large mixed feed millers.

A solid trainload of fifty cars was recently shipped by the Caroline Milling Co., Dillon, S. C., to a list of fifty-three consignees. The several brands of this company originated by Dr. Wade Stackhouse, its president, have been going strong throughout the South. They are manufactured in accordance with the formulas prepared by S. T. Edwards & Co., the feed trade engineering concern of Chicago.

GOOD DEMAND AT TOP PRICES.

MONROE, MICH.—We are finding an excellent demand for mill feed at top prices, and with the corn crop so poor we expect to see feed sell considerably higher, bran possibly around \$40 and middlings \$45, f.o.b. cars at the mill.

Corn has but very little feeding value this year and we believe that the average statement, "that it takes practically two bushels of corn this season to go as far as one of good corn would" is true, as we have hardly had a single lot of new corn from the farmers of this vicinity that we could call good. Even the very best is unsatisfactory.

The one redeeming feature, though, throughout this section at least, is the excellent crop of oats we had. Believe the average must be 60-75 bushels per acre. They are testing "36 lbs. natural" and this is the finest crop we have had for a number of years. However, even at that, there is not the amount of oats coming to market that one would expect, considering the size of the crop.

The feeding stuff situation in our opinion, is a very strong one.—Amendt Milling Co., G. A. Amendt, Pres.

COTTON SEED MEAL.

KANSAS CITY, Jan. 17.—Trade in cotton seed meal and cake is on a moderate scale, as compared with the pronounced activity reported a month ago. Yet sales are being made by Kansas City dealers for prompt shipment and as far ahead as April. The product still is regarded as a cheap feed, relative to corn and other feeds, but some cattlemen seem to think it may sell on a lower basis since the export demand in Texas subsided. There are free offerings from Texas at \$28.50 per ton for carlots. Arkansas has plenty of meal to sell at \$39@39.50. In Oklahoma the mills are maintaining a firm attitude and offering only for deferred shipment, as they are behind with old orders and cancelling January contracts. Meal in Oklahoma is held at \$41. The Kansas City price is \$45.60, or 50c higher than a week ago. Ton lots are \$4 less than carlots.

Apparently, nothing but a radical decline could stimulate the southwestern demand for linseed meal. The only sign of a reduction is the offering of spring deliveries in Minneapolis by speculators at \$2 a ton discount under current mill prices. At present mills are \$47.50 on

carlots. The Kansas City price is \$51.80 for carlots and \$55.80 for ton lots.

Packers are again talking about an advance of \$5 a ton in the price of tankage. A month ago they contemplated such a raise, but failed to carry it out. The product is selling at \$60 a ton for carlots and \$65 for ton lots. Sales are said to be equal to the production. It is admitted that hog numbers are light, but the arrivals are expected to sell high and feeding will be intense. Good buying of meat scrap by poultry interests persists. Eggs are at the highest level of the year. Scrap is selling at the former prices, \$70 a ton for carlots and \$75 for ton lots.

OIL MEAL MARKET.

The oil meal market is a little lower this week than last, demand has been light and the mills have continued to run at capacity. However, the mills are pretty well supplied with shipping directions although these may run out within another couple of weeks. If no business comes, lower prices may develop. However, there has been practically no buying of linseed meal now for about thirty days and it is therefore unreasonable to assume that new buying will come in before the mills have filled all their old orders. Don't let your stock get too low!—The Bertley Bulletin, Chicago, Jan. 17.

WEEKLY LINSEED REVIEW.

NEW YORK, Jan. 19.—United Kingdom: The linseed situation in the United Kingdom during the past week was generally dull with trade inactive. The Argentine official estimate influenced the market very little.

Linseed oil remains about steady. Holland has been selling oil here and offers have been mostly well taken.

Cotton oil of all classes remains neglected.

India: Crop news from this grower is generally favorable. Shipments of linseed amount to 60,000 bushels compared with 172,000 bushels the week previous.

Argentina: The markets for seed in this country have been generally steady during the past week. Country offers are not pressing. Shipments continue moderate, and port stocks remain unchanged at about 2,800,000 bushels.

MINNEAPOLIS FLAXSEED MARKET.

MINNEAPOLIS, MINN., Jan. 17.—The flaxseed prices in the Northwestern markets are practically the same as one week ago for the May options, but cash seed is higher as the market is 4 cents over the May price for same. Light country offerings will undoubtedly influence prices to a great extent and the present indications are that prices will be maintained, or higher levels may be reached if the steady demand continues.

There are fairly large stocks of flaxseed in Canada as follows:

	Bus.
Terminal elevators	2,674,000
Country elevators	1,495,000
In transit, approximate	100,000
Approximate in farmers' hands	1,000,000

Total stocks 5,269,000

We would estimate that from 2,500,000 to 3,000,000 bushels of this seed will be available for shipment to the United States this spring and summer.

At the moment Argentine seed is cheaper laid down in New York than Canadian seed at Lake Erie ports. The Argentine Government's second estimate of this year's crop is 52,800,000 bushels, which is 400,000 bushels less than the first estimate issued in November. These are gross figures, and we must deduct 6,000,000 bushels from these figures for sowing seed and home consumption. This will leave their exportable

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

surplus 46,800,000 bushels, according to the official estimate. Private estimates still insist that the crop will not exceed 40,000,000 bushels, and some place the figures much lower than 40,000,000 bushels.

Shipments from Argentina are small compared to last year, as follows: Last week's shipment, 464,000 bushels; this week 588,000 bushels. Last year 1,628,000 bushels. If business continues as good this spring and summer as last fall this country will have to import from 8 to 10 million bushels, so in addition to the seed which will come from Canada, we will have to have from 5 to 7 millions from Argentina.—Archer-Daniels-Midland Co.

SALT ON THE FARM.

The habit of keeping a supply of salt before farm animals all the time is a good one for every grower of livestock to acquire. Salt whets the appetite, stimulates the digestive glands and aids in preventing digestive disturbances. It is a promoter of general good health and vigorous growth, according to the Nebraska Agricultural College.

An irregular supply of salt induces overeating, which often results in digestive disorders and, in the case of hogs, may cause death from salt poisoning. If you believe in eating salt every day, feed it to your live stock every day. They crave and appreciate salt the same as you do.

NEW YORK OATS MARKET.

Oats receipts, 80,000 bushels bonded; 60,000 bushels domestic. The market responded but little to the strength shown by corn, advancing less than 2 cents per bushel. The weight of supplies and the unsatisfactory domestic demand generally, combined to prevent a further rise. There were occasional sales for export, the total volume being small and at prices below a replacement basis. There was less activity in the local market, dealers having replenished stocks the week previous and reporting an extremely light consumptive inquiry. Ex-lake Northwestern oats are in fair supply with slightly better premiums asked, out sell slowly, while all rail offerings of oats grading No. 2 white and better are held at prices above the views of dealers and consequently are not wanted. The demand is practically for oats of lower grade to compete with the Duluth and Milwaukee ex-lake offerings.—L. W. Forbell & Co.

FEED MARKETS.

MILWAUKEE.

Milwaukee, Jan. 17.—Indications of a slight improvement in consumers' demand were noticeable in the Milwaukee feed market during the past week and quotations closed firm and unchanged despite the fact that trading was stagnant. No selling pressure was exerted, although buyers are extremely reluctant to accept present high prices. Linseed oil meal continued firm, but in light demand, while lower quotations were in order for cottonseed meal and hominy feed. Current quotations are: Winter bran, \$32@33; spring bran, \$32@33; standard middlings, \$33.50@34; flour middlings, \$38.50@39.50; red dog, \$42@43.50; rye feed, \$33@33.50; linseed oil meal, \$47.50@49; cottonseed meal, \$42@43.50; hominy feed, \$46@47.50; oat feed, \$13@14; gluten feed, 30 days, \$40.80; all in 100-lb. sacks, carlots, f. o. b. Milwaukee.

MEMPHIS.

Memphis, Jan. 17.—Some improvement in demand for feed is being reported, but volume continues moderate, as nobody is buying more than requirements. Shipments on contracts are said to be larger, but even they are not heavy. Alfalfa meal receipts were slightly larger, 31 cars for the week, but buying is still cautious. No. 1 is quotable at \$29@30 and No. 2 at \$26.50@27. Cottonseed meal continues to drag and quotations are a shade easier for the week. Asked prices are \$35 for 36 percent, \$37.50@38 for 41 and \$39.50 and \$40 or 43. Hulls are slow at \$8@8.50 for

loose. Millfeed receipts were larger than for weeks, but new business has not been large, although inquiries have been better. Lack of resale cars caused the market to be firmer and asked prices are \$34@35 for wheat bran and \$38.50@39.50 for gray shorts.

CINCINNATI.

Cincinnati, Jan. 17.—Buying of millfeeds was somewhat improved during the past week; in fact, was the best since the advent of the new year, but the demand was almost entirely from large local dealers, with little or no inquiry from interior consumers or single car purchasers. Prices ruled firm but unchanged, and were mainly sustained by the relatively higher values asked by western mills. Quotations represent 100-lb. sacks: Soft winter wheat bran, \$35.50@36; hard winter wheat bran, \$35.50@36; standard middlings, \$38.50@39; soft wheat middlings, \$39.50@40; gray hard middlings, \$39.50@40; mixed feed, \$37.50@38; No. 1 alfalfa meal, \$31; hominy feed, \$50.50@51.

PHILADELPHIA.

Philadelphia, Jan. 17.—Feedstuffs are dull and weak under better offerings and light demand. We quote carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$38.50@39.50; winter middlings, \$42; spring bran, western, \$36.70@37; standard wheat middlings, \$40.50; flour middlings, \$44@46; red dog, \$49@50; low grade flour, \$59@60; rye middlings, \$40; reground oats feed, \$16@17; fine yellow hominy, \$51.70@52; fine white hominy, \$54@55; cottonseed meal, 36% protein, \$42@42.50.

DULUTH.

Duluth, Jan. 17.—Demand for feeds was more active during the last week, with woods operators in the market to a greater extent. Bran, shorts and Boston mixed each eased 50c, but the market was steady in other items. Prices per ton follow: Bran, \$31.50; shorts, \$34.50; red dog, \$43.50; Boston mixed, \$34.50; flour middlings, \$38; ground oats, \$37; No. 1 ground feed, \$43.50; No. 2 ground feed, \$41.75; No. 3 ground feed, \$40.25; cracked corn, \$46.75; coarse corn meal, \$46.75.

NEW YORK.

New York, Jan. 17.—Irregular price movements occurred in western feeds, with an advance of about \$1@1.50 per ton early in the week being followed by a setback of 50c@1 per ton. City feed was practically unchanged. There still remains a premium of about \$1@2 per ton on February delivery for western feeds, but the current demand is very small. City bran is quoted around \$39, middlings \$42 and red dog \$51, while western bran rules at \$38, middlings \$41.50 and red dog \$46@46.50 per ton.

BALTIMORE.

Baltimore, Jan. 17.—The tone of the general wheat feed situation continues firm, and for sacked bran and middlings there is a fair demand. Hominy feed and gluten feed are firmer, with the former sparingly offered. Dried beet pulp is selling fairly well in a jobbing way. Alfalfa meal unchanged. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$39@39.50; western middlings, per ton, 100-lb. sacks, \$39.50@40; city mills winter wheat bran, per ton, 100-lb. sacks, \$40@41; hominy feed, per ton, \$52@53; gluten feed, per ton, \$48.50@49; alfalfa meal, per ton, \$32@33; dried beet pulp, per ton, \$38@40.

ST. LOUIS.

St. Louis, Jan. 19.—Millstuffs—Wheat feed quiet, but firm, with bran quoted at \$32.50 to \$33 and gray shorts at \$36.50 to \$37. Only sales noted were four cars hard gray shorts (to arrive, immediate shipment) at \$36.50 local and 1 car fancy soft mixed feed to go out at \$34.75 immediate. Oat feed steady, with sales of 5 cars to go out and 2 cars local at \$13.75. Last sale white hominy feed (sacked) at \$48.75.

RECORD MILL PRODUCT SHIPMENT.

The Nutrena Feed Mills, operated by the Miller-McConnel Grain Co., Kansas City, announce a record shipment of feeds and flour from the Rea-Patterson Milling Co. plant at Coffeyville, Kans., to southern points. The shipment comprised a train of 112 cars in nearly every one of which there were Nutrena feeds. Two of the most powerful types of steam engines were required to move the long train, which was more than a mile in length and was valued at \$170,000.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

State College. In some cases where the beans have been stored in heated rooms, the pests have been completely ruined the seed. However, it has been found that sudden exposure to sub-zero temperatures is fatal to all stages of the pest. This makes its control extremely simple under winter climatic conditions in South Dakota. Whenever soy beans are known to be, or suspected of being infested, they should be placed out of doors in bags during the severe cold spell. The sudden change is fatal to the pests, and will give complete control.

COLLIS PROCESS PURE DRIED BUTTERMILK

SHOULD BE A PART OF ALL POULTRY MASH FEEDS

Feed Manufacturers who keep in touch with the experimental work conducted by the Agricultural Colleges and Poultry Feeding Experts in the scientific feeding of poultry, realize what a prominent place Dried Buttermilk has taken as part of all Mash Feeds fed.

If you are manufacturing mash feeds for growing, developing baby chicks, egg production in hens and pullets, and for fattening without **Collis Process Pure Dried Buttermilk**, you are doing so contrary to all present day teachings.

Buy your requirements now from the largest producers of Dried Buttermilk in the world.

Buttermilk dried by the Collis Process retains all feeding value and Lactic Acid found in fresh churned pasteurized buttermilk.

According to figures compiled by the New Zealand government, the areas sown or to be sown to wheat and oats in New Zealand for the season 1924-25 are for wheat 170,000 acres, and for oats 480,000 acres. The great bulk of this acreage is found in the South Island. Compared with the acreage for 1923-24, the present season's sowing indicates a falling off of about 3,000 acres in wheat, and a gain of about 63,000 acres in oats

The Mennel Milling Co., Toledo, Ohio

FEEDSTUFF SITUATION.

In spite of the grain markets showing great strength and advances, mill feeds and all other feed stuffs are marking time with prices practically unchanged, sentimentally strong but potentially weak. Unless a big demand develops, it is conjectured that the prices of feed stuffs particularly will be governed entirely by the demand from now henceforth during the Spring and balance of the Winter's feeding season. Flour production in the Northwest has increased slightly with a consequent increase of mill feeds and, unless, as stated above, the consumption increases, the supply will no doubt be sufficient to take care of the current demand from time to time.

MINNEAPOLIS. — Bran, \$30; standard middlings, \$34; flour middlings, \$37 to \$38; red dog, \$42.

CHICAGO.—Bran, \$32.60; standard middlings, \$36.60; flour middlings, \$39.60 to \$40.60; red dog, \$44.60.

KANSAS CITY.—Bran, \$30; gray shorts, \$33.50.

ST. LOUIS.—Bran, \$32.40; gray shorts, \$35.90.

ALFALFA MEAL.

Based on feeding value and protein units, alfalfa meal is one of the cheaper commodities for the mixed feed manufacturer to use in balanced rations. Just as soon as this is realized, no doubt, there will be a better demand developing on alfalfa meal and it should be reasonably expected that with the demand developing, higher prices will be in order. The market is holding very firm governed by hay prices principally. Nominally quoted second hand bag basis, choice, \$30.75; No. 1, \$28.75; No. 2, \$26.25 delivered Chicago basis. Fine ground grades from \$3 to \$4 a ton more in most cases.

REGROUND OAT FEED.—A little more sellers interest than buyers. Mills are gradually cleaning up old contracts and may be in a position to offer more of their feed shortly. The selling is still in the hands of jobbers and resellers. Nominally quoted reground, \$13.25; unground oat hulls, \$14.25, for prompt February. Premiums of 50c to \$1 a ton more asked for March, April.

HOMINY FEED.—The supply is in excess of the demand at present prices. Buyers are very reluctant to contract except where their urgent requirements demand it. Nominally quoted hominy feed carrying 6 to 7 per cent fat, yellow sacked, \$48.50; white sacked, \$49.50. In bulk, where available, \$1 to \$2 per ton less, depending upon the seller's ideas. Hominy feed that carries less than 6 to 7 per cent fat is discounted by some of the holders from \$1.50 to \$2 a ton.

LINSEED OIL MEAL.—Market is a shade weaker with additional selling pressure over the week previous. Resellers are making the most attractive prices; no doubt, are taking profits before further declines. Nominally quoted, Chicago basis, \$47; Minneapolis basis, \$46.75. Mills are ranging from 50c to \$1 a ton more depending upon how anxious they are to sell. In bulk, where available, \$2 per ton less.

DRIED BUTTERMILK.—Demand is picking up, especially for small lots for chicken feed and with production keeping pace, there is no change in prices. Quotations follow: Creamery in carlots, 6½c per lb. and L. C. L., up to 8 cents.

PACKERS' PRODUCTS.—Demand continues good, especially on meat scraps and tankage, but not quite up to last week, which was unusually good. Prices are as follows: Meat scraps in carlots, f. o. b. Chicago, \$65@70 per ton; 60 per cent protein digester tankage \$60@65; raw bone meal \$55, an advance of \$5 having been made on digester tankage on the 15th.

GLUTEN FEED.—There has been no change in the market during the past week, demand continuing steady and prices the same. Quotations are as follows: Gluten feed in bulk \$38 a ton, sacked, \$40.80; gluten meal of 40 per cent protein \$44 in bulk and \$46.80 in sacks.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35@50 per ton, standard units of 50 lb., burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

COTTONSEED MEAL.—Large supply and slow demand has affected prices somewhat and quotation today for 43 per cent protein, \$45.50, Chicago basis.

Nat Murray, of Clement-Curtis, in a report on oats crop says: "Per cent of oats crop disposed of Dec. 1 according to our correspondents averages 46.4 per cent, compared with usual per cent of 43.9. Last year the average was 45.9. We interpret this as indicating oat stocks remaining from the crop 809,000, 000 bus. against 703,000,000 a year ago."

Alfalfa Department

ALFALFA MEAL MARKET.

KANSAS CITY, Jan. 17.—Mills in Kansas City quoted no change in alfalfa meal prices this week. They reported a fair demand from mixed feed interests, with orders running as far ahead

as March. It was admitted that the volume of business was not as large as it was a year ago. The supply of hay was much larger than a week or two ago. As quoted by mills, the market for carlots is as follows, per ton: Choice, \$28@29; No. 1, \$25.50@26.50; No. 2, \$22.50@23.50; No. 3, \$22@23. Handlers of Colorado meal said the demand was not urgent. They quoted choice at \$27; No. 1 at \$25.50; No. 2 at \$22.50, and No. 3 at \$21.50.

Irregular price changes were recorded in grain-molasses feeds. Manufacturers said the demand was holding gains made since the beginning of the new year. Poultry, dairy and horse feeds were in the best request. Carlots, per ton, were quoted as follows: Dairy feeds, \$39@49; cattle feeds, \$37@46; hog feeds, \$45@54; pig meal, \$74; horse and mule feeds, \$33.25@48.50; alfalfa-molasses feeds, \$27.50@34; scratch poultry feeds, \$49.75@56.25; mash poultry feeds, \$54@81.50.

CALIFORNIA ALFALFA SITUATION.

LOS ANGELES, CAL.—Referring to the alfalfa situation would say that there has been little change in the past two or three months. Arrivals have been light but apparently enough hay has been coming on the market to supply the local demand, and at this writing there has been no Oregon or Washington hay received here. No. 1 alfalfa is quoted at from \$28.00 to \$30.00 f.o.b. cars, Los Angeles.—*Nicholls Grain & Milling Co., A. M. Thayer, Hay & Grain Department.*

FEEDING ALFALFA TO WESTERN STEERS.

Care should be used in feeding alfalfa to green steers from the western range country on feed in the Corn Belt. The western steer has never known corn, but grass and dry roughage are the natural feeds. When the green steer of the range comes to the good alfalfa or clover of the Corn Belt he will eat of it greedily while refusing to take to the corn, which is strange to him. Even after the western steer is taught to eat corn, only a certain quantity of the protein hay must be given. Stuff the managers with it and there will be left no room in the paunch for the corn. The native steer, however, is different. Give this animal free choice between alfalfa and corn all of the time, and he will eat more corn than alfalfa.

ALFALFA IN KENTUCKY.

More than 21 tons of alfalfa hay per acre have been harvested in the past four years from a 5-acre field on the experiment station farm at Lexington, Ky. The average yield has been more than 5 tons per acre per year. In the four years the alfalfa was cut 14 times, which means that three to four crops a year were obtained. The yields described are high, but they can be secured on many farms, according to S. C. Jones and Ralph Kenney, extension agronomists for the College of Agriculture, who are conducting a "Grow-More-Alfalfa" campaign in central Kentucky. The experiment station field was a rich piece of land, and no fertilizer was used but it was limed previous to sowing. Good yields are the rule rather than the exception in the Blue Grass region.

ALFALFA FOR SHEEP.

Good legume hay is the best hay for sheep, and alfalfa is to be preferred. Red clover and alsike are nearly as good, and sweet clover is fine if well cured. However, sweet clover is rather difficult to cure, and moldy sweet clover hay has caused much trouble and many deaths. Wild hay is good for part of

the hay. Some millet is good, but should not be fed to excess. Corn stover is well liked by sheep, but corn fodder should be fed sparingly to prevent the sheep from getting too much grain.

ALFALFA SUPPLANTED BY SWEET CLOVER.

Search for a leguminous feed other than alfalfa on the plains and in the semi-arid districts has brought sweet clover strongly to the fore. In the Julesburg, Colo., district, sweet clover growing has become an important factor. Both as a hay and pasture crop, the production is adding nitrogen and green manure to the soil. The usual practice in the Julesburg irrigated district is to cut the clover for hay in the fall of the first year.

A GOOD BOOK ON CANARY BIRDS.

Canaries for Pleasure and Profit is the title of a 50 page book that has been issued by the Magnesia Products Co., Milwaukee, Wis. The book is attractively printed with covers in colors, and while it is primarily a catalog of birds and supplies, more than half of the book is devoted to information on the subject of the care of canary birds. It is really a text book on the breeding and handling of birds.

The Magnesia Products Co. makes the well known Wests line of canary bird foods and supplies, that have been on the market for many years and are recognized as standard by all dealers.

MISSOURI SEED LAW REQUIREMENTS.

The Missouri seed law requires in labeling only the name of the farm seed, and does not require that the variety be indicated. Jewell Mayes of the Missouri State Board of Agriculture has issued a ruling to this effect, as indicated in the law, but the ruling further states that if the wholesaler or retailer puts the varietal name on the label that both wholesaler and retailer are responsible for its correctness the same as if it were required to be on the label.

VALUE OF SORGHUM HAY.

Ordinary sorghum hay should be worth about the same or slightly less than timothy hay for dairy cows, according to analysis. Actually, it is really a better roughage for dairy cows than timothy hay because it seems to be more palatable. Like timothy hay, sorghum fodder is somewhat lacking in protein and, on that account, it is necessary to feed just a little more in the way of bran and oil meal with it than with such roughages as clover or alfalfa.

DISINFECT POULTRY FEED BAGS.

As a means of checking the present epizootic or fowl plague, the New Jersey agricultural experiment has suggested that all feed dealers disinfect old poultry feed bags. Such bags might have been returned by poultry owners who have experienced an outbreak of contagious diseases. In other cases these bags might have been purchased from persons making a business of buying up old bags from poultrymen. In either case there is every possibility of infection to be brought back to the feed dealers and thence distributed, unintentionally, to other poultry farms.

"It is therefore apparent that feed dealers can do a great service to their poultry patrons by protecting them against infection which might be transmitted through old bags. We therefore earnestly request that the use of old bags be avoided in so far as possible. If it is necessary to use such bags, then they should be rendered as harmless as possible by disinfection. This may be done quite easily by soaking the bags for about 15 minutes in a 1-1000 solution of bichloride of mercury. Such bags should then be wrung out and dried before using."

RELIABLE STANDARD INCUBATOR

50 to 1100 Eggs

Both Hot Air and Hot Water Heating Systems Used

Automatic Ventilation, Moisture and Heating Regulation. RELIABLE dealers find the Reliable Incubators most satisfactory and profitable to sell for several reasons: 1: Our complete line of various sizes, both heating systems, to meet every need. 2: Best materials, construction and workmanship. 3: Ease of operation and possessing every convenience of modern incubation. 4: Maintains a positive uniformity of temperature with a constant even circulation of pure, fresh air. 5: Correct heating and hatching temperature and moisture in all climates. 6: Double enclosure heating system utilizes heat from lamp in two ways—an absolute guarantee against sudden chills. 7: Has an abundant nursery space.

Various Sizes The Best Yet

RELIABLE Standard Blue Flame Hover

The Leader of them all. A wickless, oil heated Colony Hover. 1925 pattern made to meet every demand of poultrymen—large or small. Fully explained in the Reliable Sales book. An unusual seller.

RELIABLE Standard Coal Burner Colony Brooder

Brooder Stove

using our own brooder stove with improved feed pouch, increasing coal capacity. Burns both hard and soft coal with equal success. Accurate and dependable heating regulation. Self cleaning. No clogging. Self ventilating canopy, maintaining pure, fresh, warm air, insuring healthy chicks. The Dealer's Favorite.

Our RELIABLE Incubators, Brooders, Hovers, Poultry Appliances and Fixtures are backed by our positive guarantee.

HAY ALL SOLD.

RENO, NEV.—All hay in Nevada is sold. There is not five cars to ship out; too early to tell about coming crop.—*Consolidated Warehouse Co.*

HAY NORMAL CROP.

RICHLAND, IND.—Hay is a normal crop of fair quality. About ten per cent has been marketed as the prices prevailing are not satisfactory to the producer.—*W. Q. Collins.*

HAY MOSTLY USED ON FARMS.

BINGHAMTON, N. Y.—Jan. 13.—There is very little hay produced in our immediate section for shipping. This is largely a dairying country and most of the hay produced here is used on the farms. From information which we have received, we believe that during the past season the hay crop generally throughout the eastern states was somewhat larger than normal but we do not have any information as to the amount that is still back in the farmers' hands.—*E. W. Conklin & Son, per M. M. Rogers.*

NATIONAL HAY ASSOCIATION CONVENTION TO BE HELD AT CEDAR POINT.

The directors of the National Hay Association have again selected the very popular convention center and famous

summer resort of Cedar Point, Ohio (on Lake Erie) for the meeting place of its 32nd Annual Convention, to be held July 28-29-30th, 1925. This choice will no doubt meet with hearty approval by the majority of the membership of the Association for it is centrally located and very accessible by boat, train, traction and automobile.

The National Hay Association has already been held seven times at Cedar Point and the records show the attendance has always been the largest of any of the many meeting points. The Convention last year would have exceeded all records of attendance, had it not been for the tornado which passed through that particular vicinity just two days before the opening of the convention. Reports were spread broadcast that Cedar Point was wiped off the map and many people who were driving through were turned back before they reached the resort. At that there were nearly 500 in attendance. Further announcements as to hotel and special railroad rates will be made later.

CHICAGO HAY NOTES.

Excessive receipts caused a decline in the Chicago market, which was especially apparent in the top grades of hay and in straw. The decline was not very much, considering the heavy receipts. Prairie hay was in good request under moderate offerings. Marsh hay was also wanted. Straw receipts were too heavy for the market to absorb without a de-

North & Company

Receivers—Shippers

Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

cline in price, and until country loading drops materially even lower prices may be expected. Demand continues for the medium grades of hay. Dark, foggy weather during the week interfered with buying as the hay could not be judged properly.

Bridge & Leonard reports country loading very heavy, but the demand for medium grades is steady. If shipments continue heavy, some recession in values is expected.

H. H. Whiteside, of the Chicago office of Federal Hay Inspection, is attending a preliminary hearing in Kansas City on alfalfa hay grades. Messrs. Parker and Wheeler are on from Washington conferring there in the preparation of tentative grades. The latter two men will then journey to the Pacific Coast holding hearings en route with the grain trade. It is planned to prepare similar federal grades on prairie hay thereafter, and Chicago, or in fact any large market in the Middle West, may, if they choose, hold hearings later on in submitting practical trade details bearing upon these grades before they are made permanent.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

Ed W. Keefner has withdrawn from the Ralph A. Lowe Co., Inc., and engaged in the hay business for himself in Room 748, Live Stock Exchange building.

President Newton C. Campbell and other newly-elected officers of the Kansas City Hay Dealers' Association were installed January 13. The standing committees of 1924 were reappointed. V. K. Shellman was re-elected secretary and treasurer by a vote of the directors and Harold Masters was made assistant secretary. D. B. Tilson will head the transportation committee for another year.

"In view of the enormous receipts of alfalfa this week, I think the Kansas City hay market proved the fitness of its title, 'the greatest hay market in the world,'" said Lloyd Faris of the Faris Hay and Grain Co. "The decline was nominal. However, there would have been more recession, except that many dealers had sold hay short. Filling of these orders took a large part of the offerings. There was a better general demand, with alfalfa mills conspicuous buyers.

Under the direction of W. A. Wheeler, in charge of the Hay, Feed and Seed Division, Department of Agriculture, and E. C. Parker, in charge of laboratory work, there will be a conference in Kansas City during the entire week of January 19-24 on the formulation of federal grades for alfalfa hay. As stated by G. F. Kellogg, in charge of the Kansas City office of the Hay, Feed and Seed Division, this meeting is not to involve a public hearing, though some prominent local hay dealers may be invited to attend and give their views. Analytical work on federal grading has been done in Kansas City, Minneapolis and Washington. The chemists have not all reached the same conclusions. At the Kansas City meeting there will be a comparison of notes and an effort to reach an agreement. Public hearings on tentative grades will be held in March and April all over the United States, winding up in Kansas City. The grades, as finally adopted, may take effect after the new crop begins to move.

HAY RATE VICTORY FOR KANSAS CITY.

Officials of the Kansas City Hay Dealers' Association were notified January 13 from Washington that the Interstate Commerce Commission had decided the

WESTERN UPLAND ALFALFA AND TIMOTHY

"Mississippi Valley" hay rate case almost entirely in favor of the western shippers. The contention of the railroads, supported by St. Louis, Cairo and Memphis hay interests, for an advance in the Kansas City proportional rate to Memphis and the Ohio and Mississippi river regions of \$1 a ton was denied, except in the case of the New Orleans-Mobile group. This means that the rate of 24c per cwt. to the Memphis gateway will stand, and Kansas City dealers were most interested in this feature of the case. More hay moves from Kansas City in this direction than in any other.

The fight was begun when the railroads announced a new tariff, effective July 25, 1924. It was one of the most bitter in the history of the hay trade, resulting in a petition to the Interstate Commerce Commission for a suspension of the advanced rate. A four-day hearing was held in Kansas City, beginning September 8, before an examiner of the Commission. J. H. Tedrow, transportation commission for the Kansas City Chamber of Commerce, and Newton C. Campbell, president of the Kansas City Hay Dealers' Association, resisted the proposed advance. Railroad attorneys and representatives of the St. Louis, Cairo and Memphis hay dealers were on the other side. Pending the decision the raise in rates was suspended to December 14 and then to February 14.

HAY MARKET REVIEW.

The hay market developed a weaker tone during the week Jan. 12-17, according to the Department of Agriculture. Country offerings were more liberal while the demand was practically unchanged so that more pressure was required to move the arrivals.

Timothy was weaker at most markets and prices averaged slightly lower. Arrivals at Boston were fully equal to buyers needs on a dull market. Stock were increasing at New York and prices declined at about \$1 per ton. Heavy receipts weakened the market at Pittsburgh, Cincinnati, and Chicago, while the St. Louis market was dull. Stock of timothy in southern markets continued light with demand only fair. High grade hay was in best demand at southeastern points while good timothy moved readily from Kansas City to Louisiana, Arkansas, and Texas.

Alfalfa ruled steady. Good alfalfa was wanted at Chicago. Receipts were moderate at Omaha and the market was steady. Milling alfalfa made up the bulk of the receipts although there was a fair volume of dairy quality hay.

The Kansas City market was practically unchanged with increased shipments to southern points offsetting the arrivals of Wyoming alfalfa which resulted from a special freight rate on this hay. This alfalfa is eagerly taken by the mills on account of its color.

Good quality prairie ruled steady. Offerings were light at Chicago and top grades were in demand. Stock

were light at Minneapolis and St. Paul and some dealers were trying for Nebraska hay. Prairie was steady at Omaha with moderate receipts and the demand was expected to increase with spring farm work. Good hay was moving readily at Kansas City with a slightly more active shipping demand while the stock yards were taking fair mounts.

HAY MARKETS.

MINNEAPOLIS.

Jan. 17.—Moderate demand and increased movement resulted in a slightly easier tone on the hay market during the week; the weather was less severe and the demand reflected the decreased consumption.

Timothy—No. 1, \$18; No. 2, \$17. Mixed, different grasses—No. 1, \$16.50; No. 2, \$15.

Clover mixed—No. 1, \$16.50; No. 2, \$12.50. Upland—No. 1, \$17; No. 2, \$16; No. 3, \$15.50.

Midland—No. 1, \$13.50; No. 2, \$11. Packing hay, \$8.

Straw—Rye, \$9.50; oat, \$9; wheat, \$8.50. Alfalfa—No. 1, \$24; standard, \$20; No. 2, \$17.

PORTLAND, ORE.

Jan. 15.—Buying prices f. o. b. Portland: Alfalfa, \$19.50@20 ton; valley timothy, \$19@20; eastern Oregon timothy, \$22@22.50; clover, \$16.50@17.50; oat, \$19@20; oat and vetch hay, \$18.50@19.50; straw, \$7.50@8.

NEW YORK.

Jan. 15.—The New York Hay Exchange has issued the following report with latest quotations:

	Hay.	Straw.
Receipts for week, tons	1,489	18
Receipts last week	1,023	31
Receipts from Sept. 1	27,544	358

Arrival of carlots at all market points were heavier during the week. Lighter trading prevailed, principally the result of difficult trucking. The slippery condition of the streets retarded movement, and in consequence sales, with the result that offerings and available supply show an increase. This condition affected prices, causing the level of values to sag approximately \$1 per ton.

Stocks at Manhattan consist of about an average assortment of large and small sales, with prices about \$1 apart, whereas at Brooklyn small bales at the moment are comparatively lighter and values there on large and small sizes are about even on the better grades, with lower quality small selling under large. Straw situation is unchanged.

Federal grade quotations for large bales follow: Timothy—No. 1, \$27; No. 2, \$24@25; No. 3, \$22@23. Light clover mixed—No. 1, \$24@25; No. 2, \$22@23; No. 3, \$20@21. Medium clover mixed—No. 1, \$22@23; No. 2, \$20@21. Clover—No. 1, \$24@25; No. 2, \$22@23; No. 3, \$20@21. Heavy grass mixed—No. 1, \$20@21. Rye straw, \$15@16.

MILWAUKEE.

Jan. 17.—Due to continued poor demand prices in the Milwaukee hay market closed approximately \$1 lower. Receipts were light. Current quotations, per ton, are: No. 1 timothy, \$16@17; No. 2 timothy, \$14@15; No. 1 mixed, \$15@15.50; No. 2 clover mixed, \$13@14; sample hay, \$8@10; marsh feeding, \$12; packing, \$11; rye straw, \$10@10.50; oat straw, \$10@10.50.

KANSAS CITY.

Jan. 17.—A wonderful influx of alfalfa, chiefly from Nebraska and Kansas, was mainly responsible for a new high total of receipts for the season this week. Name and wild hay offerings aggregated 9 cars, or 249 more than a week ago. The total a year ago was 579 cars. According to the record, the biggest previous week's receipts since harvest was 856 cars, the latter part of October.

The market handled 677 cars of alfalfa compared with 474 a week ago and 297 year ago. Farmers evidently regarded prevailing prices, built up during light pre-daily runs, as satisfactory. Fortunately a rush of offerings found many shippers with January contracts to fill. There was no buying for this account and also by alfalfa mills and other purposes. Prices held up remarkably. Though trade was slow at times, the market declined only a few cents to \$1.50 a ton, with the greatest loss in select dairy.

There were 195 cars in the receipts of alfalfa, showing an increase of 12, as compared with the previous week's movement. Its variety had a recession of 50c to \$1 ton. Demand was limited to the stock yards and other local interests and a few shippers. The best trade was on Friday. Including timothy, clover mixed and clover, the arrivals of tame hay other than alfalfa were 97 cars. Timothy from Missouri predominated. Fair buying was reported and prices ruled unchanged. Shipments were mostly southward.

Twenty-nine cars of straw were dumped to the market, but a majority had been bought to arrive. The price broke \$1 a ton in the disposal of offerings. A fair deal developed on the decline, with stock yards people the best buyers. Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City: Alfalfa—Select dairy, \$26@27; choice, \$24.50; No. 1, \$22.50@23.50; standard, \$22@22.50; No. 2, \$16.50@18.50; No. 3, \$14@16. Prairie—No. 1, \$10@11.50; No. 2, \$9@10; No. 3, \$7.50@9; packing, \$6@7. Timothy—No. 1, \$16.50@17.50; standard, \$15@16; No. 2, \$14@15; No. 3, \$12.50@15.

Clover mixed—Light, \$16.50@17; No. 1, \$15@16; No. 2, \$12@14.50. Clover—No. 1, \$16@18; No. 2, \$12@15.50. Straw—Wheat, \$8.50.

MEMPHIS.

Jan. 17.—Receipts of hay increased to 112 cars last week, but outgoing movement continues light. The trade is buying little as stocks are getting larger and consumers are not taking as freely as expected. Quotations for timothy are nominally unchanged at \$24@24.50 for one, \$23@23.50 for standard, and \$22 for two. Higher grade alfalfas are unchanged at \$32 for choice and \$31 for No. 1, but standard eased slightly to \$28 and No. 2 is without change at \$23@23.50.

CINCINNATI.

Jan. 20.—The hay market displayed considerable activity during the week, and though somewhat easier and lower showed a good increase in the volume of business transacted. Receipts were much larger, but they came on a comparatively bare market and were practically all absorbed. Shipping interests particularly enjoyed an improved trade, and while the demand was mostly for immediate delivery, the increased offerings of a better class of hay also allowed filling of more contracts for January shipments. A slight decrease in the number of out-of-town orders noted at the close, indicating that the pressing needs of consumers were fairly supplied, but as hay is the most economical article of feed on the market a continued good demand can be expected. Unexpected large receipts recently delayed in transit gave the market an easy tone on Saturday.

Timothy—No. 1, \$17.50@18; No. 2, \$16@17; No. 3, \$14@15; threshed, \$10@12; no grade, \$11@13. No. 1 heavy clover mixed, \$16@17. No. 1 light clover mixed, \$17.50@18. Clover mixed—No. 1, \$16.50@17; No. 2, \$14@15; no grade, \$11@13. Clover—No. 1, \$17.50@18; No. 2, \$15@16; no grade, \$10@12. Second cutting alfalfa—No. 1, \$26@28; No. 2, \$22@24. First cutting alfalfa—No. 1, \$18@20; No. 2, \$16@18. Sound sample grassy hay, \$13@15. Straw—Wheat, \$10.50@11.50; oats, \$10@11; rye, \$12@13.

PHILADELPHIA.

Jan. 17.—The hay market is very quiet, but supplies of desirable qualities are small and choice grades exceed quotations. Straw is dull but steadily held under light receipts. Hay (Federal grades): Timothy—No. 1, nominal; No. 2, \$20@21; No. 3, \$18@19; sample, \$10@12. Light Clover Mixed—No. 1, \$20@21; No. 2, \$17@18; No. 3, \$12@14. Medium Clover Mixed—No. 1, \$17@18; No. 2, \$14@15. Heavy Clover Mixed—No. 1, \$16@17. Light grass mixed—No. 1, \$19.50@20. Straw—No. 1 straight rye, \$15@16; No. 2, \$14@15; wheat, \$15@16; oat, \$15@16.

BALTIMORE.

Jan. 17.—Under light receipts of the better grades of timothy and choice light clover mixed hay and a fair demand for such descriptions, the local market is firmer, and an element contributing to the firmness is the falling off in receipts of hay from nearby country points by motor trucks, the bad condition of snow-covered country roads having made hauling almost impossible. Low grade and inferior hay is dull and overlooked.

Straw of all kinds in light receipt and unchanged. Quotations: Timothy—No. 2, \$21@21.50; No. 3, \$17@19. Light Clover Mixed—No. 1, \$19.50@20; No. 1 clover mixed, \$19@19.50; No. 2 clover, \$17@18. Straw—No. 1 straight rye, \$18@19; No. 1 wheat, \$12@13; No. 1 oat, \$13@14.

OMAHA.

Jan. 17.—Prairie hay: Receipts much heavier. Demand only fair. Prices slightly lower. Alfalfa hay: Receipts continue to increase. Arrivals moving fairly well, but heavy receipts causing slight recessions in prices. Prices below are for carload lots: Upland Prairie—No. 1, \$12@12.50; No. 2, \$9.50@11; No. 3, \$8@9. Midland prairie—No. 1, \$10.50@11.50; No. 2, \$9@10; No. 3, \$7@8. Lowland prairie—No. 1, \$9@10; No. 2, \$7@8. Alfalfa—Choice, \$20@21; No. 1, \$18.50@19.50; standard, \$15.50@18; No. 2, \$14@15; No. 3, \$12.50@13.50. Straw—Oat, \$7.50@8; wheat, \$7@7.50.

DULUTH.

Jan. 17.—Trade in hay was nothing to brag about, according to dealers. Feeders bought in moderate lots and the higher grades only were wanted. Receipts of hay from the country continued light, but they were enough to cover needs. Quotations per ton are unchanged, as follows: Timothy—No. 1, \$17; No. 2, \$15. Mixed timothy—No. 1, \$16; No. 2, \$12. Prairie—No. 1, \$16; No. 2, \$14; No. 3, \$12. Midland—No. 1, \$11; No. 2, \$9. Straw—Rye, \$9; oat, \$8.50.

PITTSBURGH, PA.

Jan. 17.—The receipts of hay were moderate for the week; invoices are more numerous however, with the demand governed to a considerable extent by the offerings of farmers in Allegheny and surrounding counties.

It is predicted by those in a position to know that 25% less hay will be shipped into this market compared with last year because of the unusual yield of hay in this territory. The demand for mining hay is steady owing to the slightly better feeling in the coal business and the large consumers here are continually replenishing their stocks at the market as far as their storage will permit; no particular change is looked for at the moment unless we should experience a considerably increased movement, which is not likely. No change in prices. Hay receipts, 139; straw, 13.

TOLEDO.

Jan. 19.—Hay trade shows improvement for the first time in many weeks. Prices remain unchanged but dealers look for an advance if receipts do not increase. Farmers are advised to sell at present prices as stocks are liberal and spring not far away. The demand which is now appearing comes from sections where the crop was not large and may be enough to reduce stocks to some extent.

Prices for the past week were as follows: No. 1 timothy, \$15; No. 2 timothy, \$13; No. 1 light clover mixed, \$14; No. 1 heavy clover mixed, \$13; No. 1 clear clover, \$13; No. 1 first cutting alfalfa, \$17; No. 1 second cutting alfalfa, \$23; sound dry wheat straw, \$9; sound dry oats straw, \$9.50 per ton f. o. b. Toledo.

CHICAGO.

Jan. 19.—Receipts and shipments of hay in tons in the Chicago market for the week ending Jan. 17, also total receipts and shipments from Jan. 1, follow:

	Jan. 17, 1925.	Jan. 10, 1925.	Jan. 19, 1924.
Week's receipts....	4,776	2,684	3,019
Week's shipments....	158	198	172
Rcts. since Jan. 1..	9,584	4,808	6,273
Shpts. since Jan. 1.	569	411	482

Receipts were liberal and market lower. Arrivals Monday morning, 87 cars timothy, 2 alfalfa, 6 prairie, 2 packing and 23 straw. Demand for hay was fair but straw was slow, with much left over.

No. 1. No. 2. No. 3.
Timothy \$21@23 \$17@20 \$13@16
Timothy and Clover—
Light mixed..... 20@22 16@18 14@15

Alfalfa 14@25
Prairie—Ill., Ind., Wis., Kas., Neb., Mo. and Okla. feeding, \$12@18; packing, \$11@15.
Straw—Rye, \$12@13; oat, \$10@11; wheat, \$9@10.

ST. LOUIS, MO.

Jan. 19.—The receipts of hay on both sides of the river were quite heavy today. The market is on the decline and in buyers' favor, even best qualities easier. Look for a little lower market rest of week.

Clover—Choice qualities in fair demand; medium and lower grades very dull.

Alfalfa—Best qualities wanted at full values; medium grades in fair demand.

Prairie—Market cleaning up; No. 1 steady; low grades hard to place.

Straw—Steady.
No. 1 timothy, \$23@24; standard timothy, \$20@22; No. 2 timothy, \$16@18; No. 3 and sample, \$10@12; No. 1 clover mixed, \$18@20; No. 2 clover mixed, \$16@17; heavy mixed, \$15@18; No. 1 clover, \$18@19; No. 2 clover, \$15@17; threshed hay, \$12@14; choice alfalfa, \$26@28; No. 1 alfalfa, \$23@25; standard alfalfa, \$20@22; No. 2 alfalfa, \$17@19; No. 1 prairie, \$15@16; No. 2 prairie, \$13@14; rye straw, \$9@10; wheat straw, \$8.50@9.50.

R. E. DEANS DIES.

The many friends in the trade will regret to learn of the death of R. E. Deans of Atlanta, Ga., at his home on Jan. 9th after an illness of several months. Mr. Deans was a wholesale broker in hay, grain, flour, feed and cottonseed products and was well and favorably known to the trade. He was a member of the Grain Dealers National Ass'n. and the National Hay Ass'n. It is gratifying to know, however, that the business will be continued under the name of G. C. Deans. The new management will be headed by G. C. Deans who had been actively associated with his brother for many years and will be assisted by F. E. Taylor who also has had long and varied experience in the above lines. While the guiding spirit and genial disposition of Mr. Deans will be greatly missed by his assistants, the new management is fully equipped and qualified to aggressively serve the best interests of the former patronage.

N. Y. HAY AND GRAIN DEALERS MEET.

At the mid-winter meeting of the New York State Hay & Grain Dealers' Association, which was held in Syracuse on the 14th, means for assisting the Bureau of Farms and Markets to secure an appropriation from the Legislature, for use in inspection service, was given consideration as was also the proposal upon the part of the railways to change rates from a zone to a mileage basis. The board of directors selected Aug. 20 and 21 as the date for the annual meeting and the Hotel Onondaga at Syracuse as the place.

American Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

Complete descriptive catalog sent free for the asking.

HAY SHORTAGE IN COLORADO.

Feeders in the territory surrounding Brush, Colo., are short of hay on account of insufficient moisture last year. There are many sheep and lambs on feed in this section this year, but few have been shipped out so far. There are also quite a few cattle being fed and, contrary to conditions in most places, enough corn is available to take care of them. Alfalfa is selling from \$10 to \$17 a ton, according to quality.

NEW ALBANY PACKING COMPANY.

Slaughtering operations have been started in the new plant of the Albany Packing Co., Inc., Albany, N. Y., which was recently organized with Fred M. Tobin, of the Rochester Packing Co. as president. This plant is considered one of the most modern in the country.

Provisions, Etc.

WEEKLY AVERAGE PRICES.

Weekly average prices at Chicago for good beef cattle, hogs, aged sheep and lambs, as compiled by the Chicago Drovers Journal:

	Cattle.	Hogs.	Sheep.	Lambs.
Past week....	\$ 9.10	\$10.45	\$ 9.10	\$18.10
Previous week....	9.20	10.20	8.75	17.80

Av. 1920-1924....	\$ 9.60	\$ 9.55	\$ 7.85	\$13.95

CHICAGO PROVISION REVIEW.

CHICAGO, Jan. 19.—Active trading with a wide range of prices with heavy liquidation by longs and covering by shorts, combined with large supplies of hogs the leading feature. Closing trades were at nearly the best of the week with lard futures up 20 to 45c, short ribs 27½ to 42½c and bellies unchanged to 5c higher.

There was one line of 5,000,000 lbs. liquidated covered which was said to be for a packer, while the lard was supplied by various holders who were taking profits. On all weak spots good buying appeared and apparently some of the packers there were covering short sales to get their money out of the market and replacing on sharp rallies. The manufacture of lard is increasing and Chicago stocks are piling up. On Nov. 15, they were 37,296,000 lbs., an increase of 16,902,000 lbs., as compared with Jan. 1, and a gain of 27,905,000 lbs. over the same time last year.

A better continental demand for lard and meats was reported by a few of the packers, supplies being taken by stocks already abroad. Others, however, said

business was slow. While the run of hogs in the early part of the week was light and prices advanced sharply, increased receipts later carried values off materially toward the last. There are more good packing hogs coming which accounts for the increased manufacture of product, particularly of lard.

The fresh meat trade is active and there is a large consumption of hog product.

The range of prices for week, the December range and range previous to December follow:

	High.	Low.	Jan. 17, 1925.	Jan. 10, 1924.	Jan. 19, 1924.

HOG SLAUGHTERINGS.

The reports to THE PRICE CURRENT-GRAIN REPORTER show the number of hogs packed in the West in the winter season beginning Oct. 27, 1924, compared with the same period of previous year:

	To Jan. 17, 1925.	To Jan. 19, 1924.
Chicago	2,650,300	2,637,800
Kansas City	743,300	826,000
South Omaha	767,200	692,500
St. Louis	853,300	840,200
South St. Joseph	541,300	489,600
Indianapolis	574,900	595,900
Milwaukee	212,200	213,100
Cudahy	288,700	340,400
Cincinnati	216,600	218,000
Ottumwa	256,700	247,500
Cedar Rapids	217,800	232,900
Sioux City	591,000	404,500
St. Paul	1,028,200	939,200
Cleveland	342,600	430,600
Louisville	81,900	104,500
Wichita	165,300	184,200
Detroit	338,500	330,400
Nebraska City	79,300	83,700
Fort Worth	85,900	94,500
Oklahoma City	78,900	91,800
Above and all others.....	12,305,000	12,042,000
For the week.....	1,093,000	1,075,000
Previous week	1,212,000	1,073,000

Weights are reported as follows: 205, 206, 207, 212, 239, 228, 221, 208, 211.

Correction.—The slaughtering figures of the Fort Worth market for the weeks ending Dec. 27, Jan. 3 and Jan. 10 are in error. They should have been, respectively, 56,800, 63,200 and 76,200. This error occurred in adding 58,000 to the Dec. 20 total, whereas it should have been 5,800, to bring the Dec. 27 figure up to date.

HOG PRODUCTS.

Fair trade and market higher, due to advance in grain and hog prices. Dull domestic and export shipping trade.

LAMBS ON FEED JAN. 1.

There was a decrease of about 163,000 head or nearly four per cent in the number of sheep and lambs on feed January 1, 1925, from the number January 1, 1924, in the corn belt and western states, according to the estimate of the Department of Agriculture. The estimated numbers were 4,081,000 this year and 4,245,000 last.

EXPORTS OF HOG PRODUCTS.

The past week's clearances of hog products compared with previous week and last year:

	Jan. 17, 1925.	Jan. 10, 1925.	Jan. 19, 1924.
Pork, bbls.	290	600	1,970
Pork, lbs.	55,100	114,000	374,300
Meat, lbs.	17,295,000	14,577,000	17,232,000
Total meat	17,350,100	14,691,000	17,606,300
Lard	14,197,000	27,325,000	16,572,000
Total product.....	31,547,100	42,016,000	34,178,300

RECEIPTS, TWENTY MARKETS.

Combined receipts of cattle, hogs and sheep at the seven leading western markets and thirteen other points today and for the week thus far, with comparisons:

	Cattle.	Hogs.	Sheep.	All kinds.
Past week.....	272,000	1,174,000	289,000	1,735,000
Prev. wk.....	304,000	1,233,000	259,000	1,796,000
1924	278,000	1,129,000	308,000	1,715,000
1923	295,000	801,000	282,000	1,378,000
1922	258,000	751,000	300,000	1,309,000

Combined receipts at the twenty markets for 1925 to date, with comparisons, as compiled by the Drovers Journal:

	Cattle.	Hogs.	Sheep.	All kinds.
1925	626,000	2,801,000	609,000	4,036,000
1924	724,000	2,928,000	800,000	4,452,000
1923	763,000	2,715,000	782,000	4,260,000

WHEAT RUNS ON HIGH.

Well, Old Top: Nearly every week the grain market goes right on up through a cloud of bearish figures and records of past performances dug up from the graveyard by the bears. Every week since figures were available on world's crop conditions our house, as well as myself, have been trying to tell you the last half of 1924 and early 1925 grain market is a special eight-cylinder bull model, put together by world's conditions and would climb to the \$2 mark on high. It kept on climbing right through September and December deliveries without any chains, through a regular downpour of wheat, both from this country and Canada; and with Russia hungry (instead of having a surplus), in the writer's humble opinion we should not be afraid of the Argentine and Australia crop movements disturbing conditions very much. With our visible decreasing the way it is the domestic situation is strong enough to sustain markets and there is a better chance of May wheat in K. C. going out over the \$2 mark than under.—*Tod Sloan, B. C. Christopher & Co., Kansas City, Mo.*

Morning Session.

9:30 a. m.—President's address, F. E. Crandall, Mankato, Minn.

10 a. m.—Appointment of committees.

Afternoon Session.

1 p. m., luncheon, New Nicollet Hotel.

1—Address, E. S. Woodworth, Chamber of Commerce, Minneapolis, Minn.

2—"My Experience with the Cooperative Marketing Law," O. A. Radke, Le Sueur Center, Minn.

3—"Some Legal Phases of the Minnesota Cooperative Marketing Law," Joseph N. Moonan, Waseca, Minn.

4—"The Market Quotations of the Grain Bulletin," F. R. Durant, Minneapolis, Minn.

5—"The Minnesota Storage Law," J. T. Probstfield, Supervisor, Local Grain Warehouse Department, Minneapolis, Minn.

6—Reports of committees.

7—Election of officers.

A reduced rate of a fare and a half has been granted by all railroads during the week of the auto show. Be sure and secure a certificate when you buy your ticket. A receipt will not answer the purpose.

You will be most cordially welcome to attend our meeting whether or not you are a member of the association.—*F. E. Crandall, President; E. H. Morceland, Secretary.*

GRAIN WEIGHING IN AFRICA.

In a recent test of three Richardson dustproof automatic grain shipping scales, in use by the Cape Town elevator of the South African Railways & Harbors, each scale being set to weigh 6,000 pounds, and 20 drafts being made on each scale, a discrepancy of but 7½ pounds in a total of 360,000 was found, or about 1/480 of one per cent.

The Chicago office of the Chase Bag Co. has been considerably enlarged, now occupying rooms 712 and 713 in the Woman's Temple. The former office of the Milwaukee Bag Co. was in this building, located, however, in another room, and the former office of the Chase Bag Co. and other Chicago branch offices of those bag concerns entering into the Chase Co. have been consolidated at the above address.

SEVENTH ANNUAL CONVENTION.

The seventh annual convention of the Tri-State Country Grain Shippers' Assn. will be held at Minneapolis on Thursday, Feb. 5, 1925, at the new Nicollet Hotel.

The forenoon session will begin at 9:30 o'clock. At 1 o'clock a luncheon will be served by the hotel management. Immediately following the luncheon the program will be carried out.

This will be an interesting and instructive meeting and every grain dealer that can possibly do so should attend. The Cooperative Marketing Law will be discussed by a grain man who has run up against the working of the law. The other numbers on the program are of vital importance to the grain trade of the Northwest.

Now—
greater accuracy—longer life
with the Type “S” Auto Truck Scale

THE Type “S” principles of design were first proved in railroad truck scale service. Undoubtedly this is the most severe test that could be given—exposed to weather, weighing tremendous loads, subject to jar and shock. The results surpassed all expectations. The Type “S” is more accurate...and it remains accurate under the most severe requirements.

The record was repeated in large capacity grain hopper scales. Here the Type “S” conquered a field where the minutest accuracy and constancy is required. The superiority was almost unbelievable—installation was more economical, operation was easier, and weights could be recorded with absolute certainty.

And now, in auto truck service, the Type “S” again offers new standards of accuracy and dependability. Our engineers will be glad to give you facts and figures and show you results other users have obtained. Or mail the coupon for the interesting book, “A Talk on Scales.”

FAIRBANKS
SCALES

New York

Chicago
900 South Wabash Avenue
and more than forty other principal cities in the United States

For Grain Dealers

Hundreds of dealers have found that weights can be easily and economically obtained with Type “S” Scales. They are made in capacities for the largest hauling equipment—an item of great importance now that auto trucks are being so widely used by farmers.

There is so much to be told about this wonderful scale that it cannot be described in detail here. Send the coupon for complete information and the booklet, “A Talk on Scales.”

Kewanee RENEWABLE
Grain Spout BOTTOM

Use a Kewanee Renewable Bottom Spout and when the bottom wears slip in a new one. We guarantee a Kewanee section to wear out 12 times as long as the bottoms are made from a special alloy steel—strong and long wearing. If you wore out a set of bottoms every year the replacement cost would be little—renewable bottoms for 8¢ size and smaller cost about 37 1/2 cents. And it's far less expensive to buy new bottoms than to repair worn spouts or try to patch them.
ORDER ONE ON TRIAL—Give us the outside diameter, or outside rectangular measurements of your spout, spout, and length of spout wanted. We will ship you a Kewanee. Use it a month, six months or a year. If it's not satisfactory to you return it and we'll refund your money.

Kewanee Implement Company
KEWANEE, ILLINOIS

If this paper pleases you kindly recommend it to your neighbors in the trade.

WANTED and FOR SALE MARKET PLACE, CLASSIFIED

for Buyers and Sellers of Properties and Equipment in Grain, Seeds, Hay, Feed, Flour, Millfeed, Beans, Produce, etc.
25c Per Printed Line Each Insertion

HAY FOR SALE.

ALFALFA and all kinds of hay. Delivered prices. HARRY D. GATES COMPANY, Jackson, Mich.

MACHINERY BARGAINS.

WE OFFER you a select list of elevator and seed equipment, in new and used machinery. Write for our bargain prices. STANDARD MILL SUPPLY CO., 501 Waldheim Bldg., Kansas City, Mo.

MACHINES FOR SALE.

FOR SALE CHEAP—Latest Type Strong Scott Pneumatic Air Dump, complete. WINTERS DUMP CO., 240 So. 4th St., Minneapolis, Minn.

GIBSON CORN CRACKER, practically new, for sale by THE BROOKS CO., Ft. Scott, Kansas.

ELEVATOR AT AUCTION.

BYRON, ILL.—22,000 bushel, round vitrified tile elevator, coal sheds and complete modern equipment to be sold at auction on Saturday, January 31, 1925. Located on C. G. W. R. R. in good stock. Grain and Dairy district of Illinois. Population 1,000. For particulars address Ray Barrick, Sec., FARMERS GRAIN COMPANY, Byron, Illinois.

MILLS FOR SALE.

FOR SALE—One hundred barrel flour mill in very best of condition. All new machinery and new power plant. Engine of the finest and absolutely reliable. Have 20,000 bushel capacity elevator and 6,000 barrel capacity fireproof warehouse. Excellent frame building for mill. Situated on the Mississippi River and Frisco Railroad in Missouri. Railroad spur running into the mill. A splendid bargain. Address MILL, care Price Current-Grain Reporter, 309 S. La Salle St., Chicago, Ill.

HELP WANTED.

WANTED—Brokers in Iowa and Minnesota to sell feed products for large manufacturers. Address BROKER, Box 27, care Price Current Grain Reporter, 309 So. La Salle street, Chicago, Ill.

SITUATIONS WANTED.

POSITION WANTED—As manager of Farmers' Elevator, or will join anyone who wants an experienced buyer to operate a country elevator. Address N. J. RODENBERG, Cathay, N. D.

SEEDS FOR SALE.

FOR SALE—White seed corn, fully matured, planted in April. Car lots or less. COLE SEED SAVER CO., Newbern, Tenn.

ELEVATORS FOR SALE.

FOR SALE—Iron clad elevator, 40,000-bu. capacity; only one competitor; good grain territory; a 400-car station doing good profitable business; electrically equipped, in good running order; storage for 10 cars of hay, 10,000 bu. of ear corn; located on best shipping R. R. in Ohio. Good reason for selling. Address H. G. POLLOCK, Middle Point, Ohio.

FOR SALE—Terminal elevator and Kansas Line. Terms. Bargain. ALLIN GRAIN CO., Coffeyville, Kans.

FOR SALE OR RENT—30,000 bu. concrete elevator with Hess Dryers attached. Ill. Central—Penn.—Wabash switching. Write J. M. ALLEN, Box 75, Decatur, Ill.

ENGINES FOR SALE.

FOR SALE—30 H. P. Foos Gas Engine priced right. Address E. C. WEGENER, Minco, Okla.

ATTENTION, MILLERS!

What you need for your mill we probably have. Full line of new equipment and very complete stock of used machinery at prices that will interest you. Everything from the receiving elevator to the packers. Write us today.

W. R. LEATHERS,

BUSINESS AND TRADE CONDITIONS

THE official character of much of the discussion of co-operation among the farmers further justifies what might seem to be too frequent reference thereon in this column.

The agricultural co-operative movement has always been a worthy subject of discussion, but many occupants of the Presidential chair at Washington have been so engrossed with financial and other affairs of great importance, admittedly, that certain homely details of their farm constituents' life came in for but little attention.

Today, we have in Calvin Coolidge, one who has rather positive ideas and at the same time a President who seeks enlightenment on co-operative marketing of farm products and allied matters. The President was quoted in a recent address as follows: "Propaganda seeks to close the mind while education seeks to open it. Of education and of real information, we cannot get too much." He appointed a commission to search out true facts concerning the welfare of the farmer, realizing, no doubt, from the training of an executive mind and through his personal experience on the Vermont farm, that either collectively or individually, the farmer has a man-sized job on his hands.

The country is most interested, however, in his plans as they may concern the position of the Government in financial and other encouragement of co-operative activities. We have stiffened our immigration bars with the purpose of excluding undesirables and not intended to keep cheap farm labor out of the country. Agriculture and labor alike approves this immigration policy. It has been stated here that it is probable the Government will not undertake to finance farm organization activities. Neither is it likely that the Government will officially encourage the establishment of properly selected executives from without the ranks for farm organizations, the withdrawal of whom through their own resignations or otherwise, would find farmers as a class no more capable of managing their own organizations in the future than they have been in the past. This statement does not conflict with the assurance made here from time to time that the farmer is individually a good business man, but he has not been proven capable of controlling his interests in a broad sense, planting, producing, harvesting and marketing on a collective basis.

It is believed that President Coolidge stands pat on the insistence that the agricultural co-operative movement shall be left solely in the hands of the farmers themselves—well enough for the tax payers of the country because it would require from them very little financial farm aid. But will a program of this sort work out satisfactorily?

The New Secretary of Agriculture

It is becoming growingly apparent that President Coolidge is seeking an expert in marketing rather than simply a dirt farmer to fill the high office of Secretary of Agriculture. It is in the proper methods of distribution rather than personal contact with the farmers of the West that we shall find the crux of the situation. The assurance that our country will continue as a surplus farm products nation for many decades means that improved marketing will benefit the consumer to a larger extent than the producer, but economies in distribution are not comparable in considering grain, for instance, and such perishable produce as fruit. Exchange facilities make the han-

dling charges on grain and live stock exceedingly small whereas such transportation expense as refrigeration and such unknown overhead expenses as spoilage, make the difference between the cost of fruit in the orchard and at the house-wife's door a large factor.

Once again, as so frequently stated here, there are larger difficulties confronting the farmer than marketing problems: such as, for instance, the cost to him of manufactured articles, implements, and such raw materials as fertilizer. The price level of the farmer's purchases has been maintained by a combination of tariff on imported goods and high labor

CONSERVATIVE estimates place the total cash wheat purchased in the world's markets, by importing countries during the past week, at more than 15,000,000 bushels, the bulk of which naturally was Australian and Argentine wheat.

Actual clearances of American wheat have been running around 3,000,000 bushels per week thus far this year, and the total for the first 6 months of the crop year has been around 180,000,000 bushels.

The entrance of Bulgaria, Holland, Germany and Russia into the market has caused a general scramble to secure supplies, leading to a heavy advance in world prices, and perhaps the largest buying of cash grain in the world's history put through under normal conditions.

France, in order to promote imports, has decreed that bread, hereafter, must contain 20 per cent of imported grain and the result has been that the price of bread in that country has advanced above the war level, and the attention of bakers has been called to the importance of incorporating 8 per cent of substitutes in the making of wheat bread.

charges on domestic production, all of which can not be successfully applied to the products of agriculture.

It seems to us that the new Secretary of Agriculture should be given sufficient means and authority to co-relate some system of equitable association between farm prices and the cost of farm needs.

Inter-Allied Debts

Figures on international indebtedness have recently been issued by the Bankers Trust Co., which are interesting from at least two standpoints; first, the magnitude of the moneys involved; second, consideration of the practical question: is it possible for debtors to pay such enormous sums and is it good business for the creditors to receive such payments? Associated with the solution of this problem is the probability that a gold standard in all nations will be necessary for the satisfactory settlement of their finances and the stabilizing of their business structure.

In thinking back, we recall that when these loans were contracted, they were mainly in the payment of enormous exports of munitions and foodstuffs. It is felt by economists that the only safe method of repayment would be through the reversal of the stream of traffic and the return to the United States, the heaviest creditor, for instance, of large quantities

of raw materials and manufactured goods. The difficulties present in a plan of this description seem insurmountable, for the United States, in acreage and peoples, manufacturing economies and inventive genius, is fitted to handle a heavy export business. We are only handicapped in such program through high-priced labor, but no logical economic reason seems possible to justify the importation of even the cheapest foreign goods, of which we are surplus producers.

Then, there is the moral issue involved, as to whether the great creditor nations are justified expecting payment that may even approach one hundred per cent of the indebtedness. This moral issue, if it entails lopping off even a considerable part of our claims, should have the hearty support of the business interests of the country and it may be that in the development of the duties of the Dawes commission, some equitable and humanitarian solution of these problems will be worked out.

Sound Credit, the Basis of Expansion

The possibility of inflation, still in the offing, is no occasion for lack of courage in the business world. Sufficient caution still prevails to steady our conduct in seeking future business, with money rates low and credit abundant. Today's figures on industry and trade reflect the broad advantage to cautious buyers of the light inventories maintained since the Spring of 1923.

There are still many lines in which capital and plant account still shows too large an item on the books. Unbalanced costs and selling prices in domestic markets and the continued stiffening of foreign competition are not sufficient, however, to induce timidity.

Continued increases in the unfilled orders of the iron and steel trade with several price advances announced last week are significant features of this basic industry. It is natural that buying has slackened somewhat because consumers are well covered for the first three months of the year. Building trades have been unusually active in considering the extremely cold and unfavorable weather condition of the Winter. This latter situation has favored the coal trade which has suffered poor business both at the mines and in consuming channels. Carloadings continue to exceed the figures of a year ago and railroads are buying heavily in anticipation of further traffic peaks this year.

Federal and State Powers

The extension of Federal supervision and control may have seemed unusually broad in the trades served through the PRICE CURRENT-GRAIN REPORTER. At least, it has appeared so. President Coolidge, however, was recently quoted on this matter when he said, "Efficiency of state governments is impaired if they relinquish and turn over to the Federal Government responsibilities which are rightfully theirs."

It is difficult to distinguish true facts from fiction in the newspaper reports of our various state administration activities. Neither is it a dependable criterion to consider the popular elections from time to time as truly indicative of the character of the politicians thus placed in positions of authority. The meeting of Governors some year or so ago did very little to assist state executives in the business-like handling of their office. As publishers, we do not encourage the broader assumption of power by the Federal Government but it must be apparent that each state shall first prove its ability to govern itself if a further extension of federal authority over individual and state rights is to be avoided.

SAPIRO TO COURT

ACTION for libel against Henry Ford has been started by Aaron Sapiro of pool fame. A formal demand has been sent to Mr. Ford for a retraction of certain statements alleged to have been made in the *Dearborn Independent*, owned by the automobile manufacturer, which is the legal preliminary required by Michigan law before the suit for \$1,000,000 can go to court. In this document Mr. Sapiro accuses Mr. Ford of approving "an attempt to destroy my participation in the co-operative movement, its purposes, or its effects," and quotes several paragraphs from articles appearing in the *Dearborn Independent* to which he takes exception.

It is surprising that this suit was not initiated some time ago. The series of articles appearing in Henry Ford's paper constituted the most violent castigation of an individual and his methods ever appearing in print, and the long period of silence gave credence to the charges against Sapiro and those who were alleged to have been associated with him. This case should hold the attention of the country from coast to coast, because not only Sapiro but the whole pool movement will be subjected to the blinding searchlight of legal questioning. The public wants to know the truth.

While it is to be regretted that these articles expressed an unmistakable prejudice to the Jews, there were certain statements made and figures given which apparently were based on facts that everyone would like to know more about. This case also will serve to indicate why Sapiro has shown such a kindly interest in the welfare of the American farmer. Lawyers will literally strip him of any vestments of philanthropy which he may be wearing, and make him stand out on his own merits. The questions to be revealed by this trial are as follows: Who is Sapiro, what is the pooling movement, and what is his relation to it?

WINTER TIME, FIRE TIME

A N elevator fire is liable to occur most any time, but in cold weather the office stove is booming, oil and grease congeal, and less care and attention are given to inspection of various portions of the elevator with the result that something may go wrong and not be noticed. Cold weather is liable to breed careless habits. But it behooves every elevator operator to see to it that inspection of the plant is made at regular stated intervals and preventive measures be taken at all times.

Fire barrels should be carefully watched in winter time, they should contain a non-freezing solution, otherwise they will freeze up and burst. Elsewhere in this issue is an extract from the report of Sec'y Sloan of the Farmers' Grain Dealers' Ass'n of South Dakota, which contains about as much advice as can be put in a few words regarding the care and maintenance of elevator property. We have dwelt editorially on these things many times. We want it to become a second nature with every elevator operator as far as it is possible to do so to know that proper care and attention is being given elevator property for the prevention of a fire. The best kept elevators burn occasionally but the chances are that they won't. An elevator fire is always an economic loss and doubly hard on the owner during the grain movement.

THEY WANT TO QUIT

A T a meeting of members of the Dark Tobacco Growers' Coöperative Association of Daviess county, Kentucky, which was held in Owensboro on the 17th, two thousand growers voted in favor of cancelling their 5-year pooling contract, and named a committee to raise funds to employ counsel to test its validity and to ascertain how it could be terminated.

On the same date 400 members of the Dark Tobacco Growers' Coöperative Association of Montgom-

ery county, Tennessee, voted to request the legislature of that state to so amend the Bingham marketing act as to allow the members to withdraw from the association when a majority in any county so votes.

It is quite evident that the pooling scheme is no more a panacea for the tobacco growers' troubles than it is for growers of wheat and when the trouble which was caused by the effort of the Burley pool to prevent its members from planting a crop this year, are recalled, the fallacy becomes increasingly apparent.

Certain combinations in restraint of trade may, by legislative fiat be made legal, but it is going to take more than that to make them an accepted part of the American plan of doing things. Class legislation can have no permanent place in this country under our present Constitution.

SIDE LINES

IT is becoming more and more evident, as the days go by, that the smaller country elevator and frequently the larger one as well, cannot be operated without taking on so-called side lines, and while coal and a few other commodities have been very generally handled for a good many years, necessity has recently brought a great increase in the number and a wide diversity of commodities thus handled.

Taking on one or a dozen or more side lines will not, automatically, mean sales and profits and unless a market exists or can be created and unless business-like methods of advertising, handling and selling are adopted, side lines are pretty sure to be just an added burden, which might better have never been taken on.

As an illustration of what may be done with side lines when they are handled intelligently, we should like to call the attention of our readers to a statement made to the members of the Indiana Grain Dealers' Association, by C. O. Wise, of Connersville, Indiana, as reported on page 13 of our last week's issue.

That statement shows that the handling of wheat gave his company but 35 per cent of its gross profits, side lines, including coal, seed, tankage, fertilizer, etc., making 65 per cent.

While we are on the subject of side lines, there is one more point we should like to emphasize and it is this: Be sure that each side line carries its proper proportion of the overhead, unless, of course, you want to use it to attract to your elevator, people who would not otherwise come and in that event the difference should be charged to advertising and credited to sales of that specific line.

CODE OF ETHICS

IN the code of ethics adopted at the recent meeting of the Indiana Grain Dealers' Association, there are set forth those principles and ideals which, if more generally followed by all of us, would bring about a real revolution in business.

Take for example paragraph number 3, of the code, which reads as follows:

"I realize that as an ambitious business man, worthy of success, I should and do recognize the importance of personal qualifications which contemplate private morality, sobriety, sincerity, truthfulness, integrity and honor, and as an ethical man I wish no success that is not founded on justice, honesty, morality and fair dealings," and we at once establish a foundation for the conduct of business which would certainly leave little to be desired.

The adoption of resolutions, however, is an easy matter and the most of us are always willing to concede that they ought to be lived up to—by the "other fellow," but we are confident, from the spirit displayed by the members of the Indiana Association, all through their meeting, that the code adopted, clearly represents their principles and aims every day in the year, and it is simply an added indication of the gradual elevation of the plane on which the business of the whole world is conducted.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	Jan. 24, 1925.	Jan. 17, 1925.	Jan. 26, 1924.
Wheat—			
Primary receipts	6,305,000	5,288,000	3,705,000
Primary shipments ..	4,345,000	4,382,000	2,779,000
Receipts since July 1.	416,788,000	410,492,000	262,253,000

REFORESTATION

EX-GOVERNOR FRANK O. LOWDEN, of Illinois in an address in Chicago last week before the American Forestry Association, made this startling statement: "No man holds good enough title to any acre of land, to leave it in a less fruitful condition than when he got it." Continuing, Mr. Lowden said that there were in so-called wood lots, 150,000,000 acres, on which trees might be planted and 530,000,000 acres of waste land on which trees would grow.

The value of forests, for their lumber and fuel, is too well known to call for any discussion and their value in holding back moisture and thus in lessening flood damage is familiar to every one, and the point we wish to make is that while the question of maintaining the forests is one in which every one is interested, the most of us decline to feel or to assume any personal responsibility in the matter, and the result is that nothing in any large and systematic way is being done.

We owe a debt not only to ourselves but to our posterity in this specific direction. What are we going to do about it?

LETTERS from our readers are solicited on subjects of interest to those engaged in the grain and allied trades, news items, reports on crops, grain movement, new firms, contemplated improvements and cars leaving in transit.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain, feed, seed, bean and hay industries is unquestioned. The character of advertisements in its columns testifies to the favorable opinion of and value received by our advertisers. If you would be classed with progressives, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

CHICAGO, JANUARY 28, 1925

GRAIN TRADE REVIEW

SOME of the theories advanced by believers in higher prices for wheat many weeks ago have commenced to materialize, and values have advanced steadily to a new high on the crop, and a \$2 figure at Chicago for the May delivery would not be surprising before long. The aggressive buying of cash wheat in all of the leading markets of the world, with the largest business probably in history put through under normal conditions has had a radical effect on values, and whereas two weeks ago Argentine wheat was quoted at equal to about 15c under American hard winter delivered abroad, the two countries were at practically the same figure at the close of the past week, indicating that foreign markets had been too low as compared with America rather than the latter having been too high. All markets sold at a new high on the crop the past week, and while there were numerous reactions due to the technical position there was nothing in the action of the world's markets to suggest that the end of the advance was in sight, as each reaction was followed by a bulge to a new high. The speculative interest in wheat is world wide at the present time, and while the short interest is relatively small, nothing has developed of late to shake the confidence of holders; in fact, the news has been decidedly in their favor. It is probable that over 15,000,000 bu. of cash wheat was bought in the world's market the past week by importing countries, and despite the high level, fair quantities of domestic grain were taken. Naturally the bulk of the business was in Argentine and Australian wheat. It is privately estimated that charters have been made to move out 138,000,000 bu. of southern hemisphere grain, or well over half of the exportable surplus. Charters for North American wheat on the other hand are somewhat less than 8,000,000 bu. according to the reports. Actual clearances of American wheat have been running around 3,000,000 bu. or more per week, since the turn of the year, and for December were over 26,000,000 bu., making the total for the first six months of the crop year around 180,000,000 bu., suggesting that there is around 100,000,000 bu. available for export after cutting into the carryover for 25,000,000 bu. as compared with the

quantity on hand at the end of the 1923-24 season.

Foreign Situation.

The trouble with the market has been the refusal of foreigners to thoroughly understand the world's situation. The United Kingdom, France and Italy apparently thought that they would be about the only buyers of the Argentine and Australian wheats, but the entrance of Russia, Germany, Holland, Bulgaria and other countries into the market dispelled this belief and led to a general scramble to secure supplies with radical effect on the world's price. France has at last realized that supplies are theoretically short and in order to promote imports of foreign wheat has decreed that bread hereafter must contain 20 per cent of imported grain. The result has been an advance in the price of bread to somewhat above the war level. Some of the smaller American bakers have found it necessary to advance prices 1c per loaf, and a general advance of that amount would not be at all surprising in the immediate future. There are intimations that the Argentine wheat crop has been over-estimated, and cables from Buenos Ayres indicate that a majority of the leading exporters are decidedly bullish. Australian dock strike is serious, and exporters have ceased to offer grain except for March shipment. The cash wheat basis in the United States has firmed with red winter scarce and sells well above \$2 in all of the leading markets. In fact, that price was bid at country points in Ohio during the closing days of the week. There is more or less apprehension as to the condition of the new crop with fears of extensive damage in some sections, especially where the ice pack has continued over the plant for over a month. However, it will take growing weather to determine the damage, if any, and that will not be experienced for some weeks to come. In the meantime claims of damage will receive little attention from thinking traders. The July and September deliveries have advanced in sympathy with the May and are selling at abnormal figures for this season of the year.

Coarse Grains.

Strength in both corn and oats has been borrowed largely from wheat as the cash situation is anything but encouraging to a bull. At the same time there has been no material pressure on either market, and each break has been followed by sharp upturns when wheat bulged into new ground. Cash corn market has weakened with discounts for spot lots the widest of the season. A scarcity in elevator room is a strong factor in this respect, but there is no keen demand for the No. 5 and No. 6 grades on account of light weight, which is a factor in increasing the percentage of these grades. Oats prices are low as compared with corn, but at the same time it has been almost impossible to attract much speculative buying on account of the large stocks now held at terminal markets and which as yet show no signs of decreasing. The rye market has advanced very rapidly with a fair export business, and the fact that the visible supply continues to increase has had little or no effect on prices. The continent has taken fair quantities of rye of late and Russia has bought rye flour.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Jan. 24, 1925.	Jan. 17, 1925.	Jan. 26, 1924.
Wheat	6,119,000	5,227,000	3,764,000
Corn	3,296,000	8,984,000	7,501,000
Oats	5,835,000	5,104,000	4,386,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week.....	20,250,000	15,651,000
Preceding week.....	19,315,000	13,665,000
Since July 1.....	769,500,000	686,461,000

Wheat values were on the upgrade the greater part of the week, and while the market was called upon to absorb immense profit taking sales, the finish was within a fraction of the top with net gains of $5\frac{1}{4}$ @ $7\frac{1}{2}$ with July showing the most strength. Bullish sentiment strongly predominated, and while the bulge checked the foreign demand the latter attracted little attention. Trade was on a large scale, with a near record for total transactions made last Friday. The belief that wheat will be scarce before another crop is harvested and the entrance of Russia and other countries into the world's markets as buyers were the bullish influences, and bearish development attracted little attention.

Corn after selling at a new high on the crop early the past week, reacted sharply in sympathy with the weakness in cash grain and closed with net losses of $\frac{5}{8}$ @ $2c$ for the week, the latter on May, which went to $1\frac{1}{8}$ c under the July. Cash discounts were the largest on the crop and in some instances farmers are being advised to hold back their grain and sell the May against it rather than sacrifice the cash article at the prevailing figures. Eastern demand remains distinctly slow.

Despite the strength in wheat, oats averaged lower and closed about the bottom with net losses of $1\frac{1}{4}$ @ $1\frac{1}{8}$ c for the week with trade largely of a local character. Those who have bought on the price have in many instances sold out and the market at the present time awaits some new developments. Rye sold at a new high on the crop and led the advance in grains, gaining $15\frac{1}{8}$ @ $16\frac{1}{4}$ c for the week. Export demand was not overly brisk, but little attention was paid to the comparatively limited foreign demand and the big discount of the cash grain as compared with the May. Range of prices the past week follows:

	High.	Low.	Jan. 24, 1925.	Jan. 17, 1925.	Jan. 26, 1924.
Wheat—					
May	\$1.96	\$1.87 $\frac{1}{2}$	\$1.95 $\frac{3}{4}$	\$1.88 $\frac{3}{4}$	\$1.09
July	1.72 $\frac{1}{4}$	1.64 $\frac{1}{4}$	1.70 $\frac{3}{4}$	1.63 $\frac{1}{4}$	1.07 $\frac{3}{4}$
Sept.	1.58 $\frac{3}{4}$	1.53 $\frac{3}{4}$	1.57	1.51 $\frac{1}{4}$	1.06 $\frac{1}{2}$
Corn—					
May	1.37 $\frac{1}{4}$	1.31 $\frac{3}{4}$	1.33	1.35	.79 $\frac{1}{4}$
July	1.37 $\frac{1}{4}$	1.32 $\frac{3}{4}$	1.34 $\frac{1}{4}$	1.34 $\frac{1}{4}$.79 $\frac{1}{2}$
Sept.	1.37 $\frac{1}{4}$	1.33 $\frac{3}{4}$	1.34 $\frac{1}{4}$	1.35	.80 $\frac{3}{4}$
Oats—					
May	.64	.61 $\frac{1}{2}$.61 $\frac{1}{2}$.62 $\frac{3}{4}$.47 $\frac{1}{2}$
July	.64	.61 $\frac{1}{2}$.62	.63	.45 $\frac{1}{2}$
Sept.	.60 $\frac{3}{4}$.58 $\frac{3}{4}$.59	.60	.43 $\frac{1}{2}$
Rye—					
May	1.76 $\frac{1}{2}$	1.62 $\frac{1}{2}$	1.76 $\frac{1}{2}$	1.61 $\frac{1}{2}$.73 $\frac{1}{4}$
July	1.58	1.44 $\frac{1}{4}$	1.58	1.41 $\frac{1}{4}$.74 $\frac{1}{2}$

WHEAT STOCKS AND CONSUMPTION.

WORLD'S WHEAT EXPORTS.

Exports of wheat last week compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Jan. 24, 1925.	Jan. 17, 1925.	Jan. 26, 1924.
American	4,234,000	6,882,000	7,741,000
Argentine	4,074,000	4,199,000	3,400,000
Australian	2,944,000	2,784,000	3,336,000
Indian	976,000	880,000
Russian	1,880,000
Others	40,000	192,000

Total

Of the above total wheat from America there cleared in the form of flour 1,345,000 bus.

The total export of wheat since Aug. 1, the commencement of the European crop year, compared for three years:

	1924-25.	1923-24.	1922-23.
American	262,117,000	239,194,000	268,534,000
Argentine	45,784,000	43,370,000	41,566,000
Australian	26,264,000	25,088,000	15,568,000
Indian	20,320,000	5,864,000	5,248,000
Russian	328,000	19,272,000
Others	2,544,000	11,930,000	3,287,000
Total	357,357,000	344,718,000	334,242,000
Season	753,195,000	662,698,000

WORLD'S CORN EXPORTS.

Exports of corn last week, compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Jan. 24, 1925.	Jan. 17, 1925.	Jan. 26, 1924.
American	16,000	16,000	626,000
Argentine	1,552,000	3,040,000	864,000
African	323,000
Russian	196,000	175,000
Others	1,607,000	493,000	649,000

Total

Exports of corn since Nov. 1, 1924, compared with last year and year before:

	1924-25.	1923-24.	1922-23.
American	280,000	3,020,000	22,234,000
Argentine	37,740,000	16,876,000	48,396,000
African	867,000	4,629,000
Russian	1,055,000	594,000
Others	8,641,000	13,351,000	116,000
Total	48,583,000	38,470,000	71,046,000
Season	229,932,000	205,235,000

WORLD'S OATS EXPORTS.

Exports of oats last week, compared with the previous week a year ago, as reported to the Broomhall service and forwarded to this paper:

	Jan. 24, 1925.	Jan. 17, 1925.	Jan. 26, 1924.
American	209,000	131,000	460,000
Argentine	1,057,000	126,000	1,924,000
Others	10,000	20,000

Total

Exports of oats since Aug. 1, 1924, and comparisons for three years.

	1924-25.	1923-24.	1922-23.
American	13,926,000	11,260,000	22,540,000
Argentine	24,283,000	11,742,000	7,735,000
Russian	180,000
Others	1,614,000	580,000	2,670,000
Total	39,823,000	23,762,000	32,945,000
Season	67,500,000	65,765,000

U. S. GRAIN IN CANADA.

The Canadian Bureau of Statistics reports the following amount of grain in store in Canada on Jan. 9:

	Jan. 16, 1925.	Jan. 9, 1925.	Jan. 18, 1924.

Corn	1,228,205	1,288,602	179,729
Total, bus.....	10,253,220	10,389,678	1,423,041

WALLACES' FARMER REPLIES

On Packers' Profits—Their Position Unsound—Use Insinuations Which Create Class Prejudice.

IN the letter appearing below, *Wallaces' Farmer* replies to an editorial in the Jan. 14 issue of THE PRICE CURRENT-GRAIN REPORTER, entitled "Much Ado About Nothing":

"In the Jan. 14 issue of THE PRICE CURRENT-GRAIN REPORTER you state that *Wallaces' Farmer* is doing the packers a foul injustice. You say that the packers are denied the right to present their side of the case. I may say that when this matter of large hog profits was up in the spring of 1923 we gave Dr. L. D. H. Weld four times as much space in reply as we took with our original statement. We have also given E. N. Wentworth of Armour space whenever he wished to reply.

"In the case of our editorials on packers' hog profits in our issues of Dec. 26, 1924, and Jan. 2 and 9 of 1925 I may say that the only protest from the packers is one from Wentworth which he says is not for publication.

"In your Jan. 14 article you claim that we think it is a crime for packers to make profits. If you will re-read our editorials you will find that we think it is wrong for packers to use profits made in slaughtering hogs to cover losses in other lines of business.

"It is my observation in trying to get THE PRICE CURRENT-GRAIN REPORTER to correct misstatements that it is infinitely more difficult for us to get a fair hearing in your paper than it is for the packers to get a fair hearing in *Wallaces' Farmer*."

Although the Jan. 9 editorial in *Wallaces' Farmer* was the one directly referred to in our editorial of Jan. 14, we believe that it also covers the points at issue in the editorials of Dec. 26 and Jan. 2. The whole burden of these editorials is based merely on "suspicion" and wild conjecture. Can there be any justice in charging a corporation with a crime on such grounds? By innuendo, the packers have been charged by *Wallaces' Farmer* with entering into a combination in restraint of trade, when it says in an editorial: "We have always had a suspicion that on the average, packers make high profits on the slaughter of hogs and the sale of pork products, and that these profits have been used to counterbalance losses in other branches of the business."

It would seem from Mr. Wallace's letter that he believes the packers so control the market that they pay whatever they desire for hogs, cattle, and sheep and charge as much or more than the retailer can stand for the finished product. If that is the case, it is hard to understand why they do not arbitrarily fix higher profits on cattle and sheep operations but content themselves only with high profits on hog slaughtering, as *Wallaces' Farmer* suspects. Some inconsistency!

Another editorial states that the packers purchased hogs in December at 34 per cent above the pre-war price and sold lard and bacon at 50 per cent above pre-war and the sides and hams at 42 to 44 per cent above pre-war. This is hardly a fair comparison, as the hog is not all bacon and lard, but is composed of a number of cheaper cuts and inedible parts. Granted that these figures are correct, however, did it ever occur to *Wallaces' Farmer* that the cost of packing operations has increased enormously since 1914, wages alone being double the pre-war figure, which it seems would more than explain the difference between 34 and 50 per cent, taking the extremes as an example.

Wallaces' Farmer also is astounded at the immense figure for which hog products sell as compared with the theoretical amount which was paid for the live hogs. By insinuation, they would have the farmers believe that a large part of the 50 per cent gain of the selling price over that at which the hogs were purchased represents net prof-

its. What cheap drive! How many manufacturing enterprises sell their finished products for as small a difference as 50 per cent over the raw product? Wages, work materials, power cost, selling cost, advertising, and other items must all be deducted from this 50 per cent before the packers get anything.

Not only the packers but the grain trade has suffered from this same source of insidious propaganda which is being doled out to the farmer. The grain exchange members are called crooks, terminal elevators are making enormous profits, country elevators are taking their unjust due from the farmer, are some of the charges laid at the door of the grain trade from such sources as *Wallaces' Farmer*, notwithstanding vindicating reports issued by the United States Government.

The publishers of THE PRICE CURRENT-GRAIN REPORTER are of the opinion that statements made in the editorial, "Much Ado About Nothing," require no retraction. As for the question of a fair hearing in the columns of this paper, Mr. Wallace and his publication have always had the privilege of presenting their side of the case whenever a communication has been addressed to the editor, and the courtesy is open to him in the future.

COAST GRAIN PRICES.

Quotations of grain reported by grain exchanges of the Pacific Coast as of Jan. 21, are as follows:

Portland — Merchants' Exchange, noon session, Jan. 21:

Session, Jan. 21.

Pullman, Wash., Jan. 22.—Red, \$1.68; white, \$1.71.

Lewiston, Idaho, Jan. 22.—Red, \$1.63; white, No. 1, \$1.70.

Colfax, Wash., Jan. 22.—White, \$1.68; red, \$1.65; barley, \$35; oats, \$32.

Dayton, Wash., Jan. 22.—Club, \$1.75; red, \$1.72.

Davenport, Wash., Jan. 22.—Hard white, \$1.98; bluestem, \$1.88; forty-fold, \$1.68; club, \$1.65; marquis, \$1.70.

Odessa, Wash., Jan. 22.—Bart and bluestem, \$2.05; Turkey red, \$1.87; marquis, \$1.76; forty-fold, \$1.73; club, \$1.70; Jones Five, \$1.63.

CANADIAN GRAIN IN U. S.

The following table exhibits the quantities of bonded grain in the United States reported last week compared with previous week and one year ago:

	Jan. 24, 1925.	Jan. 17, 1925.	Jan. 26, 1924.
Wheat	16,805,000	18,129,000	26,721,000
Oats	1,497,000	1,625,000	1,507,000
Rye	1,559,000	1,565,000	1,507,000
Barley	1,973,000	2,111,000	372,000

IOWA FARMERS DEALERS MEETING STORMY

ABOUT 2,000 delegates and guests attended the convention of the Farmers Grain Dealers' Assn. of Iowa at Ft. Dodge, Ia., on Jan. 20, 21 and 22. Unusual interest was manifested in the program on account of the question whether or not the association should endorse the Grain Marketing Co. was to be debated by J. W. Coverdale, secretary of the cooperative company, in the affirmative, and H. A. Wallace, of *Wallaces' Farmer*, in the negative. President H. F. Huibregste, of Hull, presided at the sessions. Although special papers and discussions on topics of particular interest to farmers' companies managers were on the program and a number of excellent speakers were on the program the main interest was centered in the debate over the cooperative elevator company. A plea for harmony was made by J. F. Gustafson, of Windom, Minn., president of the national body, who spoke on the subject, "Advantages and Activities of Farmers' Elevators and State Associations." E. L. Kreger, of Ralston, talked on the "Managers' Association," and Chas. E. Eckerle, Minneapolis, took the subject "Our Outlook."

Debate on Grain Marketing Co.

J. W. Coverdale, in explaining the history, plan of operation, and future plans of the cooperative, said in part as follows:

"The Grain Marketing Co. is actually a large factor in the American grain markets. The machinery is all erected and running; its transactions are proceeding on a gigantic scale. Thousands of grain farmers are already enrolled as members, directly or indirectly, and whether the producers of grain or their elevators are members or not, the Grain Marketing Co. is handling somewhere along the line a fair portion of all the grain that enters commerce.

"The customary process of organization has been reversed in setting up the Grain Marketing Co. Business for the company was created simultaneously with the organization, the acquiring of physical properties, the finances and the managerial ability. The producers of grain and their associations are being invited to join the company on the evidence of things done rather than those hoped for, although there is a host of the latter.

"While it is not possible to ascertain exactly what proportion of the entire volume of marketed grain has been handled by the Grain Marketing Co. since it began business on Aug. 5, it has handled a considerable portion of all the grain that has come to market in the central states.

Of course, starting as it did at the beginning of the crop year, the company did not have time to create a large membership, and so the bulk of the grain it has handled has been from non-members. However, it has handled grain for pools, farmer elevators, individuals, etc. It has handled grain for member cooperative organizations with memberships in the company representing a total of about 90,000 grain producers. About 300 farmers' elevators already have done business with us. In Iowa from our Fort Dodge and Des Moines offices we have records of 78 farmers' elevators and 51 independents from whom we have received business since August 5, 1924. In Michigan 216 elevators, in northwestern Ohio, 80, in northern Indiana 39, and in Illinois a partial count shows over 200. The company has handled grain from every pool in the United States, directly or indirectly, except one.

"The Grain Marketing Co. is not a speculative company, hence it can not pay above the market price at time of purchase, and when it sells, it must meet competitive prices. All the grain it buys is hedged on the future market immediately upon purchase; thus the rise and fall of prices have little effect upon

it. It requires no contract for delivery of grain, and will not get it unless its price is equal to that of its competitor and its service as good or better.

Wallace Opposes Plan.

H. A. Wallace, of *Wallace's Farmer*, in opposing the merger, said:

"The Grain Marketing Company is not as it claims to be essentially a cooperative concern. Since it began business in August, it has handled over 100,000,000 bus. of grain, but the methods were essentially as though a trust had been formed of the merger properties instead of a cooperative. Nearly all the business has necessarily been for non-members, which means that the company is violating the Capper-Tincher Act of the United States. Members must be brought in fast or it will have to abandon its cooperative guise.

"The contract provides that not until the \$4,000, lent to the merger, and eighty per cent of the appraised value of the properties is raised, shall the Armour and Rosenbaum interests release control of the business. Marcy and the two Rosenbaums are now in complete charge. Even if the property appraisal is as low as \$15,000,000, this clause means that the merger will have to pay Armour and Rosenbaum \$16,000,000 before the new company can dictate policies to the managers. When the stock selling expense is considered, it is probable that it will cost the farmers of the United States considerably over \$20,000,000 to run the business as a cooperative.

"To think of the Rosenbaums and Marcy really believing in a philosophy of cooperation is ridiculous. From the standpoint of the world of big business they may be fine fellows, but it is certainly a travesty on cooperation to allow men with their background to manage without interference for a period of five years a mammoth grain trust."

From the foregoing it may readily be seen that Wallace's remarks are seared with prejudice and that he has advanced no real argument against the Grain Marketing Co. Unless cooperation bears the Wallace stamp of approval, it apparently has no merit.

At the closing session, resolutions were passed condemning the Grain Marketing Co. and recommending that the state board of the association be empowered to investigate any stock selling scheme that should come under the Blue Sky Law which affects the interest in their elevators and farmers. Resolutions of condolence for the late Henry C. Wallace, secretary of agriculture, and the late G. M. Dyer, former president of the association, were also passed.

J. W. Shorthill, secretary of the Farmers' National Grain Dealers' Assn., in his address on Wednesday evening said that the farmers' cooperative elevator movement will be a success as long as that movement originates with the farmer; is conducted by the men who originated it; is organized in local units, and is built from the bottom up. He also voiced opposition to the Grain Marketing Co.

T. G. Merritt of Gliden, Ia., was elected president; Simon Kemmerer of Ames, vice president; and S. J. Cottingham of Stanhope, treasurer. J. P. Larson was re-elected secretary.

FINAL REPORT CANADIAN CROPS.

Canadian Government final report on the 1924 crops showed a reduction of 32,000,000 bu. as compared with the recent Winnipeg *Free Press* estimate on wheat and a decrease of 9,000,000 bu. as compared with the preliminary official returns. Total wheat for all of Canada is 262,000,000 bu., or 214,000,000 bu. less than harvested in 1923. Crops in the three provinces with comparisons follow (final 000 omitted):

	Final, 1924.	Preliminary, 1924.	Final, 1923.
Wheat	236,000	245,000	452,000
Oats	229,000	233,000	392,000
Barley	69,000	66,000	60,000
Rye	11,000	11,800	20,600
Flax	9,600	9,600	7,000

The Letter Box

Changed Hands
Price Current-Grain Reporter: Thos. Boyce Feed Co. now rent and occupy the Attica Mills, formerly operated by Chesboro Bros., dealers in grain and flour.—Mrs. Frank Chesbro, Attica, N. Y., executrix.

Will Meet in April.
Price Current-Grain Reporter: This letter is to advise you that the annual meeting of the Western Grain Dealers' Association will be held during the month of April, time and place not yet fixed.
Will be glad to have you give publicity to this extent, and oblige—Geo. A. Wells, Secretary, Des Moines, Ia.

A Reader for Forty-four Years.
Price Current-Grain Reporter: For the past forty-four years I have been an independent grain dealer and for the same length of time have been getting your paper. In your issue of Jan. 7 in an editorial on page 10, under the heading "Sidelines," you mention flour, feed, salt, fence posts and other material. Your editorial is right to the point.—North Dakota.

Winter Wheat Condition.
Winter wheat in our section same as last year, has a good covering of snow, should come through the winter in fair shape. Last year most of it froze out, account no winter covering. Cannot speak of other sections of the state.
Of the 1924 crop, not over 12 per cent left in the Glasgow territory, very little stored wheat, probably not over 2 per cent of crop went west to west coast from here this year, balance all east. Local consumption 25 per cent.—Glasgow Flour Mill Co., Glasgow, Mont.

New Elevators.
Price Current-Grain Reporter: We have just closed a contract for a 12,000 bushel elevator to be built for the Light Grain & Milling Co. at Turpin, Okla. This is on a new railroad being constructed out of Forgan, Okla.

This plant is 24x32 ft. on the ground, and the bins are 32 ft. to the square. The pit will be 18 ft. deep and the cupola 16 ft. high. There are six main storage bins 9x6 ft. and one bin over the work room 6x9 ft. The engine room will be 8x10 ft., and the office 10x18 ft. in two rooms. The whole plant will be iron clad, with a 3 V crimp galvanized roofing. The machinery will include a 6 h.p. Type "Z" Fairbanks engine, Globe combination truck dump, 1,000 bushel Richardson automatic scale, a 10-ton Fairbanks truck scale, and a 1,250 bushel per hour elevator leg. The construction will start at once.

We are also building a mixed feed plant for Tyler & Co. at Junction City. This plant will contain a number of small overhead retail bins, a No. 20 Western hammer type mill, a 3-pair high roller mill, 3 elevator legs, cracked corn grader and separator, with a 100 ft. run of spiral conveyor to draw material from the main elevator to the mixing plant. This mill is under construction at present.—The Star Engineering Co., Tom Curless, Manager, Wichita, Kans.

Corn in Illinois.
Price Current-Grain Reporter: Prevailing prices recently paid for corn have been tempting to the grower; he gets a nice wad of the long green for a crib of corn these days. In addition he saves taxes, interest and shrinkage, which would mount up to a pretty penny by next summer. The answer is a movement of corn of larger volume and longer continuance than had been expected. This stream of corn has filled and overfilled most terminal elevators and the demand from consumers.
The result is that box cars laden with

grain are standing around most anywhere, waiting for a chance to be unloaded. The grain dealers generally would have preferred to have a large part of this corn remain in farmers' cribs until next summer, when it would be in fine condition to ship anywhere and would probably be in better demand.
In fact, it looks now like this good quality Central Illinois corn will be quite a scarce article later in the season. It really seems that it would have been good policy to let the states that raised soft corn this year have the market to themselves these weeks of cold weather, which was the only time when they could move it; however, the corn has arrived from all sections lately in a stream larger than the demand called for.—H. I. Baldwin & Co., Decatur, Ill.

From Pondera County.
Price Current-Grain Reporter: Following is the grain situation in Pondera County, located in northwestern Montana:
During the years from 1909 to 1916, which was the beginning of agriculture in this territory, winter wheat was one of our most important crops, but since then it has rapidly given away entirely to hard spring wheat of the Marquis variety or to flax, oats or barley.

There are around 120,000 bushels of wheat in storage in the Valier elevators and approximately 50,000 bushels in the farmers' hands at this time.
About 50 per cent of our wheat crop is shipped to the western coast, 30 per cent to the east and the balance to Montana flour mills.

Practically speaking, about one-third of Pondera county is under irrigation and the balance of the county is farmed under dry-land methods or is used for stock raising. The irrigated lands raise all of the small grains and also fine alfalfa hay which makes it very satisfactory for diversified farming. The dry land raised very fine hard spring wheat which always sells at around the top figure on the east or west markets.

The farmers are using more improved farm machinery each year and are following out the latest methods in handling dry and irrigated lands with the result that the farmers are doing much better than when they first undertook to farm in this country.

Dairying, hog raising and sheep raising on the irrigated lands is being practiced more each year.—H. W. Pond, Valier, Mont.

Montana an Agricultural State.
Price Current-Grain Reporter: The acreage of winter wheat in Montana sown this fall for 1925 harvest is placed at 112 per cent of the 683,000 acres sown last fall or 767,000 acres. The condition of winter wheat on Dec. 1, while not as favorable for the state as a whole last year, is above average and at 85 per cent of a normal compares with 90 per cent of a year ago and 82 per cent, the 10-year average for Dec. 1. The crop has been protected through the low temperatures by good snow covering and enters the winter with a generally good root system.

The acreage of winter rye is placed at 169,000 acres, 135 per cent of the acreage seeded last fall. Condition of the rye crop on Dec. 1 was placed at 88 per cent of a normal compared with 84 per cent a year ago and the 10-year average for Dec. 1 of 84 per cent.

With favorable weather conditions during the spring months, Montana looks forward to an increase in the spring wheat acreage of 12 to 15 per cent. The soil at the present time is in good condition; lots of snow on the ground over the entire state.

There has been marketed during the season approximately 85 per cent of the crop; the prices for spring and winter wheat vary according to protein content, the price for spring wheat ranging from \$1.65 to \$1.85 per bushel and for winter wheat from \$1.55 to \$1.65 per bushel. The quality of Montana wheat as a general rule is extremely good and the

wheat demands a high premium on all terminal markets.
The percentage of Montana wheat milled in Montana is based on an average crop of fifty million bushels per year, and while the milling capacity of Montana would absorb 35 to 40 per cent of the wheat raised in this state, yet at the present time they are grinding only from 20 to 25 per cent; however, this percentage is increasing rapidly as the general flour consuming public becomes more familiar with the high quality flour produced by Montana mills by reason of the fact that Montana produces the best quality of wheat raised in the United States.—The Rocky Mountain Elevator Co., W. G. Kirkpatrick, General Superintendent, Great Falls, Mont.

SOME GOOD ADVICE.
At the annual meeting of the Farmers' Grain Dealers' Assn. of South Dakota, held recently, Secretary Sloop in his annual report touching on elevator fires in the Northwest, had the following to say which can be read with profit by every elevator operator. We suggest that his remarks be clipped and posted where they can be read occasionally.

"There have recently been brought to our attention the tremendous fire losses accruing in the Northwest from the destruction of grain elevators, especially independent and farmers' elevators, and unless something is done to curtail these losses, it will eventually mean not only higher premiums, but difficulty in securing the proper coverage.

"It behooves every manager and board of directors to cooperate and use every precaution in preventing fires in their elevator promptly. Your fire barrels should be kept filled with water, and during the winter months, salt should be added so that the water will not freeze.

"Greasy rags, waste and matches should be kept in metal cans with tight covers. Stove pipes and chimneys should be gone over carefully. Trash, tumble weeds and corn husks should be kept clear of the elevator approaches.

"These are just a few of the things that a manager can do to eliminate fire hazards, and if he is careful and inspects his machinery for hot boxes every night when the elevator is closed down, it certainly will go a long way toward lessening the tremendous losses that are occurring at the present time.

"When a fire destroys your elevator, it means a loss to the community, a loss to the owner, and puts out of employ-

ment the manager and his helper, and you cannot be too careful to use your very best efforts with a view to avoiding a fire in your property."

VISIBLE SUPPLY OF GRAIN.

Following is the visible supply of wheat, corn and oats by weeks (final 00 omitted), with comparisons:

		Wheat.

Terminal Markets

MINNEAPOLIS.

F. W. Erickson, manager Big Diamond Mills Co., attended the convention of Ohio bakers at Columbus last week.

G. W. Wilder and C. W. Ross have resigned from the board of managers of the North Dakota State Mill & Elevator at Grand Forks, N. D.

A. R. Hastings has resigned as head of the shipping department of the Commander Mill Co. and will enter the feed jobbing business on his own account.

B. L. Simmons, formerly manager of the North Dakota State Mill & Elevator at Grand Forks, N. D., has been made manager of the receiving department of Quinn-Shepherdson Co.

The Minneapolis Chamber of Commerce has voted to amend its rules governing the purchase and sale of mill feed so that they will conform to the new rules of the Grain Dealers National Association.

Gerald R. Martin of the Brooks Elevator Co. has been elected to the board of directors of the Millers and Traders State Bank as has also E. J. Pickering of the Northwestern Consolidated Milling Co.

The Digest Products Co. has just been organized at Lake City, Minn., and will put on the market a mineral stock feed. An elevator has been leased from the Botsford Lumber Co. and fitted up for the manufacture of the product.

A bill has been introduced in the Minnesota legislature which would require the exchanges at Minneapolis, Duluth and St. Paul to report daily to the Railroad and Warehouse Commission the number of cars of grain bought into their markets for sale and the disposition made thereof.

DULUTH.

S. J. Schulte, Correspondent.

Wendell Moore has returned to New York after spending a few weeks at the office of his father's firm here, the Moore Grain Co. He has for some time been in charge of the New York office of that house and he is regarded in trade circles as a shrewd operator.

Movement of oats to this market is being relatively well maintained. Part of the receipts have been transfers from Minneapolis. Stocks of oats in the elevators here now aggregate nearly 11,850,000 bus. and from present indications the total will be materially added to during the next few weeks as country elevators are anxious to move their holdings to the terminals.

The annual elections of the Duluth Board of Trade this week resulted in acclamations all along the line. Percy H. Ginder of the Barnes-Ames Co. was moved up from the vice-presidency to the presidency, and George Barnum, Jr., was elected vice-president. The slate of directors and members of the standing committees as nominated went through without opposition, as follows: Directors (three years), W. R. McCarthy, G. E. Robson and B. Stockman; board of arbitration (one year), G. G. Barnum, Sr., M. M. McCabe and E. A. Vivian; board of appeals (one year), Thomas Gibson, F. E. Lindahl and W. C. Mitchell.

Duluth and Superior elevator interests are sailing close to the boards as regards available storage space. An official of one of the houses with a capacity of 3,500,000 bus. asserted that it had only space left to store around 300,000 bus. of grain. In view of the small receipts during the last few weeks, operators are, however, of the opinion that they will be in position to handle any grain that may offer up to the opening of navigation. In case of emergency some boat storage space will be available as a result of a few freighters wintering in this harbor. From information being received by elevator men, growers over the Northwest are thought to have comparatively small quantities of grain remaining to market on their farms.

Julius H. Barnes of the Barnes-Ames Co. spent a few days on this market during the last week. In conversation with dealers he expressed the opinion that high prices for wheat and other grains would prevail again for this year's crop. As he views it, farmers may put in their crops next spring in the perfect assurance that they will be able to realize profitable prices for them. In all his experience he had never known supply and demand conditions to be so nearly balanced as they are at present. Mr. Barnes came in for considerable publicity during his stay here through a story emanating from Chicago to the effect that he and Cutten had engineered a wheat corner; that in fact they had cornered a commanding proportion of the surplus wheat stocks in this country and that any shorts might be compelled to pay heavily to get under cover later on. Mr. Barnes issued a strong denial of the story, pointing out its palpable absurdity, and claiming that he was not interested to even a minor extent in the May wheat future on the Chicago market.

NEW YORK.

J. M. Nugent, Correspondent.

Charles H. Robinson has resigned his position as treasurer and secretary of Blake-Dobbs Co., Inc.

The receivership of Blake-Dobbs Co., Inc., has been discontinued and the involuntary petition in bankruptcy filed against this firm has been dismissed.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: R. L. Barnes of Duluth, J. J. Page of Toronto, James Ellis and R. Kip, both of Philadelphia, also William Tucker and J. W. Prindiville, both of Chicago, E. N. Todd of Montreal, and C. E. Pratt of London.

There was a scattered business in wheat for export during the past week. Total sales amounted to about four to five million bushels. Of the total, the major portion of the business consisted of American hard winters for shipment via the gulf, but there was also a moderate to fair trade in Manitobas, some Durums and a little business in Duluth spring wheats.

Flour Situation.

New York, Jan. 24.—The readjustment in the price of bread, largely in the way of reducing the weight of the loaf, has placed the baking trade here in a sounder financial position and consequently there has been a better business in flour despite the big advance to new high records for the season.

A good many consumers who have been hesitating have come into the market and supplied their immediate needs, and consequently sales, while mostly for nearby shipment, have shown a decided improvement.

In the export market there has been some business with Sweden and Danzig but the demand is limited largely to low grades. The Russian buying appears to be over for the time being at least, and the commission houses here who handled the business believe their requirements have been filled. Sales are now placed at about 600,000 bbls. of Canadian flour.

Spring patents were quoted at \$9.55@10.15; soft winter straights, \$9.40@9.90, and hard winter straights, \$9.30@9.75 per 196 lbs.

CINCINNATI.

George Mosbacher, Correspondent.

A. Bender of A. Bender & Sons has been confined to his home the past week because of illness.

Henry M. Brouse of the Perin-Brouse-Skidmore Co. has been re-elected treasurer of the Cincinnati Chamber of Commerce.

President F. L. Watkins of the Exchange has practically completed his committee appointments for the year 1925, which will be announced this week.

Under the new by-laws of the Exchange the executive committee will take over the

duties of the former board of governors which John De Molet, Fred Edmonds and John H. Dorsel served faithfully and efficiently the past two years.

Total stocks of grain for last week and week previous in Cincinnati elevators are as follows:

	Jan. 23, '25	Jan. 16, '25
Wheat	254,581	256,135
Corn	194,694	144,510
Oats	203,255	230,898
Rye	4,721	3,142

The grain trade at large will rejoice to learn of the complete recovery of Henry W. Brown of Henry W. Brown & Co., who has been confined in Christ Hospital, Cincinnati, for the past eight weeks, due to

F. L. WATKINS,
President,
Cincinnati Grain & Hay Exchange.

an affection of his leg which developed as a complication from a severe attack of rheumatism. Mr. Brown left the hospital for his home, Hamilton, Ohio, Friday.

At the first meeting of the new board of directors of the Grain and Hay Exchange, held Tuesday, Jan. 20, for organization, Frank L. Watkins, who had served the past year, was re-elected president; A. M. Brown, first vice-president; John De Molet, second vice-president; Elmer H. Heile, secretary, and Ralph H. Brown, treasurer. D. J. Schuh was reappointed executive secretary. Mr. Watkins' record as president of the Exchange the past year is one of which he may well feel proud, and though he endeavored to decline re-election, the newly elected board of directors believed him to be particularly deserving of a second term because of the unselfish interest he has at all times taken in the organization, and insisted upon his re-election. He served the Exchange as treasurer consecutively for three terms and also as director at various times. Mr. Watkins is the manager of the local offices of the Cleveland Grain & Milling Co. and a man admirably equipped and thoroughly familiar with the grain business.

Cash Markets.

Buying of wheat for shipment to mills was much improved here the past week because of the relatively lower prices as compared with competing markets, but the lower quotation had the effect of materially shutting off the country movement and business was of smaller volume than a week ago. Several buyers representing southern mills were here contracting deferred shipments.

No. 1 red winter, \$2.13@2.14; No. 2 red winter, \$2.12@2.13; No. 3 red winter, \$2.09@2.11; No. 4 red winter, \$2.05@2.09; No. 5 red winter, \$2@2.05.

Cash corn was weak and more difficulty was experienced in selling and finding buyers except at sharply reduced prices, especially for the lower grades. Receipts continued fairly liberal but very little graded above No. 4. As compared with last week prices showed losses of 4@5c per bu. Yellow grades, owing to a fair demand for meal, brought a premium of 2c. Ear corn was largely nominal in the absence of offerings.

No. 3 white, \$1.27@1.28; No. 4 white, \$1.22@1.24; No. 5 white, \$1.18@1.20; No. 6 white, \$1.12@1.17; No. 3 yellow, \$1.28@1.29; No. 4 yellow, \$1.23@1.25; No. 5 yellow, \$1.20@1.22; No. 6 yellow, \$1.13@1.18; No. 3 mixed, \$1.26@1.27; No. 4 mixed, \$1.21@1.22; No. 5 mixed, \$1.18@1.19; No. 6 mixed, \$1.12@1.17; sample grade, 95c@1.17.

The cheapness of oats as a feeding substitute for corn and other higher priced

feeds failed to improve the demand sufficiently to absorb the moderate receipts, resulting in an extremely dull market and lower prices.

No. 2 white, 62½@63½c; No. 3 white, 60½@61c; No. 4 white, 57½@58c; No. 2 mixed 60½@61c; No. 3 mixed, 57½@58c; No. 4 mixed, 55½@57c.

LOS ANGELES, CALIF.

C. G. White, Correspondent.

Mrs. Olive Miner, formerly connected with Tarr & McComb, Inc., has accepted a position as stenographer with Huffine & Co.

Alex Johnson, secretary of the California Farm Bureau Exchange, San Francisco, was a business visitor in the city one day last week and while here called at the exchange.

D. L. Smith of Smith & Scott, Inc., returned the latter part of last week from a business trip through the southern part of the state. Mr. Smith reports business activities in that section as being excellent.

Los Angeles added another grain firm to its list of grain dealers the first of the year. The new firm will be known as the Seaboard Grain Co., with offices in the Financial Center building, and will be under the management of J. D. Hunter, formerly of Amarillo, Tex.

J. Stewart, formerly of Kansas City, Mo., who has been engaged in the grain business in that city for many years, called on the exchange a few days ago to meet the members and some of his former clients. Mr. Stewart has been in this city for several months and expects to make it his future home.

Cash Markets.

The market conditions at this terminal stand practically unchanged since our last report. The demand has been very good with fairly heavy arrivals. There is scarcely anything left on tracks at the week end which indicates the demand strong. Utah-Idaho millrun is quoted at \$42 per ton and Kansas bran \$40 per ton. These two commodities are quick sellers on arrival. Alfalfa meal, medium ground, is selling at \$32, while molasses alfalfa mixed is quoted at \$30. There seems to be strong demand for cotton seed meal at \$44 and rolled barley has advanced \$2 per ton during the week and is now quoted by the mills at \$55. Whole grains remain steady to a slight advance. No. 3 yellow corn is selling at \$2.63@2.64 per hundred, while No. 2 is easily quotable at 5c advance. No. 2 western red wheat is selling at 2.12½@2.15, while No. 2 feed barley is a quick seller at \$2.40. The light rains during the past week have somewhat encouraged the market here and a talk with the dealers indicates that it is harder to secure the different commodities than it is to dispose of same. The hay market remains much the same as a week ago, and while the arrivals have been heavier, the demand has increased in proportion and there is but little left on the tracks at the close of the week. Alfalfa hay from Imperial Valley is selling at \$27 per ton, while hay of the same quality from central California is worth \$2 to \$3 more. No. 2 is quotable at \$2 less. No. 3 barley hay can be quoted at \$28@29 and No. 1 oat hay from \$29@30. There seems to be, from various reports, plenty of hay available to carry through until the new crop begins to arrive.

SIoux CITY.

Two representatives of the extension department of the Grain Marketing Co. of Chicago were in the city last week on business.

W. Seymour Gard, who for many years was in the coal, hay and feed business in this city, but who last year moved to Los Angeles, died in that city last week.

BALTIMORE.

Robert C. Neu, Correspondent.

Total stocks of grain in Baltimore elevators on January 21 were 10,980,000 bushels, of which amount over 6,500,000 bushels consisted of rye.

Indications point to the re-election of President A. W. Mears of the Baltimore Chamber of Commerce at the organization meeting of the new board of directors, to be held here on January 28.

Richard J. Biggs, one of the older members of the Baltimore Chamber of Commerce, and engaged in the grain commission business of this market, is convalescing from the effects of an operation performed at the Church Home & Infirmary several weeks ago.

President A. W. Mears of the Baltimore Chamber of Commerce returned early last week from a western trip. While at a dinner of the St. Louis Flour Club on the evening of January 15, at which he was the guest of honor, he was elected an honorary member of that organization.

Among the out-of-town visitors on the floor of the Baltimore Chamber of Com-

merce last week were: Wallace De Runderau of Harman & De Runderau, proprietors of the Crimora Roller Mills, Crimora, Va.; A. J. Oberg, sales manager of the Christ-Ian Mills, Minneapolis, Minn.; E. B. Reid of Charlestown, W. Va.

The last meeting of the old board of directors of the Baltimore Chamber of Commerce took place on Monday, January 19, at which President Mears presented his annual report, reviewing the happenings in the local grain market during the year 1924. The report was adopted and will be submitted to a general meeting of the members of the Chamber on January 26.

The Terminal Warehouse Co., which operates large warehouses here for the storage of merchandise handled by the Pennsylvania Railroad Company, will hold a special meeting of its stockholders on January 21 for the purpose of authorizing a 100 per cent stock dividend. The company was organized in 1893 and recently increased its capitalization to \$600,000. Officers of the Terminal Warehouse Company are: Samuel W. Lippincott, president; Charles England, vice president, and William R. Howard, secretary and treasurer.

The Maryland senators and representatives in congress are preparing, with the aid of the leading trade organizations of Baltimore, to strongly resist the efforts of Senator Butler of Massachusetts, and others, to abolish the port differentials in rail freight rates on exports and imports at Baltimore, Philadelphia and Norfolk. Senator Butler has introduced a bill, the purpose of which is to put all Atlantic seaboard ports on a rate parity. The measure has been referred to the Senate Committee on Interstate Commerce, but it is not believed that it will pass during this session of congress.

Another Contract Awarded the M. A. Long Company.

A contract for the construction of the new Roland Park Apartments, corner Club and Upland Roads, Roland Park, has been awarded the M. A. Long Company of this city, builders of the Baltimore & Ohio export grain elevator at Locust Point. The structure will be the first large apartment building in that community and in architectural design will resemble the old manor houses of Northern France. Most of the apartments will face Club Road and will have porches overlooking a garden with a pool and fountain, inclosed by a low wall. The building will have several wings and there will be five separate entrances and five elevators located in different parts of the building. The top floor of the structure will rise 165 feet above the level of the golf links. The cost will be about \$550,000.

KANSAS CITY.

T. J. Tanner, Correspondent.

C. K. Davis of the Hodgson-Davis Grain Co., who has not fully recovered from recent sickness, has gone to Southern California for a rest of several months.

A special agricultural train from the Missouri College of Agriculture, composed of three lecture cars and an exhibition car, left Louisiana, Mo., Jan. 26 over the Chicago & Alton for a short tour through the state.

Visitors at the Board of Trade this week included W. M. Duncan, Chicago; T. M. Scott, St. Louis; H. G. Fisher and E. A. Hamilton, Minneapolis; E. T. Beyer and L. R. Powell, Wichita, Kan.; Paul Bos-saugh, Salina, Kan.; and A. C. Munich and Glen Jones, St. Joseph, Mo.

J. E. Huffine of Los Angeles, Cal., who is visiting his brother, B. M. Huffine of the Kansas City Board of Trade, reported that oats, barley and wheat in southern California were suffering from drought. He added that southern California mills were buying most of their wheat from Oregon.

Answering charges of E. E. Frizell of Larned, Kan., that southwestern freight rates are grossly unfair, Clyde Aitchison, chairman of the Interstate Commerce Commission, issued a statement Wednesday declaring the rates to be not unreasonable. Mr. Frizell was invited to file a formal complaint if he desired to make a test.

C. P. Cawthorn, an authority on live stock and for several years connected with the Poland-China and American Hereford Journal, has entered the grain business with the Hodgson-Davis Grain Co. Mr. Cawthorn is an applicant for membership in the Board of Trade, having bought the certificate of E. W. McKinnic of the local office of Thomson & McKinnic, Chicago.

Future Trading Threatened.

Endeavoring to enforce an old law, the prosecuting attorney of Pettis county, Mo., has induced a grand jury in Sedalia to indict J. K. Christopher of B. C. Christopher & Co., Kansas City, under a charge of keeping a place where dealing in grain options is permitted. B. C. Christopher & Co. have a branch office in Sedalia, with private wire connection. Operating under the Capper-Tincher law and federal supervision, the company claims to be doing a legitimate business in grain futures in Sedalia, the same as in Kansas City. Mr. Christopher gave bond for \$1,000. His trial will come up Jan. 31. Attorneys for the Kansas City Board of Trade, the St. Louis Merchants' Exchange and the Chicago Board of Trade will defend Mr. Christopher, as it is realized that an adverse decision would be disastrous to future trading in the state.

Bigger Murray Elevator.

Enlargement of the Murray elevator in North Kansas City, contemplated for several months, is to be realized. Work is scheduled to begin within the coming week.

According to an announcement by Conrad E. Spens, vice-president in charge of traffic for the Chicago, Burlington & Quincy Railroad, the construction of several new concrete tanks will be completed by July 1. This will add 1,100,000 bus. to the capacity and bring it up to 2,600,000 bus. About \$350,000 will be expended on the improvement. The house is under lease to the Norris Grain Co. of Minneapolis, which has another elevator in Kansas City with a capacity of 1,800,000 bus.

Cash Grain Markets.

Wheat—Receipts for the week, 590 cars, against 525 a week ago and 524 a year ago. Demand for hard and dark wheat lagged somewhat, as reflected by a reduction of premiums of protein qualities over futures. Still, there was a net advance of 3@8c a bushel, which may be ascribed to the gains recorded in the speculative market. A new top price of \$1.03½ was recorded Friday for a car of No. 2 dark from Kansas. Local millers were fair buyers in filling old orders for flour. New flour trade was moderate and of a hand-to-mouth character. Shipping orders for wheat were light and elevator men bought slowly on account of scarce storage room. Doubtless some export business was accomplished at the gulf ports and wheat was sent out for this purpose, as well as to mills in various directions, who had it stored here. Advances from Kansas indicated that not more than 10 or 12 per cent of the 1924 crop remained in farmers' hands. The closing prices of hard and dark wheat were: No. 1, \$1.85@2.04; No. 2, \$1.84@2.03; No. 3, \$1.83@2.02; No. 4, \$1.80@2. Soft wheat offerings continued light and there was an urgent demand for choice milling grain, though the lower grades and mixed samples were slow. No. 2 scored a new high sale on Friday when a car from Missouri brought \$2.08. Final nominal prices were up 4@6c, with No. 1 at \$2.06@2.10, No. 2 at \$2.05@2.10, No. 3 at \$2.02@2.08, and No. 4 at \$2@2.05. For the first time since the big increase in stocks began after harvest the elevator holdings fell below those of a year ago. On Saturday the stocks were 12,368,000 bus. as compared with 12,417,000 in 1924. The week's decrease was 633,000 bus. Freezing and thawing weather prevailed in the Southwest, which was not good for growing wheat, but there were no serious crop complaints. Some reports from Missouri and Kansas said the ice covering of fields during the winter had not resulted in as much damage as was expected.

Corn—Receipts, 626 cars, against 532 a week ago and 615 a year ago. Though No. 2 yellow reached a new top quotation of \$1.27½ on Tuesday, the market developed pronounced weakness thereafter, with all interests slow buyers, especially of corn with high moisture content. Declines ensued and the market closed 1¼@3¼c under the prices prevailing on the previous Saturday. Final quotations were: No. 2 white, \$1.23½; No. 3, \$1.20@1.21½; No. 2 mixed, \$1.20½; No. 3, \$1.17½@1.19½; No. 2 yellow, \$1.23½@1.24; No. 3, \$1.20½@1.22½. Stocks increased 438,000 bus., to 5,031,000, as compared with 750,000 last year.

Oats—Receipts, 140 cars, against 87 a week ago and 158 a year ago. As in the case of corn, the best level for white oats was scored early in the week. Prices fell later, though the Texas demand evidently was increasing, as indicated by shipments from elevators. White oats closed 1@1½c lower, with No. 2 at 60@61c, and No. 3 at 59c. Signs of an early spring stimulated the calls for red seed oats, with the result of advancing prices. This variety closed 3@3½c higher. No. 2 was quoted at 65c and No. 3 at 64c. Oats stocks in local elevators decreased 23,000 bus., to 2,175,000, against 1,036,000 a year ago.

Kafir and Milo—Receipts, 194 cars, against 159 a week ago and 122 a year ago. The market exhibited great strength in the first part of the week, with buying for both storage account and shipment to feed manufacturers. Depression followed, due to the slump in corn and to advices from Los Angeles, indicating that eastern prices were too high for acceptance. Net gains at the close were confined to milo, which was up 2@6c per cwt. Kafir was 1@3c lower. Final quotations were: No. 2 white kafir, \$2@2.02; No. 3, \$2; No. 4, \$1.97@1.99; No. 2 milo, \$2.17; No. 3, \$2.16; No. 4, \$2.15. Stocks increased 21,000 bus., to 247,000, as compared with 88,000 a year ago. The Kansas weekly crop bulletin said threshing of grain sorghums had been much delayed this winter by snow and bad weather.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

Visitors on the St. Joseph Grain Exchange during the week ending Jan. 24 included R. Gross, Tarkio, Mo.; E. Weckman, Plattsburg, Mo.; W. C. Schneider, Cosby, Mo.; R. Davis, Plattsburg, Mo.; J. E. Buck, Corning, Kan.; A. B. Crane, Stewartville, Mo.; Floyd Smith, Riverton, Ia.; E. L. McNeal, Fairfax, Mo.; C. W. Hendricks, Imperial, Colo.; E. Powell, Agency, Mo.; J. H. Pauley, Denton, Kan.; D. H. Minton, Forest City, Mo.; C. P. Raiser, Forest City, Mo.; G. B. Ruffner, Morrill, Kan.; C. C. Cullinger, Maysville, Mo.; F. H. Geiger, Everest, Kan.; W. T. Roach, Fairfax, Mo.; W. S. Spratt, Burlington Junction, Mo.; E. P. Collins, Highland, Kan.; H. L. Sawyer, Chicago, Ill.; John Watkins, Liberty, Neb.; H. B. Hall, Johnson, Neb.

Receipts of all grains have been considerably heavier so far this month than a year ago, and prospects are for about 1,000,000 bus. increase over January, 1924. Farmers seem anxious to realize on their

grain at present prices. For the past week hard wheat prices are 1@6c higher, the greatest upturn is on ordinary quality hard which has advanced about 6c. Premiums for choice have not kept pace with price advances for ordinary, and top quotations are only about a cent up for the week. Offerings have been moderate and demand rather slow. Corn prices are about 2@3c lower for the week; offerings have been fairly liberal and demand spotted. Oats prices 1@1½c lower for the week; offerings have been increasing and demand fair to good.

PHILADELPHIA.

George A. Rudderow, Correspondent.

Exports of grain for the week ending Jan. 23 were 859,390 bus wheat and 25,714 bus. rye.

Receipts of flour and grain for the week ending Jan. 24 were: Flour, 50,307 bbls.; wheat, 1,270,999 bus.; corn, 50,368 bus.; oats, 27,484 bus.; rye, 58,580 bus.; and 421 tons feed.

Louis G. Graff, formerly head of the old grain firm of L. G. Graff & Son and four times elected president of the Commercial Exchange, sailed on Saturday with his wife and daughter for South America.

The following out-of-town visitors were registered at the Commercial Exchange during the week: P. E. Nye, St. Louis, Mo.; Fred L. Roberts, York, Pa.; E. M. Kelly, Wichita, Kan.; E. J. Bolender, Reading, Pa.; F. D. Pates, New York City; A. A. Cox, Pottsville, Pa.; L. Groff, Minneapolis; J. W. Hartman, Minneapolis; W. G. Kerchner, Leavenworth, Pa.; Frank S. Johnson, Media, Pa.; Edw. Gillespie, Sellersville, Md.; A. J. Oberg, Minneapolis; W. K. Emory, New York City; H. L. Reiser, Leesport, Pa.; A. J. Timmons, Dagsboro, Del.; R. C. Nicholson, Chestertown, Pa.; J. S. Wittington, New York City, and M. D. Smith, Minneapolis.

The special committee of the port of Philadelphia ocean traffic bureau, composed of Geo. F. Sproule, president of the body; Hubert J. Horan, president of the Commercial Exchange; H. DeWitt Irwin, chairman of the committee, and B. Hoff Knight, manager of the bureau, on Wednesday met Agnew C. Dice, president of the Reading company, and E. D. Hilleary, vice-president in charge of traffic, in a conference to outline the part of the traffic bureau. Mr. Dice told the committee that now as heretofore the company is deeply interested in the port of Philadelphia and that anything good for the port is directly beneficial to the Reading company. He said the carrier had invited bids to be opened March 1 for the construction of the first unit of the grain elevator to be built by the company at its Port Richmond terminal. The first unit will have a capacity of 2,500,000 bus. and will cost \$3,000,000. The elevator plans are a result of suggestions made by the special committee of the Commercial Exchange's committee last year. In addition to the Port Richmond elevator the Reading company has also appropriated \$300,000 for a new grain elevator at 20th street and Pennsylvania avenue to replace the structure which was recently demolished by fire.

Philadelphia Flour Market.

Philadelphia, Jan. 24.—Receipts of flour during the week were 50,307 bbls. The market is quiet but strong in sympathy with wheat and prices are higher again. We quote per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, western, \$9.50@10; soft winter straight, nearby, \$9@9.25; hard winter straight, \$10.40@10.75; hard winter, short patent, \$10.75@11.15; spring first clear, \$9.50@9.75; spring patent, \$10@10.50; spring short patent, \$10.75@11; fancy spring and city mills patent, family brands, \$11.25@11.75. Rye flour, \$8.85@9.10 per bbl. in sacks, as to quality. Buckwheat flour, \$4.25@4.50 per 98-lb. sack.

NEW ORLEANS.

M. L. Davis, Correspondent.

J. W. Mooney, general agent of the Mississippi-Warrior service, is on a business visit to Tampa, Fla.

Grant Carl, southern representative of the Grain Marketing Co., was a New Orleans visitor this week.

Stocks in elevators as of today are: Wheat, 1,753,000 bus.; corn, 430,000 bus.; oats, 246,000 bus.; rye, 36,000 bus. Cars on track: Wheat, 9; oats, 1.

No blackstrap molasses is being offered for January shipment. Standard blackstrap is quoted at 14½@15c February shipment and 13½@14½c for March shipment.

For the first time in the more recent history of water transportation on the Mississippi river three different transportation companies have large tows of wheat en route to New Orleans. Approximately 1,250,000 bus. wheat are in transit by the Goltra line, the Mississippi-Warrior service, and the West Kentucky Coal Co.'s line. The West Kentucky Coal Co. are newcomers in the field of wheat transportation on the lower river and are bringing their first tow down for C. B. Fox company, local exporters.

Local exporters were much gratified this week when advised of the decision of the shipping board wiping out the 15c per 100 lbs. differential which now places South Atlantic and gulf ports on a rate parity with Northern Atlantic ports. This should in time result in a deflection of a portion of the export traffic from central freight territory which is now going to Northern

Atlantic ports. It is even hoped in some quarters that this may attract American traffic which has heretofore moved by way of Montreal. To Carl Giessow, of the New Orleans Joint Traffic Bureau, and N. O. Pedrick, representing Southern Steamship interests, go much of the credit for having presented the case to the shipping board.

OMAHA.

Leigh Leslie, Correspondent.

A car of No. 1 dark northern spring wheat sold on the Omaha market last week at \$2.15 per bushel. Dark northern spring and hard spring wheat, showing a good percentage of protein, have been selling here at very high premiums. "These high prices make it look," said J. N. Campbell, secretary of the Nebraska Millers' Ass'n, "as if this is going to be a favorable year

for farmers in this state to increase their acreage of spring wheat."

There has been a very considerable increase in the movement of corn to the Omaha market in the last week. Advices received here indicate a largely increased movement not only in Nebraska but also in Iowa and Minnesota. This is reflected in increases in purchases to arrive. The demand for corn is by no means active in the states which market most of their corn at Missouri river terminals and this is likely to result, it is pointed out, in larger receipts at Chicago.

The unusually heavy snowfall this winter has been of great benefit to crops throughout Nebraska, according to agricultural authorities at Lincoln. In December the ground in the central and western parts of the state had been almost constantly covered with snow, accompanied by un-

ROY I. CAMPBELL

RUNKEL & DADMUN

GRAIN AND SEEDS

Personal Attention to All Shipments

MILWAUKEE

WISCONSIN

usually cold weather. This condition, agricultural authorities point out, is highly beneficial to crops, the snow serving as a covering for wheat, rye and alfalfa, while the accompanying cold weather has kept these crops from growing under snow. "Snow also creates the necessary moisture for the ground," said Professor Burr of the agricultural college of the state university, "and the heavy snow will put the ground in good condition for the spring crops." The United States weather bureau at Lincoln gives the average snowfall during December, 1924, at 15 inches, and it estimates that from 20 to 30 inches of snow fell in parts of the western and central sections of the state.

TOLEDO.

S. M. Bender, Correspondent.

The annual dinner of the Toledo Produce Exchange, held at the Toledo Club last Wednesday evening, was one of the most successful in the history of the exchange. The attendance and optimism that prevailed were both outstanding features. F. O. Paddock, oldest active member of the exchange and famed for his oratory, painted a picture of future Toledo that held his fellow members and visitors spellbound. He vividly pictured new flour mills, wharves, elevators and docks for ocean-going vessels and Toledo as the first port of entry when the proposed Great Lakes-St. Lawrence is completed. As chairman of the transportation committee, he also told of negotiations now under way with the railroads entering Toledo which will be advantageous for grain interests located here.

J. D. Hurlbut, president of the exchange, presided and was toastmaster in his usual brilliant style. Chicago men were called on for impromptu remarks after E. L. Southworth had been introduced as "one of the coming young men of our organization." Mr. Southworth said he believed the year just past was one of the most successful for grain men here since the market was established. This year holds still greater promise than was apparent last year, in his belief.

R. L. Mansfield of Bartlett-Frazier Co., Chicago, sounded a warning against becoming too pronounced in propaganda regarding the world's scarcity of wheat. Agitation of a serious character might be the result of too much talk about the price of bread grains. He suggested that everyone "Stop, Look and Listen" before getting too bullish. G. Walter Bevan of J. S. Bache & Co. expressed a similar opinion and was followed by other Chicago representatives including W. J. Fittsimmons of Hulburd, Warren & Chandler, A. W. Mansfield of Thomson & McKinnon, Edward Hymers of Jackson Bros. & Co., and E. F. Thompson of Lamson Bros. & Co. Railroad interests and traffic departments were represented by Jesse Patterson of the New York Central Lines, James Graham of the Nickel Plate, and Lee Macomber, traffic commissioner of the Chamber of Commerce. Other speakers included J. C. Husted of the C. A. King & Co., and Fred Mayer of J. F. Zahm & Co., who was also chairman of the arrangements for the big dinner. Fred Haigh, the grain men's printer, led the singing in his characteristic peppy manner, while Ben Hoffman, local manager of Lamson Bros. & Co., and Ernie Smith, local rube comedian, added their high class talent to round out the evening's entertainment.

Archie Gassaway, secretary of the exchange, was given high praise by one of Toledo's leading newspapers the past week. They are running a series of articles about prominent Toledoans, and the honor of being listed among them is considered a signal recognition. Archie is so well known to the boys on change that his important part in the upbuilding of the exchange has come to be a fixture. For many long years, both lean and good, he has faithfully kept the records and data that make a market worth while. It is good to see him receive a bouquet now and then to let us know that others recognize his ability and long service.

Flour output for Toledo mills the past week was 37,500 bbls., equal to 78 per cent of capacity. The week before it was 38,800 bbls. and a year ago last week was 30,600 bbls.

Receipts of grain for the week were 64 cars of wheat, 100 cars of corn, 50 cars of oats and 2 cars of barley.

The Ohio state statistician announces that with hog prices at \$10 per cwt. on the average, the highest price since 1920 has been reached. Sheep and lamb prices also showed a big upward movement as did all grains, but hay prices remain around \$5 a ton below last year's level.

Ohio's fall crop of pigs was 18 per cent below the 1923 fall crop, according to State Statistician West who bases his estimate on the mail carriers' inquiry made in December. There is also a reduction of more than 13 per cent in the number of breeding animals kept for the next spring crop. He figures the spring pig crop will not be

more than 75 or 80 per cent of last year after allowing for the usual losses.

Wheat is moving a little more than recently and the milling demand is excellent with premiums advancing with the market. Cash trade in corn continues slow. Oats are also easier. Storage space is at a premium and therefore accumulations are below normal for this time of year.

MEMPHIS.

George Williamson, Correspondent.

J. E. Marks, Sheffield, Ala., and E. M. Peel, Little Rock, Ark., were visitors at the Merchants' Exchange Saturday.

E. R. Trout of the Otto Weiss Alfalfa Milling Co. of Wichita, Kan., has been mixing with the trade here for several days.

M. E. Grant, grain shipper of Minneapolis, Minn., was registered at the Merchants' Exchange Thursday by E. L. Luibel.

The mixed feed plant and warehouse located at Bellevue and the Belt Line, formerly operated by G. E. Patteson & Co. but for the past year or so under lease to the All States Co., now defunct, is reported to have been sold. The owners say it was bought by representatives of the several mixed feed manufacturers who entered the merger, but details could not be had from any of them.

Statistics compiled in the office of Secretary Franchioli at the Merchants' Exchange show that grain receipts for 1924 were larger than for the previous year. Receipts of corn were 8,032,000 bus., estimating 1,200 to the car; of oats, 10,131,000, estimating 1,500 to the car. Wheat receipts dropped off slightly, amounting to only 381,000 bus., compared with 436,000 for 1923. Tons of hay received were 33,162, compared with 35,412, while alfalfa meal receipts were 27,120 tons as compared with 29,300.

Receipts of corn for the past week were 229 cars and of oats 187. As result of the liberal receipts for the past two weeks and the disappointing demand and outlet, stocks are becoming burdensome. The dealers counted on a fairly good demand by this time and bought accordingly, but general complaint is heard and they must either be patient or sell at concessions. Quotations are holding up fairly well but business is very small. Track price for No. 3 white corn is \$1.34; No. 3 mixed, \$1.29, and No. 3 yellow, \$1.34. Oats are almost as dull as corn and cash No. 3 white is quoted at 63½¢@64¢.

OKLAHOMA CITY, OKLA.

W. F. Kerr, Correspondent.

Harry Hunter, grain dealer of Okarche, was a recent Oklahoma City Grain Exchange visitor.

The 1925 president of the United Provident Association of Oklahoma City is George Sohlberg, president of the Acme Milling Co.

A charter has been granted to the Farmers Mill & Grain Co. of El Reno, capital stock \$10,000; incorporators, P. N., B. B. and J. N. Kroeger.

The Plainview (Tex.) Grain Exchange has been transferred from the jurisdiction of the Oklahoma federal grain supervisor to the Texas supervisor's jurisdiction. The Texas supervisor is C. W. Griffin of Fort Worth.

A loss of \$7,000 was sustained by the Canadian Mill & Elevator Co., El Reno, when its elevator at Banner was destroyed by a fire of unknown origin. The elevator is said to have contained 1,700 bus. of wheat, 200 bus. of oats, and 100 bus. of kafir.

A great deal of damage was done to wheat in southwestern Oklahoma by iced snow during January, Carl Robinson, federal agricultural statistician, says, and cotton will supplant wheat in many fields. Heavy damage by smothering is reported from some counties of northeast Texas.

A report from Texhoma, Okla., says that grain dealers there estimate that 400 more cars of grain of the 1924 crop will be shipped. Texhoma elevators have in storage 2,500 tons of milo maize. During last year 838 cars of wheat and 964 cars of other grains were shipped from that station.

J. G. H. Windle, member of the House of Representatives from Greer county and speaker pro-tempore of the House, is one of the incorporators of the recently organized Farmers Feed & Grain Co. at Granite. The capital stock is \$10,000. Other incorporators are O. M. Hayes and J. F. Kruska, both of Granite.

President E. B. Ellis of the Business Men's Club at Waurika, Okla., says that one of the chief objects of the club this year is to secure the establishment of a flour mill there. Frank Kell, Wichita Falls miller and railroad operator, has completed a line of railroad to Waurika from Wichita Falls, thus giving the town three railroads.

Willis G. Sautbine, Inc., and Sautbine-Franklin Co., each with a capital stock of \$10,000, were incorporated recently by Mr. Sautbine, C. D. Sautbine and L. J. Milburn. Mr. Sautbine formerly was a grain dealer and member of the Oklahoma City Grain Exchange. Recently he has been engaged in the oil and motor car businesses.

The board of directors of the Oklahoma Wheat Growers Ass'n at a recent meeting called upon all members with undelivered wheat to deliver it to the sales agency of the association by March 1. Wheat held

by grower members after that date will be figures being 54,648,934 bus. in 1924 against 36,947,657 present time.

Mr. Hamilton, manager of the Merchants' Exchange, is confined to his home with lumbago. He is able to attend to much of the business on the phone. His friends miss his genial presence and hope for his early recovery.

The creation of a primary grain market is being attempted here by the Grain Exchange committee.

Prices are quoted five days a week at 2 p. m., and at this hour brokers attend with "bids and asks," and in this way it is thought an independent Vancouver price may be established for four grades of wheat, both for cash and futures.

If any or sufficient business develops, arrangements have been made with the Canadian Press Service to wire the prices to the principal daily papers, so that Vancouver prices may appear alongside those of other world's markets.

ST. LOUIS.

DENVER, COLO.

F. R. Houlton, Correspondent.

Receipts of grain at Denver the past week were three hundred thirty cars.

VANCOUVER, B. C.

Morwood Clark, Correspondent.

Fall wheat acreage in Alberta shows a decrease of 6,900 acres, or 17 per cent, in comparison with a year ago when 40,500 acres were seeded against 33,600 this season.

Another thing that will contribute largely to the development of the grain trade here is the proposed building of a branch line connecting up the Peace River district with the C. P. R. and the C. N. R. It is alleged that in the Peace River district there are 20,000,000 acres of first class wheat lands. If only one-half of this quantity was placed under cultivation, at the average production of 20 bus. to the acre, it would mean a crop of 200,000,000 to find an outlet to the world's market via Vancouver.

That Vancouver as a grain shipping port is becoming more popular with the prairie people is shown by the fact that in spite of the 100,000,000 bus. decrease in the Alberta wheat crop last season, the receipts of wheat, oats, barley flax, all grains here from the opening of the crop season, Aug. 1 to the end of the year 1924, were 14,108,770 bus. against 14,176,375 during the same time 1923, while the deliveries at the head of the lakes show a falling off of 105,911,297 bus. for the same period, the receipts being 265,988,778 bus. in 1923 against 160,077,481 bus. for the last five months of each year.

The stocks of wheat in Vancouver show a heavy increase, being 2,674,953 bus. at present against 1,200,762 in 1924.

The heaviest stock carried during this crop season was 3,044,497 bus. on Jan. 13. The grain stocks at the head of the lakes show a decrease of 17,999,235 bus., the

figures being 54,648,934 bus. in 1924 against 36,947,657 present time.

Mr. Hamilton, manager of the Merchants' Exchange, is confined to his home with lumbago. He is able to attend to much of the business on the phone. His friends miss his genial presence and hope for his early recovery.

The creation of a primary grain market is being attempted here by the Grain Exchange committee.

MILWAUKEE.

D. K. Steenberg, Correspondent.

A car of Wisconsin soft wheat sold at a new high mark for the crop on Friday, Jan. 23, at \$2.02, grading No. 2 mixed.

Shipments of grain from Milwaukee during the past week were 219,650 bus. oats, 77,105 corn, 91,856 barley, 46,375 wheat, 10,570 rye; total 445,550 bus., against 384,368 the preceding week and 555,640 a year ago.

Grain receipts at Milwaukee during the past week were 203 cars barley, 216 corn, 124 oats, 35 wheat, 45 rye, 3 flax, 6 miscellaneous; total 637 cars, against 574 the week before, 504 a year ago and 972 in 1923.

Carl Houlton of the La Budde Feed & Grain Co. spent one day last week at Cedar Rapids, Ia. The grain department of the La Budde company, under the direction of Mr. Houlton, is rapidly developing an extensive business in Iowa.

W. A. Zahn, who recently resigned as secretary of the Charles H. Krause Milling Co., has entered the real estate business as a member of the firm of Erdmann & Zahn, which maintains offices at 510 Eleventh avenue, Milwaukee.

Further gains in bread grains were made during the past week in the Milwaukee market, wheat selling 8@11c higher for the period, and rye 13@15c up. Barley is unchanged while oats are 1@2c lower, and corn 4@6c lower. Receipts were better and trade generally good.

Mr. and Mrs. Herbert Courteen, the former of the Courteen Seed Co., one of the largest firms of its kind in the country, are now at Biloxi, Miss., where they will spend the remainder of the winter. Mr. Courteen, when he left last week, said that he hoped to lure a few big ones from the gulf while he was south.

Milwaukee milling output last week was

6,800 bbls., the same as the previous week, as compared with 4,000 for the same week of last year. The mill was operating at 57 per cent of capacity. Flour receipts during the past week totaled 20,650 bbls. as compared with 38,150 last year and shipments were 15,970 bbls. as compared with 11,770 last year.

Snowfall in Wisconsin this winter, while not as heavy as some farmers would like for their winter crops, has been sufficient to carry the crops to a good average condition, according to Paul O. Nyhus, director of the federal and state crop reporting service at Madison, Wis. Winter wheat, legumes and grass crops are in very satisfactory condition at this time of the year, according to Mr. Nyhus.

William Madden of the E. P. Bacon Co., Howard Mallon of the Grain Marketing Co., Clifford Thorsen of the Riels Co., Carl Houlton of the La Budde Feed & Grain Co., Edward Hiemke of the L. Bartlett & Son Co., A. L. Flanagan of the Fraser Smith Co., and John Murphy of the Cargill Grain Co., all of Milwaukee, attended the grain dealers' convention at Fort Dodge, Ia., last week.

G. L. Parsons of Goderick, Ont., L. J. Hessling of Minneapolis, Henry Stephanson of Spring Valley, Minn., Edward Diericks of Minneapolis, M. E. Grant of Minneapolis, W. B. Webb of the Wabasha (Minn.) Milling Co., William McLaren of Wabasha, Minn., B. L. Kabot of the Menominee (Mich.) Milling Co., C. H. Oppel of St. Louis, Minn., and J. H. Adams of Minneapolis were out-of-the-state callers at the Milwaukee Chamber of Commerce during the past week.

Wisconsin grain and feed men who registered at the Milwaukee Chamber of Commerce during the past week included A. Haler of DeForest, S. L. Sloan of Madison, H. Hix and G. Weirmann of Sullivan, Geo.

and Wayne Lewellin of Waterloo, F. S. Durham of Neenah, E. H. Karrer of Fond du Lac, John A. Thomas of Pewaukee, E. Liethen of Appleton, Fred Iverson of New Holstein, K. Huebner of Forest Junction, D. Richardson of Sussex, Hiram Menger of Allenton, A. F. Hoffman and J. H. Cavanaugh of Madison, D. H. Biddick of Livingston, P. A. Smith of Randolph, Henry Kruenen of Cedar Grove, Edward Bartl of La Crosse, Henry Wiernam of Waldo, Paul F. Boulay of Fond du Lac, N. Hoag of Waukesha, and J. Kern of Sparta.

The Wisconsin Experiment Association, recognized as the greatest organized body of seed growers in the country, will hold its annual meeting and grain show at the college of agriculture of the University of Wisconsin, Madison, Feb. 2-5. The organization started in 1902 with a lean membership comprising a few university professors and former students. Today, however, it has grown to such proportions that Wisconsin pure-bred seed is famous throughout the world and last season the value of seeds marketed by the association offices was \$1,800,000 and the value of fibre marketed, \$1,200,000. The marketing service is free to members. Better marketing services, seed cleaning machinery, the Northern Grain Show, growing of alfalfa for seed and hay and of peas for the canning industry will be topics and features at the coming meeting.

Milwaukee at Fort Dodge.

The Milwaukee market was well represented at the Farmers-Grain Dealers convention at Fort Dodge, held Jan. 20-23. Members and representatives distributed a very clever advertising article, a thermometer carrying the ad of the Milwaukee Chamber of Commerce.

The following members were present: E. H. Hiemke, A. L. Flannigan, J. J. Murphy,

WINNIPEG.

Geo. H. Measham, Correspondent.

The week ending Jan. 24 has been one of the most active and sensational of any one such period in the history of the Winnipeg Grain Trade. New records of high prices on the crop have been of almost

daily occurrence and the volume of trade has been of enormous proportions.

The public interest in the market is undoubtedly very large and the spreading trade between here and Chicago continues to be a very important factor in market activities. Orders from country points are also in considerable volume.

There comes a note of warning occasionally that prices are inflated and a collapse overdue. There is no getting away from the fact that the U. K. and Continent are following the prices on this side and that the exporters and millers are free buyers. In fact on Friday, the day on which Winnipeg May broke through the \$2 mark, both the exporters and millers were heavy buyers above that figure.

Bruce McBean was the first broker to bid \$2 for May wheat. He is one of five brothers, members of the Winnipeg Grain Exchange and there is a sixth McBean at Toronto in the grain business, all sons of the late Archie McBean, a pioneer of the grain trade of Western Canada. It is interesting to note that Nicholas Bawlf, Geo. R. Crowe, Gabe Murphy, James Richardson, and others now deceased, who were the pioneers here are well represented by their descendants. It were pity indeed if these names so familiar in the grain trade of the past generation disappeared from the records of the exchange.

Saturday's market though not as active as on some of the previous days of the week was featured by very heavy buying by one of the great export houses against acceptances over night. It looks as though wheat at \$2 is on a commercial basis. The sharp reply of Julius Barnes to those who indirectly seemed to implicate him in a wheat corner received considerable atten-

tion here and was generally accepted as satisfactory news by wheat bulls.

Oats are dead and likely to be until considerable inroads are made in the big Canadian Visible supplies. There continues to be good demand for barley from the export trade. Rye is following the advances in Chicago but trade in it is light and there is little of it to trade in. Flax is dormant but liable to wake up at any time. There has been scattered liquidation in seed in progress for some time and it is going into strong hands.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Oats receipts have been light with 12 cars. There was no change in values. The market was steady with No. 3 white selling at 57½c; No. 4 white, 56½c.

Thawing weather has taken most of the snow and ice from the wheat fields and reports from good authorities would indicate the damage will be very light.

Reports from Springfield, Ill., state that the new livestock yards there which have been under construction for several weeks will be completed and opened to the public about Feb. 15. Straus Canterbury & Co., who have been in business at Peoria for several years, will maintain a branch there.

Corn receipts at this market were too heavy for the demand Saturday and prices declined 2@4c. Local industries appeared filled up and were out of the market. Receipts were 104 cars and market very slow. The Peoria market has been high compared with other markets and there has been a good amount of northwest corn here, this corn being lighter in weight than Illinois corn. Several cars were carried over. No. 4 white, \$1.20; No. 4 yellow, \$1.17½; No. 6 yellow, \$1.11; sample yellow, \$1.08; No. 6 mixed, \$1.10.

Cattle and calves were generally steady. Best calves selling at \$12.00 down. Receipts were very light.

Light hogs, \$9.65 to \$10.75; mediums, \$10.65 to \$10.90; heavies, \$10.85 to \$11.00; packers, \$9.75 to \$10.25.

Hogs at local yards were active and 15 cents higher than Friday's best time with choice heavy butchers selling at \$11.00 with bulk of sales \$10.60 to \$10.80. Trading was active with a good demand and receipts placed at 1,500 head.

Grain receipts and shipments at Peoria for the week ending Saturday, January 24, as compared with same week last year as reported by the secretary, Peoria Board of Trade as follows:

Receipts—	1925.	1924.
Wheat	32,400	26,400
Corn	773,950	238,400
Oats	324,000	225,000

Rye	1,200
Barley	25,200	89,600
Flour, bbls	1,156,750	579,400
Shipments—	61,100	51,900
1925.	1924.	
Wheat	26,400	24,000
Corn	482,250	128,350
Oats	304,600	192,600
Rye	1,200	1,200
Barley	5,600	9,800
Flour	818,850	355,950
	58,800	47,000

PORTLAND, ORE.

Mrs. Charles E. Spence, wife of C. E. Spence, state market agent, passed away at the family home in Gladstone.

The local wheat market continues firm and prices are too high to permit of working new foreign business, the market being on a domestic basis. Montana dark northern reached a new high for the season and for the past 5 years, being sold at \$2.25.

W. C. North, state legislator, in a bill introduced the past week, would have the office of state market agent abolished, the functions of the grain inspection department returned to the supervision of the public service commission. While Mr. North admits that he does not expect the bill to go through, he stated last week that he would like to see some discussion on this and several other bills, and find out if the other legislators and Governor Pierce are favorable to reducing appropriations.

The grain inspection department has apparently been functioning properly the past few years, but the office of state market agent hardly seems necessary. More salaries, more overhead expenses, etc., with the office apparently a political one, seem hardly justified. C. E. Spence, state market agent, or nominally so, finds ample time to discuss and be active in politics. Why not abolish the office of state market agent and have the grain inspection department returned to the supervision of the public service commission?

Terminal receipts in cars were reported by the Merchants' Exchange for the season to Jan. 22 as follows:

Portland—	Wht.	Br'ly	Flr.	Corn	Oats	Hay
1924-25...	12,696	485	1,085	386	480	1,281

CHICAGO.

S. Mowat of the Larrowe Milling Co., Detroit, was in Chicago last week.

Harry C. Avery, an old-time member of the Chicago Board of Trade, is dead.

Joseph Faroll of Faroll Bros. has purchased a seat on the New York Stock Exchange for \$110,000.

Vance & Co., grain commission, has moved into new offices on the first floor of the Webster building.

Richard Ullman, familiarly known to his friends as "Dick," is enjoying the sunny climate of Florida and Bermuda on his wedding trip. He is a member of the firm, Ullman Grain Co., Chicago and Kansas City.

W. E. Suits, in charge of the feed and flour departments of the Quaker Oats Co., has been promoted to a vice-presidency. Mr. Suits is chairman of the executive committee of the American Feed Manufacturers Ass'n.

M. W. Samuels & Co. are celebrating the removal of their offices to 685 Illinois Merchants' Bank building. The standard type of customers' room has not been followed, the room set apart for this purpose resembling an exclusive club.

C. W. Sievert recently resigned as general superintendent of the Arcady Farms Milling Co. "Cy," as he is familiarly known by his trade friends, has been filling a real job in connection with the feed milling operations of this large corporation, operating plants at Chicago, Buffalo, East St. Louis and Kansas City.

John J. Coffman of Bartlett-Frazier Co. returned from the Iowa Farmer-Grain Dealers' Ass'n meeting, held at Fort Dodge last week. He said most of the representatives are worried over the oats they are

BRENNAN
Means Real GRAIN and SEED
Commission Merchants
JOHN E. BRENNAN & CO.
CHICAGO

carrying. They are debating the advisability of hedging the oats. In fact, some of them have already started to.

Arthur W. Cutten and Julius Barnes, whose names were recently mentioned as being engaged in an attempt to corner wheat, have denied that there was any such condition in sight. Mr. Cutten is reported as saying: "The bearish propaganda sent over the country about the wheat market being cornered was evidently inspired in Chicago. It has not changed the fundamental situation in wheat and has probably scared a lot of holders into selling out." Mr. Barnes in his denial said: "My firm does not own a bushel of wheat in Chicago."

A meeting of the American Feed Manufacturers Ass'n was held at the Auditorium hotel on Jan. 28 for the purpose of changing that part of the by-laws relating to the date of the annual meeting. As it now stands the convention must be held in June, but as the invitation of New Orleans has practically been accepted and as May in this southern city is, as a rule, much more pleasant, it was proposed to amend the by-law so it will read that the meeting may be held in May or June, and then to hold it early in May.

W. M. Samuels & Co.
The official opening of the splendid suite of offices for W. M. Samuels & Co. was held this week at Room 685, Illinois Merchants Bank Building, which is at 231 S. La Salle St. Dr. Samuels, the head of the firm, has been identified with grain, cotton, provisions, stocks and bond interests in Chicago for years. He is a member of the Chicago Board of Trade and, until recently, was associated with Jackson Bros. Dr. Samuels is also particularly close to professional people as he is a registered physician, and the appointments of his customers' room were designed to serve such trade in an exclusive manner. Complete ticker service, local and long distance telephone facilities, and a statistical black-board of unusually broad markets and data, is available for their customers. An atmosphere of privacy, such as secured in private clubs associated with these practical business requirements, predominates the advantages of this new brokerage office. The Doctor's many friends are confident he will enjoy signal success in his own business, as he has in other trade circles for many years past.

Trade Opinion.
Last May the grain trade the world over was pessimistic after a long period of falling markets and official and private economic authorities were urging a reduction of wheat acreage because of the prospect of continued unprofitable wheat prices. We chose that moment, at the very depths of the depression, to issue a letter since famous under the caption "Stop! Look! Listen!" pointing out the bullish possibilities in the world grain situation, particularly as regarding wheat. In the eight months since that time steadily advancing prices have brought wheat growers a most abundant prosperity and the speculative public has been turned from pessimism to an optimism that is in danger of discarding all conservation in thought and action. This change of feeling, reflected in efforts in various countries to encourage wheat production where a year ago the effort was the other way, has helped to interest the outside public in the speculative side of the grain market to a degree not seen in many years. This class of participation in the market always suggests caution and calls for thoughtful consideration of the change which practically a dollar a bushel advance in wheat prices must effect in the supply and demand situation.—Bartlett-Frazier Co.

The business in corn for shipment is unimportant, reflecting an extremely bearish position for the cash side. Lack of elevator and storage space was another important factor. Eastern trade, however, is credited with being free buyer of futures.—Pope & Eckhardt Co.

World exports of wheat since July 1 have been 391,000,000 against 374,000,000 in corresponding time last year. That the world exports to date are larger than a year ago, when the season's exports are expected to be less is explained by the fact that the United States is the only large exporter which has a materially increased surplus, and the United States exports move earlier in the season than exports from other countries. A continued market decrease in our visible, and a smaller world export movement in comparison with the movement in the past six months may reasonably be expected.—Clement, Curtis & Co.

May oats at 63½ look ridiculously cheap with May corn at 137. This is less than half the price of corn and provides every incentive for extra consumption of oats. Big barley sales for export emphasize the short crops of coarse grains abroad. There is a big crop of oats but we believe it will all be wanted and that an advance of several cents in oats is probable. Would buy them right here.—Logan & Bryan.

The most striking thing in the world's situation is the fact that Roumania, Bulgaria and Russia, which countries are ordi-

139 N. Clark St. Chicago, Ill.

narily exporters, have been buyers of foreign wheats, Russia taking considerable Canadian flour, also wheat for seed purposes. Norway, Finland, Germany and Russia are rather steady buyers of rye. In addition to foreign inquiry and demand, it is believed that the stocks of flour at domestic points are small, from which it follows that there will be a consistent demand for wheat from milling interests. Even at the present time, premiums for cash wheat at all western terminals are strong and advancing.—Thomson & McKinnon.

CANADIAN VISIBLE.

Canadian visible supply of wheat increased 274,000 bus.; oats decreased 49,000 bus.; rye increased 45,000 bus.; barley decreased 16,000 bus. These statistics represent terminal stocks only.

	Jan. 24, 1925.	Jan. 17, 1925.	Jan. 26, 1924.
Wheat	30,631,000	30,357,000	59,297,000
Oats	16,807,000	16,856,000	10,597,000
Rye	1,906,000	1,861,000	1,997,000
Barley	5,877,000	5,893,000	1,613,000
Afloat—Wheat,	8,228,000 bus.;		
oats,	1,258,000 bus.;		
barley,	838,000 bus.;		
rye,	140,000 bus.		

CHICAGO GRAIN STOCKS.

Wheat stocks in all positions in Chicago decreased 760,000 bus. last week, and barley 52,000 bus., while corn increased 958,000 bus. Rye, 165,000 bus., and oats 934,000 bus. Details follow, last three ciphers omitted except in the totals:

	Public.	Private.	*Total.	Last yr.
Wheat	2,507	5,052	8,005,000	16,027,000
Corn	3,589	7,877	11,466,000	2,180,000
Oats	6,524	15,853	22,377,000	3,148,000
Rye	1,893	255	2,148,000	1,412,000
Barley		269	269,000	307,000
*Includes 1,022,000 bu. wheat, 529,000 bu. corn and 1,351,000 bu. oats afloat.

Legal, Traffic and Arbitration Decisions

COURT DECISIONS.

Unusual condition of animals, indicating external violence during transportation, repels presumption pertaining to proper vice, and casts burden on carrier: If condition of animals suggests injuries from external violence during transportation, and evinces a condition not usually attendant on carriage with due care, it is sufficient to repel presumption pertaining to proper vice, and to cast burden on carrier of showing no negligence.—Morrow et al. vs. Wabash Ry. Co. (Court of Appeals of Kansas City, 265 S. W. Rep. 851.)

Liability of common carrier ceases with delivery, according to directions or usage and custom of trade: Liability of common carrier ceases with delivery at point of destination, according to directions of shipper or usage and custom of trade at destination.—Arkansas Railroad vs. Winters. (Supreme Court of Arkansas, 265 S. W. Rep. 967.)

Jobbers cannot misuse word mills in advertising: The law as to when an advertiser engaged in jobbing merchandise may use the word "mills" upon its stationery or in its advertising, or represent that the merchandise sold by it comes direct from manufacturer to purchaser, has been set forth by the United States Circuit Court of Appeals for the Seventh Circuit in the opinion rendered by Justice Alschuler in the case of the Federal Trade Commission vs. Pure Silk Hosiery Mills, Inc., in which the Federal Trade Commission successfully petitioned the court to compel obedience to its own order.

Unless the advertiser actually owns and operates or directly and absolutely controls a factory or mill wherein merchandise is made, the court held that the use of the word "mills," or representations of direct sale from manufacturer to purchaser, is unlawful.

In this case, it was shown that the Pure Silk Hosiery Mills, Inc., owned 240 out of a total of 1,363 shares of the outstanding capital stock of the Browning Hosiery Mills, operating hosiery mills at Chattanooga; that the secretary and treasurer of the Pure Silk Hosiery Mills, Inc., is one of the seven directors of the Browning Hosiery Mills and that the secretary and treasurer of the Browning Hosiery Mills is a director and vice-president of the Pure Silk Hosiery Mills, Inc.

The opinion of the Court makes it evident that even though this advertiser owned a majority of such stock and the interlocking directorate were further extended, the advertising in question would be illegal unless or until the operation and control of the mills in question were absolutely and completely in the possession of the advertiser. A jobber is a jobber no matter how many shares of stock he owns until he engages actively in manufacturing.

AGRICULTURAL PRODUCTS RATES.

A statement, which was signed by the presidents of the ten western railways, comprising the Western Railways Committee on Public Relations, and which outlines their position with reference to the proposed reduction in freight rates on agricultural products, has just been issued.

This statement, which was signed by C. H. Markham, president, Illinois Central; L. W. Baldwin, president, Missouri Pacific; Ralph Budd, president, Great Northern; H. E. Byram, president, Chicago, Milwaukee & St. Paul; S. M. Felton, president, Chicago Great Western; W. H. Finley, president, Chicago and North Western; J. E. Gorman, president, Chicago, Rock Island & Pacific; Carl R. Gray, president, Union Pacific; Hale Holden, president, Chicago, Burlington & Quincy; C. E. Schaff, president, Missouri-Kansas-Texas, is in part as follows:

We especially call attention to the effect upon the transportation service the western railways could render the farmers that would be produced by changes in rates that would unduly reduce the earnings of the railways that serve them. Because of the recent advances in prices the farmers desired in the late summer and fall months of 1924 to ship their grain in wholly unprecedented volume. A serious "car shortage" would have caused the farmers losses of many millions of dollars. Fortunately, the railways, within the two preceding years, had made such large expenditures for new locomotives, freight cars and other improvements that, with the cooperation of the shippers' regional advisory boards, they were able to move the grain to market as fast as it came to them. In the months of August, September, October and November they loaded 1,133,000 cars with grain and grain products, an increase of no less than 25 per cent over the number in the corresponding months of 1923.

The western railways have raised and invested large amounts of new capital recently, not because the earnings they have been making have justified it, but because they have had faith in the fairness and wisdom of the American people. The net return earned by the western roads in 1923 was \$88,500,000 less than in 1917 and amounted to only 3.94 per cent on their property investment. The return earned by them in the first eleven months of 1924 was only at the annual rate of 3.87 per cent. If this condition should continue, most of the railways in this territory would be compelled to quit making the additional investment required to enable them to handle the freight business offered to them.

If this were done the result would be especially to cripple the transportation service upon which western farmers must rely to get their products to the markets of this country and the world.

The proportion of the traffic of different roads that consists of farm products varies widely. On some railways in western territory farm products constitute almost one-half of the total freight business. It is upon the roads handling the largest amounts of farm products that the farmers especially depend for service, and, of course, it is upon these roads that there would be caused the most serious reductions of earnings and impairment of service by special reductions of rates on farm products.

It is the almost unanimous opinion of agricultural experts that freight rates are not and have not been a cause of the depression in agriculture, but that the real causes have been much more fundamental.

The movement for making special reductions in freight rates upon farm products, upon the ground that they were too high in proportion to the rates on other commodities, was begun before recent large advances in the prices of certain farm products occurred.

Comparisons between pre-war and present freight rates and prices are usually based upon the rates and prices which prevailed in 1913. The average freight rate now received by all the railways in western territory for hauling each ton of freight

one mile is less than 37 per cent higher than in 1913. According to a report of the United States Bureau of Labor Statistics the average wholesale price of farm products in October, 1924, was 49 per cent higher than in 1913. The same situation was shown in the reports of the Department of Agriculture with respect to prices actually received at the farms. The present relationship between the prices of farm products and freight rates in western territory—in which one-half of all tonnage of agricultural products in the country is handled—affords no justification for special reductions in freight rates on farm products. The freight rates are so small in proportion to the market prices of practically all farm products that the prices the farmers receive are determined almost entirely by the amount of each class of farm products produced and the demand for them in this country and throughout the world.

A study made by the National Livestock Producers' Association, regarding the prices paid in 1923 for 4,831,707 head of livestock shipped from twenty-nine states and received at fourteen markets, showed that out of every dollar paid for this livestock at the central markets the producer received 93.55 cents. Freight charges were 3.78 cents and other marketing costs 2.67 cents. If the freight charges on all this livestock shipped in western territory had been the same as before the war it is probable the producers of the livestock would have received no more for it. Between May and October, 1924, as shown by reports of the Department of Agriculture, the farm price of corn advanced from 79 cents to \$1.09, or 30 cents per bushel. The farm price of wheat advanced from 97 cents to \$1.30, or 33 cents per bushel. Since then further advances have occurred. Between June 2 and December 30 the cash price of corn on the Chicago market increased from 77½ cents to \$1.28, or 50 cents a bushel, and the cash price of wheat from \$1.10 to \$1.83, or 78 cents a bushel. These advances in prices were greatly in excess of the total freight rates paid upon corn and wheat, and many times as great as the reductions of rates that were sought. Innumerable instances could be cited showing that the prices farmers receive for their products depend upon marketing methods and market conditions and not upon freight rates.

HEARINGS ON GOODING BILL.

The interstate and foreign commerce committee of the House of Representatives has started hearings on the Gooding bill, which proposes the repeal of the long and short haul clause of the interstate commerce act.

If this bill is passed it would prohibit the Interstate Commerce Commission from granting to any railroad the authority to charge or to receive more in the aggregate for transportation for a shorter than for a longer distance, over the same line or route of railroad, in the same direction, the shorter being included in the longer distance.

There has been continued agitation for a number of years seeking to have the power of the Commission to permit the carriers to depart from the observation of this long and short haul clause, taken away from that body, this agitation being largely fostered by the so-called intermountain cities and by some of the coastwise steamship lines.

On the other hand, numerous associations of shippers, including the National Industrial Traffic League, have taken the stand that control of the situation should be left to the Interstate Commerce Commission.

ABOLISHES PORT DIFFERENTIALS.

Existing differentials between South Atlantic and Gulf ports in favor of North Atlantic ports have been abolished by the U. S. Shipping Board, which ordered the cancellation of the tri-partite conference, of which the North Atlantic, South Atlantic and Gulf conferences were members, thus permitting each of them to name its own rates on goods moving from competitive American territory to foreign ports.

Under the condition heretofore existing the tri-partite conference maintained a differential in favor of the North Atlantic ports, whereby the rate of cargo from South Atlantic ports was 7½¢ per hundred higher than from Atlantic ports and the rate from Gulf ports was 15¢ per hundred higher than from North Atlantic ports. The board states that its order corrects this condition.

Domination of the tri-partite conference by foreign steamship lines was pointed to by the board as an important factor in its decision. But the board

stated that its order canceling the tri-partite conference arrangement between the two groups of carriers was issued mainly for the reason that the rate situation resulting therefrom was effectively controlled by the North Atlantic conference.

"It should be pointed out," the report says, "that the membership of the North Atlantic conference is predominantly foreign. This foreign membership, with votes outnumbering by far those of the American membership, dominates the tri-partite conference and the rates applicable to American commodities moving in American bottoms from American ports. The result is effective control by foreign lines of an extensive portion of our commerce and of much of our shipping. Manifestly, in view of the responsibility imposed in it for the up-building of an American merchant marine, this situation calls for unequivocal action on the part of the board."

\$6.30 CHARGE UP AGAIN.

With New York territory the plaintiff, we are once again hearing further evidence on the charge of \$6.30 covering transit and demurrage charges on feed and hay. The plaintiff asks two things: first, that the free time shall be extended to forty-eight hours; second, that the bill of lading shall be surrendered to any agent of the carrier at any point desired rather than at the destination only. This avoids circumstances which frequently arise in the New York territory where diversion is made and the car may arrive at a local point considerably before the bill of lading is available. Evidence was taken in Chicago last week and a decision has not been rendered as yet.

FRESH MEAT RATES UNREASONABLE.

In the complaint of John Morrell & Co., against the C. & B. & Q., the Commission found rates on fresh meats and packing house products from Sioux Falls, S. D., to Lincoln, Neb., to be unreasonable and unduly prejudicial and ordered reparation.

RECOMMENDS DISMISSAL.

In a tentative report by the Interstate Commerce Commission, dismissal is recommended of the complaint of the Birmingham Traffic Bureau against the Frisco concerning rates on grain and grain products from Memphis to Birmingham.

WHEAT AND COARSE GRAIN RATES.

In a tentative report by the Commission, rates on wheat and coarse grain from points on the Atlantic Northern Railway to Council Bluffs, and proportional rates to points beyond, on the Rock Island, are condemned.

FARM PRICES.

Following are details of prices paid to farmers, compared quarterly on the 15th day of the month indicated, as reported by the Bureau of Agricultural Economics:

	Nov., 1924.	Nov., 1923.	Aug., 1924.	Feb., 1924.	May, 1924.
Hogs	\$8.62	\$6.66	\$8.54	\$6.54	\$6.68
Beef, cattle, 5.43	5.23	5.67	5.47	5.94	
Veal calves, 7.89	7.85	7.94	8.51	8.14	
Sheep	6.39	6.20	6.32	6.82	7.33
Lambs	10.55	10.01	10.15	10.53	11.43

Barley

RECEIPTS OF BARLEY.

Carload receipts of barley last week at different points named, with comparisons, follow:

	Mpls.	Dul.	Chi.	Win.	Mil.
Jan. 19.....	77	1	12	47	59
Jan. 20.....	46	3	36	72	31
Jan. 21.....	32	1	21	33	31
Jan. 22.....	47	4	11	51	23
Jan. 23.....	47	2	18	40	23
Jan. 24.....	63	6	23	24	31
Total	322	17	121	267	203

CHICAGO BARLEY PRICES.

Following is the daily range of quotations for spot malting barley quotations at Chicago.

Jan. 19....\$0.98@1.03	Jan. 22....\$0.95@1.02
Jan. 20....94@1.01	Jan. 23....95@1.02
Jan. 21....94@1.00	Jan. 24....95@1.00

Receipts of barley at Chicago for week ending Jan. 24, 1925, were 204,000 bus., compared with 179,000 bus. same week 1924; shipments, respectively, 59,000 bus. and 138,000 bus.

EXPORTS OF BARLEY.

The exports of barley (bus.) from principal United States ports, as reported by the Chief of the Bureau of Statistics of the Department of Commerce for each month, for years named, were as follows:

Mos.	1924.	1923.	1922.	1921.
Jan.	299,228	661,319	441,190	2,991,170
Feb.	613,280	1,191,104	463,853	1,324,488
Mar.	969,010	1,191,991	835,504	1,567,403
Apr.	706,217	708,316	1,002,008	631,047
May	447,649	364,708	1,015,222	458,225
June	512,760	361,817	1,152,602	1,371,653
July	1,054,012	816,159	2,518,647	2,107,520
Aug.	1,396,112	2,571,305	2,085,264	4,602,358
Sept.	1,955,151	2,053,619	3,671,263	5,357,012
Oct.	5,315,000	1,424,566	2,939,699	2,082,255
Nov.	2,709,000	264,072	1,562,587	2,510,935
Dec.	1,744,000	382,240	1,092,862	829,934
Yr.	17,721,419	11,893,177	18,780,600	25,834,000

BARLEY MARKETS.

MILWAUKEE—Buyers of barley were not especially active in this market during the past week and quotations closed unchanged for the period. What demand existed was mostly from the shippers and the lower grades moved the freest. Receipts were 203 cars as compared with 175 the previous week and 153 during the same week of 1924. Choice to fancy, 48 to 50 lb. test, quotable at \$1.01@1.03; fair to good, 44 to 47 lb. test, 95c@1.01; light weight, 40 to 43 lb. test, 90@98c; feed, 90@95c. Iowa quoted 92c@1.02, as to quality; Wisconsin, 92c@1.03; Minnesota, 90c@1.02; Dakota, 90c@1.01; feed and rejected, 90@96c.

DULUTH—Trade in barley was slightly better during the last week. Dealers came in for supplies and with receipts amounting to only 9 cars, the market was strong. Prices closed 4c to 7c up at from 81c to 94c.

KANSAS CITY—Six cars of barley reached the market this week, the first in a considerable length of time. There was a good demand from feed manufacturers, local and southeastward. Prices advanced 1@3c per bushel. No. 3 closed at \$1.01@1.03 and No. 4 at \$1.01@1.02. Withdrawals from store reduced the stocks 3,000 bus. to 11,000, as compared with 402,000 a year ago.

CHICAGO.—With exports for the week double what they were last year and with the market well cleaned up, prices showed a steady advance and reached a new high of \$1.03 for spot barley, the losing prices were off, however, being 3c@1. Exports from the principal Atlantic ports for the week ending Jan. 4 were 618,000 bus., compared with 87,000 last week and 586,000 bus. last year.

MINNEAPOLIS.—The demand was good throughout the week, especially for the better grades and offerings of good barley were taken quickly.

There was not much change in prices which ranged from 82 to 96 cents.

RYE MARKETS

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending Jan. 24:

	Mpls.	Dul.	Chi.	Win.	Mil.
Jan. 19.....	28	42	7	5	25
Jan. 20.....	19	27	18	9	3
Jan. 21.....	8	17	15	5	10
Jan. 22.....	16	24	7	2	3
Jan. 23.....	16	28	17	5	8
Jan. 24.....	17	30	15	5	6
Total	104	168	79	31	55

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending Jan. 24, were:

	Mpls.	Dul.	Chi.	Win.	Mil.
Jan. 19..\$1.52%	\$1.55%	\$1.59	\$1.54%	\$1.58

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending Jan. 24:

	May.	July.
Jan. 19.....	\$1.62% @1.65%	\$1.44% @1.45%
Jan. 20.....	1.64% @1.66%	1.45% @1.48
Jan. 21.....	1.64 @1.66%	1.46 @1.48%
Jan. 22.....	1.64% @1.69	1.47% @1.50%
Jan. 23.....	1.69% @1.76	1.50% @1.56%
Jan. 24.....	1.73 @1.76%	1.54% @1.58

Receipts of rye at Chicago for the week of Jan. 24, 1925, were 94,000 bus. vs. 55,000 bus. same week of 1924; shipments were 480,000 bus. vs. 9,000 bus. same week of 1924.

EXPORTS OF RYE.

The exports of rye from all United States ports, as reported by the Chief of the Bureau of Statistics of the Department of Commerce for each month, for four years, were as follows, not including rye flour:

Mos.	1924.	1923.	1922.	1921.
Jan.	200,333	3,448,979	1,129,336	5,428,450
Feb.	136,646	5,974,431	1,194,249	3,756,838
Mar.	299,436	1,360,455	902,599	1,750,589
Apr.	2,077,456	2,218,636	3,897,932	2,113,989
May	1,923,584	4,611,459	5,482,544	1,984,349
June	3,708,317	3,877,443	4,953,468	2,439,032
July	1,306,448	3,328,284	2,788,582	931,148

Dec.	852,000	521,575	3,763,261	1,968,671
Yr.	35,686,033	30,850,189	47,260,275	29,811,721

RYE MARKETS.

MILWAUKEE—Rye continued in steady demand and shippers and quotations showed daily advances in prices in the Milwaukee market during the past week. Receipts were moderate and prices closed 13@15 cents higher for the period. No. 2 sold at \$1.65% @1.69, billing commanding premium, ranging at 7@9 cents under May price. Offerings were generally offgrade with high moisture content and discounts were liberal. Considerable Wisconsin sold on a forward shipping basis. Dry was scarce and wanted. Receipts were 45 cars as compared with 27 cars the previous week and 23 in 1924. Market closed at \$1.67% @1.69% for No. 2, inside for Wisconsin, ranging at 7@9 cents under May price.

NEW YORK—Trade in rye for export during the week was spasmodic. However, the total business aggregated about two million bushels principally to Germany and Finland.

DULUTH—Record high prices were set in rye on this market during the last week, as a result of urgent bidding by exporters. Demand was so active that floating supplies were reported to have been cleaned up and present holders are bullish in their views on account of interest on the part of foreigners and the prospect that it will be continued. Spot No. 1 rye closed 14c up at \$1.66%.

CHICAGO.—Trade was liberal in volume throughout the week and the market was active, but nervous at times. Speculative buying was heavy and prices were carried to new high levels. Export demand continues to be a big factor in the situation, with Germany, Norway and Poland asking for offers. The closing price of No. 2 was \$1.69. Ex-

HOUSTON, TEXAS

ports for the past week were 736,000 bus. against 265,000 bus. last week and 171,000 a year ago.

MINNEAPOLIS.—Advance throughout the week has marked the rye situation the movement being in sympathy with wheat, the export demand having somewhat slackened. Closing prices on No. 1 and 2 were 1@1% under May.

Beans and Potatoes

LESS BEANS ON HAND.

SAN FRANCISCO.—The demand for beans from California the past thirty days has been extremely good. We understand that this applies not only to California, but to other bean producing states as well, and prices have been advancing on all varieties of beans from all sections of the United States.

As far as California is concerned, we have less beans on hand at this time this year than we had at this time last year; in fact, the stock report just issued, as of Jan. 1, covering all beans in the state of California, shows 500,000 sacks less on hand Jan. 1, 1925, as compared with Jan. 1, 1924. Furthermore, the vast majority of beans held in California are now in second hands and are very firmly held. We estimate the 1924 crop of beans raised in California is as follows:

Limas	450,000
Baby limas	225,000
Pinks	250,000
Small whites	65,000
Large whites	40,000
Black eyes	250,000
Bayos	15,000
Cranberries	60,000
California reds	50,000
Red kidneys	20,000
Pintos	5,000

Total1,430,000
—Barnard & Bunker.

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Jan. 24:

Beans—Boston—Car lots, per 100 lbs., N. Y. and Mich.: Choice h.-p. pea beans, \$7.00@7.25; fair to good, \$6.50@6.75; Calif. small white, \$8.50@8.75; yellow eyes, extras, \$7.25@7.50; red kidneys, \$10.50@10.75; Calif. limas, \$14.25@14.50; native green peas, \$7.25@7.50; Canada, \$6@6.25; jobbing prices, 25 to 50 cents above car lots.

Chicago—Firm on light supplies and good demand. Favorable market here for all colors. Per 100 lbs.—Spot navy beans, Mich., \$7@7.25; brown Swedish, \$6.15@6.25; light red kidneys, \$10.00; dark, fancy, \$11.30.

Minneapolis—Nominal quotations in lbs., including sacks. Beans, fcy. h.-p. navy, 5c; lima, Calif., 18c; brown, 5c; peas, green, fcy., 8c; yellow, fcy., 6c; marrowfat, 9c.

New York—Rather slow trading in most varieties, tone remaining generally steady to firm. Domestic—Marrow, \$9.75@10.25; pea, choice, h.-p., \$7.25; pea, screened and prime, \$6.75@7; red kidney, \$10.35@10.50; white kidney, \$9.60@9.75; lima, Cal., \$14.75. Imported, 100 lbs.—Marrow, \$9.25@9.50; white kidney, \$8.75@9; lima, Mad., 1923-24, \$12.25; 1922-23, \$9.50; lima, European, large, \$11.75; medium, \$11.25. Lentils—Chile, \$8.50; Russia, \$6.75@7. Peas, domestic, 100 lbs.—Black eye, \$10.50@10.75; yel. split, \$6.25@6.50; gr. split, \$8@8.25. Imported, 100 lbs.—Green, Japan, \$6@6.25; Holland, \$5.75@6; yel.

split, \$5.50@6; gr. split, \$8@8.25; chick, Mex., imperial, \$12@12.50; monster, \$11 @11.50; large, \$9.50@10; small, \$7.50; chick, Alg., large, \$7.50@8.

St. Louis—Quote ch. h.-p. Mich. white beans at \$7 and prime m.-p. at \$6.75 per 100 lbs. Scotch peas 7% c, green split peas 9% c and yellow 7c per lb. Lima beans (ch. Calif.) at 15% c per lb.

San Francisco—(Per lb.)—Whites, small, 8c; large, 7c; pinks, 8% c; limas, 14c; cranberry, 8c; kidney, 10% c; lentils, large, 9c; small, 8c; black eye, 10% c; Mexican reds, 8% c; bayos, 8c. Peas (per lb.)—Split peas, yellow, 8c; green peas, 6% c.

Potatoes—

Chicago—Car lots receipts for week ending Jan. 24 were 445 compared with 263 previous week and 295 a year ago. Market unchanged to a shade easier. There was a rather slow trade and the volume of sales were light. Buyers were not very keen to purchase and were taking only what was necessary to fill some urgent orders. Bulk, per 100 lbs., Wis., \$1.15@1.35; ordinary and poor, \$1@1.10; round white, sacks, Wis., \$1.10@1.25; small and poor, \$1; Minn., \$1.10@1.20; Idaho russets, \$2.25 @2.50; early Ohios, sacks, Red Rivers, \$1.25@1.35. New—Few coming from the south. Demand light. Hampers, Texas, \$2.50@2.75; boxes, Idaho, repacked, \$2.25. Sweets—Demand fairly good; arrivals light. Bus., Ill. Jerseys, \$2.50@2.75; Ill., Nancy Halls, \$2.50; soft and poor, \$1.50; hampers, Tenn., Nancy Halls, \$2.75@3; Ill., \$2.25; Jersey, eastern, kiln-dried, \$3.25@3.50; poor and wormy, \$2.25@2.50; Ill., Jersey, large hampers, \$2.75; small hampers, \$2.00 @2.25.

New York—Sack potatoes more quiet, but steady at unchanged prices. Jersey basket sweets barely sustained under a slow demand. L. I. bulk, 180 lbs., \$3.50@4; 165-lb. sk., \$2.75@3; 150-lb. sk., \$3@3.50; 3-bu. sk., \$2.75@3; Me., bulk, 180 lbs., \$2.50@3; car lots, cwt., \$1.30@1.50; 150-lb. sk., \$2.25@2.50; state, bulk, 180 lbs., \$2.40@2.60; car lots, cwt., \$1.25@1.30; 150-lb. sk., \$2 @2.25; Bermuda, bbl., No. 1, \$13@14; No. 2, \$11@12; No. 3, \$6.50@7.50. Sweet potatoes—Jy., bskt., \$1@3.50; Del. and Md., bskt., \$1@2.75. Yams—S. C., bbl., \$4.50@5.

BUCKWHEAT MARKETS.

MILWAUKEE—Buckwheat was in little demand in the Milwaukee market during the past week and quotations continued unchanged. Prices, per 100 lbs., are: Silver hull, \$2.30@2.40; Japanese, \$2.45@2.50.

BUFFALO—Local buckwheat, \$2.25 per 100 lbs.

CHICAGO—Fancy Jap, \$2.60 per 100; fancy silver hull, \$2.35@2.40, and dirty seed less.

MINNEAPOLIS—Japanese, \$2.55@2.60; silver hull, \$2.50@2.55; mixed, \$2.50@2.55.

St. Louis—Last sales (to arrive) at \$2.56 per 100; not over 2 per cent foreign marketed.

News of the Country Grain Trade

ARKANSAS.

Lonoke, Ark.—The Lonoke Grain Co., managed by Milton Hicks, has opened for business in the building formerly occupied by Bell & Houston.

Pine Bluff, Ark.—The Southern Feed Stores has incorporated with a capital of \$10,000, of which \$4,000 is subscribed. Incorporators and officers are: E. E. Spencer, pres.; D. E. Caraway, vice-pres.; C. D. Whyte, trustee and treas.

Walnut Ridge, Ark.—Fire destroyed the Walnut Ridge Milling Co.'s warehouse occupied by the Arkansas Commission Co. A heavy stock of feed-stuffs and grain were burned, the loss of which is partially covered by insurance.

CALIFORNIA.

Los Angeles, Cal.—Charles G. Glenn, formerly with the West Coast Grain Co., is now connected with the Sperry Flour Co.

San Luis Obispo, Cal.—Robert Forbes of Lompoc will succeed C. W. Reynolds as agent and manager of the Southern Pacific Milling Co.

San Gabriel, Cal.—N. J. Fuller has purchased the San Gabriel Feed & Fuel Co. Associated with him in the business are his two sons Raymond and Fred.

San Bruno, Cal.—Fred Beltrano has taken over the business heretofore conducted under the name of O. Beltrano & Son. He will carry a complete stock of feed.

CANADA.

Regina, Sask.—The opening of offices in London and Liverpool is being contemplated by the Saskatchewan Co-operative Elevator Co.

London, Ont.—Fire damaged the flour mill of Hunt Bros., Ltd. Loss estimated at \$750,000. The insurance company also adjusted some 100,000 bushels of grain and 8,000 bbls. of flour.

COLORADO.

Julesburg, Colo.—The Julesburg Co-operative Grain Co. will hold their annual meeting of the stockholders here on Jan. 31, for the purpose of electing five directors and transacting such other business as may arise.

DELAWARE.

Wilmington, Del.—The Cash Feed Stores, Inc. has organized to retail and wholesale grain and cereal, with a capital of \$100,000.

FLORIDA.

Gatesville, Fla.—The J. G. Smith Grain Co. was destroyed by fire recently, the loss running into the thousands, partially covered by insurance.

Tampa, Fla.—Fire damaged the warehouse of the E. E. Freeland Co., wholesale grain merchants, causing a loss estimated at \$10,000. Spontaneous combustion is thought to have been the origin of the blaze.

IDAHO.

Lewiston, Idaho—The feed and poultry supply department of the Idaho Pure Seed Co. has been purchased by W. M. Duthie, who has opened the W. M. Duthie Grain & Produce Co. at 315 Main St. in the Thiessen Block.

ILLINOIS.

Oneida, Ill.—A new mill was being erected by the Farmers' Elevator Co.

LaHarpe, Ill.—Merlin Ewing has purchased the poultry and feed business of his brother, Grover Ewing.

Leaf River, Ill.—C. A. Partridge, who has been in charge of the grain and coal station, will soon leave to take up a better position.

Weldon, Ill.—The following directors have been elected by the Weldon Grain Co.: W. H. Conn, James Coffman, Edgar Martin and John Galoway.

Roseville, Ill.—A record of which to be proud is that established by the Pratt Grain Co. here, who have been in business at the same office for fifty years.

Hamel (R. D. Alhambra), Ill.—The Hamel Co-operative Grain Co. held its fifth annual meeting here on Jan. 26th. Three directors were elected to take the places of those whose term expired.

Decatur, Ill.—The Shellabarger Elevator Co. has been purchased by Earl Crawford and Fred Schlarb and will operate same under the name of Crawford & Schlarb, dealing in grain, hay and feeds.

Ladd, Ill.—At a recent meeting of the Ladd Elevator Co. the following directors were elected: L. A. Schwab, Pres.; Albert Flaherty, Sec'y; V. C. Mitchell, Wm. Eiten, Wm. Herlein. The company made a 35 per cent profit during the past year.

Sidney, Ill.—At a meeting of the Sidney Grain Co., L. B. Porterfield and Howard Love were re-elected directors and the following officers were elected: C. C. McElwee, pres.; L. B. Porterfield, vice-pres.; George Trick, treas.; Howard Love, sec'y.

Galesburg, Ill.—Members of the Knox County Farm Bureau have adopted a resolution expressing their dissatisfaction with the American Farm Bureau Federation regarding their action in the recent \$26,000,000 grain merger of the Grain Marketing Co.

Arcola, Ill.—The Farmers Elevator Co. have elected the following officers for this year: Clarence Coombe, pres. and mgr.; H. L. Waters, sec'y; Glen F. Smith, asst. sec'y. The elevator has handled a large volume of grain during the past year, the stockholders receiving the usual annual dividend.

Sullivan, Ill.—The Sullivan Grain Co. will rebuild its elevator which was partly destroyed by fire recently. Until then, all corn will be hauled to the Allenville Elevator, which is also owned by Mr. Tabor. Latest estimates show that 500 bushels of grain were burned and damaged by water, 300 bushels of which can be sold, at discount, for feed.

Viola, Ill.—At the annual meeting of the stockholders of the Farmers Grain & Supply Co., the following officers were elected: President, B. D. Baxter; sec.-treas.; Jim T. McGaughy; directors, Wm. A. McGaughy, A. J. Swanson, Shaul Johnson, Mike Plunkett, C. F. Peterson, Peter Docherty. The company's sales for the past year totaled \$70,000.

Altona, Ill.—At the annual meeting of the Farmers' Co-operative Grain Co., officers were elected as follows: J. E. Main, pres.; D. N. McMaster, vice pres.; C. G. Nelson, secretary; Oliver Nelson, treas. With the exception of the treasurer, these men served in the same capacities last year. The report shows purchases of grain, coal, feed and fencing to the amount of \$155,053.39 and net profits for the year of \$1,667.65.

Whaley property at the south end of Paris, recently purchased from W. H. Whaley.

MICHIGAN

Saline, Mich.—Ferdinand Emil Friis, owner of a flour mill a few miles south of Saline, died.

Allegan, Mich.—Edwin Horn, Jr. and William Legner, who bought the Allegan Co. Mill B recently, have sold it to the Northern Securities, Chicago, for the manufacture of flour.

Harbor Beach, Mich.—Officials of the Huron Milling Co. have announced that B. W. Jenks, Jr. is the new vice-president and general manager of the company, following the death recently of Capt. Gilmore G. Scranton.

MINNESOTA.

Owatonna, Minn.—P. O. Heieie, age 75, a retired grain dealer, died at his daughter's home here.

St. Paul, Minn.—Benjamin H. Woodworth was elected president of the Minneapolis Civic & Commerce Ass'n. He is president of the Woodworth Elevator Co.

Fergus Falls, Minn.—The local farmers elevator here has handled over 4,000 bushels of corn thus far, Manager Mortenson estimates the surplus corn which will not be fed, will be about 6,000 bushels.

Dawson, Minn.—At the annual meeting of the Dawson Flour Mill, the following officers were elected: William Jackson, pres.; P. A. Olson, vice-pres.; Herman Swanson, sec'y, treas. and manager. Directors re-elected. Report shows last year's business to have been better than for the four preceding years.

MISSOURI.

Boonville, Mo.—At the annual meeting of the Farmers Elevator Ass'n Jeff Davis and Albert Johnmeyer were elected as members of the board of directors.

Sikeston, Mo.—Ed Frazier has sold his interest in the Sikeston Seed Co. to his partner, Al Daily, who will operate it under the new name of the Sikeston Seed Store.

Paris, Mo.—The stockholders of the Producers Elevator Co. here have voted an assessment of 40 per cent, and have planned to reopen as soon as arrangements can be made. Those not paying the assessment will be dropped from membership.

Marshall, Mo.—The Goodwin & Fletcher Grain & Feed Co. will open a big mill to manufacture feeds about Feb. 1st. They recently purchased the plant known for years as the White mill. J.

F. Goodwin and W. H. Fletcher are behind the enterprise.

Springfield, Mo.—The Springfield Flour & Feed Co. has increased its capital stock from \$50,000 to \$60,000.

Elsberry, Mo.—At a meeting of the stockholders of the Farmers Cooperative Elevator Co., the old board of directors was re-elected with the exception of B. H. Wells, who was succeeded by Chas. W. Finley. J. F. Miller was elected president, and B. C. Singleton, secretary.

Fairfax, Mo.—The elevator owned by J. F. Sly, E. S. Coe and E. L. McNeal, was destroyed by fire of unknown origin, causing a loss of \$6,000 to \$7,000, partially covered by insurance. Plans for rebuilding are indefinite. 1,100 bushels of corn and 400 bushels of wheat burned.

Springfield, Mo.—A \$100,000 mill and warehouse is being erected by the Holland-O'Neal Milling Co., the contract for construction being awarded by S. E. Dobbs. The plant will be equipped to manufacture corn, chops and meal for local distribution and to purchase grain and distribute flour and feeds. It will also be used as a public storage for sugar and other sacked products for distribution locally.

NEBRASKA.

Curtis, Nebr.—Fire slightly damaged the roof on the office of the Crete Mills.

Fremont, Nebr.—The Red Feather Feed Store has succeeded the Service Feed Store here.

Hastings, Nebr.—The Hastings Brokerage Co. has succeeded to the business of the J. C. Lee Grain Co.

Lincoln, Nebr.—Fire of unknown origin destroyed the Nye-Schneider-Jenks grain elevator causing a loss estimated at nearly \$55,000. 252,000 bushels of wheat and 25,000 bushels of corn were in the elevator.

Edholm, Nebr.—At the annual meeting of the Edholm Grain Co., the following officers were elected: Ben E. Eberly, pres.; W. I. Meck, sec'y; Frank L. Votava, treas. R. S. Black and Peter Votava were re-elected directors, and

GOOD STOCKS OF TIMOTHY.

FREEPORT, ILL.—There are good stocks of timothy through this territory, may be some surplus. There is more in the country than for several years, at this time.

Stocks of red and mammoth clover are only moderate. We shall probably have to ship in some for our spring trade, but have sufficient stock to last possibly sixty days. We have bought moderately of sweet clover and alfalfa, and shall have to buy more in March. The farmers' financial condition is better than a year ago and we believe that seed trade will be larger than it was in 1924.—The H. A. Hillmer Co.

ST. LOUIS SEED MARKET.

Quote timothy: Good average country seed at \$6 to \$6.10, dark and low-grade at \$2 to \$5; clover, fairly clean seed at \$28 to \$29 (high grade clean seed worth \$30 to \$31), slightly weedy lots \$26 to \$27, and heavily weedy lots at \$15 to \$24—trashy and tailings less; alsike at \$15 to \$20; alfalfa at \$16 to \$20; redtop at \$10 to \$11 for clean seed—chaffy at \$4 to \$8.50; German millet at \$3 to \$3.25; common millet at \$2.15 to \$2.25; hog millet at \$2.55, Early Fortune at \$2.65 to \$2.70 and Siberian at \$2.20 bulk basis; yellow, black and brown soy beans at \$1.75 to \$2.90 according to variety and quality; sunflower seed, quote at \$3.60 per 100 lbs., on basis of latest sale.

SEED RECEIPTS AT TOLEDO.

Following is a statement of seed receipts and shipments at Toledo in bags for week ending Jan. 24, and season to date and comparisons, also stocks, etc., as compiled by C. A. King & Co.:

	Receipts.			Shipments.		
	Clov.	Als.	Tim.	Clov.	Als.	Tim.
This wk..	936	882	94	614	188	30
Last wk..	1,120	220	1,198	1,453	174	122
Sn1924-5	9,370	4,912	15,398	5,516	1,200	4,389
Sn1923-4	13,816	8,697	8,578	15,554	2,291	6,237

SEED SELLING SEASON STARTING.

ATLANTA, GA.—The selling season with us, which has just about started, seems to be opening up in about a normal way, other than for the interruption from flood conditions in the Southeast this past week.

It is too early yet to get any reason-

Field and Grass Seeds

able line-up on the demand for field seeds.

The very great rise in the price of cow peas will undoubtedly widen the demand for soy and velvet beans.

We have never seen cow peas as short in supply or as high in price as at the present. The recent introduction of essentially hay varieties of soy beans will undoubtedly lead largely to the replacement of cow peas with soy bean plantings for hay and forage purposes.—H. G. Hastings Co., H. G. Hastings, President.

TOLEDO SEED PRICES.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy for the week ending Jan. 24:

	Range for wk.		Close	
	High.	Low.	Jan. 24.	Jan. 17.
Clover—				
Cash	\$19.75	\$19.15	\$19.75	\$19.65
Jan.	19.75	19.15	19.75	19.65

Alsike—				
Cash, new.	13.35	13.05	13.35	13.20
Jan.	13.35	13.05	13.35	13.35
March	13.50	13.20	13.50	13.50
Timothy—				
Cash	3.35	3.10	3.20	3.35
Jan.	3.35	3.10	3.20	3.35
March	3.40	3.15	3.27½	3.40

KANSAS CITY SEED MARKET.

KANSAS CITY, Jan. 24.—Expanding demand for cane, millet, Sudan and alfalfa seed is the feature of the seed market, while offerings from producers continue light. Dealers say that, on the present basis of prices, cane seed is wanted as far north as North Dakota and eastward and southeastward. The local houses are paying 10@25c per cwt. more than a week ago for seed, but are afraid to bid up more, as it is thought that the country has a large amount, some still unthreshed. Red top is quoted, as from first hands, at \$1.70 @1.85; orange, \$1.07@1.80; black amber, \$1.50@1.75. Millet seed is so high that the demand is limited, but scattered orders are coming in. Very little is arriving and the supply available especially of German, is believed to be small. Prices bid to the country this week were 25@50c better, with fancy German at \$4@4.25, choice German at \$3.50@3.75, common at \$2.25@2.75, Siberian at \$2@2.50 and hog at \$1.75@2. Sudan seed is selling in a wholesale way at \$5@6 per cwt. There is a fair demand. Fresh offerings are light. The carlot trade in alfalfa seed is reported to be of fair volume. Not much of this seed remains in the producing regions, but dealers' stocks are liberal. Kansas City houses offer at \$15@22 per cwt.

Interest in clover, timothy and blue grass seed is increasing. Generally red clover seed is held by dealers at \$20@34 per cwt. One house is advertising it at \$13 a bushel. Timothy is quoted at \$6@7 per cwt. and advertised at \$3.50 a bushel. The wholesale market for blue grass seed is \$17@28. Alsike clover is offered at \$10 a bushel.

Real interest in soy beans and cowpeas is not expected for some weeks.

Producers have not shown a desire to sell freely. Brown, the most desirable variety, is quoted, as from first hands, at \$2.75 a bushel; Black Wilson, \$2.50; other kinds, \$1.50@1.75.

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending Jan. 24, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rcts.	Shpts.	Rcts.	Shpts.	Rcts.	Shpts.
Week ...	673	413	327	324	394	330
Prev. wk.	729	139	264	317	355	502
1924	172	248	284	197	552	527
1924-25.	28,917	17,752	6,595	3,666	12,139	11,270
1923-24.	26,748	11,917	5,336	3,704	15,802	7,210
1922-23.	26,825	21,351	7,097	5,524	18,610	4,308

Timothy—Unchanged. Fair inquiry. Fair country run, \$5.75@6 per 100 lbs., good country run about \$6.15@6.25 and high grades at \$6.50@6.60.

Alfalfa Seed—Steady. Recleaned country lots, \$21@23 per 100 lbs.

Clover Seed—Unchanged. Country lots \$25@27.75 for 100 lbs., good \$28.25 @29.25, choice \$29.75@30.75, fancy \$31 @32, and Mammoth \$29@33.

Alsike—Steady. Average country lots \$20.25@21 per 100 lbs. Fair seed \$16.25 @17.25 and poor at \$11.50@13.50.

Flax—Firm. No. 1 Northwestern closed nominally \$3.18½@3.22½ per bu. of 56 lbs.

Other Seeds—Domestic Hungarian millet \$3.50@4; Germany \$3.50 for poor, \$4@4.25 for choice and \$4.75@5 for fancy Southern; Siberian, \$2.75@3, common millet \$2.75@3.25, good to choice \$3.25@3.50; Jap, \$3.50. Feed Millet—Broom corn and Early Fortune millet \$2.50, choice \$2.60, fancy \$2.75. Sunflower seed, \$3.50@4.

TOLEDO SEED MARKET.

TOLEDO, O., Jan. 26.—Clover seed advanced this week and the trade was fairly good. Good support is noted on all declines. Investors are inclined to await the spring cash demand before making further commitments. Holders feel confident there will be a heavy trade beginning soon and that stocks will be quickly reduced. The amount of clover here is not large enough to cause any serious worry and dealers may have to go outside to fill their sales. The foreign clover coming in is not as high quality as early arrivals, but will be equal to our domestic offerings. Some trading of February to March at about 15 cents difference which will cover the carrying charge. More deliveries on January contracts the past week and still further expected before the end of the month. French advices tell of a firm market over there and a good demand from America. Their stocks over there are nearly exhausted. Receipts of clover this week 936 bags. Shipments, 614 bags.

Alsike was firm while timothy declined about 15 cents. Only a light trade is being carried on in these seeds and the market will probably remain quiet until cash demand picks up. A lively

ALFALFA AND CLOVERSEED PRICES BY STATES.

The Bureau of Crop Estimates gives the following average price for alfalfa and clover seed in dollars per bushel as sold by producers in the states named each month for 1924 and 1923:

	Alfalfa seed				Clover seed			
	Nebraska	Kansas	Colorado	Ohio	Indiana	Michigan		
Date.	1923.	1922.	1923.	1922.	1923.	1922.	1923.	1922.
Dec. 15....	12.00	9.00	9.30	9.00	12.50	11.10	12.30	10.70
Jan. 15....	11.70	9.70	9.70	8.90	12.40	11.60	12.50	10.90
Feb. 15....	11.60	9.60	9.50	8.60	12.40	11.60	12.50	10.90
Mar. 15....	12.00	10.40	10.50	9.60	13.00	12.20	13.00	11.10
Apr. 15....	12.50	10.60	10.80	9.50	13.10	11.40	13.10	10.70
May 15....	13.40	11.70	11.20	9.30	13.00	11.10	12.80	10.60
June 15....	13.00	11.90	11.00	9.70	12.00	10.00	12.50	10.10
July 15....	13.00	11.80	11.40	9.00	12.20	10.20	12.30	10.10
Aug. 15....	12.30	11.00	9.30	9.60	12.70	10.70	11.20	9.90
Sept. 15....	12.00	10.00	9.50	9.60	12.30	11.30	11.20	10.90
Oct. 15....	11.50	11.70	9.60	10.40	13.00	12.30	12.50	12.40
Nov. 15....	11.00	10.90	9.30	9.20	16.00	12.00	14.80	12.10

spring demand would revive trade and might easily cause an upturn in both. Stocks are liberal but might be greatly cut with a large demand. The liberal discount under clover, while representing the difference in the stocks and crop should prove attractive to the country trade.

DULUTH FLAXSEED MARKET.

DULUTH, Jan. 24.—Trading in flaxseed was comparatively slow during the last week. Prices sagged on two days and then recovered on the appearance of better buying. The net result for the week showed gains of 2½ to 3½ cents in spot and January and of 3½ to 4½ cents in the May and July futures.

Receipts were light, aggregating only 39,667 bushels in the six days and shipments came to 63,437 bushels, leaving stocks of 992,000 bushels in the elevators.

Operators were disposed to play a waiting game, so that trading was held down in the absence of any impetus in the way of enlarged receipts and offerings. Crushers at Minneapolis continued to offer good premiums in the effort to attract the movement from the country their way and the records showed that they obtained more than sufficient seed to take care of their linseed oil requirements. Crushers at Milwaukee and Chicago continued to draw upon stores in the elevators here for supplies and present estimates are that around 500,000 bushels will be moved from this market to those points between now and the opening of lake navigation.

Operators here are assuming that with the spreads between the market at practically a working basis the bulk of the liberal supplies at Fort William now standing at around 2,750,000 bushels will be distributed between this point and Lake Erie ports, thus meeting any supplies emergencies that may arise. Crushers interests were impressed by the substantial movement of Argentine seed to Atlantic ports reported this week at over 700,000 bushels and they are accepting that as evidence that Eastern crushers will supply their deficiencies largely from that quarter as being the cheaper market. The course of the Argentine market is consequently being watched with interest by flaxseed operators here.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and the same period last year were:

	Saturday.	Wk. ago.	Yr. ago.
Spot	\$3.10½-17½	\$3.07-15	\$2.48-53
To arrive	\$3.10½-11½	3.07-08	2.48%
January	3.10½	3.07	2.48
May	3.11½	3.08	2.49%
July	3.11½	3.07

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grain from the principal ports of the United States to foreign countries during the week ending Jan. 17, 1925 (000 omitted):

CORRECT.

The National Council of Farmers' Co-operative Marketing Associations, in its meeting at Washington last week, recorded its opposition to any sort of government aid or subsidy for coöperative marketing, but asked for "a sympathetic, understanding administration of the laws and regulations which are already in force." Since government aid means government supervision to some

Feedstuffs

Among recent Chicago visitors was "Bob" Hall, sales manager of the Collis Products Co., Clinton, Ia. He attended the Chicago meeting of poultry interests.

E. B. Hogan, a graduate of the Michigan Agricultural College, is now in charge of Ohio sales territory for Hales & Hunter of Chicago. Mr. Hogan will make Red Comb feed headquarters at Columbus, Ohio.

The Mountain States Mixed Feeds Co., Denver, Colo., is operating under the personal management of its president and chief stockholder, J. V. Melville. Geo. Lopez, general manager until recently, has resigned.

M. E. Dixon who, for the past several years, has been traveling extensively as general sales manager of Fleischmann's feed yeast, has resigned. He is resting up for a few weeks but expects to announce new connections shortly.

Flat rates on the transcontinental movement of molasses have been extended so that Hawaiian importations are now coming in on the Pacific Coast. Such molasses deliveries have been made to feed mixers in Kansas City and Minneapolis.

C. W. Sievert recently resigned as general superintendent of the Arcady Farms Milling Co. "Cy," as he was familiarly known by his trade friends, has been filling a real job in connection with the feed milling operations of this large corporation, operating plants at Chicago, Buffalo, East St. Louis and Kansas City.

The Mytinger Mfg. & Gr. Co., Wichita Falls, Tex., is adding a two-story feed milling property to their present plant. S. T. Edwards and Co., the feed trade engineers of Chicago, are handling the job. New equipment will be installed and "Mygraco" feeds will be available in a considerably larger tonnage as soon as the present work is completed.

FARMER NEEDS BETTER PRICES.

BRATTLEBORO, VT.—Last season's crop of hay in this section was very satisfactory, and we understand the farmers, as a whole, have a sufficient stock to very nearly supply their wants until grass time.

The high price of grains is causing a very material reduction in the consumption in this section, owing to the low prices and poor demand which the farmer is receiving for his milk.

We cannot see much encouragement for the farmers in this section until the farmer can get a much better price for his products.—Crosby Milling Co., C. W. Reed, Manager.

DEMAND HAND TO MOUTH.

PHILADELPHIA, PA.—The demand for feeds in this section has been of the hand to mouth variety for sometime past, and from present indications is apt to continue on the same basis.

Buffalo mills and stored feed at Buffalo have been dominating the wheat feed situation in the East and prices from this source have averaged from \$1 to \$2 per ton below same grades of feed for shipment from the West.

Under these conditions the dealer has been able to secure enough feeds to meet his current demands at practically his own figures. Concentrates have been steadily declining. Under these condi-

tions there is no incentive to carry heavy stocks and we believe the retail dealer is wise in continuing on his present policy of buying for current needs.—King Brothers & Company, per S. A. King.

FEEDSTUFFS SLOW.

MINNEAPOLIS, MINN.—Feeds selling slowly. Seventy per cent of our cows taken by T. B. test. High prices holding back sales; milk prices not high enough; beef cattle being marketed as is instead of fattening.—Big Diamond Mills.

FEED BUSINESS QUIET.

BUFFALO, N. Y.—Wish to say business has been rather quiet throughout the East and the buying has been from hand to mouth for some time. Concentrates, such as linseed oil meal and cotton seed meal, we think at the present prices are very attractive, but still there is not much demand. The cold weather and heavy snow throughout the East we feel will stir the situation thoroughly and particularly February and March should be very much better than for the past sixty days.—Arcady Farmsmilling Company, N. E. Yardley, Vice President.

OIL MEAL MARKET.

The linseed oil meal market is about unchanged nominally for last week. Mills, especially in Minneapolis, continue to advise that they have sufficient shipping directions on hand to keep them going for some time. Demand, while not heavy, seems to be sufficient to absorb the limited offerings and therefore prices have had very little change.—The Bertley Bulletin, Chicago, Jan. 24.

COTTON SEED MEAL.

KANSAS CITY, Jan. 24.—While demand for cotton seed meal and cake is much less active than before the holidays, it is said to be about normal for this time of the year. Sales by Kansas City dealers range from prompt shipment to May. The price here is quoted the same as a week ago, at \$45.60 a ton for carlots and \$49.60 for ton lots. Arkansas is the only free offerer. Its prices range from \$37.50 to \$38.50 for carlots, with the top figure asked by mills in the western portion of the state. Apparently there is less demand eastward than westward for Arkansas meal. A week ago the Arkansas market was \$39 @39.50. Oklahoma meal is 50c lower at \$40.50. Texas meal is slightly weaker, at \$38 @38.50.

Business in linseed meal continues so small that dealers are indifferent about the market. A quotation of \$51 a ton on carlots was made here this week, with ton lots at \$4 more. This showed a recession of 80c. However, the Minneapolis mill price was unchanged, at \$47.50 for carlots. The market had a weak tone, due to offerings by Chicago resellers at \$46 to \$46.50.

Tankage accomplished its long threatened advance this week. It was marked up \$5 a ton. Carlots sold at \$65 and ton lots at \$70. Demand from hog interests continued good, but manufacturers said there had not been sufficient time to reflect the full effect of the rise. Meat scrap sold at former prices, \$70 for carlots and \$75 for ton lots. Poultrymen were fair buyers.

WEEKLY LINSEED REVIEW

NEW YORK, Jan. 26.—United Kingdom: The linseed situation in the United Kingdom remains steady. While the consumptive demand is rather quiet, forward positions rule steady owing to America's liberal takings recently.

Linseed oil displays a firm tone with

 Kansas City, Mo. Chicago, Ill. E. St. Louis, Ill.

the consumptive demand good. All foreign offers have been accepted. The small shipments of linseed to Europe from the Argentine was the firming influence.

Cotton oil is easier and neglected with the demand generally inactive.

India: The new crop of linseed in this country is progressing. Shipments of linseed this week amount to 332,000 bushels as compared with only 60,000 bushels last week.

Argentina: The weather continues fine and favorable for the interior movement of seed and port stocks are gradually increasing and now aggregate about 3¼ million bushels as compared with 2¼ million bushels last week. Clearances are also enlarging, this week's outward movement exceeding one million bushels against ½ million bushels last week. Markets have ruled steady with a fair foreign demand in evidence. Both America and the Continent have purchased fair quantities recently.

MINNEAPOLIS LINSEED MARKET.

MINNEAPOLIS, MINN., Jan. 24.—Flaxseed, both here and in the Argentine, has registered a sharp advance during the past week. At the moment of writing Minneapolis May is quoted at \$3.12½, an advance of 4½¢ per bushel. Duluth May is selling at \$3.10½, an advance of 4½¢ per bushel. Argentine seed has a larger advance than our Northwestern markets, and the price in that country is up 7½¢ per bushel for the week. A cable from our Buenos Aires agent this morning says: "Speculators buying heavily—exporters have no basis to go upon—Europe not buying." The Northwestern Miller says: "Private estimates still insist that the Argentine crop will not exceed 40,000,000 bushels, but there seems no good reason to discount the Government figures to any such extent, and a crop in the neighborhood of 50,000,000 bushels seems fairly sure. This would leave for export something like 44,000,000 bushels, which is ample to take care of the requirements of both Europe and the United States until the crop of 1925 is harvested in the northern hemisphere."

This is the highest private estimate of the South American crop we have seen. Undoubtedly the Argentine market is in the hands of speculators. If Europe stays out of that market the speculators may find trouble in finding customers for their long seed.

Shipments to Europe from Argentine have been light this month; last week 216,000 bushels; the week before that 164,000 bushels, and this week only 272,000 bushels. Shipments to the United States have been as follows: Two weeks ago, 300,000 bushels, last week 372,000 bushels, and this week 732,000 bushels.—Archer-Daniels-Midland Co.

NEW YORK OATS MARKET.

Oats receipts, 36,000 bushels bonded; 80,000 bushels domestic. Prices advanced moderately under the influence of the strength of other grains, but the weight of increasing receipts and lack of domestic demand caused them to decline sharply. Supplies seem too generous and consumptive requirements too small to permit of more than temporary rallies at this time. There has been no change in the local situation, all dealers appearing to hold stocks ample for their needs with no inducement to increase them, notwithstanding their relative cheapness, until there is a revival of spot demand from consuming interests. Spot offerings are not burdensome, but are difficult to merchandise under existing conditions. There has been no further advance in premiums for this

reason, and holders are still willing to accept prices below a western parity in order to prevent the accumulation of further charges. What little demand occasionally appears is for the lower grades, which are in scant supply, there being but little inquiry for the better qualities.—L. W. Forbell & Co.

FEED MARKETS.

MILWAUKEE.

Milwaukee, Jan. 24.—Continuance of but as passive interest in feeds on the part of the consumer is taking effect in the Milwaukee and Wisconsin and during the past week all items were weak and quotations closed generally lower for the period. Predictions of \$40 millfeeds are no longer prevalent and most of the dealers look forward to a continued decline in the market over the next few weeks. Farmers insist that due to the present low prices they are receiving for milk and butter they cannot afford to pay high prices for feed. Current quotations are: Winter bran, \$32@32.50; spring bran, \$31.50@32.50; standard middlings, \$34.50@35.50; flour middlings, \$38@39; red dog, \$42@43.50; rye feed, \$33@33.50; linseed oil meal, \$47.50@48; cottonseed meal, \$41.50@45.50; hominy feed, \$48@49; oat feed, \$13; gluten feed, 30 days, \$38.80; all in 100 lb. sacks, carlots, f. o. b. Milwaukee.

CINCINNATI.

Cincinnati, Jan. 24.—The mill feed situation was extremely dull the past week, and concessions of 50¢ per ton and even more were freely made for bran and middlings to stimulate buying, but beyond an occasional sale to a large dealer there was little or no demand. Interior buyers of one or two car lots remained out of the market, and track offerings were slightly increased. Considerable mixed feed was reported as being consigned here from other markets because of dullness at these centers, but most of it was also unsalable here. Quotations represent 100-lb. sacks. Soft winter wheat bran, \$35@35.50; hard winter wheat bran, \$34.50@35; standard middlings, \$38@39; soft wheat middlings, \$39.50@40; gray hard middlings, \$39.50@40; mixed feed, \$37.50@38; No. 1 alfalfa meal, \$31; hominy feed, \$50@50.50.

MEMPHIS.

Memphis, Jan. 24.—The feed situation continues unsatisfactory and prices disposed to drag. Cottonseed meal is very slow and prices have eased a dollar a ton during the past week, which naturally discourages buying. Holders are not pressing anything for sale, and it is believed more than usual will be consumed in the cotton belt because of the high cost of grain. Dealers quote 36 per cent at \$34.50 to \$35; 41 per cent at \$37 to \$37.50 and 43 at \$39 to \$39.25. Loose hulls are slow also and are quotable at \$7.50 in car lots. Millfeed is slow and track offerings larger than for some time, resulting in local prices having an easy tone. Wheat bran is quotable at \$33 to \$33.25 and gray shorts at \$38. Alfalfa meal receipts for the week were 41 cars, but new buying was slow and quotations remain at \$29 to \$30.

BALTIMORE.

Baltimore, Jan. 24.—The wheat feed situation is steady on spot bran and middlings, with the premium on middlings over bran increasing. Gluten feed is easier and selling sparingly. Hominy feed in limited offering in near positions and demand fair for both white and yellow hominy feed. Alfalfa meal quiet and unchanged. Dried beet pulp selling fairly well in a jobbing way. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$38@38.50; Western middlings, per ton, 100-lb. sacks, \$40@41; city mills' winter wheat bran, per ton, 100-lb. sacks, \$42@42.50; hominy feed, per ton, \$52.50@53.50; gluten feed, per ton, \$45@46; alfalfa meal, per ton, \$32@33; dried beet pulp, per ton, \$38@40.

NEW YORK.

New York, Jan. 24.—The demand for feed continues moderate with consumers purchasing only sufficient for immediate requirements. The tone of the market is quiet.

City bran is quoted at \$37.50; middlings, \$41.00, and Red Dog, \$49.00; while Western Bran rules at \$37.00 to \$37.50; middlings, \$45.50, and Red Dog, \$50.50 to \$51.00 per ton.

DULUTH.

Duluth, Jan. 24.—Demand for feeds was in better volume during the last week and a fair trade was put through by dealers. Consumption of hay over the territory showed seasonal improvement. Millfeeds closed from 50¢ to \$1 off and ground feeds from 50¢ to \$1.75 up, the top bulges coming in cracked corn and coarse cornmeal. Prices per ton follow: Bran, \$30.50; shorts, \$34.50; red dog, \$42.50; Boston mixed, \$34.50; flour middlings, \$37.50; ground oats, \$37; No. 1 ground feed, \$44.50; No. 2 ground feed, \$42.75; No. 3 ground feed, \$40.75; cracked corn, \$48.50; coarse cornmeal, \$48.50.

FEEDSTUFF SITUATION.

All feeds during the past week have, insofar as demand is concerned, marked time, with prices declining rapidly particularly on mill feeds. Very little demand and buyers are reluctant in contracting except that for their immediate requirements to fill current needs. Flour shipments have increased slightly, consequently, a little larger production of mill feeds.

MINNEAPOLIS.—Bran, \$29; standard middlings, \$33; flour middlings, \$36; red dog, \$40.50.

CHICAGO.—Bran, \$31.60; standard middlings, \$35.60; flour middlings, \$38.60; red dog, \$43.10.

KANSAS CITY.—Bran, \$30.50; brown shorts, \$34; gray shorts, \$34.75.

ST. LOUIS.—Bran, \$32.90; brown shorts, \$36.40; gray shorts, \$37.15.

ALFALFA MEAL.

Prices unchanged, also demand. Market holding very firm under these conditions. Nominally quoted second-hand bag basis, choice, \$30.50; No. 1, \$28.50; No. 2, \$26.25, delivered Chicago. Fine ground grades \$3 to \$4 a ton more.

REGROUND OAT FEED.—Sellers' interest gradually increasing. A fair demand at present prices. Jobbers and resellers about cleaned up on their cheaper offerings. Nominally quoted reground, \$13 to \$13.50; unground, \$14 to \$14.50, for prompt and February shipment.

HOMINY FEED.—Prices have declined radically during the past week. Much more sellers' interest than buyers'. In fact, there is practically no demand at present prices. Nominally quoted second-hand bag basis, \$46 to \$47.50, white hominy feed; yellow, \$46 to \$47. In bulk, where available, \$1.50 to \$2 per ton less.

LINSEED OIL MEAL.—Market unchanged with a slight leaning to a little more sellers' interest than buyers at present market prices. Nominally quoted Chicago basis, \$47; Minneapolis basis, \$47. Mills are asking slightly higher prices in some instances. In bulk, where available, \$2 to \$2.50 per ton less.

DRIED BUTTERMILK.—Demand continues good, particularly for small lots, car lot buyers, as a rule, being still pretty well stocked up. Quotations are as follows: Creamery in car lots 6½¢ and L. C. L., up to 8¢ per pound.

PACKERS' PRODUCTS.—Demand remains good, the high price of corn being reflected in the strong call for tannage. Prices follow: Meat scraps in car lots, f.o.b. Chicago, \$65@70 per ton; 60 per cent protein digester tannage, \$60@65; raw bone meal, \$55.

GLUTEN FEED.—Demand in the west continues good but in the east it is sluggish, and prices on gluten feed are lower. Quotations are as follows: Gluten feed in bulk, \$36 a ton; sacked, \$38.80; gluten meal of 40 per cent protein, \$44 in bulk and \$46.80 in sacks.

CHARCOAL.—Seasonable demand at a price basis f.o.b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35 @50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined), in 13-ton minimum cars.

COTTONSEED MEAL.—Supplies continue ample and demand light causing a break in prices, 43 per cent protein being quoted at \$44.50, Chicago basis.

Prices of cottonseed meal as of Jan. 23, at some of the principal markets for immediate or February shipment:

	36%.	41%.	43%.
Baltimore	42.55	44.80	46.80
Boston	44.15	46.40	48.40
Buffalo	40.70	42.95	44.95
Cedar Rapids, Ia.	40.35	43.10	45.10
Chicago	39.80	42.30	44.05
Cincinnati	38.95	41.20	43.20
Detroit	40.80	43.05	45.05
Indianapolis	39.95	42.45	44.20
Minneapolis	41.90	44.15	46.15
New York	42.55	44.80	46.80
Peoria, Ill.	39.80	42.25	44.00
Philadelphia	42.95	45.20	47.20
Toledo, Ohio	39.70	41.95	43.95

BLACKSTRAP MOLASSES.—There is an increasing demand for blackstrap but supplies are ample and prices are somewhat down being now 13 cents per gallon, f.o.b. Gulf ports.

BROOM CORN MARKETS.

Although road conditions have been unfavorable, buyers are active throughout the entire Dwarf area with their efforts centered principally in Northwestern Oklahoma and adjacent districts in southwestern Kansas, New Mex., and Colo.

In the Dwarf sections, the past week \$100 has been paid more freely with crops being taken at \$110, \$115 and \$120,

these prices being paid for corn that could not be classed as real choice corn but above the average of the general run of the crop and considered as grading up to corn that has been bought 30 days ago around \$75 to \$85. Field prices to the growers range usually from around \$70 upwards to \$100.

Advices from the Lindsay Standard district state that buyers are taking crops steadily, with prices a shade stronger and a disposition principally to obtain the better grade crops. Prices paid this week range from \$80 to \$115 with the majority of buys made from \$80 to \$100.

Broom corn is being taken from the farms in the "Central" (Illinois) at the same average prices that were paid the week before. Corn is being taken steadily, with prices paid running from \$100 upwards to \$150 for an occasional crop of good corn. Some few crops have been secured from \$80 to \$100.

Farmers are showing more strength on account of the activity this month.—*Broom Corn Review.*

COTTON NEWS

Exports for Week.

Exports of cotton during the week of Jan. 18 amounted to 162,276 bales, as compared with 179,597 bales the previous week and 203,056 bales for the corresponding week in 1924, the Department of Agriculture reports. Total exports from August 1 to January 1 amounted to 4,888,587 bales, as compared with 3,723,223 bales for the corresponding period a year ago.

Consumption Up.

Cotton consumed in December was reported as 532,047 bales, exclusive of linters, as compared with 492,000 bales in November and with 532,629 bales in October, when the largest consumption in recent months was registered. During December a year ago 463,789 bales were consumed. The number of cotton spindles active in December showed a decline as compared with a year ago, amounting to 32,661,949 last month as against 34,049,852 during December, 1923, but it is felt that during December of 1924 there was a more sustained activity of the spindles in operation than was the case a year ago.

Increase in Belgium.

The present outlook in Belgium indicates a 20 per cent increase in the consumption of American cotton during 1925, according to cabled advices to the Commerce Department.

Illegal Practices.

The cotton industry has been warned by the Federal Trade Commission that many of the present cotton merchandising practices are illegal, and new legislation is recommended to correct what the commission characterizes as "abuses in handling consigned cotton."

The commission suggests to the Senate, new legislation making it a criminal offense for consignees in the course of interstate or foreign commerce to sell the shipper's cotton to themselves without his express consent; to fail to return or to credit to the shipper within a specified time after the sale is made the full amount of the sales price, less proper deductions, such as commission fee, charges for storage, interest and insurance.

The methods condemned by the commission in handling cotton include the following: Merchandising by factors; failure to remit full price obtained; selling cotton without instructions, borrowing on shippers' cotton in excess of advances; borrowing excessively short weight bales and low grade cotton; loans to consignees and merchants on their own warehouse receipts, and repledging pledged receipts.

C. B. Seay of the Consolidated Feed & Grain Co., Buffalo, visited the Chicago office last week.

Alfalfa Department

PROMINENT ALFALFA MAN DIES.

Benjamin F. Tucker, president of the Lamar Alfalfa Milling Co., Lamar, Colo., died on Jan. 17. Mr. Tucker was a well-known figure in the alfalfa meal trade, and his death will be a loss not only to the industry but to the community in which he lived.

ALFALFA MEAL MARKET.

KANSAS CITY, Jan. 21.—Cheaper hay and an abundant supply of raw material are enabling alfalfa meal millers to meet the ideas of mixed feed manufacturers. A good demand is reported, though it is not general, as some interests seem to have stocks left from last summer's purchases. Prices of meal were reduced 50c to \$1 a ton this week, except on the poorer qualities of No. 2 and No. 3. Carlots were quoted as follows per ton: Choice, \$27@28; No. 1, \$25@26; No. 2, \$22.50@23; No. 3 or brown, \$22@22.50. These prices differed very slightly from the quotations of dealers on Colorado meal.

As reported by manufacturers there was a good trade in horse, dairy and scratch poultry feeds. These articles sold at sharp advances, owing to the high cost of basic materials, including corn, wheat and kafirs. Other feeds were in fair request, but no higher. Closing prices of carlots, per ton, were: Dairy feeds, \$39@49; cattle feeds, \$37@46; hog feeds, \$45@54; pig meal, \$74; horse and mule feeds, \$34.75@49.50; alfalfa-molasses feeds, \$27.50@34; scratch poultry feeds, \$52.50@59; mash poultry feeds, \$54@81.50.

REDUCED ACREAGE IN KANSAS.

MANHATTAN, KANS.—Reduction in alfalfa acreage in Kansas is causing concern in agricultural circles, for alfalfa has been recognized as "the redeemer of Kansas," declared J. C. Mohler, secretary of the state board of agriculture in an address recently.

"Acre for acre, alfalfa has done more for the agricultural prosperity of Kansas than any other single crop and its rapid decrease in both acreage and yield may well cause concern as to its future in this state." "Alfalfa has decreased in Kansas from 1,360,000 acres in 1915 to 884,000 acres in 1924, a loss of approximately 54,000 acres per year.

"Alfalfa might be called the redeemer of Kansas in more than one sense. First, it gave us a money-making crop which became distinctive of the state. Second, alfalfa is a soil builder of such outstanding merit as to restore the land which has become worn by continuous cropping. Third, alfalfa is the only crop known to Kansas agriculture capable of producing in such generous degree, three values in a single year—hay, the seed and the soil improvement.

"During the ten years in which it has been reported separately from clovers and tame grasses, Kansas alfalfa has produced a total value of more than 329 million dollars, or an average of approximately 38 million dollars a year."

MERE WORDS.

Hon. F. O. Lowden, who says he has been studying crop surpluses, declared that "surpluses should be handled in such a manner that they do not break the market." Just what that manner of

handling is he does not tell, nor can he. For no man has ever been able to tell us how to prevent a surplus from breaking the price without destroying the excess. Surpluses and deficiencies will continue to have their effects on markets no matter what system or method of marketing we employ.—*National Stockman & Farmer.*

These are the Fastest
Selling and Most
Profitable Feeds for

FEED DEALERS

Sugared Schumacher Feed and Boss Dairy Ration are the fastest selling and most profitable feed for feed dealers because—

1. They are **QUALITY** Feeds that exactly meet the requirements of farmers and dairymen.
2. They produce such splendid results for feeders that they always come back for more.
3. They make a **COMPLETE** dairy ration. Sugared Schumacher Feed supplies the carbohydrates and Boss Dairy Ration the protein part of the ration.
4. Sugared Schumacher Feed is an "all 'round" feed—good for hogs, horses and dairy cattle.
5. They are extensively advertised in the farm and dairy publications. These convincing advertisements send thousands of customers to the stores of dealers who handle these feeds.

If you are not handling these fast selling and profitable feeds write us today for our attractive dealer proposition.

Hay Department

Reliable private reports on the quantity of hay back on the farm are coming in from Illinois and Indiana showing that more than 75 per cent of such hay is held, much of it not even baled. The last Government report estimated that only 35 per cent of the hay crop had been shipped. Feeding on the farm is less and country dealers who are hay shippers have not bought from the farmer as customarily. The fact that the farmer is holding his hay does not necessarily mean that we will experience glutted hay receipts in terminal markets later on. It simply indicates that the farmer is speculating and holding the bag rather than the country hay dealer, although it is true a large reserve of hay has been accumulated on the farm with a consequent bearish effect on prices. From a price standpoint and in comparison with high priced grain, we shall unquestionably experience the strongest demand for cheap grades of hay. In such purchases, the feeder and dairyman will average up feeding costs.

GOOD SHIPPING DEMAND.

Receipts of alfalfa have been in excess of the demand, causing a further decline, but at this decline we find a fairly good shipping demand. There is also a good demand for high grade timothy or clover mixed while the lower grades are hard to move. This is also true of prairie.—J. A. Brubaker & Co., Kansas City.

HAY GOOD QUALITY.

CATO, N. Y.—The stocks of hay in this locality are very good qualities with about the same amount harvested as last year but not so much shipped out. The demand for hay on the general markets seems to be rather poor but have known the same conditions to exist before when it worked out a much better price in the spring months.

As the basis for this opinion would say that the eastern dealers have no stock in their warehouses. Every one is buying minimum cars instead of large cars, and in some cases two dealers split up a car between them. My opinion is that the market will hold out where it is with a possibility of going higher.—*Crownshield Mill, Inc., by George A. Cooper, Secy. and Treas.*

HAY AND STRAW RATES WRONG.

In a decision on its Investigation and Suspension docket, the Commission has ordered the cancellation of suspended tariffs proposing both increases and decreases in rates on hay and straw from Missouri River points and tributary territory, to Cairo, Memphis, Mississippi River crossings south of Memphis, Mobile and destinations in Mississippi valley territory. This order of cancellation is made without prejudice to the publication of schedules found by it to be reasonable. The Commission at the same time found proposed increases in rates on hay from Kansas City and Omaha to Cairo and Metropolis, Ill., unreasonable and ordered the tariffs cancelled.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.
Members of the Kansas City Hay Dealers' Assn. contemplate a banquet in the near future. The function will have a double purpose—to celebrate a year of prosperous trade and to talk over matters of common interest.

Present prices of prairie hay are said to be too low to warrant shipments from many points in the Southwest. Yet, aside from stock yards companies here and elsewhere, the market level fails to attract much buying. The auto-

North & Company

Receivers—Shippers

Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

mobile, in killing off the horses and mules, has almost ruined the prairie hay business.

"Arkansas, Louisiana and Texas are fair buyers of timothy hay," said C. F. Arnold, one day this week. "We can't get into the Southeast with timothy, owing to competition from the Ohio River states. There is little more than a local interest in clover and clover-mixed."

Officials of the hay, feed and seed division of the Department of Agriculture were in conference in Kansas City throughout the week, trying to reach an agreement on certain technical features of the tentative grades of alfalfa hay to be submitted to the trade later. They called into consultation President N. C. Campbell of the Kansas City Hay Dealers' Assn., J. A. Brubaker, D. B. Tilson, Victor Paris, W. H. North, V. K. Spellman, secretary of the local association, also made some suggestions.

Though liberal receipts of alfalfa hay are not uncommon in January, owing to the desire of farmers to clear out surplus stocks before tax assessment time, the runs of the last two weeks were larger than most dealers expected. "If the weather permits," said D. B. Tilson of Dyer & Co., Wednesday, "I would not be surprised to see alfalfa continue to pour in until the end of February. In such an event the market is likely to decline sharply. It has broken moderately thus far and is holding up better than might have been expected." N. C. Campbell, president of the Kansas City Hay Dealers' Assn., said: "There is yet a large surplus of alfalfa hay in Nebraska, Wyoming, Colorado and Kansas. Farmers will ship it before the period of spring work begins. No higher tribute could be paid to the Kansas City market than to point to the way prices have been maintained under the pressure of recent receipts. There is a good demand in the South and Southeast, principally in Arkansas, Mississippi and Louisiana."

HAY MARKET REVIEWS.

Hay market news was mixed during the week ending Jan. 24 but averaged dull to weaker, according to the Weekly Hay Market Review of the United States Department of Agriculture. The demand held constant and some markets were burdened with increased shipments. High quality hay continued scarce at most markets and moved more easily than the lower grades.

Timothy prices averaged almost \$5 lower than this time last year and about \$1.50 higher than 1922 while alfalfa prices have advanced and are close to last year's January level. Prairie prices continue close to the 1922 level.

Timothy was dull at Boston with accumulation of medium and lower grades. Receivers were cutting prices to save demurrage. Receipts were liberal at New York and prices declined slightly. Concessions were necessary to move arrivals. Best grades were \$1 higher at Philadelphia and the accumulation at Pittsburgh was cleaned up.

Heavy receipts broke the market at Cincinnati and price reductions failed to move all the arrivals and the St. Louis market was dull but the Chicago market displayed a stronger undertone.

Alfalfa receipts were liberal and the market was slow. Quotations were unchanged at Omaha but the market was dull and low grades were especially hard to move. Wyoming alfalfa continued to arrive at Kansas City and the market was easier with increased receipts. Mills, dairies, and feeders were active buyers but the shipping demand fell off with Southern markets trying for lower prices. Only good hay was wanted for

shipment and ordinary and damaged hay sold at low prices.

Prairie averaged practically steady. Offerings were light at Chicago and the market was steady but demand was slack at St. Louis and prairie was quiet at Minneapolis and St. Paul. Offerings increased at Omaha and some was sold at a large discount from the quoted prices. Demand for good quality prairie was good at Kansas City with a good volume of shipping trade, while the stockyards bought steadily during the week. The shortage of forage in the Mississippi delta caused an increased demand for this hay.

CHICAGO HAY NOTES.

Continued heavy receipts have caused a further decline in the Chicago market on all grades, but prices now obtainable will doubtless hold back loading until the market is cleaned up.

Bridge & Leonard report heavy arrivals but lighter country loadings, with continuous inquiry for all kinds of alfalfa.

Van Wie & Moorhead advise that straw is hard to dispose of, receipts heavy and market quiet, and Walters Brothers are advising shippers to send no more straw to this market until the surplus is disposed of.

Albert Miller & Co. advise that receipts of hay are liberal but that the bulk of it is of a very low quality, mostly number 3 and sample. Snow and colder weather should stimulate demand.

HAY MARKETS.

CHICAGO.

Jan. 26.—Receipts and shipments of hay in tons in the Chicago market for the week ending Jan. 24, also total receipts and shipments from Jan. 1, follow:

	Jan. 24, 1925.	Jan. 1, 1925.	Jan. 24, 1924.

Shpts. since Jan. 1.	776	569	937

Receipts were liberal and market easy. Arrivals Monday morning, 82 cars timothy, 2 alfalfa, 8 prairie, 6 packing and 18 straw. Better buying is looked for, as snow storm and colder weather should cause a better demand.

NEW YORK.

Jan. 22.—The New York Hay Exchange Ass'n has issued the following weekly report with latest quotations:

	Hay.	Straw.
Receipts for week, tons.....	613	12
Receipts last week	1,489	18
Receipts from September 1st..	28,157	370

An extremely heavy snow storm has again made hauling conditions intolerable with the result that buying has been sharply curtailed to hauling possibilities, and with rather liberal arrivals, supplies are tending to accumulation and values as a result show some loss. Bulk of supply on hand is nearby State hay in large bales of about No. 3 quality, ranging in value from \$20 to \$22.

Generally speaking values at Brooklyn range under Manhattan but regardless of location prices at all heavy storage points have had to be sharply reduced to attract buyers. The week closes with buyers in a humor to take hold at present prices but prevented from so doing because of the difficulty encountered in trucking.

Rye straw is nominally quoted. Federal grade quotations in large bales follow:

	No. 1.	No. 2.	No. 3.
Timothy	\$25@27	\$23@24	\$20@22
Light clover mixed	23@24	21@22	19@20
Med. clover mixed	20@22	18@19	16@17
Light grass mixed.	23@24	21@22	19@20
Heavy grass mixed	18@19	16@17	14@15
Rye straw	15@16	13@14	11@12

MINNEAPOLIS.

Jan. 21.—Receipts continue to increase and the tone of the market with the good demand brought about by low temperatures is maintained at about the same figure as the previous week.

Timothy—No. 1, \$17; No. 2, \$16. Mixed, different grasses, No. 1, \$16.50; No. 2 mixed, \$15. Clover, mixed, No. 1, \$16.00; No. 2, \$12.50. Upland, No. 1, \$16; No. 2, \$15; No. 3, \$13. Midland, No. 1, \$12.50; No. 2, \$11. Packing hay, \$8. Straw—Rye, \$9; oat, \$9; wheat, \$8. Alfalfa—No. 1, \$24; standard, \$19; No. 2, \$16.

MONTREAL.

Jan. 23.—There is little business being done in the local market for baled hay and prices are quoted unchanged, with No. 2 timothy at \$14 to \$15 per ton and No. 3 timothy at \$12.50 to \$13 per ton, f. o. b. cars here.

PORTLAND, ORE.

Jan. 21.—Buying prices f. o. b. Portland: Alfalfa, \$19.50@20 ton; valley timothy, \$19@20; eastern Oregon timothy, \$22@22.50; clover, \$16.50@17.50; oat, \$19@20; oat and vetch hay, \$18.50@19.50; straw, \$7.50@8.

MILWAUKEE.

Jan. 24.—Hay quotations tumbled another dollar in the Milwaukee market during the past week. Whatever demand exists is being met directly by the growers and movement in the market is negligible. Current quotations are: No. 1 timothy, \$15@16; No. 2 timothy, \$13@14; No. 1 mixed, \$14@14.50; No. 2 clover mixed, \$12@13; sample hay, \$7@9; marsh feeding, \$11; packing, \$10; rye straw, \$10@10.50; oat straw, \$10@10.50.

TOLEDO.

Jan. 26.—Hay remains quiet and prices unchanged. State reports show that the present price is about \$5 below those of last year. The large crop and excellent quality have held the market in check. Dealers are far from discouraged, however, as they believe that hay will sooner or later become active and with prices so low there is little likelihood of their going lower. Shipments are small with receipts very light.

Prices for the past week are as follows: No. 1 timothy, \$15; No. 2 timothy, \$13; No. 1 light clover mixed, \$14; No. 1 heavy clover mixed, \$13; No. 1 clear clover, \$13; No. 1 first cutting alfalfa, \$17; No. 1 second cutting alfalfa, \$23; sound dry wheat straw, \$9; sound dry oats straw, \$9.50 per ton, f. o. b. Toledo.

BALTIMORE.

Jan. 24.—Under continued light receipts the past week of desirable grades of timothy and choice light clover mixed hay and a fair demand for these descriptions, the local market is firm as quoted and there is a fair outward movement from day to day. Low grade and inferior hay has to be sold for whatever it will bring.

Straw—Trading in straw is principally of a jobbing character and the market is quiet, with prices sustained principally by small receipts and light stocks. Quotations follow: Hay—No. 1 timothy, \$22; No. 2 timothy, \$20.50@21; No. 3 timothy, \$17@19; No. 1 light clover mixed, \$19.50@20; No. 2 clover mixed, \$19@19.50; No. 2 clover mixed, \$17@18. Straw—No. 1 straight rye, \$20@21; No. 1 wheat, \$16@17; No. 1 oat, \$16@17.

MEMPHIS.

Jan. 24.—Hay stock is getting uncomfortably large here, and last week's receipts were 131 cars, the largest of any time during the season. Demand is disappointing and prices have eased as a consequence, for track offerings are plentiful. Quotations are more or less nominal and are: No. 1 timothy, \$22; standard, \$21; No. 2, \$20; alfalfa, No. 1, \$28; standard, \$27; No. 2, \$23.50. Choice alfalfa is very scarce and commands a good premium.

CINCINNATI.

Jan. 27.—There was certainly an overabundance of hay on the market this week, and as is usual in instances of overmarketing much trouble was encountered by the trade in reducing the accumulation and making satisfactory money returns to

shippers. The sudden lowering of prices which ensued as a natural result of the oversupply hurt many dealers who had purchased higher priced hay, and though the lower values attracted many buyers, the disposition shown by sellers to force sales resulted in many cars of inferior quality being sacrificed to save demurrage. As a consequence of taking losses the market became more or less demoralized and buying became slower and efforts to clean up the accumulation failed. There was, however, a good demand for top grades of all kinds, and prices, considering everything, held fairly steady, but ordinary quality, and especially clover and heavy mixed, necessitated liberal concessions to effect sales. No. 1 timothy, \$17.50@18; No. 2 timothy, \$15.50@16.50; No. 3 timothy, \$13@14; threshed timothy, \$10@12; no grade timothy, \$10@12; No. 1 heavy clover mixed, \$15.50@16.50; No. 1 light clover mixed, \$16@17; No. 1 clover mixed, \$15@16; No. 2 clover mixed, \$13@14; no grade clover mixed, \$10@12; No. 1 clover, \$16@16.50; No. 2 clover, \$13@14; no grade clover, \$10@12; No. 1 second cutting alfalfa, \$25@26; No. 2 second cutting alfalfa, \$21@23; No. 1 first cutting alfalfa, \$17@18; No. 2 first cutting alfalfa, \$15@17; sound sample grassy hay, \$12@14; wheat straw, \$10.50@11.50; oat straw, \$10@11; rye straw, \$12@13.

PITTSBURGH, PA.

Jan. 24.—Receipts for the last week were more liberal, and with good shipping conditions this market would have had considerable more hay.

The demand, while not keen, was fair and prices suffered only slightly under the heavier offerings.

This being the coldest of the seven winters since 1917, it is to be expected that present prices are current values and would be higher had the crop been only normal.

The quality of the offerings at this time is fair; poor hay can be sold at quotations; values, however, are not always satisfactory on such offerings; prices here-with are full figures at the moment.

Hay receipts, 150 cars; straw, 17 cars. No. 1 timothy, \$20@20.50; standard timothy, \$18.50@19; No. 2 timothy, \$16@17; No. 3 timothy, \$14@15; No. 1 light clover mixed, \$18@18.50; No. 1 heavy clover mixed, \$18.50@19; No. 1 clover mixed, \$18.50@19; No. 2 clover mixed, \$13.50@15.50; No. 1 clover, \$18.50@19; No. 2 clover, \$13@15.

Straw—Receipts of straw have increased and with only fair demand the market is weaker at prices quoted. Only good straw wanted. Quotations: No. 1 wheat straw, \$12.50@13; No. 2 wheat straw, \$12@12.50; No. 1 oat straw, \$12.50@13; No. 2 oat straw, \$12@12.50; No. 1 rye straw, \$13.50@14; No. 2 rye straw, \$13@13.50.

DULUTH.

Jan. 24.—Trade in hay was on a larger scale during the last week. Dairying interests were in the market more freely and retailers over the territory found it necessary to fill in their stocks to some extent. Quotations per ton are unchanged, as follows: Timothy—No. 1, \$17; No. 2, \$15. Mixed timothy—No. 1, \$16; No. 2, \$12. Prairie—No. 1, \$16; No. 2, \$14; No. 3, \$12. Midland—No. 1, \$11; No. 2, \$9. Straw—Rye, \$9; oat, \$8.50.

PHILADELPHIA.

Jan. 24.—Baled hay is in small supply and firm with a fair demand, especially choice, which are scarce and wanted. Straw is dull but firm under light receipts. Hay (federal grades): Timothy—No. 2, \$21@22; No. 3, \$18@19; sample, \$10@12. Light Clover Mixed—No. 1, \$20@21; No. 2, \$17@18; No. 3, \$12@14. Medium Clover Mixed—No. 1, \$17@18; No. 2, \$14@15. Heavy Clover Mixed—No. 1, \$16@17. Light Grass Mixed—No. 1, \$19.50@20. Straw—No. 1 straight rye, \$15@16; No. 2 straight rye, \$14@15; wheat, \$16; oat, \$16.

KANSAS CITY.

Jan. 24.—Continuation of the January run of alfalfa hay this week offset decreases in prairie and other varieties and established another new high total of arrivals for the season. The aggregate was 983 cars, as compared with 969 a week ago and 761 a year ago.

The market handled 736 cars of alfalfa. This was 59 more than the previous week's total. It exceeded the receipts of a year ago by 220 cars. Under so heavy a load and with fewer short sales to fill, the market yielded considerably, especially on the medium and lower grades, which became very dull. Dairy qualities were in fair demand, though weaker. Declines were recorded on Monday, Thursday and Saturday. At the close the market showed a recession of \$1@2 a ton.

Receipts of prairie dropped off 17 cars to 178. While shipping demand was limited, there was good local buying, particularly of the upper grades, mainly by stockyards interests. Prices on No. 1 and No. 2 were unchanged to 50c a ton higher. Low grades and brown hay were in excess of requirements, ruling dull most of the time, but they have been so cheap lately that no decline occurred.

The arrivals of timothy, clover mixed and clover exhibited a reduction of 28 cars. They amounted to 69. All quotations were unchanged. There was a fair southern demand, especially for timothy, which formed the bulk of the offerings.

Straw suffered from another excessive volume of receipts, including a liberal proportion of consignments. The market broke \$1.50 a ton. Some of the straw was bought by shorts to fill sales and the rest went to stockyards people and packers. Receipts were 28 cars.

Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City: Alfalfa—Select dairy, \$25@26; choice, \$23@24.50; No. 1, \$21@22.50; standard, \$17

@20.50; No. 2, \$14.50@16.50; No. 3, \$11@14. Prairie—No. 1, \$10.50@11.50; No. 2, \$9.50@10; No. 3, \$7.50@9; packing, \$6@7. Timothy—No. 1, \$16.50@17.50; standard, \$15.50@16; No. 2, \$14@15; No. 3, \$12.50@13.50. Clover mixed—Light, \$16.50@17; No. 1, \$15@16; No. 2, \$12@14.50. Clover—No. 1, \$16@18; No. 2, \$12@15.50. Straw—Wheat, \$7.

ST. LOUIS, MO.

Jan. 26.—The receipts of hay on both sides of the river were exceedingly heavy today. Market slow, dull and altogether in buyers' favor. Look for dull market all this week.

Clover—Choice qualities in fair demand; medium and lower grades hard to place at any reasonable price.

Alfalfa—Easier with larger arrivals. Lower prices ruling. Medium grades difficult to sell.

Prairie—In fair demand for No. 1 or better qualities; lower grades hard to place at fair prices.

Straw—Steady.

No. 1 timothy, \$21@22; standard timothy, \$19@20; No. 2 timothy, \$16@18; No. 3 and sample, \$16@12; No. 1 clover mixed, \$18@19; No. 2 clover mixed, \$15@17; heavy mixed, \$15@18; No. 1 clover, \$18@19; No.

2 clover, \$14@16; threshed hay, \$12@14; choice alfalfa, \$26@28; No. 1 alfalfa, \$23@25; standard alfalfa, \$20.00@22; No. 2 alfalfa, \$17@19; No. 1 prairie, \$15@16; No. 2 prairie, \$13@14; rye straw, \$9.00@10.00; wheat straw, \$8.50@9.50.

American Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

Complete descriptive catalog sent free for the asking.

American Steel & Wire Company
Chicago New York

Urge Farmers to Feed More Salt

When DeKol Plus Segis Dixie made her new world's record of 33,464.7 pounds of milk containing 13,349.35 pounds of fat in a year, she ate 83.66 lbs. of salt—about 7 lbs. a month. Salt probably paid the biggest per cent of profit of any single item in her feed.

Sell More Salt — And More Feed

Few farmers feed enough Salt. Whether your customers feed beef or milk cattle, horses, hogs, sheep or poultry, they will get better results by feeding a pound of salt with each 100 pounds of dry feed and keeping another supply of loose salt before stock at all times. Our National Advertising Campaign is recommending this plan. Both you and your customer will make more profit if you, too, suggest it. The flakes of Colonial Special Farmer's Salt dissolve instantly and cannot cause sore tongues. It is the best you can recommend.

COLONIAL SALT COMPANY - Akron, Ohio

Total products...	25,144,250	31,547,100	57,347,950

CHICAGO PROVISION REVIEW.

CHICAGO, Jan. 26.—Trading in provisions was heavy at times and price changes sharp. Commission houses had good buying orders on the breaks and there was also buying by the smaller packers, while on bulges packers generally were sellers, particularly of lard. Strength in grain at times had a good influence on the provision trade. Closing prices were at losses of 5c to 40c on lard with gains of 22½c on short ribs and 47½c to 62½c on dry salted bellies.

Supplies of hogs continue ample for all requirements of packers and the fresh meat trade. Production of lard is heavy and accumulations large. Shipments for the week were 10,835,000 lbs., a good increase over the previous week, compared with 18,453,000 lbs. last year. Shipments of meats were smaller than the previous week being 16,873,000 lbs., compared with 24,878,000 lbs. last year. Domestic and export demand for lard was disappointing and for meats only fair. Foreign markets were irregular with a good decline followed by an advance. Deliveries of lard on January contracts were large and for the month to date aggregate 9,500,000 lbs.

Product has been taken by carriers and the futures sold against it at good

carrying charges, the spread between loose and tierced lard being unusually wide. There is a great deal of lard held by speculators, not only by those who are spreading between lard and cotton seed oil but by speculators who have the product bought on margins, many of whom have profits and are taking them on the bulges and replacing on the breaks.

The range of prices for week, the December range and range previous to December follow:

THE PRICE CURRENT-GRAIN REPORTER

WANTED and FOR SALE
MARKET PLACE, CLASSIFIED
 for Buyers and Sellers of Properties and
 Equipment in Grain, Seeds, Hay, Feed,
 Flour, Millfeed, Beans, Produce, etc.
 25c Per Printed Line Each Insertion

MILLS FOR SALE.

FOR SALE—One hundred barrel flour mill in very best of condition. All new machinery and new power plant. Engine of the finest and absolutely reliable. Have 20,000 bushel capacity elevator and 6,000 barrel capacity fireproof warehouse. Excellent frame building for mill. Situated on the Mississippi River and Frisco Railroad in Missouri. Railroad spur running into the mill. A splendid bargain. Address **MILL**, care Price Current-Grain Reporter, 309 S. La Salle St., Chicago, Ill.

FOR SALE.
 Comminted Material and Meal Mill with

Real Money-Making Opportunity.
 Will sell half ownership or entire mill to party with usual qualifications who can manage and operate plant. Mill exceptionally well located, in good condition, producing comminted material and meal from corn cobs. Products sold to aluminum, tin plate, metal product manufacturers and other outlets at good prices, requiring small sales resistance and representing a real money-making opportunity. Reason for disposing of property on above basis is that other interests require personal attention.

C. C. TRUAX,
 1170 East Broad Street,
 Columbus, Ohio.

FOR SALE—25 bbl. never failing water power flour and feed mill, good dairy section, plenty grain at mill door. For particulars, address **GOODRICH MILLS**, Goodrich, Mich.

SOME EXCELLENT OFFERINGS
 In new, shop worn, and slightly used equipment for flour, feed, and cereal mills can be had by inquiry to
W. R. LEATHERS
 9 S. Clinton St. Chicago, Ill.

Kewanee Grain Spout **RENEWABLE BOTTOM**
 Use a Kewanee Renewable Bottom Spout and when the bottom wears slip in a new one. We guarantee each Kewanee section to wear out 12 bottoms and the bottoms are made from a special analysis steel—tough and long wearing. If you wore out a set of bottoms every year the replacement cost would be little—renewable bottoms for 8" size and smaller cost about 37 1/2 cents. And it's far less expensive to buy new bottoms than to replace entire spouts or try to patch them.
ORDER ONE ON TRIAL—Give us the outside diameter, or outside rectangular measurements of your down spout, and length of spout wanted. We will ship you a Kewanee. Use it a month, six months or a year. If it's not satisfactory to you return it and we'll refund your money.
Kewanee Implement Company
KEWANEE, ILLINOIS

ELEVATORS FOR SALE.

FOR SALE—Iron clad elevator, 40,000-bu. capacity; only one competitor; good grain territory; a 400-car station doing good profitable business; electrically equipped, in good running order; storage for 10 cars of hay, 10,000 bu. of ear corn; located on best shipping R. R. in Ohio. Good reason for selling. Address **H. G. POLLOCK**, Middle Point, Ohio.

FOR SALE—Terminal elevator and Kansas Line. Terms. Bargain. **ALLIN GRAIN CO.**, Coffeyville, Kans.

FOR SALE OR RENT—30,000 bu. concrete elevator with Hess Dryers attached. Ill. Central—Penn.—Wabash switching. Write **J. M. ALLEN**, Box 75, Decatur, Ill.

ATTENTION, MILLERS!

What you need for your mill we probably have. Full line of new equipment and very complete stock of used machinery at prices that will interest you. Everything from the receiving elevator to the packers. Write us today.
W. R. LEATHERS,
 9 S. Clinton St. Chicago, Ill.

PLANT FOR RENT.

FOR RENT—Our plant which we operated as a feed store for 40 years and until October 1, 1924. 1923 sales \$175,000.00. **CONKLIN AND CUMMINGS**, Goshen, N. Y.

GRAIN FOR SALE.

KAFIR—CANE.
 White Kafir, Red Top or Sumach Cane Seed in carlots. **THE L. C. ADAM MERC. CO.**, Cedar Vale, Kansas.

Why a Monarch Is a Profitable Investment

Ovid Roller Mills

Flour, Feed and Coal

THOS. H. HYSLOP, Proprietor
Ovid, Mich.

Sprout, Waldron & Co.,
Muncy, Pa.

Gentlemen:

We have used one of your 20" Monarch Ball Bearing Attrition Mills since September 1911, and during that length of time we have never had occasion to put a wrench on it for making adjustments. The only time it is opened is to change plates. There is no lost motion in the bearings, and we can see no reason whatever why the mill will not last ten years longer. I surely wish that every machine we are running would give us the satisfaction which we are getting from the Monarch Ball Bearing Attrition Mill.

Very truly,

Thos H Hyslop

BUSINESS AND TRADE CONDITIONS

FURTHER tax reductions are definitely in line for decisive action of some sort, according to administration plans. The President is quite frank in his criticism of our present patronage system which has slowly but no less thoroughly embroiled many office holders and an endless horde of their cohorts who are filling salaried jobs in both federal and state offices.

Very frank charges have been made, and doubtless with considerable justice, that these employees spend much of their time in justifying the importance of their own jobs and in casting about for increasing the revenue therefrom. It is a right and proper time to cut off some of this dead timber as the administration hews to the line of economy which has been set up as the keynote of a reduced budget.

It has been figured that, for the year 1924 alone, the average salaries of Government employees in the District of Columbia have been increased fifty-four per cent. Although we do not vouch for the accuracy of this figure which seems rather high, it is a known fact that the Government payroll has reached, as the President says, "a staggering total."

U. S. Marketing Board

The report of the Agricultural Commission has been made to the President and it is presumed his customary quick acting procedure will be put in process. Advance recommendations of a sweeping and serious character are made in the report, including legislative action, credit extension; formation of pools; further tariff protection and an early increase of twenty million dollars for state experiment station work and the permanent establishment by 1929 of a sixty-thousand-dollar fund for each experiment station.

Some of this program will be either modified or expanded as the details of the plan are worked out by the House and Senate leaders.

Proponents of the measure claim its strong point is the fact that co-operative organizations may enter into the plan voluntarily if they so desire and that compulsory action is not contemplated.

The Department of Agriculture's annual report refers to the general outlook as "fairly encouraging, with a possible slackening in domestic demand for farm products next Winter." The report is quite characteristic of such things, based on data, collated for a period considerably before its release and, therefore, not enjoying the advantage of up-to-the-minute advices. The outstanding interest of the report may be in the reference to Foreign purchases which it is predicted will be at least as good as during the past year. The European economic situation as bearing on it appeals to the department statisticians as distinctly brighter, coupling the small grain crops of 1924 in countries outside the United States, with higher purchasing power and better facilities for financing imports. The meat packing industry is also encouraged through the assurance that German importations of pork products will continue strong in spite of advanced prices.

Federal Trade Commission

The Wadsworth bill recently introduced in Congress, contemplates a reformation of the ever-widening powers of the Federal Trade Commission. It seeks to keep their activities on a friendly footing with business and to avoid the hostility which has very naturally attended their work. Arising from the need of regulating the anti-trust acts and the

elimination of dishonest business practices, the activities of the commission have carried in some instances far beyond their legal rights. Mr. Gaskill, one of the commissioners, criticizes its mode of procedure in the investigation of complaints which have become not so much an inquiry of facts as a judicial effort to prove or disprove them. He is assisting the authors of the above-mentioned bill towards simplifying the commission's methods and encouraging a greater degree of informal friendly discussion, rather than the present situation as it hangs over business like a black cloud.

A surprisingly open attack on the Federal Trade

THE wheat situation the world over is so complicated and so many new factors are entering into it that traders have found it exceedingly difficult to sell their grain and then to get back into the market again at a profit, as prices have rapidly advanced after each break, each bulge carrying prices to a new high for the season. The outlook for the new crop is not yet a material factor. This winter's very unusual ice pack still covers a large area and the question as to what, if any, damage it may do, cannot as yet be told. With Russia again in the market for flour and with an estimated need of 9,000,000 bus. of seed grain and with an absorption up to this time of the exportable surplus of southern hemisphere wheat, equalling perhaps 50%, there is a growing belief in some quarters that the estimates as to the world's import needs will have to be revised upwards.

Commission as well as the Interstate Commerce Commission was made by the President's agricultural conference. The criticism is based upon alleged failure to assist the farmer.

The World Court

The administration's renewed request that the United States shall participate in world court affairs should insure approval at the present session of Congress. It is not confused with the League of Nations for the Court does not concern itself with international matters generally, only considering disputes which are referred to it for action. Among its advantages is the opportunity to arbitrate matters of seemingly small importance today which might grow into apparent cause for the declaration of war tomorrow. The Court Plan, however, provides for the refusal of any party to enter a discussion if such nation deemed it wise without jeopardizing the position of such country in the dispute. It is claimed for the plan that there is nothing lost through participation in world court arbitrations and that much would be gained. A rather broad and probably justifiable distrust of European diplomacy has so far prevented the participation of the United States in such matters. This objection carries but little weight under the sensible plan contemplated for the Court, including as it does, only voluntary discussion of

quarrels which may arise and should be immediately adjusted before they have grown into something serious.

Germany and France Influence

Allied with this discussion is the widely heralded "most favored nation policy" breaking into print as it does so frequently. Although it has been traditionally opposed, a change in our attitude has been effective since the Tariff of 1922 was adopted. In effect, we guarantee to those countries, with which we have such agreements, our lowest tariff rates without any compensating concession from them.

This old matter is now up again as a part of the impending German Treaty in which affairs are anything but satisfactory, tending to long defer our adjustment of commercial relations with Germany. From their position, her financiers are curbing undue optimism in the fear of a new collapse such as marked 1923. The stabilization of her business and the meeting of the Dawes plan obligations will be possible only through a sharp increase in the nation's income and productivity. Among late financial scandals, is the advice that Germany's industrial leaders have been compensated enormous sums in gold for business reverses suffered.

Official and private criticism of the attitude of France on both world finances and her home affairs is bitter. It seems that the present French Government has neither the right plan or the proper administrative power to enforce equitable taxation. England is very generally, uncomplainingly, carrying the load of enormous taxation, as are other allied powers, and the situation in France where taxes are relatively nil is, therefore, both unexplainable from an economic standpoint and unfair to other nations.

The newspapers are discussing in round figures \$4,000,000,000 in land, resources, indemnities and the fruits of victory secured by France, for which payment will be exacted from the next generation or two of other peoples. Following this line of reasoning, it is shown that the debt burden will be spread over the industrial and financial business transactions of our grandchildren.

An economic war between Germany and France bids fair to grow out of this situation. Ruhr valley industrialists hope to force France into further reparations concessions and to the evacuation of all occupied areas at an earlier date than contemplated in the Versailles treaty.

Officially, French leaders are quoted in high sounding phrases relative to the customary honor concerning their debts and other matters. This, however, invited a rather sharp rejoinder from President Coolidge in which he pointedly remarked that the United States had fully repaid her friendly obligations to France of the past century through the events crowded into the world war years.

During periods of sharp price advances in grain, we hear complaints from the baker, the housewife, and other consumers of bread stuffs, and the public press is now figuring out how much the average family will be forced to pay beyond the customary former loaf price ranging from 5c to 12c. Ordinarily, you know, professional traders in the grain market are looked on with aversion as a dangerous influence when they sell short a certain grain future in which the investor is interested. The same investor praises them as a constructive and valuable necessity when through large purchases the same grain future is bid up.

UNATTRACTIVE SURROUNDINGS

IN traveling through one of the great grain growing states last summer, we could not help being impressed by the cluttered-up condition of the grounds surrounding most of the country elevators. Here a discarded boiler, there a pile of broken grain doors or perhaps tiling, yonder some rusty line shafting and everywhere weeds and lack of shade, presenting a picture that was far from attractive and leaving a question in our mind as to whether a concern that was so careless or indifferent about outside appearances, might not be just a wee bit careless about some of its business methods.

We of course appreciate the fact that there is much about an elevator to make dirt and we also appreciate the fact that it is not as a rule, a place where a farmer takes his wife and children, but we are confident, that other things being anywhere near equal, he will go to that elevator with an outside appearance of neatness and with perhaps a reasonably inviting place in which to sit, while he discusses some of his problems or considers the purchase of some material from among the numerous side lines with a better incentive to do business and with more pep.

By no means all of the elevators we saw were thus unattractive, some of them being all that could be expected or desired, but the latter only served to emphasize the unkempt appearance of the former, by reason of the contrast.

TRADE RULES AND CONTRACTS

AN arbitration recently before the committee of a state grain dealers' association was decided in favor of the plaintiff and upon appeal to the Appeals Committee the first decision was reversed in favor of the defendant, because there was a difference of opinion on the substitution of a lower grade with a specified discount. The appeal committee's majority report interpreting that the contract did not provide discount, therefore the original decision conflicted with one of its trade rules. Thereby agreeing that the highest grade mentioned in the contract should be the correct grade. The minority report of the appeals committee states that the plaintiff was in the unique position of having violated a trade rule but not his contract. And it further states that there is never a cause for action without breach of the contract and that no rule of an association can be invoked against a member who has literally and properly complied with his contract. This minority report would seem logical and the fulfilling of a contract to the letter would in a court of law stand. From further facts at hand it would appear that the contract did provide for a lower grade and a discount, for the seller sold No. three with four to apply at 5c discount. The trade rules of an association should always conform to law and equity.

OVERLAPPING DEPARTMENTS

RECENT reports from Washington are to the effect that the age-old trouble, jealousy between the various departments, has again broken out, this time the Department of Commerce and the Department of Agriculture being directly involved. Funds for the use of the State, Labor, Commerce and Justice departments was the subject being considered by the House Appropriations Committee and an effort was being made to increase by about \$300,000 the amount allotted to the Department of Commerce, when one congressman proposed an amendment to the appropriation bill, providing that none of the money given to that department should be used by it for the investigation of agriculture or in the assembling of information coming within the scope of the Department of Agriculture. The amendment was lost, but it serves to illustrate the point we want to make and that is this: There are too many bureaus, too much duplication of effort, too much spending of our money for facts and figures that are of little value and last, but not

least, there is frequently, too much delay in giving to the public information which has been gathered at great cost and which, if made immediately available, would be of great service, but which, when eventually given out, has become largely academic.

IT WORKS BOTH WAYS

HOW many country elevator operators are equipped and ready to offer their services in the testing of seed corn before spring planting? All, we hope. Careful selection and testing of seed corn before planting time will mean thousands of extra bushels to be handled through the country elevators. Therefore, a correspondingly larger increase in the volume of business and profits for the grain dealer. Here is where you can do a good turn to others and at the same time benefit yourself.

THE USE OF BANK CHECKS

SOME very interesting and valuable information has just been put out by the American Bankers' association in its campaign seeking to reduce the number of bogus checks and forgeries, the latter, alone, being responsible for a loss last year, amounting to \$100,000,000. Among the warnings given are: "Don't write a check with a pencil and don't make any erasures or corrections on it. Don't leave any blank space after the written amount, and don't sign checks in blank or draw them made payable to cash or bearer unless presented personally for payment. "Safeguard your checks as you would your money," the association admonishes. "Keep your check books securely locked up and be careful how and where you sign or exhibit your signature. Beware of the magic of the word 'certified.' Ordinary certification stamps can be duplicated as easily as any other rubber stamp. Watch checks which apparently bear the maker's O. K. or other form of approval. They are more easily forged than the full signature. Guard your canceled vouchers as you would a valid check, leaving none where it may be easily taken."

MORE FARMLAND

SIX new western reclamation projects comprising more than 400,000 acres of land and calling for expensive irrigation works, have been reported as feasible from engineering, economic, agricultural and land development standpoints by the Department of the Interior. Before work can be begun on them, however, Congress must appropriate money and strong opposition to that has already been shown by those who fear a consequent over production of farm products. We long ago learned that there are two sides to every question and the one here involved, is not an exception to the rule. We should like, however, to again call attention to an editorial in our January twenty-first issue, in which we stated that this country's population in 1980 had been estimated at 175,000,000, making an average yearly increase of more than a million mouths to feed. With such a situation as that inevitably confronting the United States, we see no very protracted period of over production, and while we would not advocate an unlimited expansion of our farm land area, we can see no reason for alarm over the completion of the projects now being considered. IS THERE A REAL WHEAT SHORTAGE? THE sensational advance in wheat prices during the past week, which carried May up about 86 cents over the low of the season, is generally conceded to be due to the speculative craze of the public. Statistics indicate a world's surplus of around 75,000,000 over requirements, after allowing for a

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

United States and Canada carry-over of 85,000,000 bushels, but this estimate is based upon the assumption that the 300,000,000-bushel surplus of the southern hemisphere, will be shipped before the end of the crop year.

High prices have brought wheat in heavy volume from southern hemisphere farms and it is estimated that 70 per cent of the Australian surplus has already been sold, or on the basis of International Institute figures, about 77,000,000 bushels.

THE METRIC SYSTEM

THE Britten-Ladd Metric bill is now before Congress. If it is passed, it will vitally affect in time the scale equipment of every country elevator and terminal elevator as well, for it means that every weighing device must have a different scale beam based on the Metric System. We have published editorials from time to time on the Metric System urging our readers, if they were vitally interested in this subject, to express their opinion to their Senators and Representatives. We would like to have every elevator operator who is a reader of the PRICE CURRENT-GRAIN REPORTER write us at once expressing their views and opinions on the Metric System and whether or not they would like to see this legislation go into effect. Let us hear from you.

THREE DOLLARS a year in the United States and Mexico; \$4.00 a year for Canada, \$5.00 United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at the same rate. Single copy 15 cents.

LETTERS from our readers are solicited on subjects of interest to those engaged in the grain and allied trades, news items, reports on crops, grain movement, new firms, contemplated improvements and cars leaving in transit.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain, feed, seed, bean and hay industries is unquestioned. The character of advertisements in its columns testifies to the favorable opinion of and value received by our advertisers. If you would be classed with progressives, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

CHICAGO, FEBRUARY 4, 1925

GRAIN TRADE REVIEW

THE sensational advance in wheat prices the past week is largely a reflection of the statistical position which commenced to unfold itself some months ago, and with which the grain trade as a whole is very familiar. During the entire upturn which has carried May wheat up around 86c per bu. over the low point of the season there has been no change of market manipulation by those who know anything about the wheat situation, and even the gossip has been singularly free of unfavorable comment. European buyers and the general public apparently were not disposed to believe the theories regarding a scarcity, and it was not until the price commenced to advance in a rather violent manner that there was what might be called general public in evidence. The advance does not change the theory of scarcity to any extent and still higher prices are anticipated by many in the grain trade, especially by those in closest touch with the European situation. With but few exceptions practically all of the European countries have come into the market as buyers, this being especially pronounced during the past few weeks which has added to the bullish enthusiasm.

No Actual Shortage.

There is no actual shortage of wheat in the accepted term of the word, as statistics indicate a world's surplus of around 75,000,000 bus. over and above requirements after allowing for a carry-over of 85,000,000 bus. in the United States and Canada, but the pinch in the shoe is found in the fact that practically all estimates are based on the assumption that the southern hemisphere will ship its 300,000,000 bus. surplus before the end of the crop year, either July 1 according to the American trade or August 1 by the European schedule. With the supply and demand so closely adjusted the difference of exports of 10,000,000 bus. or more shipped or unshipped before the end of that period might have a decided effect on the general situation.

The high price tends to draw out wheat from farmers' hands in comparatively heavy volume in the southern hemisphere and it is estimated that 70 per cent of the Australian surplus is already sold. On the basis of 110,000,000 bus. surplus, as estimated by the

International Institute, this suggests sales of 77,000,000 bus., or 12,000,000 bus. more than reported in trade figures a short while ago. Inasmuch as the Orient has been a liberal buyer, some of the Australian wheat will not be available for European consumption. The Asiatic consumptive needs, however, are included in the quantities theoretically required by importing countries.

Under normal conditions the purchases of importing countries are usually somewhat heavier during the last half of the crop year than during the first six months. There is another factor that the trade must consider this season and that is the effect of the heavy rains in Europe during and after harvest which greatly damaged the quality of the crop, which was already short due to drought and extreme heat earlier in the season. The combination of the two has been that several countries counted upon earlier to furnish a moderate quantity of wheat for export are now actually in the importing group. Russia is variously estimated to need 25,000,000 to 50,000,000 bus., and has been a fair buyer of both wheat and flour during the past month or so. With Hungary and Bulgaria also buying there has been a situation created that has seldom been witnessed in the history of the grain trade.

Outlook for the new winter wheat is generally regarded as fairly good, especially in Kansas, but it will take several weeks of growing weather to determine whether there has been any great loss in acreage. The ice pack still prevails over a good part of the central west and as snow fell on top of it and temperatures remained low it has not disappeared. It is in the territory covered by ice that the heaviest losses are likely to be witnessed. Bulk of the export business in wheat continues to go to southern hemisphere countries, although fairly liberal quantities of domestic are now under contract to go out from February on. Any scarcity in the world's supply will not commence to make itself actually felt until April or May, and it is possible that the highest prices will not be made until June.

Coarse Grains.

Speculative interest in both corn and oats has increased somewhat of late with an advance in the deferred deliveries to a new high for the season, with the public engaged in buying rather freely. This buying was in the face of a decidedly bearish cash corn situation, with steadily accumulating stocks and killing discounts prevailing for cash grain in the sample market, while in oats there were prospects of export business. This does not apply to corn as the present price is far above that prevailing in Argentine and the outlook for the new crop there is fairly good due to recent rains. The new crop will not start to move there until sometime in May. As compared with the price of corn, oats are regarded as selling at a low level, but there is around 107,000,000 bus. cash oats available at North American terminals which tends to check the upturn. Were a brisk domestic demand to develop the market naturally would be influenced, although sometimes an advance in futures is necessary to start the domestic trade to buying.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Jan. 31, 1925.	Jan. 24, 1925.	Feb. 2, 1924.
Wheat	6,434,000	6,119,000	4,168,000
Corn	8,786,000	8,296,000	9,761,000
Oats	5,101,000	5,835,000	4,405,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week	20,321,000	18,334,000
Preceding week	20,250,000	15,651,000
Since July 1	789,821,000	704,795,000

All deliveries of wheat sold at a new high on the crop the past week, May

getting above \$2 for the first time in over 50 years under normal conditions, and while the sensational advance brought out immense profit taking the finish was at net gains of 7½c on May while the deferred deliveries were unchanged to ½c lower. The new crop futures were under commission house pressure and were inclined to drag toward the closing days of the week at times due to investment selling. Speculative interest was very large at times with a new record set for a single day's business. Cash wheat also sold at a new high for the season, with the basis on red winter somewhat firmer in all markets.

The upturn in wheat stimulated public interest in the corn market and with free covering by shorts prices moved up sharply after declining early in the week, and July and September sold at a new high on the crop. The finish was at net gains of 2¼@3c. Considering the relatively slow cash demand the action of the market was surprising, as stocks continue to accumulate and discounts of low grades on spot remain very low as compared with the May delivery.

Oats showed more activity than for a number of weeks with the July and September selling at a new high for the season, and the finish was at net gains of 1¼@2½c. Considering the size of the trade the range of around 5c for the week was not large. Prospects of export business, with a sharp advance in oats and barley in Winnipeg, had considerable to do with changing sentiment. Domestic demand is still relatively slow. Rye showed moderate activity and fair strength and closed 3c higher to 3c lower, with the new crop deliveries under pressure. Range of prices the past week follows:

	High.	Low.	Jan. 31, 1925.	Jan. 24, 1925.	Feb. 2, 1924.
Wheat—					
May	\$2.05½	\$1.94½	\$2.02½	\$1.95½	\$1.11½
July	1.73½	1.68½	1.70½	1.70½	1.10½

WORLD'S WHEAT EXPORTS.

Exports of wheat last week compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Jan. 31, 1925.	Jan. 24, 1925.	Feb. 2, 1924.
American	6,068,000	4,234,000	6,832,000
Argentine	6,349,000	4,074,000	5,084,000
Australian	5,400,000	2,944,000	2,360,000
Indian	904,000	976,000	...
Russian	360,000
Others	40,000	288,000
Total	19,221,000	12,268,000	14,924,000

Of the above total wheat from America there cleared in the form of flour 1,850,000 bus.

The total export of wheat since Aug. 1, the commencement of the European crop year, compared for three years:

	1924-25.	1923-24.	1922-23.
American	268,185,000	246,026,000	277,077,000
Argentine	52,633,000	48,454,000	47,049,000
Australian	31,664,000	27,448,000	16,704,000
Indian	21,224,000	5,864,000	5,533,000
Russian	328,000	19,632,000	...
Others	2,544,000	12,218,000	3,439,000
Total	376,578,000	359,642,000	349,904,000
Season	753,195,000	662,698,000

WORLD'S CORN EXPORTS.

Exports of corn last week, compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Jan. 31, 1925.	Jan. 24, 1925.	Feb. 2, 1924.
American	16,200	16,000	729,000
Argentine	1,128,000	1,552,000	336,000
African	323,000	...
Russian	196,000	187,000
Others	714,000	1,607,000	450,000
Total	1,858,000	3,694,000	1,702,000

Exports of corn since Nov. 1, 1924, compared with last year and year before:

	1924-25.	1923-24.	1922-23.
American	296,000	3,749,000	24,022,000
Argentine	38,868,000	17,212,000	19,496,000
African	867,000	4,629,000	...
Russian	1,055,000	781,000	...

Russian	180,000	...
Others	1,614,000	580,000	2,990,000
Total	41,855,000	25,865,000	36,256,000
Season	67,000,000	65,765,000

CANADIAN GRAIN IN U. S.

The following table exhibits the quantities of bonded grain in the United States reported last week compared with previous week and one year ago:

	Jan. 31, 1925.	Jan. 24, 1925.	Feb. 2, 1924.
Wheat	16,468,000	16,805,000	24,029,000
Oats	872,000	1,497,000	1,552,000
Rye	1,368,000	1,559,000	2,268,000
Barley	1,396,000	1,973,000	258,000

NEW TYPE CALIFORNIA ELEVATOR

Octagon Shaped Concrete Bin Construction With Working Floor Below Bins Are Features.

SUCH unusual things are done and seen in Sunny California that it is not entirely unexpected to find that even grain elevators are built differently than they are back East. One of the most interesting and novel types of elevator construction is found in the Murietta Valley Elevator Co., Inc., house at Murietta near Riverside, Cal. The company was organized in 1918 by the farmers of the district, and was built at a cost of \$23,000 to reduce the cost of handling grain during and following the war. Even the organizing expense is included in the cost.

are located grain spouts running from each bin to a conveyor just below the upper floor to draw grain out of the bins. Spouts also are arranged so that grain can be sacked from any bin. It is believed that this arrangement of the elevator reduces the danger of dust explosion to a minimum. The engine room floor is 4 ft. above the working room. On this level is located all machinery, such as cleaner, automatic scales, wind car loader, two feed grinders, and a 15 h. p. engine.

Three main bins are of octagon shape 50 by 10 by 6 ft., with two small bins 4 ft. square in between the large bins, the total capacity being 33,000 bu. The discharge of grain in any bin is handled from the engine room by the turn of a wheel. This arrangement does away for the necessity of climbing stairs. Between the working floor and the en-

This elevator has been pronounced by many authorities as the best of its size on the Coast. J. A. Packard, from whom the data and illustrations was received, was the building and machinery inspector of the job, and is now secretary of the Riverside Chamber of Commerce. The construction work was done by the Davidson Construction Co., of Los Angeles.

NEW PHILADELPHIA ELEVATOR.

The Reading Company, familiarly known as the Philadelphia & Reading Railway, plans to build a 2,500,000-bus. grain elevator at its Port Reading (Philadelphia) terminal and bids for it are to be opened on March 1st.

This announcement has just been made by Agnew T. Dice, the president of the company, who says that the

delphia have many excellent reasons to justify the completion of the present plans even though the merger goes through, and it is on this basis that the Philadelphia & Reading is going ahead with the construction of the plant.

INDIANA POOL DISTRIBUTION.

The Indiana Wheat Growers' Ass'n on Jan. 24th mailed checks for 40c per bushel to all members who delivered wheat to the association on or before Dec. 31. This makes the pool distributions on the 1924 crop amount to \$1.25 per bushel on the basis of No. 2 soft wheat (2c premium for No. 1, 3c discount for No. 3 and various discounts for other lower grades for dockage or for hard or mixed wheat). This brings the pool distribution above the price generally prevailing during the harvest season. The association will make further payments to its members in April and in June.

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grain from the principal ports of the United States to foreign countries during the week ending Jan. 24, 1925 (000 omitted):

Articles and countries.	Week ending Jan. 24, 1925.	Jan. 26, 1924.	Since July 1, 1924.
	Bus.	Bus.	Bus.
Barley	654	141	16,566

Showing Floor Slabs Being Poured. The Bins Set on This Floor Which Is 12 Inches Thick Supported by Six 18-Inch Concrete Pillars.

Showing Method of Re-enforcement of the Octagon Shaped Bins. Note the Iron Rods Used for Re-enforcing.

It is built entirely of reinforced concrete with only the engine house roof and the stairway of wood. The elevator is 87 ft. high from the bottom of the pit to the top of the pent house. There is no tunnel or underground work, except the pit for receiving grain, the top of which is 4 ft. above ground, and the elevator boot which is 9 ft. below ground level. The main floor level where grain is received in wagons or trucks is 7 ft. from the bottom floor on the ground level, providing a room beneath the grain tanks but above ground, with a door at one end and three windows on each side for ventilation. The main floor is of concrete 12 ins. thick supported by concrete pillars 6 by 18 in. Walls of the elevator are one foot thick. In this space, which is called the working room,

gine room, there is an open space with a short connecting stairway, and then a stairway from the working floor down into the pit, the bottom of which is 4 ft. below the water line. All cement below the ground line was made waterproof by mixing with 10 per cent of hydrate lime. All grain going into the elevator is re-cleaned before it is put in the bins and all dockage hauled back by the farmers, reducing the dockage in the elevator grain to less than 1 per cent by government standard test. Grain can be changed from any bin to the others or even back into the same bin by the conveyors and elevator can be run through the scales if desired.

structure, which will be built from the best that could be found in many sets of plans, will cost approximately \$3,000,000 and it will be so constructed that additional units may be added as they are needed.

Among the large items of equipment for which contracts have already been placed is a Link-Belt box car unloader.

Frequent reference to this large elevator has appeared in this column and it has been understood that the impending merger of the Reading Railroad with the Baltimore & Ohio and the Central of New Jersey casts some uncertainty on the actual erection of the elevator at Philadelphia. Western grain shippers and the grain trade at Phila-

Plant of the Murietta Valley Elevator Co.

J. V. Thompson, First President of the Murietta Valley Elevator Co., and Builder of the Plant.

Pouring the Last of the Concrete Into the Forms for the Plant of the Murietta Valley Elevator Co.

The Letter Box

Firm Name Changed.

Price Current-Grain Reporter: We would like to have you change the list from Lawhon Co. to Lawhon Strube Co., as we have taken into partnership W. H. Strube, who for a number of years has been general manager of Foster & Glassell Co. at this place. A liquidation of this large wholesale grocery firm enabled us to secure Mr. Strube's services.—*Lawhon Strube Co., Shreveport, La.*

Wheat 88% Normal.

Price Current-Grain Reporter: As to winter wheat in Montana, will say that the percentage acreage sown this year as compared with the acreage sown fall of 1923 is about a 15 per cent increase. The growth or wintering condition of this wheat is about 88 per cent of normal. About 80 to 85 per cent of the wheat has been marketed, but we have no idea of the percentage of the crop that went to the Western Coast and the percentage East, or percentage consumed by local milling industries.—*Northwestern Grain Dealers' Ass'n, Great Falls, Mont.*

Acreage Winter Wheat Less.

Price Current-Grain Reporter: The acreage of winter wheat in this territory, that is in the counties of Madison, Jefferson, Gallatin, and Park, is, according to our estimate, 25 per cent less than it was a year ago. Until late in the fall the ground was so dry that the farmers were afraid that winter wheat would not germinate and would not sow it. Rains came later but lasted so long and made the ground so wet that it was impossible to put in a crop, and as a result we figure the acreage is short. I think this condition prevails in practically all parts of the state.

It is our idea that about 25 per cent of the wheat crop raised last year in this territory is still in the hands of the farmers or growers unsold.

Other grain crops such as oats, barley and peas are practically all cleaned up.—*Gallatin Valley Milling Company, C. W. Smeech, Manager, Belgrade, Mont.*

Wheat, Corn and Oats.

Price Current-Grain Reporter: The International Institute of Rome shows a world wheat shortage of 11 per cent as compared with last year's production but the yield is 3 per cent more than the five-year average from 1918 to 1922. Corn is 10 per cent under and oats 10 per cent over the five-year average. Market news has been transferred to the front page of most newspapers and radio broadcasting stations are inflaming the public with stories of successful speculations of wheat. Supplies of wheat in the United States are liberal, export demand slow and we are only four months from harvest. Growing wheat is coming along under very favorable conditions.

The movement of corn to market continues, but not quite so brisk as recently. Local dealers hold a moderate amount which will be shipped along as cars are furnished and a suitable price obtained, but the farmers are refusing to sell at the moment and we hear of but few purchases from first hands. Some little corn still to be shucked, but most of it has been finished up during this week.

Western states are furnishing a fair amount of light test weight corn and extremely large discounts prevail in all markets, both between grades and different qualities of the same grade. Our good Illinois corn is suffering from this burden of light weight corn, also lack of storage space, and cash prices under Chicago May are the widest known, so our farmers are not receiving as much money as might be supposed when we look at quotations in Chicago. Corn grading has improved only slightly and

the bulk of our central Illinois receipts are grading No. 4 and No. 5.

Oats, while the cheapest grain on the list, seem to have very few friends except on occasions when someone calls attention to their relative cheapness or there are rumors of export demand. All markets seem to have a large supply, but offerings from Illinois disappear when prices decline. A better cash demand for both corn and oats is needed to be in keeping with prices being posted for futures.—*H. I. Baldwin & Co., Decatur, Ill.*

MIDWINTER MEETING FEED ASS'N.

The American Feed Manufacturers' Association held a special mid-winter meeting in Chicago Wednesday, Jan. 28th, at which the by-laws were changed to permit the next regular convention during the spring to be held in New Orleans, at the Roosevelt Hotel, which is the new name for the former Grunwald Hotel, the dates of which will be May 6, 7 and 8. Further discussion of considerable value was held on cost accounting as applied to the mixed feed business. A paper was presented by J. M. Ullman, C. P. A., a recognized authority on accounting in the feed milling industry, and it is hoped the various interests comprising the American Feed Mfrs. Ass'n will combine their ideas and take advantage of their mutual trade problems for the benefit of the entire industry. We quote from Mr. Ullman's speech.

Cost System for Feed Mills.

The necessity for a cost system is no longer questioned. We believe all feed mills will agree to this. The only question is what kind of a system. We are trying to design one which will not ensnare a mill in the meshes of voluminous detail and yet give the necessary information about costs, departmental profits and other important data.

Having analyzed a number of feed mills and installed many cost systems, we have worked out a standard system which may be used by any feed mill. It is very simple and does not require more time or expense than ordinary bookkeeping.

There are three necessary fundamentals:

(a) A suitable arrangement of accounts in the general ledger and good bookkeeping.

(b) Statistical information as to the number of tons of feeds manufactured, miscellaneous feed shipped, number of tons delivered by truck, percentage of the full capacity operated, etc.

(c) A good form for monthly summary.

A good bookkeeping system should

arrange accounts in the following manner:

Assets, Liabilities, Merchandise Accounts; Purchases, Sales, Returned goods and allowances, Freight out, Freight in, etc.

Expenses should be sub-divided as follows:

Manufacturing Expenses: Wages, Depreciation, Power, Repairs, etc.

Selling Expenses: Commissions, Salesmen's Salaries, Traveling Expense, Telegraph and Telephone, etc.

Delivery Expenses: Drivers' Wages, Truck Expense, Truck Repairs, etc.

General Administrative Expenses: Officers' Salaries; Office Salaries; Postage; General Expense, etc. Interest and Discounts, Interest Paid, Interest Received, Discounts Taken, Discounts Allowed.

As to statistical information, record should be kept as follows:

Tonnage of manufactured feeds.

Tonnage of miscellaneous feed, stuff which is not manufactured but only handled, such as cottonseed meal, middlings, etc.

As the millers all know, there is not much profit in this miscellaneous stuff, and for this reason not too much expense can be charged against it. By practical experience we have worked out the following charges for handling and selling miscellaneous stuff:

Handling	\$1.25
Selling50
General expense50
Interest25
	\$2.50

At the end of each month the feed miller will now have the correct figures for his expenses from the general ledger. He will also have records as to tonnage manufactured and tonnage of miscellaneous feeds handled. From the

total cost of manufacturing, selling, etc., he should deduct \$2.50 per ton for all miscellaneous stuff handled. The balance of expense would be the cost of manufactured feeds. Divide the cost of manufactured feeds by the tonnage and you get the cost per ton.

Of course it always should be borne in mind that the percentage of total capacity operated will have a great deal to do with costs. For instance, if the mill operates only 25 per cent of full capacity, the costs will be very high. Normal costs could be figured on the basis of about 75 per cent full capacity.

Below we give an outline of representative costs taken from a number of mills operating on the basis of 75 per cent of full capacity or better:

Costs per ton:

Manufacturing	\$2.50
Selling	1.50
General administrative	1.50
Interest, etc.25
	\$5.75

In case goods are delivered, delivery expense of \$1.60 per ton should be added.

This cost does not include heavy advertising, such as a number of firms are doing.

Two new firms were elected to membership: Donahue Stratton Co., Milwaukee, Wis., and the Gro-Bone Mineral Products Co., Dixon, Ill.

BURBANK PERFECTS NEW WHEAT.

A new variety of high quality wheat has been perfected by Luther Burbank, the plant wizard. Wheat previously introduced by him has taken many premiums for superior quality, but he claims the new grain even surpasses the others.

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range of cash prices for grain as mentioned in the leading markets of the country for week ending Jan. 31:

J. J. BADENOCH COMPANY EXPANSION.

During the last year or so, the J. J. Badnoch Co., grain merchants and feed manufacturers of Chicago, has made several notable changes by way of expansion in their business. It will be recalled that they purchased the seven hundred thousand bushel American Malting Co. elevator, thus rounding out their former physical facilities

states where he has been active for years.

These men will be in direct charge of the production and distribution of the Badnoch Co.'s full line of mixed feeds, and THE PRICE CURRENT-GRAIN REPORTER joins their many friends in wishing them continued success in the same field wherein they have made enviable records in times past.

FINAL ESTIMATE CANADIAN WHEAT CROPS.

The final estimate of the Canadian wheat crop is 262,000,000 bushels, or 212,000,000 bushels less than the final estimate for 1923, according to a telegram received by the United States Department of Agriculture from the Dominion Bureau of Statistics.

Allowing 100,000,000 bushels for do-

140,000 bushels in 1923, an increase of 35 per cent.

Oats production is now placed at 412,000,000 bushels against 564,000,000 bushels produced in 1923; barley 87,000,000 bushels compared with 77,000,000 bushels harvested last year; rye 14,000,000 bushels against 23,000,000, the estimate for 1923, and potatoes 94,000,000 bushels compared with 92,000,000, the harvest for last year.

REPORT OF THE AGRICULTURAL OUTLOOK FOR 1925.

The general outlook for American agriculture is fairly encouraging this year, according to the comparison with recent years, although there may be a slackening in domestic demand for farm products next winter. Producers of the major farm products such as cotton and wheat are advised by the department to follow about the same program of production as last year. Increased acreages of these crops are not advisable this year. General business prosperity during the first half of this year will maintain the domestic demand for the 1924 farm products yet to be marketed and should stimulate the demand for the better grades of certain farm products. It is not assured, however, that the industrial improvement of the first half of 1925 will continue into 1926 at the same high level and should there be a reduction in business activity as a result of over stimulation of business, a slackened demand for some of the 1925 crops may be expected. The foreign market for most American farm products promises to be as good at least as during the past year.

From present indications ample credit for farming purposes will be available in most regions of the United States on more favorable terms. Interest rates are now somewhat lower than in recent years and credit needed should be arranged for early in the season. Additional credit for production purposes, however, should not be used unless there is fair prospect of increasing the net farm income or unless essential to bring about sound diversification.

The present tendency in industry points to stronger competition for farm labor during the spring and summer of 1925 than prevailed during 1924. From present indications little change in farm equipment and upkeep costs are to be expected.

The outlook for cotton, although perhaps less favorable than in 1924 from the standpoint of production costs is otherwise encouraging. From present indications stocks at the end of the current season will not be large and the improved foreign demand should be maintained. Another thirteen million bale crop could probably be absorbed at sustained prices.

If there is an average world crop of wheat in 1925 the present high price of wheat cannot be expected to prevail for the 1925 crop, although prices are expected to be better than 1923. Growers of hard spring wheat are cautioned not to increase production above domestic requirements. If the spring wheat acreage in the United States is held to that of last year and an average yield is secured the production of hard spring wheat should about equal the domestic requirements.

VIOLATES MERCHANT MARINE ACT.

The Government is preparing to put a stop to shipments of wheat in bulk from the Northwest to New England points where lake transportation is furnished by Canadian vessels contrary to the coastwise laws. Basis for Federal action involving forfeiture of such shipments has been furnished Secretary of Commerce Hoover by a formal opinion from Attorney General Stone.

Mr. Stone ruled that in applying the provisions of the coastwise laws as contained in the Merchant Marine Act to grain shipments between American points by way of Canada, even if the grain is mingled with other American

grain, should the intent of ultimate transportation to an American port be established, the carrying of the grain by Canadian vessels constitutes a violation of Section 27 of the Merchant Marine Act. Section 27 provides that no merchandise may be transported between points in the United States via a foreign port except in American flag vessels with the proviso, however, that this section does not apply to merchandise so transported over through routes recognized by the Interstate Commerce Commission for which routes tariffs have been filed.

Grain in bulk is the only commodity not coming within the proviso since tariffs for its transportation have never been filed with the commission.

MINNESOTA GRAIN EX- CHANGES.

The Minnesota Railroad and Warehouse Commission, after an investigation covering a period of 13 months, during which more than 200,000 cars were sold, has found that the Minneapolis Chamber of Commerce, the Duluth Board of Trade and the St. Paul Grain Exchange their business to have been properly conducted. It found that in Minneapolis, out of a total of 142,590 cars of grain inspected and marketed, 3,536 were sold more than once; in St. Paul, out of a total of 1,051 cars 554 were resold, and in Duluth, out of a total of 61,154 cars, 611 were resold.

Resales are divided into two classes, scalp sales and merchandise sales and in checking up the scalp sales no signs of collusion were found, the percentage of such sales amounting, however, to less than one per cent.

Referring to the ultimate disposition of the grain in the three markets, the report says:

"In the Minneapolis market large quantities of grain are sold direct to the mills for the purpose of being manufactured into flour, feed and linseed oil. Another large quantity is sold direct to the terminal elevator operators, and another large quantity is sold to be shipped out of the market without being transferred from the car in which it is received. Still another large quantity is forwarded to outside markets, such as Duluth, Superior, Milwaukee and Chicago, for sale in those markets, the remainder of the grain being sold to outside points and to non-members in Minneapolis and St. Paul for local consumption.

"In the Duluth market conditions are different, nearly all grain coming in being sold to the elevator companies for either storing the grain in their elevators or exporting it down the Lakes. Only a comparatively small portion of the grain is sold for local consumption in that market.

"All, or nearly all, grain coming to the St. Paul market is handled by one corporation known as the Equity Co-operative exchange, and consists of grain bought by that corporation through its line elevators in the country, owned by it, and grain consigned to it by other elevators and individuals, and is sold by it to mills, individuals, and in other terminal markets."

The report is expected to furnish information which may be used as the basis for new grain sales legislation.

BUFFALO HAS RECORD YEAR.

From the opening of navigation on the Great Lakes until December 31, 1924, Buffalo's grain elevators unloaded 250,000,000 bus. of grain, the largest quantity in the history of the port. In addition boats now in winter storage hold nearly 39,000,000 bus. which will be unloaded between now and April 1, 1925. The winter storage fleet of about 120 boats contains approximately 11,200,000 bus. of Canadian grain and 27,800,000 bus. of American grain. When the grain in storage is unloaded about 289,000,000 bus. of grain will have been taken from boats from April 1, 1924, to April 1, 1925, which exceeds the record year of 1922 by nearly 27,000,000 bus. The port record grains received in 1924 includes: Wheat, 180,275,738 bus.; corn, 15,809,480 bus.; oats, 27,669,861 bus.; barley, 25,293,580 bus.; rye, 20,554,847 bus.; and flaxseed, 14,291,320 bus.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

O. E. M. KELLER,
J. J. Badnoch Co., Chicago, Ill.

in grain elevators and feed mills. There was also the removal of the main offices of the company to the Postal Building and the occupancy of large quarters there, including a well appointed customers' room. Their business in cash grain, futures, and a jobbing department for millfeeds and other feed ingredients has developed considerably.

Now the company announces that several new feed milling experts have been added to the staff: O. E. M. Keller,

S. A. PEDERSEN,
J. J. Badnoch Co., Chicago, Ill.

mestic requirements including grain milled for flour, seed needed for next year's crop and stocks remaining on hand August 31, 1925, there should be available for export from the current crop about 162,000,000 bushels, the department says.

From a crop of 474,000,000 bushels last year exports amounted to 343,000,000 bushels. Exports from the begin-

J. U. CROSBY,

ning of the new crop year September 1 to December 31, 1924, have amounted to 99,000,000 bushels compared with 176,000,000 bushels exported during the corresponding period for the preceding year.

Canadian flaxseed is finally estimated at 9,695,000 bushels compared with 7,

SMALLER MARKET IN UNITED KINGDOM.

Contrary to popular belief the decline in exports of farm products from the United States to the United Kingdom in the last few years is not mainly due to a lessened demand for these commodities on the part of the British people. It is largely a result of the competition of other food exporting nations. Except in the case of cotton, the British market for which has been affected by diminished production in the United States and by the loss of British foreign markets for cotton goods, the drop in our agricultural exports to the United Kingdom indicates that competitive sources of supply are taking business away from us. So says the Department of Agriculture in a report reviewing the British market for American agricultural products.

PREDICT HIGHER PRICES FOR WHEAT.

World shortage of wheat supplies will force prices up much higher, according to the European correspondent of Chas. Sincere Co. His conclusions are as follows.

"In trying to arrive at a conclusion as to the probable extent the price will advance as a consequence of the world shortage, I have chosen to treat crop and reserves in conjunction with crops and surplus of the principal exporting countries separately from the crops of the principal countries of Europe and North Africa.

"However, as the crops of the principal countries of Europe and North Africa are officially estimated at 142,000,000 bus. below the previous year's crops, besides having been considerably damaged by unfavorable harvest weather, it is reasonable to assume that the requirements of Europe for imported wheat this season has about correspondingly increased.

"That this assumption is correct has so far been clearly demonstrated by the heavy world shipments to Europe since July 1, amounting to about 50,000,000 bus. more than was shipped during the same period last season.

"Therefore, the price of wheat must advance to a point that will effect sufficient economy in consumption to reduce imports materially. Even a reduction of the requirements of importing countries to the same quantity taken last season, viz.: 730,000,000 bus., I do not believe could be effected below a price of around \$2 a bu., Chicago basis, for the remainder of this season, especially in view of the fact that financial conditions of Central Europe have now been restored to nearly normal.

"This still would leave a shortage of 160,000,000 bus. in the supplies of exporting countries, necessitating a reduction of consumption in these countries and crop-end reserves by July 1, 1925, of a similar quantity."

CORN SHORTAGE HURTS LIVE STOCK PRODUCERS.

Several years ago a writer in the *Kansas City Daily Drovers' Telegram* pointed out the danger that would result to agriculture in general should there be a shortage of corn, either through reduced acreage, as was being urged at that time, or through some working of nature. Apparently the dangers predicted three years ago are now in evidence. With corn selling at \$1 a bushel and the elevators taking it at that price the farmer sees corn in the ratio of 7.5 to one while the war time ratio of profitable hog production was fixed at 13 to 1. The value of 100 pounds of pork was estimated to be in the equivalent of the value of 13 bushels of corn, that is if the swine producer is to have a profit.

The ratio of 7.5 is arrived at on a basis of \$1 corn and \$9.75 hogs. Hogs to make a profit, on the basis of the war time ratio which Mr. Hoover approved

and which Samuel Gompers took such exceptions to, would have to be selling at \$13 per hundred at this time to leave a profit. A \$9.75 top is \$3.25 under a profit.

The cattlemen have never worked out a ratio as between corn and cattle. There are so many cheap feeds that can be used to dilute feeding costs of cattle and so many supplements for corn, and so many different ways of feeding cattle that it would take a great deal of work to arrive at a series of ratios that would cover the situation.

No one is begrudging the Kansas farmer the \$1 a bushel that he is getting for his corn, but there are a great many cattle and hogs in Kansas that cannot be fed at a profit on the present basis of corn's price. And the extra profit that Kansas is taking from \$1 corn is being offset in the losses that Kansas cattle and hog producers are taking on their production, many well posted farmers contend.

And the corn belt, which takes so much of the half finished production of Kansas cattle and hogs is not the market that it would be for these productions were corn priced so as to leave a profit for the corn belt feeders.

BUREAU OF CHEMISTRY WORK.

The enormous losses resulting from the deterioration of fruits, vegetables, grain, sugars, sirups, and other feeds is one of the most pressing economic problems before the agricultural chemist today, says Dr. C. A. Browne, chief of the Bureau of Chemistry, Department of Agriculture, in his annual report. Another great source of loss of national wealth is that of the spontaneous heating and combustion of agricultural products, both on the farm and in transpor-

tation and storage, which is closely related to deterioration of foods. The Bureau of Chemistry is giving much attention to this conservation work along with various other problems discussed in the report.

Attention is called to the figures compiled by the National Board of Fire Underwriters which show that farm fire losses alone resulting from spontaneous combustion amounted to \$4,196,386 in the period 1918 to 1921. This did not include losses of farm products caused by spontaneous heating and for which there could be no fire damage adjustment to compensate the owners.

The problem of increasing the protein content, and, therefore, the food value, of corn, wheat and other crops is also being investigated. Progress already has been made in this direction with wheat. Much wheat is now bought by the baking industries on its protein content, and it is expected that such improvement in quality of this bread crop will result in a stronger demand for American wheat in the world market.

Among other investigations being carried on by the department chemists, are problems of the value of different kinds of protein for animals and humans, the odors of plants as factors in insect control, the utilization of vegetable oils, processing of fruits and vegetables for meeting various transportation and market conditions, methods of making certain kinds of sugar, processes for tanning, treatment of such fabrics as canvass to make them more fire and water resistant, dust explosions and fires, and insecticides and fungicides. Contributions have been made to the chemical development of the dye industry, and improvements have been made in rosin and turpentine processes.

GALVESTON DOUBLES GRAIN EXPORTS.

During the year 1924 Galveston exported 27,554,249 bus. of wheat as compared with 11,050,307 bus. in 1923, and 16,911,471 bus. in 1922. These figures were furnished by the grain inspection department of the Galveston Cotton Exchange and Board of Trade. It is significant that most of the exports went to Continental ports and not to Great Britain. The heaviest shipments went to Rotterdam with 5,238,500 bus., followed by Antwerp with 4,393,850, Gibraltar, Piraeus, Genoa, and Bremen. Exports in December were 4,455,999 bus., whereas there were none during the same month in 1923. The case of Galveston is a remarkable example of how heavy grain exports were in 1924 as compared with 1923.

COMING CONVENTIONS.

Feb. 10, 11 and 12—Farmers Grain Dealers Ass'n of Illinois, Peoria, Ill.

Mar. 25-27. North Dakota Farmers' Grain Dealers' Assn., Bismarck, N. D.

May 6-8—American Feed Manufacturers' Ass'n, New Orleans, La., Roosevelt Hotel.

June 9-11.—Am. Seed Trade Ass'n. Los Angeles.

July 28, 29, 30.—National Hay Association, Cedar Point, Ohio.

Oct. 12-14, 1925.—Grain Dealers' National Ass'n, Hotel Muehlebach, Kansas City, Mo.

Oct. 12-14, 1925.—U. S. Feed Distributors' Ass'n, Kansas City, Mo.

Legal, Traffic and Arbitration Decisions

NEW LEGISLATIVE PROGRAM.

The agricultural committee of the House of Representatives in an effort to shape into legislation the recommendations of the President's agricultural committee has begun sounding out various members of congress to see what, if anything, may be done during this session.

Leaders generally, however, are doubtful that any substantial part of it can be put through before adjournment.

Besides seeking the view of members of the commission both as to the recommendations submitted and as to whether they regard them as meeting all needs of the situation, the committee is ready to hear representatives of cooperative marketing organizations.

The outlook for farm legislation this season was discussed with President Coolidge by Chairman Snell of the house rules committee and presented a long list of measures clamoring for attention, but Mr. Coolidge insists that agricultural relief and the Government reorganization bill shall be kept out in front.

In addition to its previous recommendations for specific relief measures, the commission, in a third report, sharply criticizes the administration of certain federal laws and agencies affecting the farmer.

Criticizes I. C. C.

Conduct of the interstate commerce commission, and the tariff commission particularly, fell under the criticism of the presidential appointees, while the department of agriculture, federal reserve board and internal revenue bureau also were dealt with in the report.

The commerce commission, the report says, "has failed or been unable to recognize its responsibility as an advocate of the shipper and has developed into a court," while it holds the tariff commission could materially assist agriculture by "actively functioning along the lines of its constituted powers and responsibilities."

The commission charges that "inter-departmental or interbureau jealousies," are seriously handicapping the administration of some departments and causing a "dog in the manger" attitude that is resulting in the undue expansion of some governmental agencies and retarding the development of others.

Declaring agriculture is suffering from the country's lack of a unified banking system, the commission believes the correction for this lies in measures to increase the relatively small membership in the federal reserve system and modification of certain state banking laws.

Blames Tariff Commission.

The report says the tariff commission has powers upon which to build an "aggressive fact-finding body" that should take the initiative in assembling information needed for a wise and efficient application "of existing schedules," adding that "with such information at hand

the president can call for investigation and receive a report in time to act with at least a fair degree of promptness in proclaiming modification of duties when commodities are suffering from the pressure of foreign competition."

"The conference wishes," the report says, "to emphasize the importance of recognition by all federal agencies that much of the police or regulatory duties of the Government are in connection with remedial rather than punitive legislation."

"In many cases federal commissions, boards or bureaus, which were originally established to act in behalf of individual farmers or of groups which do not have sufficient funds to act for themselves in investigating apparent injustices and in presenting these for hearing before proper tribunals, have departed from this original purpose and are now acting either as the tribunal itself, to which complainants must present their case, or in some cases as the prosecutors of the very persons whose cause they were created to serve."

Wants Periodic Surveys.

"The conference believes that effort should be made to carry over into the regulatory functions of federal agencies the spirit which should prevail in their service functions, and that the administration should cause to be made, at periodic intervals, surveys which will determine whether these agencies are performing their proper functions."

COURT DECISIONS.

Under statute against discrimination, no agreement or mistake by carriers can defeat right and duty to collect published freight rates. Under federal statute prohibiting discrimination in freight rates, no agreement between shippers and carriers or mistake or negligence by carriers in representing or collecting their freight charges can defeat their right and duty to collect published rates.—New York Cent. R. Co. v. Sharp. (Supreme Court, Erie County), 206 N. Y. S. 755.

Carrier may look to consignee for payment and may waive lien by delivery, and still hold consignor liable on contract of shipment. Carrier, contracting with shipper to transport goods, has right to look to consignee for payment of freight, and may waive its lien on goods by delivering them to consignee, and still hold consignor liable on contract of shipment.—Missouri Pac. R. Co. v. Pfeiffer Stone Co. (Supreme Court of Arkansas), 266 S. W. Rep. 82.

Owner, to discharge lien in favor of person in possession must pay or make unconditional tender of full amount due. Where one is lawfully in possession of personal property belonging to another, and during such lawful possession legal charges accrue against such property for which the law gives a lien to the one in possession, before such lien can be discharged the owner must pay or tender the full amount of such legal charges, and such tender must be unconditional. A tender of less than the full amount of the legal charges covered by such lien, coupled with a condition that certain other charges, a part of which at least are legal, shall be re-

mitted, does not constitute such a tender as will discharge the lien when refused.—Atchison, T. & S. F. Ry. Co. v. Tulsa Rig. Reel & Mfg. Co. (Supreme Court of Oklahoma.) 225 Pac. Rep. 696.

Petition for delay held insufficient as to damages. Petition, in shippers' action, for delay, not alleging market values at destination when delivery should have been made, and, when it was made, by some measure, as by the pound, but merely alleging that the market value of the shipment was less by a certain sum, when sold, than it would have been but for delay, was insufficient against special exception.

Carrier is liable for delay of perishable produce, only for deterioration at time of delivery, and it was insufficient to show deterioration when produce was sold several days later.—Gulf, C. & S. F. Ry. Co. v. Dean. (Court of Civil Appeals of Texas, Beaumont.) 261 S. W. Rep. 520.

SLAUGHTERING ON INCREASE.

The Department of Commerce announces that, according to the reports collected at the biennial census of manufactures, 1923, establishments engaged primarily in wholesale slaughtering and meat packing reported products valued at \$2,585,803,888, an increase of 17.5 per cent as compared with \$2,200,942,072 in 1921, the last preceding census year. This industry classification covers establishments engaged both in slaughtering cattle, hogs, sheep, or other animals and in preserving all or a part of the raw stock by canning, salting, smoking, or otherwise curing it for the trade; establishments which purchase raw stock from slaughterhouses and preserve it; and establishments engaged in slaughtering only.

The output of the principal classes of products in 1923 and the percentages of increase as compared with 1921 are as follows: Fresh beef, 4,834,780,580 lbs., valued at \$607,468,593, the rates of increase in quantity and value being 14.8 per cent and 10.9 per cent, respectively; pickled and other cured pork, 3,891,034,833 lbs., valued at \$609,184,888—increases of 29.9 and 11.8 per cent, respectively; fresh pork, 3,265,684,201 lbs., valued at \$429,104,502—increases of 40.7 and 14.8 per cent, respectively; lard, 2,131,993,455 lbs., valued at \$263,887,257—increases of 35.3 and 38.6 per cent, respectively.

The numbers and weights on hoof of the several classes of animals slaughtered in 1923, together with their percentages of increase or decrease as compared with 1921, are as follows: Beeves, 10,178,496, weighing 9,681,793,427 lbs.—increases of 23.2 and 19.1 per cent, respectively; calves, 5,100,012, weighing 865,548,500 lbs.—increases of 18.2 and 22.2 per cent, respectively; sheep and lambs, 13,193,856, weighing 1,060,268,890 lbs.—decreases of 10.7 and 10.6 per cent, respectively; hogs, 57,018,292, weighing 12,631,881,880 lbs.—increases of 40 and 39.5 per cent, respectively.

ESSENTIAL TO SUCCESSFUL FARMING.

Agriculture, whose first stage in this country was one of small production and limited markets, is changing from its second period of quantity production with a surplus and world prices prevailing, to a new epoch characterized by good business methods. This is the burden of an address by President R. A. Pearson of Iowa State College before the recent Washington, D. C., meeting of the American Association for the Advancement of Sciences. Land values, taxes, cost of farm labor, cost of building and supplies, and the cost of transportation have all increased, making more necessary the adoption of good business methods in agriculture. According to President Pearson, the new era should be by farm enterprise based upon business records and their proper interpretation. The records should show low cost of production and efficient marketing. The maintenance of soil fertility also is important.

Barley

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending Jan. 31:

Jan. May	July	Sept.
26 1.75 @ 1.78	1.56 1/2 @ 1.60	1.32 1/4 @ 1.38
27 1.75 1/2 @ 1.78 1/2	1.56 @ 1.59 1/2	1.33 1/2 @ 1.34 1/2
28 1.78 1/2 @ 1.82 1/2	1.57 1/2 @ 1.59 3/4	1.35 @ 1.36 3/4
29 1.76 1/2 @ 1.80	1.54 @ 1.56 1/2	1.34 @ 1.34 1/2
30 1.79 @ 1.81 1/2	1.55 @ 1.57 1/2	1.34 1/2 @ 1.35
31 1.77 1/2 @ 1.80	1.54 @ 1.56 1/2	1.34 @ 1.35

Receipts of rye at Chicago for the week of Jan. 31, 1925, were 56,000 bus. vs. 39,000 bus. same week of 1924; shipments were 109,000 bus. vs. 22,000 bus. same week of 1924.

RYE SPOT QUOTATIONS

Closing outside prices for rye of No. 2 quality cash for the week ending Jan. 31 were:

Mpls.	Dul.	Chi.	Win.	Mil.
Jan. 26 \$1.62 1/2	\$1.66 1/2	\$1.70	\$1.74	\$1.70
Jan. 27 1.64 1/2	1.68 3/4	1.69 1/2	1.77 1/2	1.69 1/2
Jan. 28 1.65 1/2	1.71	1.72 3/4	1.79 3/4	1.71 1/2
Jan. 29 1.65 1/2	1.69 3/4	1.71 1/2	1.71	1.72
Jan. 30 1.66 1/2	1.71	1.72	1.74 1/2	1.73
Jan. 31 1.65 1/2	1.70	1.72	1.73	1.72

BARLEY MARKETS

MILWAUKEE.—After opening comparatively weak and remaining so for two days the barley market picked up strength and closing quotations on Saturday established new high levels for the crop. Both the shippers and maltsters bought steadily, the former however in greatest volume. For the week prices closed 4@5 cents higher and receipts were 218 cars as compared with 203 the previous week and 115 in 1924. Choice to fancy, 48 to 50 lb. test, quotable at \$1.05@1.07; fair to good, 44 to 47 lb. test, \$1.01@1.05; light weight, 40 to 43 lb. test, 98c@1.02 feed, 92c@1.00. Iowa quoted 95c@1.06, as to quality; Wisconsin, 95c@1.07; Minnesota, 95c@1.06; Dakota, 95c@1.05; feed and rejected, 92c@1.00.

FT. WORTH.—Barley receipts have been very light and the demand dormant, and very little trading is consummated with No. 3 barley selling at \$1.01, No. 4 barley \$1.00 basis delivered Group 1.

DULUTH.—Demand for barley was more active towards the end of last week reflecting strength at Minneapolis and Winnipeg. Eastern inquiry was reported. Twenty-three cars of barley were received and spot prices closed unchanged to 1c up at 81 to 97c.

KANSAS CITY.—Nine cars of barley arrived this week, showing an increase of 3 over the previous week. Most of the receipts were recorded in one day. There was no expectation of any material increase in the country movement, in view of light Southwestern production last year. Scattered buying for account of feed manufacturers made a good demand and there were further shipments out of store. Prices closed unchanged to 1c per bushel higher, with No. 3 at \$1.02@1.04 and No. 4 at \$1.01@1.02. Stocks decreased 3,000 bus. to 8,000, against 388,000 a year ago. Oklahoma reports winter barley badly frozen out.

CHICAGO.—The market during the early part of the week was quiet and lower, but gained strength and closed higher with sharp demand. Some sales were made at \$1.04 establishing a new high for the year. Exports for the week totaled 1,196,000 bushels against but 142,000 for the same week last year and the visible decreased 215,000 bushels.

PORTLAND.—Shipments of barley from the Columbia river during the months of October, November and December amounted to 8,613 tons, all of which went to London, Hull and United Kingdom, and its total value was \$453,500. From Puget Sound, during the same period, the total shipments were 4,609 tons and the value was \$228,400.

RYE MARKETS

RECEIPTS OF BARLEY.

Carload receipts of barley last week at different points named, with comparisons, follow:

	Mpls.	Dul.	Chi.	Win.	Mil.

Jan. 31.....	20	35	15	3	6
Total	98	214	59	16	36

RYE MARKETS.

MILWAUKEE.—Rye quotations showed considerable fluctuations throughout the past week but were generally strong and prices closed 2@3 cents higher for the period. There was a sustained shipping demand throughout the week. Offerings were chiefly offgrade with high moisture content and discounts were liberal. Choice Wisconsin was scarce and in request. Considerable Wisconsin sold on a forward shipping basis. Receipts were 36 cars as compared with 45 the previous week and 25 in 1924. Market closed at \$1.69 1/2@1.71 1/2 for No. 2; inside for Wisconsin, ranging at 8@10 cents under May price.

NEW YORK.—The export demand for rye was fair with sales estimated at about two to three million bushels for the week. Norway, Finland and Germany were the principal buyers of rye.

DULUTH.—Marked strength was shown in rye on this market during the last week and new high prices were set. Export inquiry was met and some trade was reported to have been put through. New high prices were set on the crop during the latter part of the week, but recessions came later on realizing sales. Receipts of rye from the country were well maintained for the season. Spot No. 1 rye closed 3 1/2c up at \$1.70.

CHICAGO.—The trade throughout the week was liberal and the market active, with buying quite general and considerable profit taking. Carlot demand was for the most part good with a fairly steady demand from exporters. Closing prices of No. 2 were \$1.72 and No. 3, \$1.68 1/4@1.69. Visible supplies increased 509,000 bushels to 23,479,000 and exports were 489,000 bushels against 312,000 bushels a year ago.

MINNEAPOLIS.—The rye market followed wheat during the week with wide fluctuations. There is a fairly good snow covering for the rye crop in the Northwest and reports generally indicate a fair to good condition.

BEAN YIELD ABOUT NORMAL.

LAKE ODESSA, MICH.—The yield of white beans in Michigan and in our locality was about normal, red kidneys less than one-half of normal yield.

The white beans are a very good quality and package very light.

The movement from growers was unusually large during the early part of the season.

We believe that three-fourths of the beans have been marketed in our locality.

Looks now as though we might have

CULL BEANS WANTED

LARGE WHITE and RED KIDNEY CULLS

Submit Samples—Quote f.o.b. Prices

SIGMOND ROTHSCHILD CO.

HOUSTON, TEXAS

a steady advancing market during the remainder of the season.—Smith Bros., Vette & Co.

PINTO BEANS CLEANED UP.

AMARILLO, TEXAS.—We understand Pintos are about cleaned up over in New Mexico. We are at a disadvantage handling beans as our jobbers buy mostly in LCL, taking stocks from the retail stores throughout the country to apply on accounts, and in that we do not get to figure with them on their Mexican Pintos. However, we sell considerable quantity of mixed cars of California beans.—A. Walker Brokerage Co., by F. S. Davis, Mgr.

BEAN SUPPLY CLEANED UP.

BELEN, N. M.—The local bean supply is pretty well cleaned up. There may be a few cars left in Mountainair or Estancia in the hands of the Trinidad Bean and Elevator Company, or perhaps in the hands of the Mountainair Bean Growers' Ass'n at that point.

As to the estimate of the possible crop for this year, will say that any figures submitted at this time would be of no value as the harvest season is too far away.—The John Becker Company, by J. H. Becker.

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Jan. 31:

Beans—Boston—New York and Michigan pea \$7.75@8 per 100 lbs.; yellow eye, \$7.75@8; red kidneys, \$11@11.50; white California, \$8.75@9; green peas, \$8. Canadian peas, \$7; split peas, \$7; dried limas, \$15. Manchuria beans, \$6.75. Chicago—Market firm on light receipts and good demand. Spot navy, Mich., \$7.50; brown Swedish, \$6.25; red kidneys, \$10. Minneapolis—Latest quotations in pounds, including sacks. Beans, fcy. h.-p. navy, 5c; lima, Calif., 18c; brown, 5c; peas, green, fcy. 8c; yellow, fcy. 6c; marrow-fat, 9c. New York—The upward trend of the market seems to have been halted and prices held about steady with movement light. Marrows show wide range in quality and value. Domestic, 100 lbs., marrow, \$9.75@10.25, pea, choice, hand-picked, \$7.25; pea, screened and prime, \$6.75@7; red kidney, \$10.50; white kidney, \$9.75; lima, Cal., \$15; imported, 100 lbs., marrow, \$9.25@9.50; white kidney, \$8.75@9; lima, Mad., 1923-24, \$12.25@12.50; 1922-23, \$9.50; lima, Europe, large, \$11.75.

Potatoes.

CHICAGO.—Operators report that there has been but a moderate call for carlots of potatoes, either by the local or

GOOD HOUSE

TO SHIP YOUR
POULTRY, VEAL, EGGS, BUTTER
POTATOES

Write Us—COYNE BROTHERS
119 W. South Water St. CHICAGO

outside trade. Cold weather conditions during the first two days of the week had something to do with this situation but later no particular snap developed. Receipts have been fairly liberal here in view of the rather light shipments from all sections and seems to be the opinion of the potato men that with milder weather, and consequent increased receipts and shipments, the market will be somewhat easier.

Wisconsin sacked No. 1 round whites sold principally at \$1.05@1.15; Minnesota sacked No. 1 round whites \$1.05@1.10; Minnesota sacked No. 1 Red River Ohios \$1.30@1.35; Michigan bulk No. 1 Russet Rural \$1.10@1.20; North Dakota sacked No. 1 round whites \$1.05@1.15, and Idaho sacked No. 1 Russets \$2.10@2.40.

NEW YORK.—Maine shippers this week were quoting \$1.45 per cwt. bulk delivered Harlem River and \$2.45 per 150-pound bag delivered Harlem River. In the yards, Maines were selling at \$2.75 @3 per 180 pounds bulk. Sacks on the docks were bringing \$2.50@2.60.

In New York state the shippers were paying the farmers about 50c per bushel. Shippers were quoting \$1.25@1.35 per cwt. bulk and \$2.10 per 150-pound bag delivered New York. In the yards, states were selling at \$2.50 per 180 pounds bulk and \$2.25@2.30 per 150-pound bag.

Long Island farmers were selling some potatoes at 80@90c per bushel. Shippers there were quoting \$2.30@2.35 per 150-pound bag f. o. b. In the yards in Brooklyn, Long Islands were bringing \$3.50@3.60 per 180 pounds bulk and \$2.75@3.25 per 150-pound sack.

OPPOSITION TO McCUMBER-FORDNEY TARIFF.

Flexible tariff rates and retaliatory action provisions in the McCumber-Fordney Tariff Act have not been found to be very workable, and there is a movement on foot to repeal these sections of the law. The Tariff Commission itself also has been divided on most questions of importance, and it has remained for the President to iron out the difficulties. It is thought that there will be changes made in the tariff commission personnel.

BUCKWHEAT MARKETS.

MILWAUKEE.—Buckwheat prices continued unchanged in the local market during the past week. There was little movement. Current quotations are: Silver hull, \$2.30@2.40; Japanese, \$2.45 @2.50 per 100 lbs.

Crop Reports

Compiled by GEO. A. WELLS

OHIO.

Springfield, O. (2): The winter wheat condition is now favorable for the wintering of the winter wheat crop. Corn and oats are moving very slow. Hogs are being marketed light weight.

Sidney, O. (2): The winter wheat condition is now favorable for the wintering of the winter wheat crop. There is a light movement of both corn and oats. Most of the hogs are being or rather have been marketed light, not many being fed now. Think there will be more corn in farmers' cribs next spring than is now expected.

Lima, O. (1): The winter wheat condition is now favorable for the wintering of the winter wheat crop. Very little, if any, corn or oats being sold here by farmers. Hogs being marketed light for want of feed.

Bucyrus, O. (4): The winter wheat condition is now favorable for the wintering of the winter wheat crop. No corn or oats moving now. Hogs are being sold light.

INDIANA.

Decatur, Ind. (7): The winter condition is now unfavorable for the wintering of the winter wheat. No snow and rains and ice would be hard on it. No corn to move. Farmers are not selling oats.

Angola, Ind. (3): Wintering condition of the winter wheat apparently favorable. Ground is frozen. Land dormant and covered with three inches of snow and ice. No corn or oats moving or for sale. Oats bring over 80 cents and hogs are marketed at about 200 lbs. or better.

Frankfort, Ind. (2): The winter condition is now favorable for the wintering of the winter wheat. Corn and oats not moving.

Winamac, Ind. (1): The winter condition is now favorable for the wintering of the winter wheat. The movement of corn and oats is light. Hogs are going to market light.

Jasper, Ind. (3): The winter condition is now favorable for the wintering of the winter wheat. Corn and oats are moving slow. Hogs going to market light weight. Wheat is not hurt so far from freezing and thawing.

Wabash, Ind. (4): The winter condition is now favorable for the wintering of the winter wheat. No corn to move. Few oats are moving. Hogs are being made heavier than in the past.

Rensselaer, Ind. (1): The winter condition is now unfavorable for the wintering of the winter wheat. There is practically no corn. Hogs are being marketed heavy. Corn mostly No. 5 and No. 6. Poor commercial quality and being fed for most part. Feeding heaviest in years, one man having about 800 head alone.

Marion, Ind. (5): The winter condition is now unfavorable for the wintering of the winter wheat. There is a light movement of corn and oats.

Markle, Ind. (7): The winter condition is now unfavorable for the wintering of the winter wheat. There are no corn or oats moving. Hogs are being marketed light.

Brook, Ind. (1): The winter condition is now favorable for the wintering of the winter wheat crop. There is but little corn to move. Hogs are marketed about average weight.

Tipton, Ind. (5): The winter condition is now favorable for the wintering of the winter wheat. Corn and oats is being marketed light weight. Hogs going to market light.

Rushville, Ind. (8): The winter condition is unfavorable for the wintering of the winter wheat. Corn and oats movement very light. Feeding hogs heavy at present.

ILLINOIS.

Freeport, Ill. (4): The winter condition is now favorable for the wintering of the winter wheat. Corn and oats

movement is light. Hogs going to market light. Very little corn will be shipped out of this country.

Ashton, Ill. (4): The winter condition is now unfavorable for the wintering of the winter wheat. Movement of corn and oats has been liberal. Hogs are being marketed rather light weight.

Mt. Pulaski, Ill. (5): The winter condition is now slightly unfavorable for the wintering of the winter wheat. Recent decline has checked selling of corn and oats. Hogs carrying little better weight.

Nashville, Ill. (3): The winter condition is now favorable for the wintering of the winter wheat. There is no corn or oats moving. No hogs being marketed.

Eureka, Ill. (1): The winter condition of wheat is unfavorable on account of the ice. Fair movement of corn and oats. Hogs being marketed light.

Sparta, Ill. (6): The winter condition is now favorable for the wintering of the winter wheat. The movement of corn is slow. Hogs are being marketed light.

Riggston, Ill. (5): The winter condition is now unfavorable for the wintering of the winter wheat. There is no corn moving. No oats here. Wheat is coming out from under the ice and it is zero here this morning.

Rockport, Ill. (2): The winter condition is now favorable for the wintering of the winter wheat. 75 per cent of the corn and oats are sold. Hogs being marketed light.

Mt. Carroll, Ill. (4): The winter condition is now unfavorable for the wintering of the winter wheat. There are few oats moving. Hogs being marketed light weight.

Decatur, Ill. (5): The wintering condition of the winter wheat is favorable. Some corn moving but no oats. Hogs being marketed light.

MISSOURI.

Carrollton, Mo. (2): Ice is all gone and the ground frozen. There are no oats to move and but little corn. Hogs being marketed light. We had sleet and ice about 2 inches thick for 30 days. Cannot estimate damage until later.

Corning, Mo. (1): The wintering condition of the winter wheat is favorable. Corn not moving. No oats here. Hog marketing has slowed down.

Higginsville, Mo. (2): Too early to estimate the damage, if any, to growing crop on account of ice covering fields. Very little corn moving. Hogs marketed light.

Lamar, Mo. (3): Condition of the winter wheat is favorable. Corn and oats movement light. Hogs being marketed light weight.

Sedalia, Mo. (5): The wintering condition of the winter wheat is unfavorable. 40% of the corn and oats are left on the farm. Hogs are being marketed light weight.

Springfield, Mo. (3): The wintering condition of the winter wheat is favorable. There is a slow movement of corn and oats. Wheat nearly all sold.

Marionville, Mo. (3): The wintering condition of the winter wheat is favorable. No movement of corn and oats. Hogs being marketed light. Local conditions best for years. Plenty of agricultural products raised for home consumption.

Chillicothe, Mo. (1): The wintering condition of the winter wheat is unfavorable. There is a light movement of corn and oats. Hogs are being marketed light.

Bethany, Mo. (1): Some complaint of freezing and thawing on wheat. Shipping in corn and oats. Hogs are about all gone and there are very few left to go.

IOWA.

Marcus, Iowa (1): The winter condition of the winter wheat is unfavorable. Corn and oats about cleaned up.

Authorized in States of Iowa, South Dakota, Nebraska, Kansas, Illinois, Ohio and Pennsylvania

Western Grain Dealers Mutual Fire Insurance Company

Hubbell Building

Des Moines, Iowa

LIGHTNING PROTECTION

If lightning rod protection could be installed on every grain elevator on which this Company carries insurance, it would not only affect a reduction of ten cents in the rate but also a reduction in fire losses paid by this Company. This would also affect a lower cost of the insurance which would be reflected to the policyholder in an increase in the dividend rates.

Thawing and freezing hurts new seeding. What corn left in solid hands to be carried till late in the summer. Oats were fed heavily to all livestock on account of cheapness compared to corn. Many farmers inquiring for seed oats as old crop is all fed up and those have marketed their stock.

Jefferson, Iowa (5): There is no winter wheat here. Corn movement is fairly heavy. Oats light. Hogs are being sold very light.

Tama, Iowa (5): No winter wheat sown. Corn and oats movement is very slow. Hogs are being marketed very light.

Whitten, Iowa (4): Some corn and oats moving. Hogs marketed light. Movement of corn very free, considering the crop we raised.

Arthur, Iowa (2): No movement of corn or oats. Hogs marketed very light.

Belmond, Iowa (4): No wheat. Very light movement of corn and oats. Hogs are being marketed light. Weather is very fine for January. All marketable corn will be sold by February 1.

Clarinda, Iowa (3): The winter condition of the winter wheat is favorable. Corn and oats are being marketed light. Hogs going to market light weight.

Coburg, Iowa (3): The winter condition of the winter wheat is favorable. Corn and oats movement favorable. Hogs marketed light.

Clemons, Iowa (5): The winter condition of the winter wheat is favorable. Hogs are being marketed light and there is not much grain moving.

Onawa, Iowa (5): The winter condition of the winter wheat is favorable. There is a light movement of corn and oats. Hogs going to market light.

Indianola, Iowa (6): The winter condition of the winter wheat is favorable. There is some corn being sold among the farmers. Hogs going to market light weight. All kinds of livestock being sold to get rid of corn bill. Corn selling \$1.10 to \$1.20. Considerable corn to be sold by March 1.

Corydon, Iowa (6): No wheat. There is a slow movement of corn and oats. Hogs being marketed light weight.

Henderson, Iowa (3): The winter condition of the winter wheat is favorable. Corn and oats movement very light. Quite a lot of wheat held in country. Hogs are not being marketed light.

New Sharon, Iowa (5): The winter condition of the winter wheat is unfavorable. No movement of corn or oats. Hogs going to market light weight. Ground is hard and freezing and thawing very hard on wheat. Hogs going out heavier than formerly but some going very light yet.

Oakville, Iowa (9): The winter wheat condition is favorable. Slow movement

of corn and oats. Hogs being marketed light.

Hamiin, Iowa (2): The hard freeze after the mild weather is not very good for the winter wheat. No movement of corn or oats. Hogs being fed light on account of lack of corn.

Guthrie Center, Iowa (2): Condition of the winter wheat is not very favorable. No snow covering. Some freezing and thawing but mostly freezing. There is and will be very light movement of corn and oats the balance of the crop year. Hogs are being finished in the regular style now.

MINNESOTA.

Albert Lea, Minn. (6): Winter condition of the winter wheat is favorable. Average movement of oats but there is considerable oats to move, would say 20% greater than usual, but farmers state that they expect 60c for oats. Corn movement is light. Hogs are being marketed at around 200 lbs. and would sell lighter if the price would permit.

Prior Lake, Minn. (6): The wintering condition of the winter wheat is favorable. There is no movement of corn and oats. Hogs being marketed light weight.

Minnetonka, Minn. (3): The wintering condition of the winter wheat is favorable. Good movement of corn, regardless of price as bulk has to be moved next 30 days. Oats not moving under 50c here. Lots of oats will be held for more. Hogs are being made heavier.

Eden Prairie, Minn. (6): Very cold and snow. All right for winter wheat. No corn or oats to sell. Hogs are about all sold out.

Grand Meadow, Minn. (9): The wintering condition of the winter wheat is favorable. Corn being shipped in. Few oats moving. Hogs being marketed rather light.

Hutchinson, Minn. (6): The winter condition of winter wheat is favorable. Hogs are being fed medium. There is not much feed being sold here.

London, Minn. (6): The winter condition of the winter wheat is favorable. There is no corn for sale here. Not enough for feeding. Oats are moving fair. Hogs are marketed light on account of farmers having no corn to feed them.

HENRY RANG & CO.

Established 1862

Grain Merchants

CHICAGO MILWAUKEE
SIOUX CITY

Donnelly, Minn. (2): The winter condition of the winter wheat is favorable. There is a free movement of corn and oats. Hogs being marketed medium weight.

NORTH DAKOTA.

Monango, N. D. (9): No winter wheat here. No corn or oats being sold. Hogs being fed heavy.

Fargo, N. D. (8): Wintering condition of the winter wheat seems to be O. K. Fair movement of corn and oats. Hogs being fed heavy.

Sheyenne, N. D. (5): Wintering condition of the winter wheat seems to be favorable. There is a light movement of corn and oats. Hogs being sold light weight.

Lakota, N. D. (7): No winter wheat here. No corn marketed but some oats being delivered. Hogs being sold heavy.

SOUTH DAKOTA.

Bridgewater, S. D. (8): The winter condition of the winter wheat is favorable. Slow movement of corn and oats. Hogs being marketed light. Very little corn to move to market from this territory.

Canton, S. D. (9): No winter wheat here. Very small movement of corn and oats. Hogs being marketed light weight.

Miller, S. D. (5): The winter condition of the winter wheat is favorable. There is a rather heavy movement of corn and oats. Hogs being marketed rather light.

Brentford, S. D. (7): Winter condition is favorable for winter wheat. Some corn moving but no oats for sale. Hogs are being marketed light.

Flandreau, S. D. (8): Winter condition of the winter wheat is favorable. There is an extremely light movement of corn and oats. Hogs being marketed medium weight. Heavy snow covering ground and with wind and cold weather puts roads out of commission to permit farm marketing.

NEBRASKA.

Oakland, Neb. (7): The winter condition of the winter wheat is favorable. Movement of corn and oats is very light. Hogs being marketed light.

Humboldt, Neb. (9): The winter condition of the winter wheat is now favorable. Corn and oats are being shipped in. Hogs going to market light.

Harvard, Neb. (9): The winter condition of the winter wheat is unfavorable. There is a slow movement of corn and oats. Too much ice covering the winter wheat. Roads almost impassable. Are selling hogs as fast as they are finished.

Nebraska City, Neb. (9): The winter condition of the winter wheat is unfavorable. There are very little corn or oats being sold. The hogs are being fed fairly heavy.

Superior, Neb. (9): The winter condition of the winter wheat is favorable. No corn or oats moving. Roads very bad. Hogs are being marketed both heavy and light weight.

Orleans, Neb. (7): The winter condition of the winter wheat is favorable. Corn is being marketed fast. Bad roads are not stopping heavy deliveries of corn.

Roseland, Neb. (9): The winter condition of the winter wheat is favorable. Some corn is moving. Wheat is looking fine and of good, green color.

McCook, Neb. (6): The condition of winter wheat is favorable. Corn is being marketed fast as roads permit and hogs are being shipped light.

Swanton, Neb. (9): Too soon to say much about wheat. Slow corn movement. No oats to sell. Hogs going to market light.

Beatrice, Neb. (9): The condition of the winter wheat is favorable. There is quite a free movement of corn. No oats moving. Most farmers inclined to sell hogs light and to save corn at present prices.

Belden, Neb. (7): No winter wheat raised here. Corn and oats are moving very slow. Feeders taking most of what is moving. Hogs are being marketed light.

Humphrey, Neb. (2): No winter wheat here. Ground is covered with snow. Grain nearly all fed up this year on account of short crop.

Central City, Neb. (9): The condition of the winter wheat is favorable. There is a fair movement of corn but no oats. Don't see much change in situation as to hog marketing. Think they are now pretty well cleaned out as not many cattle on feed.

KANSAS.

Madison, Kan. (9): The winter condition of the winter wheat is favorable. Ninety per cent of the corn and oats are shipped. Hogs being marketed light.

Waldo, Kan. (5): The winter condition of the winter wheat is favorable. No corn or oats to move. Hogs are being marketed light.

Concordia, Kan. (4): The winter condition of the winter wheat is favorable. Light movement of corn and oats. Hogs being marketed heavy.

Minneapolis, Kan. (4): The winter condition of the winter wheat is favorable. No surplus corn or oats to move. Hogs being marketed light.

Hillsboro, Kan. (5): The winter condition of the winter wheat is favorable. Movement of corn and oats very light. Not many hogs raised in this vicinity.

Wichita, Kan. (6): The winter condition of the winter wheat is favorable. Slow movement of corn and oats from this territory. Hogs going to market both heavy and light weight.

Uniontown, Kan. (9): The winter condition of the winter wheat is unfavorable. Very slow movement of corn and oats. Hogs being marketed light. Heaviest snow storm on today. A regular blizzard.

Neodesha, Kan. (9): The winter condition of the winter wheat is favorable for the wintering of the winter wheat. Some corn movement. Hogs being marketed light. Corn is too high priced for local feeding. Wheat is looking very well. No oats.

Greensburg, Kan. (6): Conditions are favorable for the wintering of wheat. No oats here. Greater part of surplus corn has been sold. Hogs are being marketed light.

Wellington, Kan. (6): The winter condition of the winter wheat is favorable. Corn is about normal. Hogs being marketed light. The snow covering has been a help to the wheat.

Logan, Kan. (4): The winter condition of the winter wheat is unfavorable. No surplus of corn or oats raised here. Hogs are being marketed light.

Satanta, Kan. (3): The winter condition of the winter wheat is unfavorable. No oats raised. Surplus of corn moved. Same true of hogs.

Sedan, Kan. (9): The winter condition of the winter wheat is favorable. Corn and oats all gone. Hogs marketed light weight.

Oberlin, Kan. (1): The winter condition of the wheat is favorable. No movement of corn and oats. Hogs marketed light. Bad roads.

Belleville, Kan. (4): The weather is now favorable for the wheat. We have no surplus of oats to ship out and are not taking in very much corn. The movement of hogs has let up to some extent.

OKLAHOMA.

Enid, Okla. (4): The winter condition of the winter wheat is favorable. The movement of corn and oats is light. Hogs being marketed light. Think winter wheat is in good condition.

Geary, Okla. (2): The local condition of the winter wheat is too dry. There is a normal movement of corn and oats. Hogs being marketed light.

Altus, Okla. (3): Weather is now

In May and June of Last Year

when July Wheat was selling between \$1.03 and \$1.06, we predicted that wheat, within a period of one to two years, would sell in Chicago at \$1.64, \$1.88, \$2.10—possibly \$2.20. At harvest time we advised the farmers to bin their wheat; hold half of it for \$1.60, the other half until wheat in Chicago sold at \$2.00.

We expect a sharp break soon on which to replace long grain. Best get in touch with us.

MARKET CHART

O. D. WEAVER, Manager

309 So. La Salle St.

Chicago, Illinois

moderated and is favorable for wheat. No corn or oats for market. No hogs on feed.

Calumet, Okla. (2): Ground is hard frozen and very dry. Cannot determine damage until warmer weather. Corn movement is normal. No oats offered for sale. Hogs marketed light.

Driftwood, Okla. (1): Winter wheat condition is favorable. Some corn is being sold. No oats for sale. Hogs are being marketed light.

Marshall, Okla. (5): Very little corn or oats moving. Only enough for local needs. Hogs are being marketed light.

COTTON NEWS

Outlook This Year.

The outlook for cotton, although perhaps less favorable than in 1924 from the standpoint of production oats, otherwise is encouraging. From present indications stocks at the end of the current season will not be large and the improved foreign demand should be maintained. Another 13,000,000 bale crop could probably be absorbed at sustained prices.

Exports Large.

Exports are 1,354,000 bales larger than a year ago. At their present rate they point to about 7,200,000 bales as the total this season, the largest since 1913-14. They were only 5,772,000 bales for all last season, 4,864,000 in 1922-23, 6,123,000 in 1921-22, 5,643,000 in 1920-21, 4,188,000 in 1917-18, and 9,036,000 in 1913-14. Meanwhile, in parts of the South mills are said to be running full time; in some few cases night and day. Western trade reports are good. Some 11,700,000 bales have come into sight marketed or hedged; 12,500,000 bales, some believed, have actually been sold of a crop of 13,500,000 to 13,600,000 bales. The South is in comfortable circumstances; it has sold nine-tenths of its crop at good prices, even if lower than last year.

Interesting Figures.

Fenner & Beane's interesting world's statistics are making a stir in Washington. An investigation of the Census Bureau's figures 2,000,000 bales larger on the world's supply than those of Fenner & Beane may be ordered. Recently Government estimate of world's consumption was quietly raised 582,000 bales. Fenner & Beane say: "The supply outlook according to the figures which we have been able to obtain, with the necessary corrections, is approximately as follows, including linters:

"World supply outlook in bales of 478 pounds: World carryover all kinds, lint, July 31, 1923 (census), 6,341,000 bales; add linter carryover (Hester), 177,000; total, 6,518,000 bales. Less amount which Census Bureau admitted it could prove, 355,000; total, 6,163,000 bales. Commercial production 1923-24 (census) revised, 18,749,000; linters United States crop, 669,000; total, 19,418 bales. Total supply 1923-24, 25,581,000 bales. Deduct world consumption linters 1923-24 (census) revised, 19,982,000; consumption linters in United States (census), 532,000; total, 20,514,000 bales. Carryover July 31, 1924, 5,067,000; add United States crop lint 1924, estimated, 13,500,000; linters estimated, 850,000; commercial crops for-

eign cotton listed above, 9,244,000; total, 23,594,000 bales. Probable supply commercial cotton, 28,661,000 bales.

GOOD ADVICE.

Do you realize that prices are dangerously high? Do you recall the year 1921? Refresh your memory. The elevators that were holding high priced grain took severe and very heavy losses, from which they have never recovered. We would advise our shipper friends to not become over-enthusiastic over the prevailing high prices. Just think how far they could drop and what happened in 1921. *Buy your grain with larger margins. This is the time to exercise extreme caution. Pull in your lines.* Now we do not mean that we are particularly bearish on all grains, but we are all prone to become over-enthusiastic on advancing markets. This is just a reminder because we want all our shipper friends to be in business in years to come.—*Transit Grain & Com. Co., Ft. Worth, Tex.*

POOLS AGAINST FURTHER LEGISLATION.

All legislation affecting pooling now pending in Congress is opposed by the National Council of Co-operatives, and especially the Capper-Williams bill, which is designed to give government support and supervision to the pooling movement. Aaron Sapiro, national organizer and counsel for different pools, said that it was his belief that the bill would put every perishable commodity co-operative marketing association out of business and imperil every other organization. Even the McNary-Haugen bill apparently comes within the scope of his disapproval when he expresses unalterable opposition to any measure that will put the government into the business of buying and selling farm products on a commercial basis.

Maker and guarantors may be sued in same action, although guaranty is by separate contract.—The maker and guarantors of promissory notes may be sued in the same action, although the guaranty is by a separate contract, to which the maker is not a party. Unless the guarantor, in making an offer of guaranty of future advances, demands notice of acceptance of his undertaking, such notice is unnecessary. In the ordinary case, the extension of credit referred to, of itself, without notice to the guarantor, is acceptance and completes the contract; there being no reason for applying to guaranties any other or different rules than those which govern the making of other contracts.—*Midland Nat. Bank of Minneapolis v. Security Elevator Co. (Supreme Court of Minnesota.)* 200 N. W. Rep. 851.

Cartagena offers a certain market for a fair quantity of wheat for use in the manufacture of flour in the local flour mills, according to a report to the Department of Commerce from Consul Schnare at Cartagena. During the years 1922 and 1923 the amounts of wheat imported were 21,950 and 36,350 bus., respectively. The average importation at the present time may be estimated as between 2,000 and 3,000 bus. per month, depending upon the price of wheat.

Terminal Markets

KANSAS CITY.

T. J. Tanner, Correspondent.

The office space made vacant by the withdrawal of Thomson & McKinnon of Chicago from the Kansas City field will be taken by Jackson Bros. & Co. of Chicago to provide more room for the latter named firm.

Old officers of the Grain Clearing Co. of the Kansas City Board of Trade were re-elected, as follows: C. W. Lonsdale, president; E. C. Moore, first vice-president; E. O. Bragg, second vice-president; H. F. Spencer, secretary.

Among the week's visitors at the Board of Trade were H. R. Sawyer, Chicago; David Fuller, Minneapolis; C. G. Crittenden and E. W. Taylor, Omaha; Charles Iddiols, Los Angeles; John Hayes, Wichita, Kan., and S. O. Zochman, Emmett, Ida.

N. F. Noland has made application to have his Board of Trade membership representation changed from the Davis-Noland-Merrill Grain Co. to the Grain Marketing Co. of Delaware. All open accounts of the Davis-Noland-Merrill Grain Co., which was included in the merger of four old line grain firms into the Grain Marketing Co. of Delaware, have been closed.

Members of the Board of Trade voted Tuesday to rescind rules regarding handling and grading of hay, alfalfa meal and provisions, because these products are no longer under the supervision of the exchange. Rules establishing grades for grain also were repealed, having been superseded by official government standards. Rules regarding inspection on flour were changed so that directors may fix the fees when necessary.

While most traders in wheat futures through Kansas City brokers are silent about their profits or losses during the recent boom in prices, it is said at the Board of Trade that the most fortunate local operator was Ben Pixlee, a big farmer from Clay county, who spends most of his time on the exchange. Mr. Pixlee is credited with having cleaned up \$250,000 on the long side, but he has not confirmed the rumor. Paris Keyes, a member of the Board of Trade; M. K. Kreider of Meade, Kan., and L. F. Shoemaker of Meade, Kan., are also reckoned among the fortunate traders.

January receipts of grain, flour and feeds in Kansas City were 6,152 cars, as compared with 5,876 for the same month a year ago. They consisted of 2,201 cars of wheat, 2,234 of corn, 400 of oats, 621 of kafirs, 13 of rye, 20 of barley, 438 of mill-feeds, and 225 of flour. Shipments and local consumption are indicated by the following changes in local stocks: Wheat decreased 3,545,458 bus., to 11,602,003 bus.; corn increased 1,899,650 bus., to 5,540,257; oats decreased 48,349 bus., to 2,188,861; kafirs increased 58,785 bus., to 273,810; rye decreased 1,774 bus., to 139,763; barley decreased 15,804 bus., to 7,836.

Fancy Prices for Wheat.

Honors for "topping" the market on cash wheat sales shifted rapidly this week and finally rested on the A. J. Poor Grain Co., which sold two cars of No. 2 red on Friday to the Logan Bros. Grain Co. for \$2.21 a bushel. The wheat was grown by William Leeker of Merriam, Kan., who accompanied the grain to market. It was bought by Logan Bros. to fill country mill orders. The Russell Grain Co., which had several thousand bus. of No. 2 red in store belonging to Missouri farmers, sold lots from day to day, the highest at \$2.19, and several other cars of Missouri and Kansas wheat brought \$2.18 and \$2.18½. No. 2 dark hard sold at \$2.10 and one car of No. 3 was quoted Friday at \$2.10½. These prices were the highest quoted locally since the fall of 1920, when government control was effective. They are said to be the highest ever known in Kansas City during times of peace.

Christopher Decision Postponed.

Decision in the case of J. K. Christopher of B. C. Christopher & Co., Kansas City, indicted by a Pettis county grand jury for operating a place in Sedalia where future trading in grain is permitted, will not be rendered until the April term of the circuit court. This fact became known Jan. 31 when Judge A. S. Walker of Fayette, Mo.,

after hearing arguments of Mr. Christopher's attorneys for quashing of the indictment, took the case under advisement. The grain trade is deeply interested in this contest, which arose in the attempt of the Pettis county prosecutor to enforce an old law, which was designed to prevent bucketshopping. In his defense Mr. Christopher is relying upon the assumption that future trading was legalized throughout the United States by the Capper-Tincher law and subsequent federal supervision of the traffic.

Cash Grain Markets.

Wheat—Receipts for the week, 483 cars, against 590 a week ago and 677 a year ago. While demand was not broad for any kind, it was urgent for high-protein qualities of hard and dark and for the better grades of soft wheat, with millers the main buyers. The bullish spirit emanating from futures was evident, but the highest cash prices were established after the speculative boom was supposed to have collapsed. Soft wheat, which continued to be offered very lightly, led the upward flight, which resulted in the sale of two cars of No. 2 from Merriam, Kan., on Friday for \$2.21 a bushel, the highest in this market since November, 1920. On the same day a new top price of \$1.10½ was made in dark hard wheat, the sale being a car of No. 3, whereas No. 2 had brought \$2.10. Offerings of protein samples of dark and hard were small throughout the week. Local millers, in filling old orders for flour, were good buyers, though new flour sales were strictly of the hand-to-mouth character. Domestic shipping demand was not conspicuous. Elevator men were fair buyers of the medium and lower grades, but fresh export workings were moderate. At the close hard and dark showed a net gain of 7@10c, with nominal values as follows: No. 1, \$1.93@2.11; No. 2, \$1.93@2.11; No. 3, \$1.91@2.10; No. 4, \$1.90@2.09. Final prices of soft wheat were: No. 1, \$2.16@2.20; No. 2, \$2.16@2.20; No. 3, \$2.14@2.18; No. 4, \$2.09@2.14. Wheat stocks decreased 766,000 bus. for the week, to 11,602,000, as compared with 12,097,000 last year.

Corn—Receipts, 467 cars, against 626 a week ago and 940 a year ago. Prices broke sharply in the early part of the week owing to a poor feeding, industrial and shipping demand, but the market later was stimulated by the strong action of wheat. Prices turned up, but buying was practically restricted to elevator interests, who discriminated heavily against the samples with high moisture content. There was an increased percentage of arrivals from northern territory, including Iowa and South Dakota. Closing corn prices were generally unchanged to 2c higher than a week ago, with No. 2 grades up most. Quotations were: No. 2 white, \$1.24½@1.25½; No. 3, \$1.21@1.22; No. 2 mixed, \$1.21½@1.22; No. 3, \$1.17½@1.20; No. 2 yellow, \$1.25@1.26; No. 3, \$1.22@1.23. Texas took some white corn, but that state was able to buy other kinds below the Kansas City basis in Oklahoma and southern Kansas. Stocks here increased 509,000 bus., to 5,540,000, as compared with 835,000 last year.

Oats—Receipts, 107 cars, against 140 a week ago and 122 a year ago. Affected by the course of the corn market, prices weakened at the week's outset and ruled stronger later. White oats closed ½@1½c higher, with No. 2 at 61½c and No. 3 at 60@60½c. Red seed oats gained 2c, No. 2 being quoted at 67c and No. 3 at 66c. Demand for local consumption and southern shipment was not sufficient to take care of all offerings. Elevator men absorbed oats on a hedging basis and stocks increased 14,000 bus., to 2,189,000, against 990,000 a year ago.

Kafir and Milo—Receipts, 181 cars, against 194 a week ago and 122 a year ago. Demand eastward was fair, but in small quantities, with buyers complaining about high prices, while California interests reported the cost of grain sorghums from east of the Rocky Mountains almost prohibitive, including the exorbitant freight rates. Kansas City handlers bought freely on a certain basis relative to corn prices. Kafir closed 2@3c per cwt. higher, with No. 2 white at \$2.03@2.04, No. 3 at \$2.03 and No. 4 at \$2@2.01. Final prices of milo were: No. 2, \$2.15@2.16; No. 3, \$2.14@2.15; No. 4, \$2.12@2.13. Stocks increased 27,000 bus., to 274,000, as against 123,000 a year ago.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

Visitors on the St. Joseph Grain Exchange during the week ending Jan. 31 included: Chas. Gray, Fortescue, Mo.; J. M. Schlup, Stewartsville, Mo.; L. A. Moore, Severance, Kans.; C. C. Wells, Beatrice, Nebr.; E. G. Young, Vanango, Nebr.; C. V. Fordyce, Blockton, Ia.; C. Poe, Gower, Mo.;

W. A. Hanna, Oregon, Mo.; W. J. Cope-land, Clarinda, Ia.; John Nolte, Baileyville, Kans.; N. L. Pearce, Rosendale, Mo.; H. Saunders, Rea, Mo.; E. Wadkins, Elmo, Mo.; T. E. Archer, Conception, Mo.; A. F. Grote, Berwick, Kans.; J. C. Beard, Weston, Mo.; H. E. Ordwing, Savannah, Mo.; J. W. McCauley, Agency, Mo.; C. R. Grundy, Fortescue, Mo.; D. Dixon, Creston, Ia.; T. L. Jones, Agency, Mo.; J. T. Roberts, Union Star, Mo.; J. C. Severance, Bendena, Kans.; H. H. Savage, St. Louis; E. S. Wood, Braley, Mo.; G. Winters, Maysville, Mo.; W. Stouper, Platte City, Mo.

The week's trade ending Jan. 31 was probably the biggest in point of interest since war-time transactions. Chicago futures had wide daily ranges and held above the \$2 mark. Cash wheat prices were inclined to adhere closely to the options in so far as advances and declines were concerned. Supplies for January have been exceptionally heavy and at this market totaled 2,860,400 bus. of all grains compared to 1,488,600 last year. The elevator demand for slightly off-grade wheat improved toward the close of the week and the mill demand for protein offerings was fairly good throughout. Wheat is 7@8c higher for the week. Corn advanced 1@2c on No. 2 grades during the week; No. 3 quotations were about the same as Jan. 24, and lower grades moved to discounts of 2@3c, and were generally 1@2c under last Saturday. Oats declined net one-half to a cent for the week; offerings were moderately heavy. H. H. Savage, now connected with the Langenberg Bros. Grain Co., St. Louis, was a visitor on the Exchange Saturday.

CINCINNATI.

George Mosbacher, Correspondent.

The Early & Daniel Co., one of the most distinctly successful grain concerns in the Middle West, as evidence of its prosperity, filed with the Cincinnati Stock Exchange this week a statement of its 1924 business, showing gross profits of \$177,444.26, and after allowing \$31,620.66 for depreciation showed net profits of \$145,823.60.

Opinions among local handlers of wheat regarding the future trend of prices are considerably mixed, and while there is much talk and many figures to show a shortage of the world's supplies and consequently higher values, still there are good judges of the market who believe prices will suffer a serious slump in the near future.

Receipts of grain here during the month of January were the largest in many years, but with most of the trade the wheat business was unsatisfactory because of the widely fluctuating prices which, in so far as the cash article is concerned, always excites distrust and keeps buyers and sellers in a continuous state of nervousness. The trade as a whole got little benefit out of the rising market.

The most serious thing to disturb the hay market was the enormous country shipments, which totaled nearly 450 cars the past two weeks. Railroads talked of an embargo, but zero weather, accompanied by heavy snowfall, came to the relief of receivers and the demand improved sufficiently to almost clear the accumulation in the yards and terminals at the close of the week.

Walter O'Connell, popular member of the office staff of the Cleveland Grain & Milling Co., whose activities include amateur acting with talent above the average, furnished an entertaining evening to many members of the grain trade at the Holy Angels church, Walnut Hills, last Friday. Mr. O'Connell had a comedy role in a play entitled "The Truth and Nothing but the Truth," which left nothing to be desired in the way of clever humor. The piece was presented by the Dante Dramatic Club, which is composed of some really clever performers who gave skillful portrayals of their respective roles.

Cash Markets.

The cash wheat situation reflected the option strength and reached new high premiums, but the volume of business generally was smaller and most of the mill buying in small lots and more of a scattered character. Receipts were nearly twice as large as last year at this time. Gains of 4c per bushel were recorded with the demand urgent early in the week and rather slow toward the close. Mill advices indicated a desire to await a moderate break in prices before buying but inquiries were good and contract shipments were being filled. Only high protein wheat was wanted and low grades sold slowly. An Indiana miller who had previously sold wheat here was a buyer in the market this week.

No. 1 red winter, \$2.17@2.18; No. 2 red winter, \$2.16@2.17; No. 3 red winter, \$2.14@2.16; No. 4 red winter, \$2.10@2.13; No. 5 red winter, \$2.07@2.10.

The corn market experienced a slight weakness and prices for low grades were easier, but the demand was good and the increased receipts, which continue to exceed last year's arrivals at this time, were well absorbed. Shipping interests general-

ly reported an improved demand, and local alcohol manufacturers especially were active buyers of poor quality. White grades continued scarce and No. 3 and No. 4 sold in several instances above yellow of the same grade.

No. 3 white, \$1.28@1.29; No. 4 white, \$1.22@1.23½; No. 5 white, \$1.19@1.21; No. 6 white, \$1.14@1.16; No. 3 yellow, \$1.29@1.30; No. 4 yellow, \$1.23½@1.24½; No. 5 yellow, \$1.20@1.22; No. 6 yellow, \$1.13@1.17; No. 3 mixed, \$1.25@1.26; No. 4 mixed, \$1.19@1.20; No. 5 mixed, \$1.15@1.17; No. 6 mixed, \$1.10@1.14; sample grade, 95c@1.15.

An improved demand and relatively higher prices in other markets was encouraging to holders of oats who had carried offerings over, and prices recovered most of the earlier losses. Receipts were fairly large.

No. 2 white, 62@63c; No. 3 white, 60@61c; No. 4 white, 57@59c; No. 2 mixed, 60@61c; No. 3 mixed, 57@59c; No. 4 mixed, 54@56c.

BALTIMORE.

Robert C. Neu, Correspondent.

Wheat prices in the Baltimore market have advanced 65 cents during the past three months.

Total stocks of grain in Baltimore elevators on Jan. 30 amounted to 11,000,000 bus. of which quantity 6,700,000 bus. consisted of rye.

Arthur Blackburn, a member of the grain committee of the Baltimore Chamber of Commerce, has returned from a visit to New York City.

Among the out-of-town visitors on the floor of the Baltimore Chamber of Commerce last week were Thos. W. Perkins of Chestertown, Md., and F. A. Ryan of New York City.

President A. W. Mears of the Baltimore Chamber of Commerce has named the following well known gentlemen as the "differential committee," on the part of this organization, viz.: Robert Ramsay, Eugene Blackford, Ferdinand A. Meyer, Charles England and A. R. Dennis.

Plans for a large new bakery for Baltimore are taking shape. Interests believed to be acting for the General Baking Co. of New York have acquired property at the northwest corner of North and Harford avenues, this city, on which site one of the largest baking plants in Baltimore, to cost about \$500,000, is to be erected. Work is expected to begin in the spring.

The atmosphere in the vicinity of Woodbine, Md., must hold peculiar attractiveness to the female sex, since the home of J. M. DeLashmuth, Jr., a well known member of the Baltimore Chamber of Commerce, engaged in the grain business at that point, was visited by the stork on Jan. 23 and enriched by the addition of another baby girl, making the third little lady to grace the DeLashmuth household. Mr. DeLashmuth has been a pretty regular attendant on 'Change in Baltimore, but on the morning of the 23rd was forced to telephone in his regrets, as more "weighty matters" (10-lb. girl) demanded his attention at home.

New Officers.

At the organization meeting of the new board of directors of the Baltimore Chamber of Commerce, held Jan. 28, the following officers were elected for the ensuing year, viz.: President, Adelbert W. Mears (re-elected); vice-president, Frank S. Dudley; secretary-treasurer, James B. Hessong.

Executive Committee.

A. R. Dennis, chairman; Eugene Blackford, vice-chairman; Gordon P. White, A. Leslie Lewis, Edward Netre.

President Mears, who was unanimously re-elected, is head of the flour distributing and exporting firm of White & Co., of this city, and is also president of the National Federated Flour Clubs.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending Jan. 30 were 1,827,889 bus. of wheat.

Receipts of flour and grain for the week ending Jan. 31 were: Flour, 67,092 bbls.; wheat, 1,375,153 bus.; corn, 16,890 bus.; oats, 55,473 bus.; rye, 43,619 bus., and 420 tons of feed.

Senator Dudley Roe of the firm of W. J. Roe & Son, Suddlersville, Md., was a visitor at the Commercial Exchange during the week. Mr. Roe is the largest wheat dealer on the eastern shore of Maryland and at that he handles more wheat than any four men in Maryland.

The following out-of-town visitors registered at the Commercial Exchange during the past week: W. C. Chevailler, Jacksonville, Fla.; A. L. Wallace, Lancaster, Pa.; Edw. Schyckluff, Harrisburg, Pa.; R. G. Nicholson, Chestertown, Md.; W. K. Gulick, Perkase, Pa.; Philip Little, Minneapolis; Herbert A. Grant, New York City; B. J. Loagui, Minneapolis; A. J. Bolender, Reading, Pa.; C. Carling, New York City; E. O. Run, Reading, Pa.; John Long, Cleome, Pa.

Philadelphia Commercial Exchange was held on Tuesday, Jan. 27. The following ticket, which had no opposition, was elected, as follows: President, Hubert J. Horan; vice-president, Geo. M. Richardson; treasurer, Emanuel H. Price; and the following six directors to serve for two years: E. H. Cocke, B. C. Dickinson, Robert Morris, Daniel J. Murphy, William M. Richardson, and W. R. Rockafellow.

Philadelphia Flour Market.

Philadelphia, Jan. 31.—There are no new or interesting features to which we could call attention, the market ruling firm in sympathy with wheat, and while there is not much interest shown in future wants, still there is a fair demand for spot goods which the mills are holding firm at current quotations.

Receipts of flour during the past week were 67,092 bbls. We quote per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, western, \$10.25@10.75; soft winter straight, nearby, \$10@10.50; hard winter straight, \$10.50@11; hard winter, short patent, \$11@11.40; spring first clear, \$9.75@10; spring patent, \$10.25@10.75; spring, short patent, \$11@11.25; fancy spring and city mills patent family brands, \$11.50@12.10. Rye flour, \$9.25@9.75 per bbl. in sacks, as to quality. Buckwheat flour, \$4.25@4.50 per 98-lb. sack.

OKLAHOMA CITY, OKLA.

W. F. Kerr, Correspondent.

The Central West Flour & Feed Co., Tulsa, Okla., capital stock \$7,500, has been incorporated by Bess Carrington, E. V. Keeney and Joe Keeney.

A warehouse operated under the federal warehouse act has been established at Woodward, Okla., with William Graham as manager. The first grain stored was 600 bales of broomcorn.

A loss of \$20,000 was sustained by the Farmers Co-operative Elevator Co. of Mulhall, Okla., recently when its plant was destroyed by a fire of unknown origin. Stored in the elevator were 2,000 bus. of wheat, 1,500 bus. of oats and 1,000 bus. of corn.

The Farmers Co-operative Elevator & Supply Co. of Newkirk did a total business in 1924 of \$629,726, of which \$169,213 represented wheat, according to the report of the secretary made at the recent annual meeting. A dividend of 8 per cent was declared. A. R. Long was elected president; Sam Dawson, vice-president, and S. K. Sherrod, secretary-treasurer.

Heavy demands for millfeeds continued early in February and buying was not greatly retarded by rising prices. Brans were quoted about 40c higher than early in January. Flours advanced 40c to 60c a barrel and practically reached a level of that period when mills were under control of the government. Mills of Oklahoma operated at about 70 per cent of capacity. Hard wheat sold to millers at export bids.

The Oklahoma Grain Dealers Ass'n and the Oklahoma Millers' League are represented in the enterprise of the Oklahoma State Chamber of Commerce that calls for expending \$400,000 this year in advertising the resources of Oklahoma. The grain dealers were represented by F. C. Prouty, secretary of the state association, and the millers of Karl E. Humphrey of the El Reno Mill & Elevator Co., who was elected a director of the chamber.

TOLEDO

S. M. Bender, Correspondent.

Among the visitors on the exchange floor the past week were M. H. Van Den Berg of the Cumberland Seed Co., Cumberland, Md., Lon Petterman of the Delta Farmers Elevator, Delta, Ohio, and Edgar Thierrechter of Oak Harbor, Ohio.

Flour output of Toledo mills the past week was 29,000 bbls., equal to 60 per cent of capacity. The week before was 37,500 bbls. and a year ago was 32,500 bbls. Flour trade was slowed up by the advance in flour and the very strong wheat market. Buyers are cautious about making purchases at this time. They are hoping for some reaction before making further bookings.

Ohio's fall crop of pigs was 18 per cent below the 1923 fall crop, according to State Statistician West, who bases his statement in the rural mail carriers' inquiry made in December. There is a reduction of more than 13 per cent in the number of breeding animals kept for the next spring pig crop in Ohio. These figures indicate there is smaller feeding going on and the number of hogs for this spring will probably be smaller.

New wheat throughout Ohio has been fairly well protected by snow covering though some fields have been subjected to severe thawing and freezing. Farmers are inclined to hold the wheat and corn they now have as the price is so high and good feed may be scarce this spring. Prices here have been very attractive and brought up some of the holdings of the country elevators. Flour trade with the country mills has been slow as has the feed demand also. Reports from some sections indicate that hogs are going to market before they are fattened account of the high prices for feeds.

Receipts of grain were as follows: 76 cars of wheat, 181 cars of corn, 59 cars of oats and 7 cars of rye; total, 323 cars. Milling demand for wheat is not quite as good as the previous week. Premiums were off slightly on soft wheat and hard with millers bidding below the market advance. Corn has also suffered from the heavy re-

49 Board of Trade

CHICAGO

ceipts and buyers are not anxious to follow the upturn. A few choice cars are bringing good prices while off grades are selling at wide discounts. The wide spread between the cash corn here and in Chicago May is considered advantageous. Oats are moving in fair volume and buyers are slow about paying the market price.

The exchange floor is crowded nearly every day with traders and dealers who come in to see what the market is doing. It rather harks back to the war days when interest ran high in grains and stocks. The Toledo market has broadened considerably in the past year and the prospects are for a greater market here this year. Diversified industries and friendly dealers make a combination that will always bring grain to this market. Favorable developments now pending should put Toledo on the map as one of the large grain centers of the country and if enthusiasm and hard work count for anything Toledo will go far during the next few years.

Bert Boardman, manager of the East Side Iron Elevator, received a fine bit of publicity last week when he was written up by a Toledo newspaper in its column devoted to prominent Toledoans. Bert has made this modern public elevator known all over the Middle West and never has much trouble keeping his steel tanks filled to capacity. His career has been an exceedingly interesting one as he has traveled all over the country and early in life took Greeley's advice to go west. He was cowboy, farmer, brakeman, grain sampler and bookkeeper before his tireless energy and ability caused him to be chosen as his father's successor in the capacity of manager of the largest elevator in this market. He numbers among his friends such prominent men as Julius Barnes, and is known to the grain trade far and wide. His pet hobby is the betterment of politics and his opinion is often sought by leading politicians of Toledo.

DULUTH.

S. J. Schulte, Correspondent.

Ely Salyards has been elected a director of the Duluth Board of Trade to fill a vacancy created through the election of George Barnum, Jr., as vice-president.

At the annual meeting of the Duluth Grain Merchants Association, Ely Salyards was elected president; E. H. Woodruff, vice-president; and E. G. Carlson, secretary. Directors are Ely Salyards, F. C. Tenney, George Barnum, Jr., W. W. Blecher and E. H. Woodruff.

Application has been posted for the transfer of the Duluth Board of Trade membership of E. R. Balfour to W. G. Philp of the Duluth Shipping Co. Mr. Balfour has resigned his position as chief clerk of the shipping company and has removed to Seattle. His place has been filled by Mr. Philp.

The Barnes Ames Co. was credited with putting through a heavy trade in durum wheat during the last week on export account. Bidding from that and other export quarters resulted in the May durum future being advanced to \$1.99½. Offerings were too heavy to enable the pit crowd to put the figure over the \$2 mark.

Great Northern Elevator S and the Consolidated are now the only houses at the Head of the Lakes credited with any amount of space available for storage grain. The Occident elevator is holding some storage room for special milling wheats. Space has been taken for liberal shipments from that house at the opening of the navigation.

As a result of lack of space, operators of Duluth and Superior elevators are being compelled to back away from taking offerings of grain on the tables. That condition was evidenced in the withdrawal of a quotation on spot oats around the end of last week. A figure on oats to arrive was all that was made. Stocks of oats in the elevators now aggregate more than 12,100,000 bus. Holders of oats on this market are feeling more confident than they were on account of the reported buying of Canadian oats by foreigners. It is presumed that export demand for American oats will develop in the near future.

Movement of all kinds of grain to this market has been in better volume during the last ten days, attributable to the anxiety of country holders to realize upon their remaining supplies. Commission men have been in receipt of fair advices from the country recently. Realizing the tightness of space, the railroads are keeping close tab on conditions and officials here have been advising country elevators to hold back their shipments on the assumption that some space may be made later on through the taking of storage boat space as soon as ice conditions will enable steamers wintering in this harbor to be moved to the elevators.

Flour Market Strong.

Flour prices on this market were marked up to the highest level in more than three years during the last week as a result of the continued advance in wheats. Jobbers bought only for immediate needs,

however. The market in patents was advanced 75c. Prices per bbl. in carlots follow: Family patents, \$10.25; bakers' patents, \$10; first clears, \$7; second clears, \$5.50.

NEW YORK.

J. M. Nugent, Correspondent.

Export business in wheat during the week amounted to about four million bushels. The bulk of the business consisted of durums and American spring wheats, but there was also some business in American winters and a moderate scattered trade in Manitobas.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: William O. Goodrich of Milwaukee; James Arthur of Winnipeg; E. Gardiner of Philadelphia; C. Page and W. T. Purdy, both of Boston; E. H. Hollarn, D. D. Kilburn, C. H. Burrow and Donald Edwards, all of Chicago, also W. E. Harris of Baltimore.

Flour Situation.

New York, Jan. 31.—The flour market reached new high levels for the year on the upturn in wheat, but the undertone nevertheless was unsettled due to reports of reselling by outside interests at 50c to 75c per bbl. under quoted mill prices.

All sorts of rumors were current as regards export business with Russia, claimed to be actively engaged in this market. Locally, the consuming demand is still very small.

Spring patents were quoted around \$10.25 @10.75; soft winter straights, \$10.15@10.40; and hard winter straights, \$9.85@10.10 per 196 lbs.

BOSTON.

The Grain Board has secured a three-year lease on the old quarters known as the "trade floor" and will decide upon a proper name, such as Commercial Exchange of Boston, to identify it as being separate from the Chamber.

C. P. Smith is chairman of the special committee working on the plan. It is hoped to have the new organization functioning by Feb. 1. New officers may be chosen as the present officers of the Grain Board represent only that organization, while the new body must be representative of all allied trades.

Grain and flour jobbers and commission merchants comprising the Grain Board of the Boston Chamber of Commerce have voted to dissolve all connections with the Boston Chamber of Commerce and form an independent exchange to embrace the grain, flour, feed, hay, produce and other trades of Boston. Formation of a new organization is under way. The Chamber, which started the Grain Board over a quarter of a century ago, has sanctioned the change. Flour merchants held a meeting at the old Chamber building Jan. 8 at which rules governing trading in flour as enforced by the Chamber of Commerce were discussed. Proposed changes were considered and will be submitted to the new organization.

CLEVELAND, O.

At a meeting of the board of directors of the Grain and Hay Exchange, the Cleveland Chamber of Commerce, held Jan. 21, the following were elected: George Schmitt, of the Nickel Plate Elevator Co., president; W. C. Seaman, of the Herrman-McLean Co., vice president; J. G. Monfort, of the Oatman & Monfort Co., treasurer; F. J. Vasek, secretary.

The members of the board of directors are: George Schmitt, Nickel Plate Elevator Co.; W. C. Seaman, Herrman-McLean Co.; J. G. Monfort, Oatman & Monfort Co.; Ernest G. Hart, Lake Shore Elevator Co.; F. W. Blazy, Star Elevator Co.; A. A. Kemper, Sheets Elevator Co.; F. E. Watkins, Cleveland Grain & Milling Co.

NEW ORLEANS.

M. L. Davis, Correspondent.

Standard blackstrap molasses is firm at 14½@15c per gal. f. o. b. tank cars New Orleans for February shipment; prices for March shipment are 13½@14c.

Stocks in elevators as of today are: Wheat, 1,335,000 bus.; corn, 407,000 bus.; oats, 253,000 bus.; rye, 36,000 bus. Cars on track: Wheat, 8; corn, 13.

The first annual community chest drive to finance sixty-four charitable organizations for the year is being held this week. The grain interests are to be found among the most liberal contributors in both money and time for the cause.

Theodore Brent, traffic manager, and J. W. Mooney, general agent of the Federal Barge Line, left Wednesday for Houston, Texas, to attend a conference of railroad officials and shippers to discuss combination rail and water rates to and from points in Texas to points reached by the barge line service.

The hay market has taken rather a sudden change for the better, and while the receipts have been about normal, the demand has shown a strong increase and dealers say that the supply has been consumed upon arrival. There is very little

Antelope Valley alfalfa arriving and a good premium is offered for same, and is quotable at \$31@32 per ton, while Imperial alfalfa is selling at \$28; a grade lower, No. 2, is quotable at \$2 per ton less. No. 1 barley hay is strong at \$29 and No. 1 oat hay \$30@31 per ton.

The grain, hay and feed market at this terminal has shown a decided increase in activity during the past week. The arrivals of all commodities have been above normal and the demand has consumed the supply. There has been considerable trading in mixed feed and while the arrivals have been 70 carloads for the week it has not exceeded the demand, neither has the price weakened, and Utah-Idaho millrun can be quoted at \$42.50 per ton, while Kansas bran is selling at \$41. Alfalfa products are moving better than usual with prices firm at \$32 for medium ground dry meal and \$30 for molasses and alfalfa

mixed. Cottonseed meal has taken a radical advance and is now selling at \$47 per ton, while rolled barley has advanced \$2 and now quotable at \$57 per ton. While the eastern prices of grain have fluctuated considerably there has been no radical change here. No. 3 kafir sold today at \$2.50 per hundred, while \$2.57 was bid for No. 2 milo, eastern shipment. Imperial milo, California grown, No. 2 or better, was quoted at \$2.65@2.67½. No. 3 yellow corn, \$2.67½, and No. 2 at \$2.72½. No. 2 western red, re-cleaned wheat, sacked, is quotable at \$3.40 per hundred. No. 2 hard winter wheat, \$3.45@3.50. Sacked barley, California grown, was offered at \$2.72½, with \$2.62½ bid.

MILWAUKEE.

D. K. Steenberg, Correspondent.

The February rate of interest has been determined by the finance committee of the Milwaukee Chamber of Commerce at 6 per cent.

Shipments for the week were 275,050 bu. oats, 153,950 corn, 64,800 barley, 55,000 wheat, 10,570 rye; total, 559,370 bu.; against 445,550 the preceding week and 1,005,660 a year ago.

Receipts for the week were 218 cars barley, 279 corn, 144 oats, 49 wheat, 36 rye, 4 flax, 7 miscellaneous; total, 737 cars; against 637 the week before, 666 a year ago and 985 in 1923.

The Farmers Exchange organized at Bruce, Wis., to deal in flour, feeds and grains, has been incorporated under the laws of the state with a capital of \$12,000. B. Eke, B. Pinney and E. Goff are the incorporators.

The Froedert Grain & Malting Co. has sold its four story concrete building, which it erected two years ago at Cherry and Seventh streets to replace one destroyed by fire, to Charles Schloeger for a reported price of \$68,000.

The quarters of the Mayr Seed & Feed Store at Beaver Dam, Wis., are being remodeled so as to present a more modern and handsome appearance. The present owners purchased the business from Joseph Wagner in November and took possession on Dec. 10 last.

Milwaukee milling output last week was 6,900 bbls. of wheat flour as compared with 6,800 the previous week and 2,500 in 1924. Receipts of flour at Milwaukee last week were 44,100 bbls., as compared with 23,450 in 1924 and shipments were 21,120 bbls., as compared with 8,200 in 1924.

Generally improved prices prevailed in the Milwaukee market last week and wheat closed 4@7c higher for the period, 2@3c for rye, 1½c for oats, 4@5c for barley, while corn is irregular, 1c higher to 5@6c lower for low grades. Receipts were fair and trade generally good.

An exhibit of home grown grains is being held for two weeks in the Bower City Implement Co. building at Janesville. All the grains included in the display were grown by members of the Rock County Grain Growers' Association, under whose auspices it was arranged. R. T. Glassco, county agent, and Charles Marquart are in charge.

William Bauman was re-elected president of the Farmers' Feed & Fuel Co. of Racine, Wis., at the annual meeting of the company's board of directors, which was held last week. H. A. Runkel was elected vice president; Henry Wehmhoff, secretary, and Frank Bohnsack, treasurer. Although the company finished the year with a substantial surplus in the treasury, no dividend was declared, the directors deciding to use the money in reducing the bonded indebtedness.

Forty-six persons, including eight members of the Chicago club, were present at the second meeting of the Milwaukee Flour Club, which was held at the Milwaukee Athletic Club on Wednesday evening, Jan. 28. A resolution similar to that adopted by the Chicago club, asking that the federal government investigate the organization of the Continental Baking Corporation to determine whether or not federal laws have been transgressed was adopted. Adoption of a constitution and by-laws was deferred until a third meeting to be held some time in February.

Fred Fisher of Fisher & Fallgatter, Wau-paca, was elected president of the Wisconsin State Millers' Association at the annual convention of that body, which was held at the Hotel Pfister on Jan. 28. Other officers elected were: E. M. Schneider of the H. F. Schmidt Milling Co., Oshkosh, vice president; S. C. Northrop of the Globe

Milling Co., Watertown, Secretary-treasurer; and directors: George W. Moody of the Weyauwega Milling Co., Weyauwega; William J. Grover of Bernhard Stern & Sons, Milwaukee; E. C. Wright of the Wisconsin Milling Co., Menominee; and H. E. Pagel of the Pagel Milling Co., Stevens Point.

A. S. Purves of Chicago, Harold J. Pfaff of Indianapolis, A. Northrup and K. L. Burns of Watertown, Theodore Edwards of McFarland, George Bergim of Chilton, G. R. Remier of Beaver Dam, Charles Clasen of Cedarburg, George D. Craig and Harvey Swanton of Oconomowoc, Ronald Taylor of Coloma, A. H. Mintzloff of Grafton; F. Bade of Elkhart Lake, Charles Mann of Mayville, C. J. Meyer of Kiel, A. T. and H. S. Hipke of New Holstein, Edward Bonk of Clinton, W. Kuehn of Fairwater, August Kroehnke of Grafton, A. W. Anderson of Chippewa Falls, David Rosenheimer of Kawaskum, R. B. Clark of Chippewa Falls, T. P. Buckley of Waukesha, Mel Walker of Plainfield, A. Casler of Chicago, and George Eilger of Cedar Rapids, Ia., were included among visitors at the Milwaukee Chamber of Commerce during the past week.

The Bay elevator, operated under lease by Kneisler Bros., was totally destroyed in a spectacular fire on Tuesday evening, Jan. 27. About 100,000 bushels of grain were in storage at the time and the total loss has been estimated at \$250,000, fully insured. The Bay elevator was part of the Ladish Milling Co. group of buildings, which have been idle for two years, and was located between an empty eight story mill on the west and an empty ten story mill on the east. Both mills were saved through heroic efforts of the firemen, 250 of whom were present with two fire boats and seventeen engines, as well as several miscellaneous trucks. Loss of the elevator does not materially affect local storage conditions, according to officials at the Chamber of Commerce, who point out that brewery storage facilities, amounting to 2,940,000 bushels, are unoccupied and available for use. They also announced that plans are under way for the erection of two new elevators here during the present year. The Grain Marketing Co. has been storing grain in the tanks of the burned Milwaukee Railroad Elevator for many months. Plans have been under way for the erection of an inexpensive work house adjoining these storage tanks, but actual construction of such facilities have not been contracted as yet.

Milwaukee Market Broadcast.

Milwaukee cash grain markets are now being broadcast at 6 p. m. every day from station WSOE at 246 meters. The reports rank with the best given over any station in the United States, according to A. E. Bush, chairman of the radio committee. Most stations broadcasting at the present time report on but a fraction of the future service, according to Mr. Bush. In addition to the grain markets New York stock quotations as furnished by the local office of the Paine Webber Company and live stock markets as furnished by the Milwaukee Live Stock Exchange will be broadcast under the same arrangement. Members of the Chamber of Commerce radio committee included Harry Plumb, secretary of the Chamber, and Walter Holstein, Howard Mallon and J. L. Flanagan. The service was commenced on Feb. 2.

MEMPHIS.

George Williamson, Correspondent.

Visitors registered at the Merchants Exchange during the week included E. B. Terry, Little Rock, Ark.; L. L. Leech, St. Louis, and King Riddle, Gadsden, Ala.

E. R. Gardner, Jr., has bought a membership in the Merchants Exchange and entered the brokerage business for grain and hay, with offices in the Falls building.

Malcolm M. McGinnis, who recently formed a partnership under the style of McGinnis-Montgomery Co., to deal in grain and feedstuffs, has been elected to membership in the Merchants Exchange. He is in the Falls building.

W. N. Pharr, who has been a cotton buyer here for a number of years under the style of W. N. Pharr & Co., has accepted a position with Lamson Bros., Chicago, as manager of their cotton futures department. He left Saturday for his new place.

The situation in oats is nearly as bad, although receipts have not been so heavy. For the past week receipts were 165 cars and prices have suffered because of the restricted buying. Track No. 3 white were quotable Saturday at 63c, but any sizable lots could easily be bought at less because of the oversupply.

Reports from Helena, Ark., in the heart of the Mississippi delta in that state, say that purchases of seed corn thus far are about five times what they were a year ago, which indicates determination to plant more to that crop. While the proportion for the local territory may not be that much, it is expected that conditions will

CONSIGNMENTS
PURCHASES
TO ARRIVE

VON RUMP GRAIN CO., St. Louis

WHEAT
CORN
OATS

MEMBERS CHICAGO BOARD OF TRADE

cause greatly increased planting to corn and other feed crops.

Receipts of corn in this market for the past week were 215 cars, which makes about 550 cars for the past three weeks. The result of this heavy movement and a very disappointing outgo is that a big oversupply is here and tracks are generally full, the warehouse capacity not being large enough for carrying big stocks. With demurrage piling up, many people have been making some extremely close prices, although without satisfactory results thus far. One concern reports having found in the Southeast much offering to resell by New Orleans at prices several cents under what local people are asking. Quotations here are more or less nominal, but are slightly better than they were. Jan. 31, track No. 3 white corn was quotable at \$1.30, No. 3 mixed at \$1.27, and No. 3 yellow at \$1.32.

FORT WORTH, TEXAS.
G. E. Blewett, Correspondent.

Weather. Weather in Texas the past two weeks has been very agreeable, with no extremely low temperatures and some snow, but generally over the state the drought continues and moisture is needed very badly. So far there does not seem to be any material complaint about the drought, but it is well known that a good rain would be of material benefit to growing crops. There has been no evidence of material damage to wheat from the freeze, and it is not believed that any will show up later, as the plant has seemingly stood the severe weather in good shape.

Business. Business the past two weeks has held up remarkably well, especially in the face of unusually heavy receipts, while in some cases the premiums, especially on wheat, have declined and receipts have been sufficiently light to maintain an even basis, and all offered find a ready market at satisfactory levels.

Mills report a rather slow and indifferent flour demand with very few new bookings and in some cases they are forced to cancel some bookings in which the merchants have a big profit, owing to the fact that the merchants have not been able to furnish shipping instructions, and several of the larger mills report they expect to close down in the next few days unless some new business appears, and flour prices have advanced in line with wheat, and mills are now quoting at \$10.30 basis high patent.

Wheat. Wheat receipts the past two weeks have been rather light and there has been some decline in the premium as compared to the export bid, but sales are steady on a satisfactory basis and today (Jan. 31) basis delivered Texas (Group 3 or Texas common point) the following values prevail here: No. 1 soft red winter wheat, \$2.25; No. 1 mixed, 75¢ red, \$2.29; No. 1 dark hard, \$2.15; No. 1 hard, \$2.13. Country shipments of wheat have been very light and very little is moving, so all receipts here of country wheat find a ready demand.

Corn. Receipts of corn as well as shipments from the country have been very heavy the past two weeks and it would appear that the demand for the time being is fairly well satisfied, as prices are not so high, based on the option, as previously, and today (Jan. 31) basis delivered Texas Group 1 points the following values prevail here: No. 2 white and yellow corn, \$1.40; No. 2 mixed, \$1.35, while No. 3 grades sell at 20¢ below No. 2 values.

Oats. Oat receipts have been rather light and the demand has declined and values did not show an advance of the option as there are several cars on track here that the owners have been forced to sacrifice to unload, and today (Jan. 31) No. 3 white oats are worth, delivered Group 1, from 70¢ to 70½¢, while March shipments will bring 75¢.

Milo and Kafir. Milo and kafir receipts have been steady and country shipments liberal with a fair demand sufficient to absorb these and hold values at a steady basis, and there seems to be a strong tone to the cash value on sorghums in this market. Today, based delivered Texas common or Group 3 points, No. 3 yellow milo is worth \$2.20@2.23; No. 3 or better kafir, \$2.05@2.08, which would be equal to 5¢ a hundred less Group 1.

Mill Feeds. Mill feeds have been dormant with very little change and indifferent demand with the Texas mills selling gray shorts at \$2.05, and Texas millrun bran \$1.75, basis delivered Texas common or Group 3 points.

Cane Seed. Cane seed receipts have been rather steady with indifferent demand and prices have been erratic with some stronger tone the past few days and slightly higher prices and today (Jan. 31), basis delivered Texas common point or Group 3, red top cane seed, sound, fertile, is selling around \$2.20 per hundred weight.

The Kimbell mill addition of 5,000 bus. to its elevator here, is a new construction,

having been finished the past week, and Mr. Kimbell reports that his company contemplates an erection of 500,000 bushels more capacity, making him a 1,250,000-bushel plant to be ready for the next wheat crop.

Mr. Jule G. Smith, president of the Fort Worth Elevators Co., has been elected president of the Fort Worth Chamber of Commerce. Mr. Smith is one of the most enterprising and prominent citizens of Fort Worth as well as one of the best known grain men in Texas.

VANCOUVER, B. C.
Morwood Clark, Correspondent.

The Dominion Government has let the contract for an elevator to be erected at Prince Rupert, British Columbia's northern port and terminal of the Canadian National Railway. The amount of the tender was \$222,000.

George Bingham, local manager of the Saskatchewan Co-operative Elevator Co., gave an interesting address before the foreign trade branch of the Vancouver Board of Trade on Friday. He took for his subject "Some Economics of the Grain Trade."

Rapid progress is being made on the construction of the new "hospital elevator" at New Westminster. The plant will consist of a very complete equipment for cleaning and drying grains. Messrs. Penfold and Ryan, the owners, expect to have the elevator in operation early in February.

Stocks of wheat are increasing here. The amount now in the elevators is 3,383,157 bus. against 1,200,762 same time last year. There are 800 cars in transit to Vancouver. The total number of cars unloaded at Vancouver for the five months ended Dec. 31 was 9,521 against 9,482 same period year ago, and the total amount of all grains received here from Aug. 1, 1924, to Jan. 9 is 15,330,701 against 15,884,675 same period last season.

PEORIA, ILL.
L. L. Eckard, Correspondent.

Oats receipts were 11 cars. Demand was only moderate, with No. 3 white selling at 57½¢; No. 4 white, 55½¢; No. 4 red, 55¢.

Cattle trading and receipts Saturday were very light, with the tone unchanged. Best veal calves were 50¢ lower, selling at \$13.50 down.

Farlow of Bloomington, secretary. On Tuesday night, Feb. 10, there will be a banquet, part of the entertainment for which will be provided by the C. & A. chorus of Springfield. On Wednesday there will be a business session at night as well as two during the day.

Hogs at the local yards were active and steady, with best butchers selling at \$11, with bulk of 190 to 240 average, \$10.75@10.90. Hogs averaging 140 to 170 pounds were quotable from \$9.50@10.30; good packers, \$10@10.25; good light hogs sold up to \$10.75. Receipts were 2,500 head and market was very active.

The Farmers' Grain Dealers' Association of Illinois will again hold its annual convention in Peoria between Feb. 10th and 12th, inclusive. Approximately 1,000 members and others interested will meet at the Jefferson hotel. The association is made up of farmers who are co-operative stockholders in grain elevators. Fred A. Mudge of Peru is president and Laurence

Corn receipts the past week were considered liberal, although the most of arrivals were from the Northwest. Very little Illinois corn was on market here. Prices were quoted 1¢ lower to 1¢ higher, with the demand limited. The session was slow. Local consumers were fairly good buyers. Prices were irregular. No. 5 white, \$1.10; No. 4 mixed, \$1.13½; No. 6 yellow, \$1.06; No. 4 yellow, \$1.18¼@1.18½; sample, \$1.02 @1.04; No. 6 mixed, \$1.06; sample yellow, \$1.05; sample mixed, \$1.03.

Grain receipts and shipments at Peoria for week ending Jan. 31, as compared with same week last year, as reported by Peoria Board of Trade:

Receipts—	1925.	1924.
Wheat	44,400	14,400
Corn	678,750	262,500
Oats	335,000	253,100
Barley	28,000	32,200
	1,089,150	572,250
Shipments—	1925.	1924.
Wheat	33,600	16,800
Corn	518,950	330,650
Oats	303,000	230,400
Rye	1,200

Geo. H. Measham, Correspondent.

The past week has probably been a record one for activity and excitement in the grain trade. New high records were registered Monday, Tuesday and Wednesday, but on Thursday the market which had become decidedly top heavy took a tumble and the long foretold break took place.

The decline from about \$2.20 to \$2.10 shook out a raft of weakly held long wheat but did not shake the bigger holders, who have long lines from \$2.30 up. On Friday the market made a good recovery and the buying was of excellent character. The European situation is regarded as the basis of bull sentiment. With all the Eu-

ropean countries but Spain in the market for wheat and flour bullish views do appear to have foundation in fact.

The week end has witnessed a marked revival of business in the coarse grains. On Friday oats and barley were active and strong and barley scored a sensational advance. There continues to be a live export demand for barley and short covering on the advance no doubt accentuated a tight market with very little offering. If the demand existing for rye is correctly reported there should be good prices realized for the small balance of the crop yet in the country.

The trade is inclined to be very cautious on taking on commitments on either side of the market under present conditions.

but continued advances have brought in a speculative element that is far from desirable. Efforts to curb the almost at times mad rush to buy wheat are being made by demanding very wide margins. But at any time a flood of stop loss orders may be cause of fluctuations that give rise to much ignorant and malicious criticism of the grain exchange and grain trade.

Flour prices have advanced sharply in sympathy with wheat and an advance of 1c a loaf on bread is expected with the beginning of the month. This will not hurt anybody to speak of, but gives the labor agitators something to mouth about and they will make the most of it. There is no doubt but what higher prices have

stopped the farmers' friends from giving vent to their usual line of chatter while it lets loose a flood of nonsense from other quarters.

Receipts are dwindling, as may be expected, with the severe weather prevailing. At the same time wheat and in fact all grains yet in farmers' hands are very firmly held. Farmers here are never inclined to sell on a rising market. Some of them who sold their cash wheat early in the season are holders of futures with very large paper profits. These people will not be easily scared and are thoroughly convinced that wheat is on the road to \$2.50 before July 1.

MINNEAPOLIS.

The Atkinson Milling Co. increased its capital stock from \$200,000 to \$500,000.

Frank L. Carey, president of the Chicago Board of Trade, was a recent visitor in the city.

Dana McMillan of the wheat department of Washburn Crosby Co., has gone on trip to the Mediterranean.

The Gopher Feed & Grain Co., which will specialize in screenings and mill oats, has opened an office at 318 Flour Exchange, Minneapolis.

T. J. Cassidy, who has been manager of the Chamber of Commerce department of Chas. E. Lewis & Co., has become a member of the firm. He is being succeeded in the Chamber by H. H. Walters.

ST. LOUIS.

W. C. Howland, Correspondent.

The board of directors of the Merchants Exchange has authorized the secretary to purchase and cancel 50 certificates of membership when presented during this year, in the sum of \$225 dues paid in full, which will net \$100 to the owners.

Quite a number of Illinois and Missouri grain men looked in on the meeting of the millers on Jan. 28. The new officers of this combined organization are: W. C. Eisenmayer, E. W. Kidder, O. F. Kelly, Killian Coerver and J. L. Grigg.

Charles Rippin New Secretary.

Charles Rippin, traffic commissioner for the Merchants Exchange, who has been appointed secretary and traffic commissioner, assumed his new duties last Monday. He succeeds Eugene Smith as secretary, the latter having asked to be relieved of the secretarial duties on account of his health. Mr. Smith will become building manager. E. P. Costello will be made assistant traffic commissioner.

Mr. Rippin, prior to his connection with the exchange in 1912, was general agent of the Missouri Pacific Railroad at St. Louis and Memphis, Tenn., and was for many years connected with the Mobile & Ohio Railroad and Seaboard Air Line. He has also served as president of the National Industrial Traffic League for the past two years and is at the present time chairman of the Traffic Committee of the Mississippi Valley Association.

DENVER, COLO.

F. R. Houlton, Correspondent.

Receipts of grain at Denver the past week were 245 cars.

Robert N. Peek, flour broker at Little Rock, Ark., has been in Denver for the past week on business.

E. H. Markham of Mead, Colo., was in Denver looking after some of his affairs.

John Webber of the Webber Flour Mills, Salina, Kans., recently stopped in Denver on his way to the coast.

CHICAGO.

The Board of Trade memberships of Arthur Meeker and Lester Armour have been sold.

Jake Schreiner, the rye specialist, is back on the floor after an enjoyable Mediterranean trip.

C. B. Seay of the Consolidated Feed & Grain Co. of Buffalo, N. Y., was a recent visitor with the Chicago feed trade.

The Calumet Yeast & Grain Products Co. of 100th St. and Avenue N. South Chicago, with a capital of \$50,000, has been incorporated.

Among recent visitors to the market were Wm. L. Hensley of McDonnell & Co., San Francisco, and F. C. Hoose, of the Norris Grain Co., Kansas City.

Mr. Westervelt, sales manager of the National Cottonseed Products Co. of Memphis, Tenn., was a Chicago visitor last week, calling on the trade in the interests of cottonseed oil and cottonseed meal.

W. H. Colvin & Co. announce that, effective Feb. 1, their grain department will be under the management of George H. Tanner, who during the past year has been their representative on the exchange floor.

During these active grain markets and spreading operations, there is more interest in the time of opening and closing at Liverpool and Buenos Aires. The trade is well informed on time differences in the United States and Canada and now there seems to be a considerable volume of reciprocal business with exchanges in other countries. Import duties on grain and grain products are exciting more attention than normally.

After Feb. 15 the Board of Trade is to be without the valuable services of Samuel P. Arnot, executive vice president the past year. In commenting on Mr. Arnot's retirement, Acting President Lewis, in the absence of Mr. Carey, stated the action was wholly voluntary on the part of Mr. Arnot and was in the interest of his private affairs. The officers and directors accept the declination of Mr. Arnot with much regret, they having unanimously requested him to accept reappointment.

Trade Opinion.

A general feeling in the trade by the conservative commission houses is that wheat has had advance enough for the time being. Due to lack of space in regular elevators there is talk of a possibility of carlot deliveries on regular January contract within the next few days. The report that 60,000 bushels of Canadian oats had been worked for export and that stocks of Canadian oats are well cleaned up induced covering by shorts and heavy buying by local speculators in the hope that eventually Europe will have to come to this country for her supply of oats.—Pope & Eckhardt Co.

There has been very heavy profit-taking on all advances in wheat and although this

has given the market occasional setbacks the action shows that buying power, especially on breaks, has not been lacking. With the market fluctuating very rapidly in either direction, and especially as the price has advanced constantly without any materially declines, it is indeed very difficult to express an opinion. At least predictions of \$2 wheat have come true and undoubtedly this price invites profit-taking by those who have held in anticipation of this figure. The general character of the news has been bullish, although there have been no new developments in the situation. Europe was reported actively competing for the world's surplus and it is particularly notable that former exporting countries are buying wheat. Among these Russia is perhaps leading. It was also said that Hungary had removed the import duty on wheat and rye up to April 30 of this year. Corn has had a bad break, which was pronounced when wheat showed a weak undertone. The weakness in cash corn at times was the dominating feature. Oats are not showing any independent strength. They follow the leading cereal to a certain extent, with a more marked tendency toward weakness when wheat and corn reacted and the most discouraging feature in the situation is the enormous visible supply.—Bartlett-Frazier Co.

The wheat market during the past week has been spectacular and the volume of trading the heaviest on record. On one day, the 28th, transactions amounted to 111,827,000 bushels, when May delivery reached \$2.05½, an advance of over 25c since the first of the month. Winnipeg was the leader in the sharp upturn, but the advance was world-wide. Notwithstanding the reduction of 12 per cent in the size of the world crop as compared with the preceding season, and the liberal movement to date, there is no evidence of any material accumulation, indicating that the consumption during the first six months of the season has not been reduced proportionately to the reduction of the season's supplies. Foreign countries are competing with each other for the remaining supplies. In this country primary movement continues in liberal proportion, but the wheat is disappearing as indicated by the visible stocks decreasing more rapidly than a year ago. The corn market declined about 6c from the high levels reached on Jan. 19 to Tuesday of this week when the market again turned upward. The movement to market for several weeks has fairly liberal, considering the size of the crop, but this week the receipts have slackened. The oats market has been dull for many weeks, but increased interest was developed this week, which advanced the price several cents. Visible stocks have been growing larger and larger, reaching nearly 75,000,000 bushels this week, compared with 18,000,000 a year ago, and the primary movement has continued liberal. The increased optimism of the past few days was influenced by intimations of an export outlet.—Clement, Curtis & Co.

GRAIN GRADING SCHOOL IN BUFFALO.

Practical instruction in grain grading will be given in classes by Willis B. Loombs, federal grain supervisor at Buffalo, N. Y., and Patrick D. Connors, chief grain inspector, Buffalo Corn Exchange, who comprise the teaching staff. The school was opened recently in room 24, Chamber of Commerce Building, and classes will be conducted in the grading of wheat, corn, oats, rye, and grain sorghums. The fee for one course is \$25, and for the three courses, \$50. The aim of the school is to furnish instruction that will be of special interest to the grain trade of Buffalo. It is the relief of those behind the course that many members of the trade are interested only in the grading of one or two grains, and the school will be conducted with this in mind, separate course being offered this winter so that student may spend the entire time on the grains that he desires to study.

been promoted to the position of manager of the Seattle branch of the Sperry Flour Mills Co.

WISCONSIN.

Luck, Wis.—Fire destroyed the William Lindgren feed and saw mill at Trade River.

Genoa, Wis.—Thomas Latimer & Sons recently sold to Tranax Bros. their flour and feed mill.

Madison, Wis.—Joseph W. Connor of Brule, was re-appointed on the grain and warehouse commission.

Stanley, Wis.—The Burns Prod. Co.'s grist mill, stock of feed, etc. has been purchased by E. J. Crance of Chippewa Falls.

Waupun, Wis.—The following officers were elected at a meeting of the Farmers Elevator Co.: Pres., J. W. Kastein.; vice pres., W. D. Pattee; sec'y, Arthur H. Miller; treas., A. F. Schultz and manager, Charles Nummedor.

Brandon, Wis.—H. J. Liner was elected president of the Brandon Farmers Elevator Co. for 1925. Other officers elected were: C. A. Gauger, vice pres.; E. F. Young, sec'y; J. W. Foster, treas. Secretary's report showed a 10 per cent dividend had been declared.

Further advice but still of an indefinite character comes from the Washburn Crosby Co. of Minneapolis relative to the erection of a large elevator and mill in Chicago.

News of the Country Grain Trade

ALABAMA.

Albany, Ala.—The Twin City Wholesale Feed & Grain Co. has completed their modern new building. It has a floor space of 5,000 sq. ft. and is so situated that it may be enlarged when business demands it.

ARKANSAS.

Yocum, Ark.—Fire totally destroyed the mill of the Yocum Milling Co.

Warren, Ark.—The newly organized Warren Flour & Feed Co. is now managed by J. D. Harrison.

Stuttgart, Ark.—Troy Watkins of this city and A. G. Christenson of Pine Bluff has purchased the Gran Prairie Commission Co., formerly owned by N. M. Hoover.

Lonoke, Ark.—The feed store, formerly owned in partnership by W. E. Wheat and L. C. Patton, will now be run by W. E. Wheat individually, Mr. Wheat having bought out Mr. Patton.

CALIFORNIA.

Los Angeles, Cal.—Huffine & Co., formerly of Kansas City, Mo., will erect a modern elevator on a site in the new Central Manufacturing District.

CANADA.

St. Boniface, Man.—The Red River Grain Co., Ltd., with H. Kavener in charge, has been organized to deal in grain, feed, buckwheat flour, etc.

Parkland, Alta.—Fire destroyed the Bawlf Grain Co.'s elevator causing a loss of \$20,000. Insurance was carried. About 8,000 bushels of grain was burned.

Vancouver, B. C.—The Vancouver Mfg. & Grain Co., now under control of Spillers, Ltd., are contemplating additional grain cleaning machinery and equipment at a cost of \$14,000.

COLORADO.

Padronia, Colo.—The Western Wheat Co. of Sterling has purchased the elevator here owned by F. L. Green.

IDAHO.

Jerome, Ida.—The Fike Elevator here has been taken over by the Farmers' Grain & Milling Co. W. A. Randolph is manager.

Hansen, Ida.—Jesse Reynolds, an employee of the Farmers' Grain & Milling Co. here, was pinned under a sack of beans, injuring his chest, thigh and foot.

ILLINOIS.

Tolono, Ill.—The Central Elevator here, formerly owned by J. A. Creamer, has been purchased by C. A. Zelle, who is now operating same.

Byron, Ill.—The Farmers' Grain Co. offered their property on the C. G. W. right of way at auction Jan. 31, following their decision to discontinue business.

Aledo, Ill.—Report of the Farmers' Grain & Coal Co. shows that in two years an increase of 80 per cent has been made, under the management of Frank Terrey.

Roseville, Ill.—The annual report of the Farmers' Grain Co. shows the company to be in a very flourishing condition, last year's business having been very prosperous. The following directors were elected: G. F. Meacham, W. V. D. Moore, George Gossett, Arthur Taylor and High Kirkpatrick.

Pana, Ill.—Roy Schaper and family of Nokomis, Ill., will move here at an early date to reside. Mr. Schaper is a member of the flour and feed firm, Barnstable & Schaper.

New Windsor, Ill.—The annual meeting of the Rivoli Grain Co. was held recently at which the presiding officers were all re-elected for the coming year and a 7 per cent dividend was declared.

Fairbury, Ill.—Fire of unknown origin destroyed the Big Four Elevator owned by William L. Dunn of Essex, together with five hundred bushels of oats. Some insurance on the building was carried.

Plymouth, Ill.—The Plymouth Farmers' Elevator Co., managed by Tom Atyeo, has purchased the Old Hotel Cutler property. They are badly in need of more storage room for feed, flour, seed, etc.

Cullom, Ill.—At the annual meeting of the Cullom Cooperative Grain Co., the directors were re-elected with the exception of Charles Jewkes taking the place of John Riebe. A dividend of 6 per cent was declared.

Astoria, Ill.—A meeting of the reorganized Farmers' Grain & Service Co. was held recently to complete the re-financing of the company. They are now in a position to do a complete grain business and solicit the patronage of their former customers.

Clinton, Ill.—At the annual meeting of the Dewitt County Cooperative Grain Co., the following officers were re-elected: Charles Walker, president; M. M. Luttrell, vice-president; C. M. Hartsock, treasurer; Rolla T. Ingham, secretary; Adolph Cobb and Rolla Ingham, directors.

Eureka, Ill.—The Cruger Elevator Co. held its annual meeting recently, electing the following officers: W. H. Smith, president; John Blumenshine, vice-president; F. H. Kaufman, secretary; W. E. Bradle, treasurer; J. W. Dorward, manager. F. H. Kaufman and W. H. Smith, directors.

Plano, Ill.—The Plano Farmers' Cooperative Grain Co. held their annual meeting here, and reported a large and profitable business for 1924. Since organization three years ago, their officers have been: John H. Burnham, president; James F. McCarthy, vice-president; L. A. Sears, secretary-treasurer and general manager.

Clinton, Ill.—The officers of the Dewitt County Cooperative Grain Co. were re-elected at their annual meeting, as follows: President, Charles Walker; vice-president, N. W. Luttrell; treasurer, C. M. Hartsock; secretary, Rolla T. Ingham; directors, Rolla T. Ingham and Adolph Cobb. A seven per cent dividend was declared.

Belleville, Ill.—Manager F. A. Walton's report disclosed a very successful year's work for the Belleville Cooperative Grain Co., at the annual meeting held recently. The directors were re-elected. Officers are: W. J. Miller of Turkey Hill, president; Wm. F. Keck of St. Clair township, vice-president, and Sherman Stookey of Stookey township, secretary.

Stronghurst, Ill.—The stockholders of the Stronghurst Grain & Mdse. Co. held their annual meeting, and elected the following directors: O. J. Sanderson, C. E. Peasley and C. F. Heisler. Officers elected: O. J. Sanderson, president; C. H. Curry and W. W. Ross, vice-presidents; C. R. A. Marshall, secretary; and

Kansas City Board of Trade.
KANSAS CITY, MO.

Glenn Marshall, manager. A 7 per cent dividend was declared; 138 cars were shipped from the Stronghurst and Decorra stations.

Brighton, Ill.—An annual dividend of 6 per cent upon the capital stock was paid the Brighton Farmers' Cooperative Elevator Co. Two new directors were elected at the stockholders' meeting: C. C. Schmidt and W. S. Reader. The other directors are: P. A. Haycraft, T. L. Strohbeck, Jas. Root, Otto L. Oertel and C. A. Hilliard. The old officers re-elected are: President, P. A. Haycraft; vice-president, C. A. Hilliard; secretary, James Root; treasurer, T. L. Strohbeck, and manager, J. H. Hauter.

INDIANA.

Scottsburg, Ind.—A custom grinder is being contemplated by C. C. Wells.

Mt. Carmel, Ind.—A 10-ton Howe scale has just been installed by E. R. Snyder here.

Bunker Hill, Ind.—William Crowder, grain dealer here, died at his home recently.

New Palestine, Ind.—H. E. Waltz has installed a feed grinder with 5 tons an hour capacity.

Cambridge City, Ind.—The Imperial Mills will install a 20-22 inch attrition unit and feed mixing equipment.

South Bend, Ind.—Following the hearing of the Wesley Miller Flour & Feed Store's petition for voluntary bankruptcy, Thad M. Talcott was appointed a trustee to carry on the business.

Logansport, Ind.—Harry McDowell was re-elected president of the board of directors of the Logansport Elevator Co.; John H. Miller, vice-president, and Quincy Palmer, secretary-treasurer.

Flora, Ind.—Hugh McCorkle is now sole owner of the McCorkle Bros. & Riley Grain Elevator here. His partners were E. B. McCorkle and L. C. Riley, both of Thorntown, where they are engaged in the grain business.

Veedersburg, Ind.—The Farmers Elevator Co. held their annual meeting recently at which the following officers were elected: President, Walter Cook; secretary, Edward Greenley. The directors include William Van Deventer, Byron Myers, Edward Greenley, W. A. Marquess, Daniel Carpenter and Clifford A. Cade.

IOWA.

Stout, Ia.—The Stout elevator is enlarging this office.

Gravity, Ia.—L. G. Blakeslee, grain and live stock dealer here, died recently.

Rake, Ia.—Fire, caused from an exploded gasoline engine, destroyed the elevator here.

Farragut, Ia.—Ray Cox is succeeded as manager of the Farmers' Elevator Co. by Frank Alen.

Pomeroy, Ia.—A new elevator will be erected by the Cooperative Grain Co., work to start in the spring.

Stockton, Ia.—At the annual meeting of the Farmers' Elevator Co., the following officers were elected: Emil Paar-

Simonds-Shields-Lonsdale Grain Co.

QUALITY and SERVICE
Kansas City, Missouri

man, manager; Fritz Belter, secretary and Henry Springmeier, president.

Bedford, Ia.—The Farmers' Union Elevator Co. has installed a new J. L. "Humdinger" feed grinder and a 30-hp. electric motor to operate it.

Ft. Dodge, Ia.—The Iowa branch of Northrup, King & Co. will be reopened at their former location in the White Transfer & Storage Bldg. J. A. Shelton, manager.

Davenport, Ia.—The Kellogg Co. has completed repairs on the Purity Oat plant, which they purchased, and the plant is now open for shipments. The sale price was \$240,000.

Sioux City, Ia.—The Terminal Grain Corp. has voted to reduce its capital stock 50 per cent, for the reason that the concern is in a prosperous condition and there will be no need of additional funds.

Osage, Ia.—The Osage Coöper. Grain Supply Co. elevator was damaged to some extent by fire thought to have originated from elevating motor becoming overheated. The building was full of oats which were damaged somewhat by water.

Shellsburg, Ia.—The Shellsburg Grain & Lumber Co. declared a 4 per cent dividend at the annual meeting held recently. Over seventeen cars of grain were shipped during the year. Officers elected were: J. F. Robbins, president; Joe Alden, vice-president; Herbert Dickinson, secretary, and A. K. Rife, treasurer. Hober Sheeley was re-elected manager of the elevator.

KANSAS.

Vliets, Kans.—The refinancing of the Farmers' Union Elevator here is being contemplated.

Baldwin, Kans.—The Douglas County Farmers' Coöper. Ass'n are planning on installing a dump soon.

Bazine, Kans.—Geo. S. Stullken contemplates erecting a 10,000 bushel elevator for the coming harvest.

Marietta, Kans.—The contract for the new elevator to be built by the Marietta Stock & Grain Co. will be let soon.

Hutchinson, Kans.—The Farmer Coöperative Grain Dealers' Ass'n will hold its annual meeting here Feb. 25.

Seneca, Kans.—At the annual meeting of the stockholders of the Farmers' Elevator Co., Ed. Becker was elected president.

Centralia, Kans.—C. E. Drumm will erect a new modern elevator on the site of the one totally destroyed by fire last November. The approximate cost will be from \$8,000 to \$10,000.

Ashland, Ky.—W. E. Johnson is actively managing the Poage Mfg. Co., having acquired an interest therein.

Glasgow, Ky.—The Morrison Mfg. Co. have incorporated by C. and H. C. Morrison, et al., with a capital of \$20,000.

Richmond, Ky.—The Parks Milling Co. has been incorporated for \$25,000 by W. D. Parks, Millard Parks, and W. K. Price.

Stephensport, Ky.—The Stephensport Milling Co., owned and operated by J. B. Lawler, has been operating for several weeks. It was erected at a cost of \$14,000 with a capacity of 50 barrels a day. Both flour and corn meal are being turned out.

LOUISIANA.

Shreveport, La.—The Lawhon Co. have changed their name to Lawhon Strube Co., having taken into partnership, W. H. Strube, who, for many years past has been general manager of Foster & Glassell Co. here.

MICHIGAN.

Owosso, Mich.—Fire destroyed the elevator of the Isbell Wholesale Stores.

Oakley, Mich.—The following officers were elected at the recent meeting of the Farmers' Coöperative Elevator Co.: W. H. Dearman, president; Fred Canze, vice-president; Earl Parshall, secretary; A. W. Miller, treasurer.

Watervliet, Mich.—The directors of the Watervliet Milling Co. were re-elected: F. M. Sterner, Theron Forbes, Frank Danneffel, E. N. Matrau, C. D. Yates, F. W. Emerson, Wilkes Harris, Fred Scheid, Francis Case. The following officers were elected: F. M. Sterner, president; C. D. Yates, vice-president; F. W. Emerson, secretary and treasurer.

MINNESOTA.

Wheaton, Minn.—The M. E. Lindquist grain elevator has been purchased by J. A. Doderberg.

Sleepy Eye, Minn.—A large modern elevator replacing the one destroyed by

fire recently, is announced by Edward F. Berkner.

St. Cloud, Minn.—On Feb. 3, 4 and 5, a seed show will be held here and also the Central Minnesota Poultry Ass'n will hold its annual exhibit.

Clinton, Minn.—The Barney Folken feed mill has been taken over by Wm. Wieman, who will install a new mill and other improvements for the grinding of corn, buckwheat, rye, graham, etc.

Rushford, Minn.—No change was made in the personnel of the officers of the Farmers' Coöperative Elevator Co. for the coming year. George Hueblin is president and Gerhard Byholt, secretary and treasurer.

New Ulm, Minn.—The following officers were elected at the annual meeting of the New Ulm Roller Mill: E. H. Retzlaff, president; A. Schulke, vice-president; L. A. Fritsche, treasurer; and H. W. Bond, secretary; Richard Swartz, manager.

Worthington, Minn.—The final adjustment of fire loss sustained by the Humiston and St. John Elevator Co. has been made, whereby the Tri-State Grain Dealers' Mutual Fire Insurance Co. grants them \$25,010, the full amount of insurance carried.

MISSOURI.

Palmyra, Mo.—The Peoples Milling Co., president, J. W. Metcalf, has filed petition in bankruptcy.

Otterville, Mo.—P. E. Whelley will be succeeded as manager of the Farmers Elevator Co., by W. E. Coleman.

Chillicothe, Mo.—At the annual meeting of the Farmers Produce & Grain Exchange, D. C. Gwinn was elected president.

Sedalia, Mo.—Frederick Gustave Lange, aged 85, died at his home recently. He had been a grocery, feed and grain man here for 38 years.

Centertown, Mo.—Fire destroyed the Mahan Milling & Elevator Co. plant here, causing a loss of \$50,000, about half of which is covered by insurance.

Versailles, Mo.—Morgan County Elevator is now managed by W. K. Hunter.

Lockwood, Mo.—The following officers were elected at the sixth annual meeting of the Farmers Grain & Stock Co.: Theo. Kaelke, pres.; Gus Hedeman, vice pres.; and Ben H. Lammers, sec'y and treas.

Bigelow, Mo.—The Farmers Elevator Co. have installed a new motor, Kewanee Truck Dump and a Western Shelter, and have covered their elevator with galvanized iron. They expect to install a new combined corn and grain cleaner in the near future.

Bunceton, Mo.—At a meeting of the Bunceton Farmers Elevator Co., the new board was elected as follows: C. W. Fahrenbrink, H. L. Shirley, Frank Neirmeyer, Henry Hein, John Lohse, C. L. Edwards, J. A. Brandes, J. A. Laws, G. H. Steigleder and John Twillman.

LaGrange, Mo.—At the annual meeting of the LaGrange Elevator Co., Manager W. J. McPike's report showed the gross business done in 1924 was \$244,990.77, an increase of nearly \$12,000 over 1923, and a net gain of \$2,773. Geo. S. Brown was elected president, J. D. Loudermilk vice-pres.; and J. L. Tibesar sec'y.

Rushville, Mo.—At the annual meeting of the Rushville Elevator Ass'n, E. M. Peters, mgr. reported that the elevator has paid itself out of debt and has a surplus on hand. The board of directors consists of: C. M. Brumley, pres.; H. C. Page, Charles Winkler, vice pres.; G. C. McClain, sec'y; G. W. Woolston, treas.; and J. C. Keller Jr. and N. P. Turpin, directors.

Barnard, Mo.—At a meeting of the Farmers Elevator Co. the annual report showed a total of over \$212,000 business done during 1924, which is the largest of any year previous, an increase in sales of \$36,000. Members of the last year board were re-elected. J. L. Holaday was chosen president, and W. H. Goforth, secretary. A \$22,000 patronage dividend will be returned to each patron, whether purchaser or seller.

MONTANA.

Joliet, Mont.—The Occident Elevator Co. has purchased the elevator here from F. M. Webb.

Melstone, Mont.—The elevator here, managed by G. W. Emminger has closed until next season.

Glasgow, Mont.—Wm. Ruffcorn is erecting a grain elevator here with storage space for 3,000 bushels.

Glendive, Mont.—The Mill and elevator of the Glendive Milling Co. has been purchased by the Farmers Grain Co.

Musselshell, Mont.—The old Hendel Elevator Company's plant here has been purchased by W. P. Devereaux & Co.

Wagner, Mont.—A new 20,000 bushel elevator has been built here for the St. Anthony & Dakota Elevator Co. to take the place of the one destroyed by fire.

NEBRASKA.

Lexington, Nebr.—A new set of truck scales has been installed by the Lexington Mill & Elevator Co.

Waco, Nebr.—J. H. Hart, former manager of the Hanover Farmers Union Elevator, will take charge of an elevator here.

Venango, Nebr.—The Farmers Union Coöperative Grain Co. has been incorporated with capital stock of \$25,000 by John Busch, George Jord, et al.

Nebraska City, Nebr.—At the meeting of the stockholders of the Farmers Elevator Co., the following directors were elected: W. H. Pitzer, Henry Heesch and Martin Christensen. A 10 per cent dividend was declared.

Falls City, Nebr.—The Maust Bros. grain elevator was damaged when a switching engine crashed into a corner of the building releasing over 1,000 bushels of corn through the hole made. The damage is being repaired at the expense of the railroad, the cause being icy rails.

SEED RECEIPTS AT TOLEDO.

Following is a statement of seed receipts and shipments at Toledo in bags for week ending Jan. 31, and season to date and comparisons, also stocks, etc., as compiled by C. A. King & Co.:

	Receipts.			Shipments.		
	Clov.	Alsike.	Tim.	Clov.	Alsike.	Tim.
This wk.	241	252	95	1,408	83	139
Last wk.	9,611	5,164	15,483	6,924	1,283	4,528
Season 1924-25	16,248	8,700	8,586	17,080	2,685	6,461
Season 1923-24	36,002	6,017	15,152	12,535	2,801	7,770

Stocks in Toledo Jan. 31 show 11,838 bags red clover; 8,246 bags alsike and 16,703 bags timothy. Exports of timothy from New York last week were 680; imports of clover, 4,780 bags.

	Clover.		Alsike.	Timothy.
	Lbs.	Lbs.	Lbs.	Lbs.
This week	4,200	250	50	
Season 1924-25	4,200	3,450	9,764	
Season 1923-24	10,050	7,400	6,636	

MILWAUKEE SEEDS

Movement of timothy seed and clover seed at Milwaukee as reported by THE PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce, for week ending Jan. 31, 1925:

	Receipts		Shipments	
	Tim.	Clover.	Tim.	Clover.
	Lbs.	Lbs.	Lbs.	Lbs.
1925	60,000	174,980	44,500	38,150
1924	30,720	57,557	372,765	170,872

Field and Grass Seeds

season to date 6,924 bags against 17,080 bags a year ago.

Alsike and timothy were both firm to higher with trade more active. Investment buying on the declines is noted and should help to keep the market from turning weak. Both these seeds are considered well liquidated and should respond to spring cash demand. Receipts and shipments were both light.

KANSAS CITY SEED MARKET.

KANSAS CITY, Jan. 31.—There are few new developments in the seed situation to report, except that cane seed is moving with a little more freedom. Dealers say the threshing thus far is less than half the Southwestern crop. Inquiry for seed is good and widely scattered. Local dealers are reluctant to quote reselling prices, but are bidding the country as follows, per cwt.: Red top and orange, \$1.70@1.80; black amber, \$1.50@1.75. Scarcity features the millet seed market. Offerings are practically nothing, though bids are high. Demand for spring sowing is active. German is quoted, as from first hands, at \$3.50@4.25; common, \$2.50@3.00; Siberian, \$2.30@2.75; hog, \$2@2.25. There is a fair distribution of Sudan grass seed at \$5@6. Country shipments are light, but it is believed that a fair surplus remains to come forward.

Carlot trade in alfalfa seed is of fair volume. About all of the 1924 crop has left growers' hands in the various Western states. Kansas City houses are selling seed at \$15@22 per cwt.

The small supply of red clover seed in Kansas City is likely to disappear quickly as soon as weather conditions permit sowing, though high prices may induce some farmers to substitute alfalfa. Dealers are asking \$20@34 per cwt. for seed. Sweet clover seed is selling at \$9@13, with a fair demand. There is plenty of timothy seed which is selling at \$6@7. Prices of bluegrass seed remain at \$17@28. No shortage is feared and buyers are in no hurry about providing for spring requirements.

Trade in soy beans is quiet as to receipts and shipments. Much of the Missouri surplus remains to be marketed. Producers are bullish. Houses in Kansas City are bidding \$2.75 a bushel for the brown variety, \$2.50 for Black Wilson and \$1.50@1.75 for other kinds. Cowpeas will have to come from Georgia, where they are being held high.

DULUTH FLAXSEED MARKET

DULUTH, MINN., Jan. 31.—Flaxseed bulls continued to hold the cards during the last week. Steady advances were recorded and new high spots on the crop were set. Offerings were light and prices were bid up easily by the longs from day to day. The net results of the six days' operations were advances of from 8½ to 11½ cents in spot and January and of from 12¼ to 14 cents in the May and July futures.

Receipts for the week aggregated 21,185 bushels, and with shipments of 24,286 bushels, stocks in the elevators were brought down to 949,000 bushels.

A feature commented upon by specialists in the flaxseed market was that crushers appeared to have become apathetic and that it seemed to have to a great extent gotten into the hands of the speculative element. With approximately 925,000 bushels of flaxseed in the elevators here and around 4,450,000 bushels of seed in elevators at Port Arthur and Fort William and in interior houses over the Canadian Northwest, the supplies situation was decidedly easy. On top of that is to be taken into account that more than 1,500,000 bushels of Argentine seed are en route to Atlantic ports, and will arrive in this country in time for May

deliveries. It is therefore being assumed that Eastern linseed oil interests will be in position to cover their needs largely with imported seed.

In the face of that supplies argument however, traders expressed confidence regarding the future of the flaxseed market. They pointed out that on the basis of the spreads between the markets at the end of the week Duluth held a price advantage over either Argentina or Winnipeg for deliveries at Buffalo or other New York state points. Dealers expressed confidence that the demand for linseed oil would continue on a broad scale during the season and that it would prove sufficient to absorb seed supplies.

Closing prices of flaxseed on the Duluth market on Saturday as compared with the previous Saturday and the same period last year follow:

	Saturday	Week ago.	Year ago.
On track	\$3.22-26	\$3.10½-17½	\$2.52½-58½
To arrive	3.22-23	3.10½-11½	2.52½
January	3.22	3.10½
February	3.22
March	3.22½
May	3.25½	3.11½	2.53½
July	3.23½	3.11½	2.52½

AMENDS CANADIAN SEED ACT

An amendment to the Dominion Seed Act gives American exporters of seeds to Canada the right of delivery without examination or bond when the shipment is accompanied by a certificate from any of the following laboratories:

California—State Department of Agriculture, Sacramento.
Colorado—Agricultural Experiment Station, Fort Collins.
Delaware—Dover State Board of Agriculture, Dover.
Idaho—State Department of Agriculture, Boise.
Indiana—Agricultural Experiment Station, Lafayette.
Kentucky—Agricultural Experiment Station, Lexington.
Maryland—Agricultural Experiment Station, College Park.
Minnesota—University Farm Experiment Station, St. Paul.
Missouri—Agricultural Experiment Station, Columbia.
New York—Agricultural Experiment Station, Geneva.
New Jersey—Agricultural Experiment Station, New Brunswick.
North Carolina—Department of Agriculture, Raleigh.
North Dakota—Agricultural Experiment Station, Agricultural College.
Ohio—Department of Agriculture, Columbus.
Oregon—Agricultural Experiment Station, Corvallis.
Pennsylvania—Department of Agriculture, Harrisburg.
Texas—State Board of Agriculture, Austin.
Virginia—Department of Agriculture, Richmond.
Washington, D. C.—Department of Agriculture.

TARIFF ON CLOVER SEED.

VALLEY CITY, N. D.—The Greater North Dakota Association is sponsoring a state-wide movement to obtain a 5 per cent increase in the tariff on clover seed, according to Secretary Lynn Cowell.

Imports of clover seed from Canada have been sufficiently heavy to effect lowering of the price of this commodity to producers approximately 40 per cent. The Greater North Dakota Association has placed this matter before the tariff commission at Washington, D. C., and requested their prompt action toward increasing the existing tariff 50 per cent.

The increase in the import tariff, if granted, will result in approximately \$400,000 to \$500,000 additional profit to North Dakota clover seed producers and it has been indicated to the officers of the association that concerted action by public bodies in the state will aid greatly in obtaining the requested increase.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

their department has been very successful during the past year and has eliminated a large percentage of calls for reinspection. Mr. Hawn also states "Our records to date prove that the tests at these stations have been more accurate than ever before, since the installation of electric testers in these branch offices. You may also be interested in knowing that the Illinois Grain Inspection hopes to install the Automatic Electric Shut-offs in their offices, which contain twenty-four six-compartment testers."

The cost of this Electric Automatic Shut-off is not large and the saving in thermometers and time would, in a very short time, pay for its cost.

Another feature that should make it a valuable addition to a country elevator's laboratory equipment is that it gives the dealer opportunity to explain to his farmer patrons for whom he is making a test that the machine is absolutely automatic, thereby cutting off the heat at exactly the right temperature, so that every test is bound to be uniform and correct. It eliminates the human element of error and should convince those interested that while the human is not infallible that the machine produces accurate results.

COAST GRAIN PRICES.

Quotations of grain reported by grain exchanges of the Pacific Coast as of Jan. 28, are as follows:

NEW ELEVATORS AT BUFFALO.

The importance of the location of Buffalo, from a grain handling standpoint, is again illustrated by the fact that plans for 2 new elevators at that point are now under consideration.

Plans as recently announced here for the \$1,000,000 elevator of the Saskatchewan Coöperative Co., Ltd., of Regina, have been filed and a contract has already been let for the substructure.

The Abell Forwarding Co. is considering plans for a 1,200,000 bushel elevator to cost approximately \$2,000,000.

NEW DIRECTORY ISSUED.

The Illinois Grain Dealers' Association has just issued its 1925 directory, the thirty-second, since the association was organized. This directory is full of valuable information and copies may be procured from W. E. Culbertson, the secretary, at Champaign, the price being five dollars.

"SOME STATIC."

Well, Old Top: We didn't see the eclipse of the sun in Kansas City last week on account of the clouds, but I saw a statement put out in the press by the Editor of the Wheat Poolers that was almost a total eclipse of facts by big figures. The article is headed: "\$2.00 Wheat Boost to Market Plan. 17,000 Farmers in Oklahoma and Texas Chuckling." They were paid \$8,500,000 for 8,500,000 bus., and will get \$2,000,000 more in February. This looked at through smoked glasses means their very intelligent selling force sold 8,500,000 bus. of the finest hard wheat in the world for \$1.23½ per bu., when the farmer who stayed out of the pool can market his wheat now and get \$1.90 to \$1.95 a bu. for it. Suffering fivers! If that editor thinks he hears a chuckle from the farmer who joined the pool he had better get another set of listeners; that's static he hears. His statement also says the Wheat Pool plan will crowd the bears in the wheat pit into oblivion. If there were such a thing as an organization of bears, the Wheat Poolers' selling force should be elected exalted rulers on account of their past performance, selling wheat so cheap against the advice of all the

leading grain firms in the world. Oblivion is a good place for a bear, Old Top, but the average farmer does not think the climate is near hot enough for a Pooler organizer.—*Tod Sloan, B. C. Christopher & Co., Kansas City, Mo.*

CORN IN PRIMARY MARKETS.

Receipts of corn last week at 14 primary markets, compared with the corresponding week last year and also for the period beginning Nov. 1 to Jan. 31 (final 000 omitted):

THE ELECTRIC AUTOMATIC MOISTURE TESTER SHUT-OFF.

This device was patented in 1921 and has been in use since that time, which thoroughly demonstrates its efficiency and practicability. It is a great time saver as the operator can start the test and go about his other duties knowing when the proper degree of temperature has been reached that the current will be cut off and unit lowered.

As illustrated, it consists of a frame to which is attached the heating element, switches and magnetic controls. It is quickly attached to any moisture tester. It is completely wired and labeled, ready for installation. It is

entirely mechanical in operation, thus eliminating over or under heating and also causing a great saving in thermometers.

This device will pay for itself in a short time, as it is only necessary to start the test and the shut-off device will stop the test at the correct temperature, thus making testing efficient, easy and accurate.

Contact thermometers are furnished with shut-off for temperatures at 175°, 80° and 190°. It usually happens that in case an elevator is located in the corn belt, the contact thermometer with shut-off at 190° is sufficient for corn. However, if there is any great amount of testing to do, as for illustration on wheat, on which the temperature is 80°, contact thermometers for this temperature should be used. Of course, by disconnecting the shut-off feature, any other temperature can be used for the grain and the operation would be the same as with a regular thermometer. With alternating current, a transformer can be supplied instead of dry batteries to operate the heat shut-off.

Since this device was patented and placed on sale by the Seed Trade Reporting Bureau of Chicago, hundreds of elevators throughout the country have equipped their moisture testers with it. The Chicago Grain Inspection Department alone is using it on twenty-seven of their large sized machines.

Arthur E. Hawn, Assistant Chief Grain Inspector for the State of Illinois, states that the operation of these devices at the four outlying stations of

Feedstuffs

Among recent Chicago visitors were
E. C. Dreyer of St. Louis and W. H.
Young of San Francisco, both of whom
attended the mid-winter meeting of the
American Feed Manufacturers, as re-
ported in another column.

Dr. Carl S. Miner, prominent in
feed trade circles and among Chicago
research chemists, has been honored
through a lieutenant colonelcy in the
chemical warfare division of the Officers'
Reserve Corps.

FEED BUSINESS SLOW

BELLEFONTAINE.—Feed has been slow
during the past ten days. Judging from
purely local conditions, feeders do not
deem it profitable to retain their stock
and are rapidly disposing of hogs and
cattle.—*Colton Bros. Co.*

FEED SITUATION SATISFAC- TORY.

RICHLAND, IND.—The feed situation
at this point is very satisfactory. All
millfeeds are consumed locally and
prior to this year all corn has been
used the same way. The curtailment in
hog production, which is fully 50 per
cent, will leave a nice surplus in corn
which will be compelled to find outside
markets.

There is a surplus of hay and it is
not moving, producers not being satis-
fied with the prices offered.—*W. Q.
Collins.*

OIL MEAL MARKET

The oil meal market is virtually un-
changed. The mills are indifferent
about making sales and advise that
they are moving a few cars from day
to day and with sales they have already
made are giving them sufficient ship-
ping directions to keep them going for
sometime. In fact, most of the Chicago
mills have enough meal sold to carry
them through the entire month of Feb-
ruary without any additional sales.

The Minneapolis market is in an
even tighter position, mills being late
on shipments up there, and as buyers
are more interested in getting the meal
shipped which they have bought, than
in buying, sales are reported rather
light.

On the other hand, the Buffalo mar-
ket continues easy and prices in that
locality are lower than they have been
but heavier export buying is expected,
which may advance Eastern markets.—
The Bertley Bulletin, Chicago, Jan. 31.

COTTONSEED MEAL.

KANSAS CITY, Jan. 31.—Easier mill
prices and only a normal demand for
the period resulted in a reduction of
\$1 a ton in the Kansas City market for
cottonseed meal this week. Dealers
quoted carlots at \$44.60 and ton lots
at \$4 more. Texas mills offered meal
and cake at \$37.50 for carlots, or 50c
to \$1 less than a week ago; Oklahoma,
\$39.50@40, or 50c to \$1 off; Arkansas,
\$37.50, or unchanged to \$1 lower. It
was reported that Oklahoma mills were
still behind on their shipments, some
of which should have been made in
December. Arkansas offered freely and
there were fair offerings from Texas.

Sales of linseed meal in the South-
west were almost negligible, but the

market was no duller than it has been
for months. Feeders regard prices as
too high, as compared with other pro-
tein feeds. Minneapolis mills offered
lightly, reporting their output sold for
January. They asked \$47 a ton for
carlots, as against \$47.50 a week ago.
Kansas City handlers quoted carlots at
\$51.30, showing little change. Ton
lots here were sold at \$55.30.

Trade in tankage was only fair at
the new level of \$65 a ton for carlots
and \$70 for ton lots. Manufacturers
said the buyers had not had time to
become reconciled to recent advance of
\$5. Much of the product went out on
old orders. Meat scrap was in good
request at \$70 and \$75 a ton.

MINNEAPOLIS LINSEED MARKET.

MINNEAPOLIS, Jan. 31.—During the
past week there have been wild ad-
vances in wheat and flaxseed in all the
exchanges of North and South America,
and prices have reached the highest
point attained in several years. The
price of May seed in Minneapolis today
is \$3.29, an advance of 16½¢ per bushel
this week. May seed in Duluth today
is \$3.26½; a week ago today \$3.10, or
an advance of 16½¢ per bushel. On
January 30, 1924, May seed sold in Min-
neapolis at \$2.50¾ and in Duluth at
\$2.48¾, so our price in Minneapolis to-
day is 78¼¢ higher than a year ago,
and 77¼¢ higher in Duluth. This in the
face of a small crop in 1923 and a
large one in 1924, showing the influence
of higher prices in other grains.

In Argentine the advance has been
sensational, and seed is up 17¼¢ per
bushel for the week. South American
seed is selling at more than a dollar per
bushel higher than last year on this
date. Shipments from the Argentine
for January are less than half what
they were a year ago, and Europe has
taken less than one-sixth as much in
January this year as in 1924.

	1924. Bus.
To Europe	5,598,000
To United States	1,172,000
Total	6,770,000

In 1924 Europe shipped 44,176,000
bushels of seed from the Argentine,
while in 1923 they only shipped 22,728,
000 bushels.

The receipts of seed in the United
States are light, and the stocks in pub-
lic store are decreasing slowly. There-
fore, it is easy for seed to go up, and
as grain all over the world is booming
flaxseed is only keeping step with the
procession. One of our large customers
said to us, "The crushers ought to be
able to control the price of flaxseed and
not have these wild fluctuations." We
told him that flaxseed was traded in on
Board of Trade in all primary markets
of the world, and we could no more
control the flaxseed price fluctuations
than he could control prices on the
Stock Exchange.—*Archer-Daniels-Mid-
land Co.*

WEEKLY LINSEED REVIEW.

Feb. 2.—United Kingdom: The lin-
seed situation in the United Kingdom
rules firm in sympathy with the Argen-
tine strength. Crushers bought both
Plata and Russian seed in nearby pos-
itions, and speculators purchased for-
ward positions.

Linseed oil has been firmer with a
better trade and a much improved de-
mand. Cotton oil offers are above the
market. America bought fair quanti-
ties of oil during the week. It is feared
a shortage will develop later owing to
the small linseed shipments to Europe.
Cotton oil rules steady with more
inquiry in evidence.

India: Shipments of linseed this
week amount to 300,000 bushels com-
pared with 332,000 bushels the week

previous. The new crop outlook is generally satisfactory.

Argentine: Markets for linseed in this country have been generally firm with country offers rather light. The recent rains retarded deliveries of seed. Clearances have been small although these are expected to enlarge within the near future. Port stocks decreased somewhat. The foreign demand for seed has been fairly active.

NEW YORK OATS MARKET.

Oats receipts 44,000 bushels bonded, 102,000 bushels domestic. Values declined sharply early in the week but from the low point reached there was a quick recovery of 5c per bushel, with prices closing fractionally below the op. Cash prices, however, did not follow as closely as there was a weakening of premiums due to the pressure of liberal receipts at cumulative points. There has been a moderate falling off from the peak of the movement, but with a visible of practically 75 million bushels of oats, supplies will be plentiful throughout the balance of the season, with the prospect of a large carry-over into the new crop. Much will depend, however, on the amount of oats substituted for other grain in the matter of feeding, but the movement to late, during the winter, does not suggest that it has been equal to expectations. In the local market dullness prevailed, spot transactions being of a limited character, with practically no demand for the better qualities. The advance from the low point had little influence upon dealers whose stocks are considered ample for present necessities.—L. W. Forbell & Co.

THE FEED MARKETS.

MILWAUKEE.

Milwaukee, Jan. 31.—A general weakness prevailed in the local feed market during the past week and quotations for all items closed considerably lower for the period. Despite the weak condition and predictions of still further reductions next week little if any selling pressure was exerted. Consumers' demand was still a minus factor in the market and traveling representatives of local feed dealers say that farmers are still feeding forage, which continues unusually plentiful. Current quotations are: Winter bran, \$30.70@31.20; spring bran, \$30.21; standard middlings, \$33@33.50; flour middlings, \$37.50@38.50; red dog, \$41@42; rye feed, \$31.50@32; linseed oil meal, \$47.50@48; cottonseed meal, \$39.50@44; hominy feed, \$46@47.50; reground oat feed, \$12.50@13; gluten feed, 30 days, \$33.80; all in 100 b. sacks, carlots, f. o. b. Milwaukee.

NEW YORK.

New York, Jan. 31.—Reductions of 50c to 1 per ton were claimed in both Western and city feeds, principally due to the lack of a special consuming demand. City bran was quoted at \$36.50, middlings \$40.50 and red dog \$48.50, while Western bran ruled at \$36.25, standard middlings \$40.75 and red dog \$47.50@48.50 per ton.

BALTIMORE.

Baltimore, Jan. 31.—There is a somewhat easier feeling in Western spring wheat bran, but middlings are relatively firm. Huten feed is quiet and easier, while hominy feed holds its own under limited offerings in near positions. Alfalfa meal unchanged. Dried beet pulp selling fairly well in a jobbing way. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$36.50@37.00; Western middlings, per ton, 100-lb. sacks, \$40@40.50; city mills middlings, per ton, 100-lb. sacks, \$41.50@42; luten feed, per ton, \$44.50@45; hominy feed, per ton, \$53@54; alfalfa meal, per ton, \$32@33; dried beet pulp, per ton, \$33@40.

PHILADELPHIA.

Philadelphia, Jan. 30.—Offerings of feedstuffs are moderate, but demand is light and prices are weak, particularly bran and middlings. Quotations are for carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$37@40; winter middlings, \$43; spring bran, western, \$37.50@38; standard wheat middlings, \$40@41; flour middlings, \$44@46; red dog, \$48@49; low grade flour, \$59@60; rye middlings, \$40; reground oats feed, \$16@17; fine yellow hominy, \$53.50@54; fine wheat hominy, \$54@55; cottonseed meal, 6% protein, \$42.50@43; cottonseed meal, 1% protein, \$45.50.

CINCINNATI.

Cincinnati, Jan. 31.—The feed situation continued very unsatisfactory the past

week and excepting an occasional car for current needs there was practically nothing doing. The trade especially complained of the poor demand from dairy interests, who were said to be reducing their stock and feeding forage as much as possible because of the slow sale of milk. Prices as compared with a week ago were \$1.50 per ton lower for bran and standards, and \$1 for soft and hard middlings. Quotations represent 100-lb. sacks: Soft winter wheat bran, \$33.50@34; hard winter wheat bran, \$33@33.50; standard middlings, \$37@37.50; soft wheat middlings, \$39@39.50; gray hard middlings, \$39@39.50; mixed feed, \$36.50@37; No. 1 alfalfa meal, \$31; hominy feed, \$48@48.50.

DULUTH.

Duluth, Jan. 31.—Jobbers had a good trade in feeds during the last week. Dealers coming into the market for supplies. Consumptive demand for feeds was heavier over the territory. Millfeeds were easier, with declines ranging from 50c@\$.25, shorts and Boston mixed showing the heaviest breaks. Ground feeds are unchanged. Closing prices per ton follow: Bran, \$30.50; shorts, \$34.50; red dog, \$42.50; Boston mixed, \$34.50; flour middlings, \$37.50; ground oats, \$37; No. 1 ground feed, \$44.50; No. 2 ground feed, \$42.75; No. 3 ground feed, \$40.75; cracked corn, \$48.50; coarse corn meal, \$48.50.

MEMPHIS.

Memphis, Jan. 31.—Demand for feed is slack, as it is for grain and hay, and the easiness in prices is a direct result. Cottonseed meal, although very cheap compared with cost of grain, does not display any snap and is cheaper almost every day. Quotations today, which are more or less nominal, are \$34 for 36 per cent, \$36.50 for 41 and \$38.50 for 43, although firm offers could perhaps shade those figures 50c to \$1. Millfeed, especially wheat bran, fails to move as expected. Gray shorts are not so plentiful and are quoted at \$38, but bran is quotable at \$32, but sold at less during the week on track. Alfalfa meal receipts for the week were 36 cars and quotations are nominal at \$29@30, but demand limited.

ST. LOUIS.

St. Louis, Feb. 2.—Millstuffs: Wheat feed dull and nominal, with bran quoted at \$30@31 and gray shorts at \$36@36.50; nothing reported sold except split car (direct sale by mill) bran at \$32 and gray shorts at \$37. To arrive from the West hard bran quoted at \$30@30.50 and hard gray shorts at \$36.25. Oat feed quoted at \$14.50@15 and white hominy feed (sacked) at \$47@48 nominal.

POULTRY DISEASES OVER-STATED.

Newspapers have given considerable space to sensational articles regarding a serious poultry pest present in the United States. As a result the public has received a false impression regarding the situation.

It is true that European fowl pest, a very destructive disease to poultry, has been found in a few scattered communities in the states of New York, Connecticut, Pennsylvania and New Jersey. However, these communities have been quarantined and the disease is well under control.

During the past year considerable loss of poultry was suffered by poultry packers and live poultry shippers. These losses were encountered because of a very wet season which retarded the development of poultry and thereby greatly reduced their vitality. In such a condition they were susceptible to disease and contracted the common poultry diseases such as roup, diphtheria, cholera, etc.

There is no reason for alarm regarding these diseases. We have always had them and they were merely more prevalent this last year due to unfavorable weather. If we are favored during this year with more sunshine and less rain, these diseases will not give us serious difficulty.

NEW LAWN GROWER.

Darling & Co., Department K, U. S. Yards, Chicago, have just put on the market, after much experimenting and frequent consultation with crop and horticultural experts, a new fertilizer product which is a particularly good plant food for lawns and gardens. It is called "Darling's Special Lawn Grower."

FEEDSTUFF SITUATION

All feeds are weak from a purchasing standpoint but potentially steady as to price. Sellers in excess of buyers on most commodities.

MINNEAPOLIS.—Bran, \$28.50; standard middlings, \$30.50; flour middlings, \$35.25; red dog, \$40.

CHICAGO.—Bran, \$31.10; standard middlings, \$33.10; flour middlings, \$37.85; red dog, \$42.60.

KANSAS CITY.—Bran, \$28; brown shorts, \$33; gray shorts, \$33.75.

St. Louis.—Bran, \$30.40; brown shorts, \$35.40; gray shorts, \$36.15.

ALFALFA MEAL.

Sellers are holding their price firm. There is a slight demand in small quantities over widely scattered territories. Prices unchanged. Nominally quoted second hand bag basis, choice, \$30.50; No. 1, \$28.50; No. 2, \$26.25, delivered Chicago. Fine ground grades \$3 to \$4 a ton more.

REGROUND OAT FEED.—Prices unchanged. Slightly more sellers' interest. Some demand at present prices. Jobbers and resellers have about disposed of their holdings purchased some time ago when markets were lower. They have now taken their profit on recent advances. Nominally quoted reground, \$13 to \$13.50; unground \$14 to \$14.50 for quick February; 50c additional asked for each succeeding month through the Spring season.

HOMINY FEED.—More sellers' interest than buyers. Prices lower. Nominally quoted second hand bag basis, white, \$47; yellow, \$46. In bulk where avail-

able \$1 to \$2 a ton less depending upon sellers' idea.

LINSEED OIL MEAL.—It has a tendency to weakness rather than strength at this writing. More sellers' interest than buyers. Nominally quoted Chicago basis, \$47; Minneapolis basis, \$47 including sacks. Some mills are asking slightly higher prices governed largely by the amount of business they have on their books for shipment. In bulk where available \$2 to \$2.50 per ton less.

DRIED BUTTERMILK.—With advancing prices of all grains and an increasing demand from chicken feeders the prices are steady. Quotations are as follows: Creamery in carlots, 6½ cents and L.C.L. up to 8 cents per pound.

COTTONSEED MEAL.—Inquiries are increasing and demand picking up, but without change in price which for 43 per cent protein remains at \$44.50 Chicago basis.

PACKERS' PRODUCTS.—January was an unusually good month and demand continues strong. Prices are as follows: Meat scraps in carlots f. o. b. Chicago, \$65@70 per ton; 60 per cent protein digester tannage, \$60@65; raw bone meal, \$55.

GLUTEN FEED.—The demand, particularly in the East, is poor and prices are \$2.00 a ton lower. Today's quotations are: Gluten feed in bulk \$34 a ton; sacked \$36.80. Gluten meal of 40 per cent protein \$44 in bulk and \$46.80 in sacks.

BUTTERMILK.—The demand is good, especially for the smaller lots, and the supply is ample to take care of the demand. Prices quoted are as follows: Creamery in carlots 6½ and 1cl., up to 7½ cents a pound.

MEMPHIS A MIXED FEED CENTER.

Diversified farming in the South has brought with it a large demand for mixed feeds to supplement dairy, poultry, and horse rations. In this movement, the city of Memphis with its large sweet feed manufacturing plants and the Memphis Grain and Hay Exchange has taken a very important part. It is said that Memphis feed plants do an annual business of \$20,000,000. Some of these plants are owned locally while several are operated by companies with large plants in other sections of the country. In addition to the plants actually manufacturing feeds, there are a number of distributing companies which carry stocks in warehouses ready to ship at a moment's notice. One of the principal ingredients is blackstrap molasses, the source of which is Louisiana. This is shipped to Memphis in tank cars and by barges on the Mississippi River.

GROW QUALITY SEED.

Through special efforts farmers of Clark County, S. D., have been making their seed crops pay higher prices than that given any other part of the state. The farmers cooperating with the county agent are reaping returns from production of quality seed. During the past year, 14 fields of Grimm alfalfa were inspected and certified and 15,000 pounds of seed were exchanged through his office. Some of this was used locally while a considerable amount was sold in other states. The certified seed brought about 17 cents a pound more than other alfalfa seed.

Samuel R. Chambers, president of the Chambers Seed Co., Louisville, Ky., died recently at the age of 74. Mr. Chambers was a pioneer in the seed business in Louisville, beginning in 1872. He had been sick for some time prior to his death.

Alfalfa Department

ALFALFA MEAL MARKET.

KANSAS CITY, Jan. 31.—As far as the larger local mills are concerned, the alfalfa meal situation is satisfactory. Bookings up to capacity for February are reported. The feeling is so confident that no further price concessions were made this week, despite recent recessions in the hay market. Colorado mills seemed to be in a strong position also. The quotations made here on carlots, per ton, were: Choice, \$27@28; No. 1, \$25@26; No. 2, \$22.50@23; No. 3, \$22@22.50.

Molasses-grain feeds moved well, especially to poultry, horse and dairy interests. As spring comes nearer, the horse feeding demand in the South is expected to increase. Few changes in prices were reported, and they were mainly downward. Carlot quotations, per ton, were: Dairy feeds, \$39@48.50; cattle feeds, \$37@46; hog feeds, \$45@53.50; pig meal, \$73; horse and mule feeds, \$33.50@48; alfalfa-molasses feeds, \$26.50@34; scratch poultry feeds, \$52.50@59; mash poultry feeds, \$54@81.

ALFALFA QUARANTINE SITUATION.

As far as its sale in Oregon is concerned, the entire alfalfa crop of Idaho is quarantined. Malheur and part of Baker counties, Oregon, is also quarantined for shipment into other sections of Oregon, and both of these districts are quarantined insofar as Washington and California are concerned, according to the Oregon experiment station, Corvallis, Ore. The disastrous effects of a quarantine on the hay growers of the affected territory is fully realized by the state authorities, and the condition will probably exist until an adjustment in their agriculture has been made. Many of those who formerly grew alfalfa to sell are feeding it, and are probably doing a little better that way than they otherwise would by baling and shipping. A good many of them also have entered into the production of other crops, so that they have become pretty well adjusted to the new condition.

Numerous methods of combating the alfalfa weevil are being tried out, and a spray method is being worked out very satisfactorily so far as production is concerned, but since complete eradication is conceded to be impossible, no lifting of the quarantine will be made until the remaining uninfected districts of the Northwest and California are infested with the weevil.

MEASURING ALFALFA HAY.

The Missouri State Board of Agriculture presents "Rules for Measuring Hay in the Mow or Stack," dealing more especially with alfalfa hay, as follows, by courtesy of Professor L. E. Call of Kansas:

If alfalfa hay has been stacked or tared in the mow about thirty days, 12 cubic feet are usually regarded as a ton. If the hay has stood five or six months, 422 cubic feet, and if it is fully settled 343 cubic feet, will approximate a ton. In very large stacks or deep rows, fully settled, 216 cubic feet are taken for a ton. Hence, to find the number of tons:

In a mow—Multiply together the number of feet in length, width, and depth, and divide the result by the number of cubic feet in a ton.

In a round stack—Find the circumference of the stack at a height that will give a fair average distance around the stack; also find the vertical height of the measured circumference from the ground, and the slant height from the measured circumference to the top of the stack. Take all measurements in feet. Square the number of feet in the circumference; divide this by 100 and multiply it by 8; then multiply the re-

sult by the number denoting the height of the base plus one-third the number denoting the slant height. The result is the number of cubic feet, which, if divided by the number of cubic feet in a ton, will give the number of tons.

In a rick—Measure the distance in feet over the rick from the ground on one side to the ground on the other, also measure the width in feet near the ground. Add the two numbers and divide the result by 4; square this result and multiply it by the number denoting the length of the rick. Divide the final result by the number of cubic feet in a ton, which will give the number of tons in the rick.

BUSINESS NEWS

RESUMES HOUSE ORGAN.

"Webster Method," the house magazine of the Webster Mfg. Co., of Chicago, the publication of which has been suspended for a number of months, has been resumed and mechanical handling problems will be especially featured.

"HOW TO"

The Ralston Purina Co. gets out "how-to" publications for its feed dealers.

The idea back of these dealer-help publications was explained by E. T. Hall, secretary of the company, in a talk before the recent annual meeting of the Association of National Advertisers when he said:

"Nothing is ever said in these publications by the Ralston company itself. If we find a dealer doing some worthwhile job we get him to write it up. If we find some good idea that a dealer could use we get a dealer to try it out and if it works we get him to write it up."

ANNUAL REPORT OF MILLERS' NATIONAL INSURANCE CO.

The 49th annual report to the policyholders of the Millers' National Insurance Co., Chicago, as of Dec. 31, 1924, shows the results of the operation of the company for the past year. Report shows that the company suffered many heavy losses during 1924, as had also been experienced during 1923, and the company comes to the conclusion that nothing can take the place of the care and attention given by a policyholder who has the property in charge, and the elimination of physical hazards in the reduction of fire losses. The business as a whole shows a substantial gain in surplus for the year, over one-third of which was due to the increase in market value of the securities held by the company. The balance sheets showed assets of \$4,213,250.68, with a surplus over all liabilities of \$3,251,555.46. The company paid out for losses during 1924 \$1,062,622.27, with insurance in force as of Dec. 31, 1924, of \$345,776,296. There were 5,190 losses incurred during the year with only 68 totaling over \$2,000.

STORING GLUTEN OR MOLASSES FEED.

The Mutual Fire Prevention Bureau has just issued a notice to all policyholders, calling attention to the fire hazard caused by the improper storage of gluten or molasses feed, due to spontaneous combustion.

This notice says in part: "Properly conditioned and dry feed is not dangerous and every responsible manufacturer takes pride in the low moisture content, but the feed may have been dampened in transit in a leaky car. There is a positive fire hazard from the storage of gluten or molasses feed, regardless of the grade purchased, but

the hazard may be reduced to the minimum by proper handling.

"The safest method of storage is in bags, properly stacked. The first tier should be piled on 2x4's and two more 2x4's should be placed on the fourth bag up and on the eighth bag. Bags may be piled parallel or crossways but they should be so piled that a part of each bag is exposed and the tiers should not be closer together than two feet, permitting inspection of each sack.

"If storage in bins cannot be avoided, a metal pipe should be placed in the center of the bin, extending from the bottom of the bin to a point where filling the bin will not cover the top of pipe. Thermometer readings should be taken daily for the first two weeks when the readings may be extended to every other day and finally weekly if no tendency to heat develops. An iron rod left in the bin and pulled out each day for examination will answer the same purpose as the pipe and thermometer but not quite so accurately.

"Any material increase in the temperature of the feed is reason for careful daily readings and should the temperature continue to increase, the feed must be turned. Usually re-elevating will accomplish the purpose if taken in time. When feed is really hot it should be removed to a safe place out doors."

OATS IN PRIMARY MARKETS.

Receipts of oats last week at 14 primary markets, compared with the corresponding week last year and also for the period beginning Aug. 1 to Jan. 31 (final 000 omitted):

Hay Department

50% OF HAY IN FARMERS' HANDS.

ADRIAN, MICH.—It is our opinion that there is about 50 per cent of last crop still in the farmers' hands, the majority of this is ordinary old meadow and over-ripe hay and in our opinion should not be put onto the market at any price. It is this class of hay that goes to make the surplus. It is our opinion there is not an oversupply of good No. 2 or better quality, and we believe we will have a fairly steady market for these better grades, but due to the congestion in the terminal markets of the ordinary varieties we do not look for any higher prices.—*The Cutler-Dickerson Company.*

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

John R. English of the Southern Hay Co. has bought a treasury membership in the Kansas City Hay Dealers' Association.

William Dwyer of North & Co. says there is no harder task than to convert a user of one kind of hay into a consumer of another, even if the change offers a well-known advantage. He regards timothy buyers in the South the most "set" in their ways and immune to arguments in behalf of alfalfa as to feeding value and prairie as to cheapness.

As figured by C. D. Carlisle of the Carlisle Commission Co., alfalfa hay

has not declined sufficiently to render shipping unprofitable in Nebraska and other Western states. "Where the farmers had four cuttings," he said Wednesday, "there should be a net return of \$40 an acre on the present price basis. How many other crops could make such a showing?"

The conference of federal experts on the formation of alfalfa hay grades was continued into the early part of this week. Among the local dealers who submitted valuable suggestions was C. D. Carlisle of the Carlisle Commission Co., whose name was unintentionally omitted from the list of local advisors in THE PRICE CURRENT's report last week.

W. L. and H. C. Gordon of the W. L. Boynton Hay Co. have secured entire ownership of the company through purchase of the interest of W. L. Gordon, Jr., of Rushville, Mo. The company reports the best year's business in its history.

J. O. Griggs of Cash, Griggs & Kinell, Inc., has sold his interest in the company to E. H. Cash, president, and C. B. Kinell, secretary and treasurer. Mr. Griggs was vice-president. He is interested in the coal business.

Thomas Ennis of the Ennis Hay Co. is optimistic on the immediate future of the hay market because February usually is a good month for business.

"Sixty-five per cent of the recent big run of alfalfa hay was sent in by regular shippers," said D. B. Tilson of Dyer & Co. Thursday. "Owing to the decline,

North & Company

Receivers—Shippers

Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

which reached its greatest extent this week, many of these shippers lost money. Sales by Kansas City firms to the South have met rejections in a few instances, where speculative buyers laid down on contracts after seeing hay sell lower."

There was a rumor among the local hay men this week that some shippers in Nebraska, on hearing of the further decline in Kansas City alfalfa prices, had unloaded cars ready to start to the market. This was not verified, but there were telegrams announcing that loading had ceased at some stations. Viewing the trend of the market and believing in a later upturn, many Kansas City firms advised their country clients to hold back awhile.

Total receipts of hay and straw in Kansas City for January were 3,776 cars, as compared with 1,944 in December and 2,739 for January, 1924. The January movement was the largest for any month since September, 1920. More alfalfa was received than for any month since March, 1920. Figures on the different varieties for January, with comparisons, are given by Harold Masters, assistant secretary Kansas City Hay Dealers' Association, as follows.

	Jan., 1925.	Dec., 1924.	Jan., 1924.
Alfalfa	2,671	1,028	1,635
Prairie	695	720	749
Timothy	251	128	264
Clover mixed	31	21	30
Clover	40	5	2
Straw	88	42	59

HAY POOL SUES MEMBER.

Suit has been brought by the Northwest Hay Growers' Ass'n, Yakima, Wash., against George M. Chase, a member, for \$200 and costs. This action was taken under the iron-clad contract with the pool, and to restrain the member from marketing his remaining hay otherwise than through the association. He is alleged to have sold 40 tons of hay to the F. M. Balcom Co., which is also made defendant. The suit is designed to be a test of the association's contract.

WILL BECOME ALFALFA CENTER.

PHILLIPS, WIS.—The Phillips farming community will become one of the largest alfalfa growing communities of this part of the state within the next few years, is the prediction of County Agent Rahmlow.

The sandy loam soil, as found here is real for alfalfa, as it is well drained and has an open sub-soil.

The discovery that the big pile of ashes at the old Potash Factory in Tanterytown contained from 76 to 78 per cent of lime, was important. These ashes are worth as much as the best grade of marl.

Mr. Parkinson, who owns the old Potash Factory site, has agreed to sell the ashes at 25 cents per load, which is the same price marl is selling for.

Since alfalfa does best only after lime is added, this discovery is of great importance to Phillips farmers, as it not only saves money on the price of ground lime stone, but enables farmers to get as much as they want at any time, instead of getting together to make up carlots.

The county agent assures success to any farmer growing alfalfa if the following requirements are carried out:

1. Use only well drained soil.
2. Use only genuine Grimm seed.
3. Inoculate the seed.
4. Put on five to six tons of ashes per acre.

The genuine Grimm seed can be bought for less than red clover seed this year, and the inoculation is only 25 cents per acre.

HAY MARKETS.

NEW YORK.

Jan. 29.—The New York Hay Exchange Ass'n has issued the following weekly report with latest quotations:

	Hay.	Straw.
Receipts for week, tons.....	908	26
Receipts last week	613	12
Receipts from Sept. 1.....	29,065	396

Trucking, as a result of another bad snow storm and zero weather, continues extremely difficult, and in consequence the movement of hay from terminals has been greatly restricted. Meanwhile arrivals, although somewhat lighter than last week, have been in excess of deliveries, so that at the close, stocks on hand show some increase.

With heavier supply and liberal assortment of medium and low grades, mostly in large bales, ranging in quality from an average No. 3 timothy to a grassy mixture, selling slowly from about \$18@21, the situation favors the buyer throughout and it has been impossible to maintain the level of values that prevailed at the close of last week.

Strictly No. 1 timothy and top No. 2 timothy in both large and small bales, however, are in relatively lighter offering and this quality, although somewhat weakened by the lower grades, moves readily.

Straw situation is unchanged, with prices nominal.

Federal grade quotations for large bales follow: Timothy—No. 1, \$25@26; No. 2, \$22@24; No. 3, \$19@21. Light clover mixed—No. 1, \$22@24; No. 2, \$19@21; No. 3, \$17@18. Medium clover mixed—No. 1, \$19@21; No. 2, \$17@18. Light grass mixed—No. 1, \$22@24; No. 2, \$19@21; No. 3, \$17@18. Heavy grass mixed—No. 1, \$17@18.

OMAHA.

Jan. 30.—Prairie hay receipts fair. Demand light. Prices steady. Bulk of receipts of better grades. Alfalfa hay receipts heavy. Arrivals mostly common and poor grades, moving slowly. Shipping demand light. Prices lower on poor grades. Prices below are for carload lots. Upland prairie—No. 1, \$11.50@12.50; No. 2, \$9@10.50; No. 3, \$7.50@8.50. Midland prairie—No. 1, \$10@11; No. 2, \$8.50@9.50; No. 3, \$6.50@7.50. Lowland prairie—No. 1, \$8.50@9.50; No. 2, \$6.50@7.50. Alfalfa—Choice \$19@20; No. 1, \$17.50@18.50; standard, \$14@17; No. 2, \$12.50@13.50; No. 3, \$11@12. Straw—Oat, \$7.50@8; wheat, \$7@7.50.

MILWAUKEE.

Jan. 31.—Lack of demand continued in the local hay market last week and there was little trading. Very little hay is being purchased here and of that amount but a small portion passes through the established market. Current quotation are: No. 1 timothy, \$15@16; No. 2 timothy, \$13@14; No. 1 mixed, \$14@14.50; No. 2 clover mixed, \$12@13; sample hay, \$7@9; marsh feeding, \$11; packing, \$10; rye straw, \$10@10.50; oat straw, \$10@10.50.

PHILADELPHIA.

Jan. 31.—Hay is in small supply and firm under a fair demand, but snow and ice in the streets renders hauling difficult and the volume of business is only moderate. Hay grading better than No. 2 was commanding a premium over quotations. Straw is scarce and firm, with demand absorbing the offerings of choice stock. Hay (Federal grades): Timothy—No. 1, nominal; No. 2, \$21@22; No. 3, \$17@19; sample, \$10@12. Light clover mixed—No. 1, \$20@21; No. 2, \$17@18; No. 3, \$12@14. Medium clover mixed—No. 1, \$17@18; No. 2, \$14@15. Heavy clover mixed—No. 1, \$16@17. Light grass mixed—No. 1, \$19.50@20. Straw—No. 1 straight rye, \$16.50@17; No. 2, \$15@16; wheat, \$16.50@17; oat, \$16.50@17.

TOLEDO.

Feb. 2.—Receipts of hay are liberal and the demand is very slow. Dealers have lowered their prices for the first time in many weeks. The stocks here and elsewhere are large enough to take care of any spurt in the demand. There is no much hope of higher prices, though there should be a good trade later and this will give dealers an opportunity to move some of their accumulated supplies.

Prices the past week were as follows: No. 1 timothy, \$14; No. 2 timothy, \$11; No. 1 light clover mixed, \$13; No. 1 heavy clover mixed, \$12; No. 1 clear clover, \$11; No. 1 first cutting alfalfa, \$16; No. 1 second cutting alfalfa, \$22; sound dry wheat straw, \$9; sound dry oats straw, \$9.50.

CINCINNATI.

Jan. 31.—The hay market having fair withstood the burdens of an oversupply began to show signs of a steadier tone to

ward the close of the week, and though prices for ordinary and common were still easy, choice and top grades readily command premiums of 50c@1 per ton. Zero weather and heavy snowfall came to the relief of receivers and Southern and interior dealers materially increased their orders to fill up deficiencies and for immediate consumption, but only for good hay. Efforts of the trade to discourage country shipments until the accumulation in the yards and terminals was cleared, however, met with little success, and in spite of the recent break in prices receipts continued large until Friday, when only 15 cars of fresh arrivals were reported. Heavy shipments from the yards helped to materially reduce cars. Quality dominates the market more than ever and while better prices were realized for the pick of the offerings, the inferior remained almost unsalable and when sales are possible only at heavy discount. Timothy was in best demand and clover and heavy mixed slow. Alfalfa was weak and lower. Timothy—No. 1, \$17@17.50; No. 2, \$15@16; No. 3, \$13@14; threshed, \$10@12; no grade, \$10@12. No. 1 heavy clover mixed, \$15.50@16.50. No. 1 light clover mixed, \$16@17. Clover mixed—No. 1, \$15@16; No. 2, \$13@14; no grade, \$10@12. Clover—No. 1, \$16@16.50; No. 2, \$13@14; no grade, \$10@12. Second cutting alfalfa—No. 1, \$24@25; No. 2, \$20@22. First cutting alfalfa—No. 1, \$16@17; No. 2, \$14@16. Sound sample grassy hay, \$12@14. Straw—Wheat, \$10.50@11.50; oats, \$10@11; rye, \$12@13.

BALTIMORE.
Jan. 31.—On desirable grades of timothy and nice, light clover mixed hay the market is fairly firm, under light receipts and a fair inquiry for this class of hay. Low grade and inferior stuff is dull as heretofore and of uncertain value.

Straw of all descriptions is in limited supply on spot and higher. Quotations follow:

Timothy—No. 2, \$20.50@21.50; No. 3, \$17@19. Light clover mixed—No. 1, \$19.50@20. Clover mixed—No. 1, \$19@19.50; No. 2, \$17@18. Straw—No. 1 straight rye, \$18@19; No. 1 wheat, \$16@17; No. 1 oat, \$16@17.

MEMPHIS.
Jan. 31.—Receipts of hay for the week were 105 cars, while demand continued restricted. Stocks are large and prices have eased because so many had more cars than they could handle and charges were piling up. The market is nominal, but quoted today at \$22 for one timothy, \$21 for standard and \$20 for two. Alfalfa, choice, \$32, which is scarce; one at \$28, standard at \$26 and two at \$22. With the shipment in transit rates becoming effective for this market Feb. 12 the local trade hope for a greatly enlarged outlet for their hay, as it will enable them to compete with other markets, especially on alfalfa.

DULUTH.
Jan. 31.—Jobbers experienced a good market in hay during the last week. Timber operators over Minnesota were in the market freely for supplies and with light shipments from producing points stocks of the best grades of hay were drawn upon. Prices are firm and unchanged per ton, as follows: Timothy—No. 1, \$16@17; No. 2, \$15. Mixed timothy—No. 1, \$16; No. 2, \$12. Prairie—No. 1, \$16; No. 2, \$14; No. 3, \$12. Midland—No. 1, \$11; No. 2, \$9. Straw—Rye, \$9; oat, \$8.50.

KANSAS CITY.
Jan. 31.—Curtailed of country shipping was evident this week in all kinds of hay except timothy, clover mixed and clover. There was a heavy run on Monday, especially of alfalfa, but restriction followed, due to receding prices and a big snow in Nebraska. The total arrivals of hay were 853 cars, as compared with 983 a week ago and 847 a year ago.

While keeping slightly ahead of the year ago receipts, the volume of alfalfa placed on the market fell 44 cars below that of the preceding week and was 692 cars. Monday's receipts were 245 cars, said to have been the largest on record for one day. Buyers had been filled up by previous heavy offerings and prices dropped 50c to \$1 a ton. There was an improved demand later in the week for dairy qualities, but poor, wet and damaged hay continued difficult to sell. At the close the market was called unchanged to \$1 down, with the best dairy hay as high as a week ago and grades below it showing the chief loss.

Reduction of prairie offerings to 88 cars, or 90 less than a week ago, had a steady effect on that hay. Demand was equal to the supply, though brown and damaged cars sold slowly. The stock yards interests were the best buyers. Prices were practically unchanged.

There were receipts of 73 cars of tame hay other than alfalfa, most of the offerings consisting of timothy. Demand from the South and for other scattered accounts kept prices on the former basis.

Reflecting recent recessions in prices, straw shippers cut the arrivals down to 11 cars, less than half the amount received a week ago. The effect was a stiffening of prices and a rise of 50c a ton was established. Straw went to stock yards men and packers in the main.

Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City: Alfalfa—Select dairy, \$24.50@26; choice, \$22.50@24; No. 1, \$20.50@22; standard, \$16@20; No. 2, \$14@15.50; No. 3, \$10@13.50. Prairie—No. 1, \$10.50@11.50; No. 2, \$9.50@10; No. 3, \$7.50@9; packing, \$6@7. Timothy—No. 1, \$16.50@17.50; standard, \$15.50@16; No. 2, \$14@15; No. 3, \$12.50@13.50. Clover mixed—Light, \$16.50@17; No. 1, \$15@16; No. 2, \$12@14.50.

Clover—No. 1, \$16@18; No. 2, \$12@15.50. Straw—Wheat, \$7.50.

PITTSBURGH, PA.
Feb. 2.—Receipts of all grades hay are in excess of the very limited demand. This is especially true of the clover grades, which are extremely dull and prices unsatisfactory. Market badly overstocked on all grades. Quotations: Timothy—No. 1, \$19.50@20; standard, \$18@18.50; No. 2, \$15.50@16.50; No. 3, \$13.50@14.50. No. 1 L. C. mixed, \$17@17.50; No. 1 H. C. mixed, \$17.50@18. Clover mixed—No. 1, \$17.50@18; No. 2, \$12.50@14.50. Clover—No. 1, \$17.50@18; No. 2, \$12@14. Straw receipts entirely too large and market badly overstocked, especially oat straw. Buyers all seem to be stocked up and sales of oats straw almost impossible to make at any price. Wheat straw not quite so difficult to sell, but demand very limited. Quotations: Wheat straw—No. 1, \$12@12.50; No. 2, \$11.50@12. Oat straw—No. 1, \$11.50@12; No. 2, \$11@11.50. Rye straw—No. 1, \$13@13.50; No. 2, \$12@12.50.

CHICAGO.

ST. LOUIS, MO.
Feb. 2.—The receipts of hay on both sides of the river continue to be fairly liberal. The market also remains dull and overstocked. Demand limited. Believe receipts will be lighter for rest of week.

Clover—High grades selling fairly well. Medium and lower qualities hard to place at any price.

Alfalfa—Easier with larger offerings. Best qualities selling; medium and lower grades hard to place.

Prairie—Choice qualities in fair demand at market values; lower grades very dull. Straw steady.

Timothy—No. 1, \$21@22; standard, \$19@20; No. 2, \$16@18; No. 3 and sample, \$10@12. Clover mixed—No. 1, \$18@19; No. 2, \$15@17; heavy mixed, \$15@18. Clover—No. 1, \$18@19; No. 2, \$14@16; threshed hay, \$12@14. Alfalfa—Choice, \$26@28; No. 1, \$23@25; standard, \$20@22; No. 2, \$17@19. Prairie—No. 1, \$15@16; No. 2, \$13@14. Straw—Rye, \$9@10; wheat, \$8.50@9.50.

MINNEAPOLIS.
Jan. 31.—The trade in timothy is very narrow and most of the buyers are filled up, with a fair movement of upland and a slow demand and lower prices for alfalfa. Timothy—No. 1, \$16.50; No. 2, \$15.50. Mixed different grasses—No. 1, \$15.50; No. 2, \$14.50. Clover mixed—No. 1, \$15; No. 2, \$12.50. Upland—No. 1, \$16; No. 2, \$14.50; No. 3, \$13. Midland—No. 1, \$12.50; No. 2, \$11. Packing hay—\$8. Straw—Rye, \$9; oat, \$9; wheat, \$8. Alfalfa—No. 1, \$23; standard, \$19; No. 2, \$16.

PORTLAND.
Jan. 30.—Hay prices steady. Shipments coming to the terminals are not grading well and considerable off grade stuff is accumulating. No scarcity of hay as predicted earlier in the season. The Yakima country still seems able to furnish the demands of terminal dealers, although it is reported from there that first cutting hay is getting scarcer. Alfalfa is quoted \$21 per ton. Buying prices f. o. b. Portland: Alfalfa, \$19.50@20; Valley timothy, \$19@20; Eastern Oregon, \$22@22.50; clover, \$16.50@17.50; oat, \$19@20; oat and vetch hay, \$18.50@19.50; straw, \$7.50@8.

CHICAGO HAY NOTES.

Receipts are somewhat less and country loadings lighter, but the market is not yet cleaned up and prices continue low.

Bridge & Leonard report the market is slowly getting in better shape but are asking shippers to hold back their hay.

Albert Miller & Co. report country loadings very light with prospects of a better market for hay that is shipped now.

Walters Brothers advise that while prices are not notably higher there is a better feeling with buyers making inquiry for all grades of tame hay.

HAY MARKET REVIEW.

The hay market was easier during the week ending January 31 and prices averaged slightly lower, according to the weekly hay market review of the United States Department of Agriculture. Receipts were lighter than last week but were more than equal to buyers' needs and hay accumulated at several markets. The demand was quiet, although consumption increased

with the stormy weather toward the close of the week. Offerings of ordinary and low grade continued to make up the bulk of the receipts and this hay sold at wide discounts.

The timothy market was steady to dull. The offerings of top grades were equal to market needs at Boston while there was a considerable accumulation of medium and lower grades and quoted prices were hard to obtain. Receipts were lighter at New York but weather conditions restricted the movement of hay from the terminals and stocks accumulated. Top grades advanced 50c but ordinary hay was down \$1 per ton. Supplies were accumulating at Pittsburgh and the market was weaker.

Shipments increased at Cincinnati and the accumulation at this market was reduced. Timothy was steadier at Chicago with hay moving readily at quoted prices and country loadings were lighter. The St. Louis market was 50c lower and timothy held steady at Kansas City. Southern markets ruled steady with a larger volume of trade but only good quality hay was wanted at these points.

Alfalfa was easier. Alfalfa was weaker at Cincinnati and Memphis and the market was quiet at Minneapolis and St. Paul. Receipts at Omaha were liberal and alfalfa was 50c lower, although receipts were falling off on account of the heavy snows in that territory. The Kansas City market was steady for good quality hay but off grades were slow sale, even at wide discounts. About sixty cars of Wyoming alfalfa were received at this market. Mills and feeders were less active buyers, but dairy hay sold readily and the Southern demand held steady.

Good quality prairie ruled barely steady but low grades were not wanted. The market at Chicago was quiet with light receipts but prairie was down 50c at Minneapolis and St. Paul, while the St. Louis market was unchanged. Offerings were more than equal to buyers' needs at Omaha, but quotations were unchanged and it was expected that the snowfall would reduce arrivals and increase consumption. Prairie ruled almost steady at Kansas City with the stock yards taking good amounts and shippers and local transfer companies in the market.

BROOM CORN MARKETS.

Near zero weather accompanied with light snow throughout the Southwest broom corn area continued for several days and temporarily delayed buyers from driving and delivering on the part of farmers.

Outside of the few days that cold weather delayed buyers from scouting around to any extent, field work has had the same tendency as heretofore, in that buyers have been driving actively throughout the various districts and especially active in northwest Oklahoma, southwest Kansas and nearby sections in Colorado and New Mexico as these districts have more available corn in growers' hands than is available in central, southern and southwest Oklahoma Dwarf districts.

From every district, however, the report is the same that broom corn is difficult to buy and that growers in number are not willing to accept prices offered. This situation is not localized to any one particular district but applies to the Southwestern Dwarf area as a whole.

A strengthening influence was apparent on the market during December, however, this showed a stronger development during January, becoming stronger as the month faded into the past. At this time the field situation is indicating more strength than at any time this season. It is noticeable in the continued effort of buyers to secure corn and the general higher range of prices paid farmers for crops. The spread of prices paid the past ten days ranged generally from \$70 to \$100 for Dwarf and Standard in what is considered the Dwarf districts. Some few instances have been noted in securing crops under \$70 but these are the ex-

TO HANDLE OTHER SEEDS

Plans to enlarge the business of the North Dakota Grimm Alfalfa Growers' Association were made at the annual meeting of that organization recently held in Fargo.

The organization decided to handle sweet clover and red clover seed and possibly other seeds in addition to alfalfa.

Last year a total of 250,000 pounds of alfalfa seed was handled by the association.

OREGON GRAIN DEALERS' MEETING.

A meeting was recently held by the Willamette Valley Grain Dealers' Assn. at Salem, Ore. The association went on record as opposing the bill to be introduced before the Oregon legislature regarding limitation of oat hulls in feed; opposing the retention of the office of state market agent; adopted a resolution requesting state aid for seed wheat loans to the farmers of the state on the grounds that considerable wheat had been frozen out this winter, and farmers would be unable to finance spring wheat plantings; adopted a resolution requesting the federal government to take over all grain inspection in this state and the abolishment of state grain inspection.

Control of the Saskatchewan Coöperative Elevator Co., with headquarters in Regina, remains in the hands of the conservatives with the re-election of the old officers. Radical stockholders of the coöperative company wanted the pool to take over the management and resources, but the conservative element won with a decisive majority. The officers re-elected follow: Hon. J. A. Maharg, president; J. B. Musselman, vice president; W. G. Mills, secretary; and S. G. Lothian, treasurer.

Provisions, Etc.

WEEKLY AVERAGE PRICES.

Weekly average prices at Chicago for good beef cattle, hogs, aged sheep and lambs, as compiled by the Chicago Drovers' Journal:

	Cattle.	Hogs.	Sheep.	Lambs.

Last year	104,554	18,446	22,488

CHICAGO PROVISION REVIEW.

CHICAGO, Feb. 2.—Provision prices and trading were erratic. Activity in the corn market had a good influence on provision values and operations were governed largely by business in that grain. Investment buying was liberal at times while packers as a rule were free sellers on all hard spots. Supplies of hogs were ample and stocks show a good increase the past month. Foreign markets were unsettled with a good advance toward the close. Reports were fairly large and said to be on consignment. In the cash trade there was a moderate business on domestic account in lard and a better trade in short ribs. Shipments of lard for the week

were 12,815,000 lbs., an increase of nearly 2,000,000 lbs. over the previous week and compared with shipments of 18,265,000 lbs. from last year. On cured meats they were 19,915,000 lbs., a large increase over the previous week and compared with 21,087,000 last year. Deliveries on January contracts for the month were 12,250,000 lbs. of lard; 400,000 lbs. of short ribs, and 350,000 lbs. of dry salted bellies. Closing prices were at losses of 25c on lard, 22½c to 27½c on short ribs, and gains of 15 to 45c on bellies.

The range of prices for week, the December range and range previous to December follow:

	High.	Low.	1925.	1924.	1923.

RECEIPTS, TWENTY MARKETS.

Combined receipts of cattle, hogs and sheep at the seven leading western markets and thirteen other points for the week, with comparisons:

	Cattle.	Hogs.	Sheep.	All kinds.
Past wk.	232,000	1,017,000	242,000	1,491,000
Wk. ago.	255,000	933,000	246,000	1,434,000
1924	221,000	1,041,000	248,000	1,510,000
1923	232,000	852,000	253,000	1,337,000
1922	210,000	682,000	266,000	1,158,000

Combined receipts at the twenty markets for 1925, to date with comparisons, as compiled by the Drovers' Journal:

	Cattle.	Hogs.	Sheep.	All kinds.
1925	1,113,000	4,740,000	1,097,000	6,950,000
1924	1,205,000	5,023,000	1,314,000	7,542,000

HYDROCYANIC-ACID GAS SAFE FOR FUMIGATING MANY FOODS.

It has been demonstrated by the Bureau of Entomology of the Department of Agriculture that in warehouses where the use of large amounts of carbon disulphide gas for fumigation might prove dangerous, hydrocyanic-acid gas can be employed with safety. The result of thorough studies as to the penetration of the latter gas into sacked beans, peas, and cowpeas has demonstrated the practicability of this type of fumigation and made it the standard for warehouse control of bean and pea weevils where seeds are sacked. It is useless, however, for the control of the rice weevil in sacked rice and corn.

Coöperative work with the Bureau of Animal Industry has proved that cured meats can also be safely fumigated with hydrocyanic-acid gas. This work has led to a change in the Federal inspection regulations permitting the use of this gas in meat establishments.

MOVEMENT OF CATTLE.

Weekly receipts and shipments of cattle and calves at 6 Western centers the week ending Jan. 31, 1925, and totals with comparisons for corresponding time last year, compiled by THE PRICE CURRENT-GRAIN REPORTER:

BUSINESS AND TRADE CONDITIONS

FOLLOWING the orgy of spending into which the Government was naturally led by the prime importance of winning the war, it has in the years following the conflict been difficult to let down. The situation is much like the householder who drops from roast turkey to "ham and."

National obligations have been incurred by the United States which must be met and a decade or so of conservative financing will be required during which it is very unlikely that former comparatively low taxation levels will return.

It is plain that Washington is in the midst of a complete reversal of policies governing public expenditures and that certain state capitals are following suit. Economy is practiced today in halls where extravagance had become the daily diet. The great wealth of the American people and the potential wealth of the country's resources has successfully floated large loans, financed enormous projects, both good and bad, carrying forward through gravitation, an ever-increasing volume of liabilities which now must be reduced or their sheer weight will crush public and private business to a certain extent.

We are learning that the issuance of tax-exempt securities and thereby the increasing of public debts is not a legitimate item in the asset column of the Government's ledger. Interest piles up fast and as time elapses, sinking funds must be provided for the extension of loans, and the funds for such purposes come out of taxation; from you and me, who may be property owners, possibly paying high income taxes and unknowingly but assuredly paying a great hidden tax on everything we buy, eat, see, and we might almost add breath.

During the period sketched above, inflation grew upon us, with manufacturing costs and selling values increasing and the purchasing power of the dollar decreasing.

President Coolidge in his incisive manner, has gone right to the heart of the matter through the insistence that national spendthrift methods shall be changed and his accomplishments which we trust and believe will be of a worth while character cannot help similarly impress the citizens of the country in the observance of a sensible conduct of their personal affairs.

One of the "flies in the ointment" is the \$150,000,000 public building bill which would have a reasonable excuse for existence if the building trades were slack and public building additions were thereby warranted, but at the present time, there is no depression in the building trades, and so the budget provided in the present bill is entirely out of season and out of line.

An interesting change, however, has succeeded the old pork barrel style wherein ridiculously expensive public buildings were erected in rural districts, through a provision of the present measure placing in the hands of the Postmaster General and the Secretary of the Treasury the determination of where the buildings are to be erected.

Returning Business Confidence.

There seems to be a slowly changing attitude on the part of the Government versus business; slow because altering the course of red tape in the imponderable affairs of our Government could hardly be accomplished quickly. Business interests of the country, however, appear to be safer today from the nagging tactics of the Department of Justice; the Attorney General's office and such like, than for some-

time. The latest development which leans this way is in the dismissal of indictments against a former Assistant Secretary of War and several other business men of reputation, alleged to have been dishonest in affairs either directly or touching upon the interests of the Government. It is a rather fine point to differentiate between the proper saving of public money and the random accusations of the Harding administration aimed at officials of the Government and business interests dealing with them. The reaction from the "holier than thou" feature of Governmental indictments has placed us in a most unfavorable light with foreign Governments and their importing business concerns who have gathered that the United States is a hotbed of scoundrels. All of this

RECOMMENDATIONS were made Monday by Dr. J. W. T. Duvel, grain exchange supervisor, that some action be taken to prevent excessive wheat price changes in the future. He points to the fact that last Friday wheat had a range of 9¾c at Chicago, 10½ at Minneapolis and 12c at Winnipeg, and declares, "It is difficult to justify such market fluctuations with the law of supply and demand for real wheat."

It was announced that the volume of trade on the Chicago Board of Trade in January for all grains was the largest for the period for which records are available.

The trading in all grain futures for the month reached the enormous total of 2,791,300,000 bus., or an average daily trade of 107,359,000 bus. In wheat futures alone the total for the month was 1,700,817,000 bus., or an average daily trade of 65,416,000 bus. This is likewise the largest single month's trading in wheat as shown in any records available.

Dr. J. W. T. Duvel issued a statement to the effect that it might be advisable for the organized grain trade to take measures to limit daily price fluctuations to within a certain range, as has been done in the cotton market.

is said, fully recognizing our sins of omission and commission, particularly during the late war, but it is high time to expect our Government to discuss practical problems with commercial interests in a business like manner, and to this end, Mr. Coolidge can be complimented for his personal activities and supervision over the department heads, who are most concerned with the maintenance and further expansion of our great business life.

Country Banking and the Federal System.

Although country banking is somewhat overdone, as in the state of Iowa where it has been truly said that small banks are as numerous as cross-roads' post offices, it is no less truly said that the thousands of small independent country banks are the heart of our financial structure. Such bankers are not only in the main well qualified to perform their function in the community but to extend practical assistance to their customers, a service that is not necessarily of a financial character.

Country branch banking is, however, "a horse of another color," and has latterly come in for much justified criticism from Henry M. Dawes, a former comptroller of the currency. He states, as have others commenting upon the same subject, that such

branch banks fail to take into account in making loans, the personal character and moral responsibility, upon which real business success depends. Mr. Dawes associated this branch banking discussion with a strong defense of the Federal Reserve System, urging legislation in the next Congress to check the present "smothering tendency among national banks." He believes that nearly ten per cent of the assets of the entire national banking system has disappeared since 1918, absorbed in the strenuous competition with State banks.

New Foreign Loans.

There is an important distinction between Governmental indebtedness and private loans. The former, as given such wide attention in the business press these days, should be contracted, but in spite of collection difficulties lately such loans, which even now are too large to comprehend are actually expanding. Difficulties entering into the reduction of such loans and even for some nations in the payment of annual interest items seem almost insurmountable.

Foreign loans are, however, continuing upwards at a surprising rate; being for the year \$155,000,000 in round figures to the first of February and \$166,000,000 scheduled for early offering. If this same basis continues, the year 1925 will break the record of 1924 in the flotation of foreign loans, the diversified character of which is indicated in the following list of Governmental loan applications from Argentine, Poland, Germany, Japan, New Foundland and Finland.

The tangled loan situation is illustrated in the present plan of Great Britain to secure from war debts and reparations enough to fully pay the United States and to apply any surplus to the reduction of similar indebtedness among Great Britain's allies. The manner in which this is to be accomplished contemplates fixed annual payments from France. It seems to take over under British guarantees, so to speak, the pooling of all indebtedness, to be discharged under the direction of the British government. The lengthy detail of this proposal from Winston Churchill, it is understood satisfies France and it is presumed the request for a horizontal decrease in the claims of the United States will follow, if any such settlement as proposed is at all possible.

NO PRICE MANIPULATION

THE country trade should not forget the deflation of grain prices in 1921. Losses were the sad experience of many. What the future trend of prices will be or how high or low they will go, no one can predict. But it behooves all to have affairs in a comfortable position. The recent high prices of wheat has caused some agitation and Senator Cameron of Arizona, it is stated, wants an investigation of the Chicago Board of Trade on the theory that the market had been manipulated. The United States has a law to prevent manipulation and a representative with authority to act should the occasion arise. Dr. J. W. T. Duvel, who is the grain exchange supervisor at Chicago and who also has supervision over other contract markets through assistants, makes the statement that "investigation of the Chicago Board of Trade is uncalled for because there has been no manipulation of wheat prices and no evidence of concentrated holdings of grain."

The grain exchanges have been investigated time and again without finding anything wrong. No new investigation would reveal any facts that are not already in the possession of the government or the

grain supervisor's office. Such a suggestion on the part of the western senator is entirely unwarranted. This country is tired of the continued harassing of business. We are as a whole a happy, prosperous nation. If this condition is upset it will be due to meddlesome activities of unscrupulous politicians. The slogan "Less government in business and more business in the government" is still in good standing with the general public.

REGIONAL ADVISORY BOARD

FROM various sections of the country there come to us reports of the value of the Regional Advisory Boards and of the effective work they are doing in the matter of adjusting differences between individual shippers and railways in arranging for adequate supplies of cars, and in bringing about a spirit of coöperation which is of great service both to the buyer and the seller of transportation.

At a recent meeting of the Northwest Regional Advisory Board, which was held at Minneapolis, the chairman, J. F. Reed, who is president of the Minnesota Farm Bureau and executive committeeman of the American Farm Bureau Federation, said that not only had the largest grain production in the history of the Northwest been handled without a car shortage or blocked elevators, but that the spirit of coöperation between farmers, shippers, state commissions and carriers had set down the fundamental principles and basis for the handling of any transportation condition that may in future arise.

He also said there was no question but that this coöperation, during the past year, had been responsible for the return to the farmers of the Northwest of millions of dollars through the more expeditious and efficient handling of transportation.

Truly the day of "the public be damned" attitude upon the part of railway officials has gone and we are confident it has gone never to return.

THE GOVERNMENT AND THE GRAIN TRADE

THE Grain Dealers' National Ass'n has distributed to its members copy of a brief which has been presented to the President's Agricultural Committee. The Association deserves much credit in compiling this pamphlet which contains all the necessary facts in connection with the relationship within recent years of the Federal Government to the grain business. It shows the many harassments to which the grain dealers of the country have been subjected by unscrupulous politicians, and also discloses in a condensed and concise form, what the Government has done for the farmer and clearly shows that agriculture has been greatly favored by our Government, notwithstanding the propaganda to the contrary by agitators. Recipients of this pamphlet should keep it on file, read it carefully, and be in a position to know the facts and defend the grain business when it is being attacked.

ADD BUSINESS AND trade conditions

TRUCK DUMPS A NECESSITY

TIME seems to be slipping along pretty fast and before we know it Spring will be here, the time when necessary improvements around the elevator will be made. Each year, the program for building hard roads is enlarged and as time goes on, more and more of a network of such roads will radiate in practically every state. This means that farmers will use more trucks in the future with which to haul their produce to market. Therefore, it will be necessary for practically every country elevator to be equipped with a truck dump that is adaptable for both trucks and wagons. While many truck dumps have already been installed, the great majority of elevators still need this equipment. Live grain dealers will be the first in their community to so equip their plants.

ACCURACY IN MOISTURE TESTS

COUNTRY grain dealers who have moisture testers will no doubt find it advisable to equip the machines with an electric automatic shut-off. The reason for this is that every test will be the same. This device consists of a contact thermometer which shuts off the electric current in the heating element. Two advantages accrue from this equipment—one is that when the dealer starts making a moisture test, he can go about his business and forget the machine, knowing that when the operation has been completed the heat will be automatically turned off. The other is that by eliminating the human element of error, he can tell his farmer patrons that every test is absolutely the same according to Government standards and specifications and eliminate any suspicion in the minds of his customers that one test might differ from another. As testers are equipped with this device at terminals, he can be sure of obtaining the same result on the same quality of corn and always know the moisture content to a certainty.

CORN GROWING IN IMPORTANCE

WHEAT enters so largely into the channels of commerce that it is given a greater importance than its value or volume warrants. Corn still remains "King of American crops," and in spite of a reduction of over one-half billion bushels the 1924 crop is valued at \$2,405,468,000, compared with \$1,136,596,000 for wheat.

In one respect wheat is of greater importance to the grain trade, as it is a grain which is consumed almost solely in the form of flour and other products of human consumption and must be shipped through the grain dealer to market, whereas over 80 per cent of the corn crop does not leave the farm in the form of grain. The amount of corn leaving farms, however, is much larger than the percentage figure indicates, as over 500,000,000 bus. on the average annually leaves the farm and is handled by the grain dealer. This compares very favorably with some 700,000,000 bus. of wheat marketed on the average by farmers.

Statistics over a period of years and particularly developments during the past year seem to point to a greater increase in acreage and a larger demand for corn to be used in human consumption. Diversification has increased corn acreage in South Dakota, Minnesota, and Nebraska, where some years ago corn held a position of little importance, and recent experiments by the Bureau of Chemistry, Department of Agriculture, have resulted in the discovery of an economical method of obtaining sugar from corn which, it is thought, will have a wide market. All these facts indicate an ever-widening market for corn, and a larger amount moving through the grain elevator to terminal markets. The 1924-25 season, of course, will not show this tendency, but normal season in the future will bring to view these changes.

MAKE A FRIEND TODAY

ONE of the most successful ministers of the gospel we ever met was a man who knew personally and could call by name practically every man, woman and child in the small city in which he was then located, and he not only knew all of the people and spoke to them on the street, but he was a regular visitor in their homes.

The cultivation of friendships is a difficult task for many people, even in the smaller towns and in the country, while in the big cities it seems to have become almost a lost art, but it is something which pays big returns on the investment, not only in a personal but also in a business way.

The cultivation of friendships just for business reasons is a sordid thing and not at all what we have in mind, and friendships made exclusively on that basis are not, as a rule, lasting, but true friendships,

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	Feb. 7, 1925.	Jan. 31, 1925.	Feb. 9, 1924.
Wheat—			
Primary receipts	6,774,000	6,321,000	3,838,000
Primary shipments ..	4,601,000	4,459,000	2,213,000

which are expressed in sympathy, in a desire to help, and in mutual pleasures, etc., are after all, one of the things that make life worth living, and we are all glad to trade with "Joe" if he is a friend of ours.

MARKETS NEARER HOME

IN a recent dispatch from Stockholm, Sweden, Dr. Helmer Key, one of the world's leading authorities on immigration, suggests the colonization of Mexico from the excess population of Europe. With an area as large as Europe, omitting Russia, and with immense undeveloped natural resources, it now has a population of only 15,000,000 people and they buy less goods from outside of their own country than does Cuba with a population of only 3,000,000.

According to Dr. Key, it is a mistake to attempt the reconstruction of Europe's great industrial nations with the help of American capital, thus increasing industrial competition without creating new markets, a far better investment being the financing of colonization projects not only in Mexico, but also in Canada and Southeast Africa. Such a scheme, as we see it, however, might not prove to be the unmixed blessing pictured by Dr. Key. If colonization would mean the flooding of the world's markets with grain and still more grain, the troubles of this country's farmers in the recent past, might be very small indeed, compared to those that would then confront them.

LETTERS from our readers are solicited on subjects of interest to those engaged in the grain and allied trades, news items, reports on crops, grain movement, new firms, contemplated improvements and cars leaving in transit.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain, feed, seed, bean and hay industries is unquestioned. The character of advertisements in its columns testifies to the favorable opinion of and value received by our advertisers. If you would be classed with progressives, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

CHICAGO, FEBRUARY 11, 1925

GRAIN TRADE REVIEW

WHILE there have been violent changes in the price of wheat during the past week, with a decline of over 20c in the May from the recent high the actual world's position has changed but little, and press cables from abroad now indicate that many of the theories advanced by those in closest touch with conditions are taking definite form. France is expected to take Governmental action in an effort to try and check the advancing tendency, while from Bulgaria and Austria come reports of an actual scarcity of wheat despite foreign purchases. Spanish merchants are protesting over a move to import wheat into that country, the first intimation that Spain needed foreign grain that has been received. The southern hemisphere is now clearing wheat at the rate of over 10,000,000 bu. per week, and it is likely to continue to ship on a big scale for six weeks or two months after which the movement should decrease steadily. It is figured that the southern hemisphere has around 320,000,000 bu. wheat for export and in order to clear all this grain before June 30, it must ship on an average of around 15,000,000 bu. per week, which is regarded as almost impossible. It is on this account that Europe will probably be forced sooner or later to buy freely from North America as import needs for the last six months of the crop season are estimated at more than the total southern hemisphere surplus. It is not unusual for a decline to be witnessed in the wheat market during the period when the first flush of the new Argentina and Australian wheat is coming forward, but when there is a scarcity, it starts to develop rapidly after March 1. At the moment there is no scarcity in sight in this country, to say nothing of any shortage.

Closer Marketing Shown.

The Government estimate on farm reserves on March 1, is likely to show that there has been closer marketing this season than has been the case for some years past, as the difference between the primary arrivals this season and last is much greater than the difference in the size of the crop, and the carryover. The same condition probably also prevails in the three Canadian provinces and when the figures are given to the trade it would not be sur-

prising if foreign buyers commenced to realize that there is no material surplus wheat, of consequence. Latest statistics suggest that there will probably be a carryover of 75,000,000 bu. in to the new crop, after allowing for a normal carryover in the United States and Canada.

Wild Advance Past.

The period of wild advances in the wheat market are probably over for the time being, as extremely sharp upturns are in the main due to heavy public speculation, and the break of around 21c from the recent top will tend to keep the many out of the market. Within a few weeks the probable outcome of the new winter wheat crop will become a market influence. Reports from parts of Oregon and Washington indicate heavy winter killing there but there has been no growing weather of consequence in the main winter wheat belt, and until spring comes it will be hard to determine whether there has been any damage there or not. Following a year of exceptional yields per acre it would not be surprising if the total crop for the country failed to equal that of last year, but the price of the July is sufficiently high to cause many traders to take the selling side on the belief that the crop will move at lower figures than prevailing at the present time, especially as indications are for a sharp increase in the spring wheat acreage both sides of the international line if weather conditions permit. Drought prevails in parts of Europe, and the outlook at the present time in the dry sections is distinctly unfavorable, while in sections where there has been sufficient rainfall the prospect is good. The domestic visible supply is steadily decreasing, and no increase of consequence is likely to be witnessed for the balance of the crop year owing to the increasing belief that farm reserves are somewhat below normal for this season of the year.

Coarse Grains.

Many traders have given up trying to understand the corn market which has persistently refused to decline in the face of a bearish cash position and a reduction in livestock feeding operations. At the same time there are many who figure that the movement from farms will fall off materially in the immediate future, and look for the price of the cash grain to advance sharply as compared with the May. The eastern demand for cash corn and oats remains decidedly slow, and further increases in the stock of corn at leading terminal markets are anticipated for several weeks and probably will get above 30,000,000 bu. before the opening of lake navigation which usually marks the end of the period of accumulation. Locusts threaten the new Argentine corn crop which will not be harvested for several months to come. Russia is exporting a little corn, but the bulk of the European demand is being taken care of by Argentine. Australia is trying to become an exporter, but it promises to be a number of years before that country will be able to ship more than a small amount. The pressure of cash oats continues, and the market in the main is taking its trend from that of corn.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Feb. 7, 1925.	Jan. 31, 1925.	Feb. 9, 1924.
Wheat	6,768,000	6,434,000	3,838,000
Corn	6,195,000	8,786,000	8,737,000
Oats	4,718,000	5,101,000	4,366,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
This week	17,671,000	16,941,000
Preceding week	20,321,000	18,334,000
Since July 1	807,492,000	721,736,000

Liquidation was on in wheat the past week with May breaking 20 7/8c from the high of the previous week, and while

the finish was on a strong rally from the inside figure there was a net loss of 11 7/8c. Deferred futures declined in sympathy with the May and lost 8 3/8c. Trade was extremely heavy with a new record set on Friday, February 6, when purchases were nearly 126,000,000 bus., the May dropping nearly 10c from the high point that day. The break in futures brought in a better foreign demand and with short covering and re-instituting of lines sold out recently made the upturn from the low point. The world's situation is again coming to the fore as the main influence in the market.

All deliveries of corn sold at a new high on the crop, the past week, but when wheat broke corn followed and at the last was 1/2c lower with May showing the most strength. Sentiment has become decidedly bullish in some quarters and there was no material pressure on the market despite the violent decline in the wheat, the greater part of the loss being recovered toward the close. Cash demand remains decidedly slow, and the visible supply is still increasing.

Oats were fractionally higher at one time, but there was selling by longs when wheat broke and also pressure from the local element and prices dropped around 5c from the top, and closed with net losses of 1 1/2@3c with May leading, the slow demand for cash grain being a factor. So far no export business of consequence in domestic grain has developed. Rye failed to get higher than the finish of the previous week on the May and with wheat weak a sharp break followed with the finish at net losses of 10 1/4@12 1/4c with May and July sharing the most decline. Export demand improved on the break. Range of prices the past week follows:

	High.	Low.	Close	Feb. 7, 1925.	Jan. 31, 1925.	Feb. 9, 1924.

WORLD'S WHEAT EXPORTS.

Exports of wheat last week compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Feb. 7, 1925.	Jan. 31, 1925.	Feb. 9, 1924.
American	5,849,000	6,068,000	9,461,000
Argentine	6,479,000	6,849,000	6,759,000
Australian	5,472,000	5,400,000	4,008,000
Indian	960,000	904,000	
Russian			608,000
Others			432,000

Total 18,760,000 19,221,000 21,268,000

Of the above total wheat from America there cleared in the form of flour 1,384,000 bus.

The total export of wheat since Aug. 1, the commencement of the European crop year, compared for three years:

	1924-25.	1923-24.	1922-23.
American	274,034,000	255,487,000	282,889,000
Argentine	59,112,000	55,213,000	51,307,000
Australian	37,136,000	31,456,000	18,920,000
Indian	22,184,000	5,864,000	6,220,000
Russian	328,000	20,240,000	
Others	2,544,000	12,650,000	3,439,000

Total 395,338,000 380,910,000 362,878,000
Season 753,195,000 662,698,000

WORLD'S CORN EXPORTS.

Exports of corn last week, compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Feb. 7, 1925.	Jan. 31, 1925.	Feb. 9, 1924.
American	16,000	16,000	399,000
Argentine	1,516,000	1,128,000	632,000
African

Season 67,500,000 65,765,000

U. S. GRAIN IN CANADA.

The Canadian Bureau of Statistics reports the following amount of grain in store in Canada on Jan. 30:

	Jan. 30, 1925.	Jan. 23, 1925.
Wheat	2,389,019	2,715,375
Oats	1,710,343	1,710,343
Barley	334,594	376,553
Rye	3,902,324	4,091,239
Corn	1,144,540	1,173,705
Total, bus.	9,480,820	10,067,235

OUTLOOK FOR 1925

Government Report on Wheat and Corn—
Urges Increased Yield Instead of
Increased Acreage.

THE following statement of the outlook for 1925 has been prepared by the U. S. Bureau of Agricultural Economics to provide a basis upon which farmers may make readjustments to meet economic changes.

Wheat.

If there is an average world crop of wheat in 1925, the present high prices of wheat cannot be expected to prevail for the 1925 crop, although prices are expected to be better than in 1923. Growers of hard spring wheat are cautioned not to increase production above domestic requirements. If the spring wheat acreage in the United States is held to that of last year and an average yield is secured, the production of hard spring wheat should about equal domestic requirements.

1924 witnessed the very unusual situation of a large U. S. crop of wheat coming at a time of short world crop. The result was that the wheat grower in this country with a larger crop than in 1923 realized a much higher price per bushel than he received for the smaller crop of the year before. Present prices should not lead wheat farmers to deviate from programs looking toward a balanced system of agriculture.

The short crop of the world was due chiefly to low yields outside of the U. S., and only slightly to a smaller acreage. The greatest decrease in production occurred in Canada, with considerable decreases in Argentina, Italy, and Germany. The prevailing high price of wheat, as compared with the price for several years past, is due not alone to a ten per cent reduction in the world crop, but also to an increase in the world demand, which since 1918 has been on a definitely lower level than it was before the war. The low price that prevailed last year up to mid-summer, due primarily to the large 1923 crop and heavy stocks, stimulated foreign consumption.

It appears that the world supplies at the beginning of the harvest of this year's crop will be very low. A small carryover will be a strengthening factor in the market until the movement of the new crop gets well under way, and should help maintain prices for the early crop, but the world's wheat acreage and the developments in the condition of the 1925 crop will determine the market trend and ultimately the price.

Winter Wheat Acreage.

The winter wheat acreage sown for the crop that will come onto the market this year, as reported for the U. S., Canada, India, and eight European countries, shows an increase of about 3½ per cent over that of last year. The total acreage reported for winter wheat represents more than half of the total winter and spring wheat area of the Northern Hemisphere outside of Russia and China. The European countries reporting, which represent more than half of the total wheat acreage of Europe, show a slight decrease. If the plantings in other European countries have shown no increase, the winter wheat acreage in the Northern Hemisphere is still somewhat larger than last year, and barring serious winter killing and unfavorable weather during the growing season should produce a crop of winter wheat equal to that of 1923. The condition of winter wheat in the U. S. and Western Europe is generally reported as good, but conditions are less favorable in the important wheat section of the lower Danube basin.

Canada will begin the season next spring under somewhat of a handicap, for the fall plowing of land intended for next year's crop is reported as only 32 per cent, as compared with 43 per cent last year, and 48 per cent in the fall of 1922.

If the spring wheat acreage in the U. S. is held to that of last year, and

an average yield is secured, the production should about equal the domestic requirements. It seems probable that with the present tariff in effect, a production less than our requirements will bring a price for spring wheat appreciably higher than would a larger production. A situation may, of course, arise when the tariff will hold the very high milling wheats above the general level, but leave the price of the remainder of the crop at the general price level for wheat.

Durum Less Profitable.

Durum wheat will probably be the less profitable than hard spring wheat except in those regions where higher yields are generally secured. A short crop of durum wheat in the Mediterranean basin, and an increasing demand in this country, have recently forced prices for this class of wheat to a level nearly as high as that for hard spring. The prices of durum wheat depend largely upon the export demand, since the production in this country is larger than our consumption. There has been some increase in the competition with durum wheat in the foreign markets by hard wheat from Canada and North Africa. If an average crop is secured in foreign countries it may be expected to reduce the export demand for our durum, and a continuation of the present high price of durum as compared with hard red spring wheat could not be expected.

Much can be done by growers to increase the price of wheat regardless of the market situation. Careful attention to the quality and condition of the wheat when it leaves the farm adds considerably to the price; and the elimination of undesirable varieties in favor of those which yield well and command a premium on the market assures higher returns per acre with no increase in the cost of production. The quality and price of the wheat can be increased by preventing heat damage in storage through the use of inexpensive ventilators, and by removing dockage on the farm with simple cleaning apparatus. The screenings may be turned to valuable account as a feed for livestock.

Corn.

While the 1924 corn crop will probably be well cleaned up an increased acreage in 1925 does not appear advisable in view of the indicated reduction in the feeding demand. Stocks of old corn on farms are likely to be smaller than usual in the beginning of the new crop year 1925, but it appears that not more than an average crop will be required to supply the needs of the country for both feed and commercial purposes.

Acreage as large as that planted in 1924 if coupled with yields as large as in recent years, except 1924, would produce a crop in excess of the probable feeding demand and other domestic requirements and result in materially lower prices to farmers who sell their corn.

The prospect for a large corn crop in 1924 indicated by slightly increased plantings failed to materialize because of adverse weather conditions and the total production fell short of the 1923 crop by more than 600,000,000 bushels. The carryover from the 1923 crop was not large, so that the prospect of a much smaller supply of corn this year resulted in a rapid advance in prices.

Feed Requirements Less.

This advance in price together with the decreased feeding demand on farms has caused a heavier marketing of corn than was expected and commercial stocks have been materially increased. The reduction in the number of cattle and hogs on feed will result in a reduction of between 350,000,000 and 400,000,000 bushels in feed requirements during the present crop year. Other feed grains, the total supply of which is about 235,000,000 bushels larger than last year and which have been relatively cheaper than corn, are also being used extensively to supplement the short crop. The higher prices have caused the most economical feeding of corn and

it appears that the feeding requirements are being rapidly adjusted to the supply so that sufficient corn will be available for commercial needs and allow for some carryover into the next crop year. The poor quality of the crop in a large section of the Corn Belt, however, will reduce the effective supply considerably below the amount indicated by the production figures. With the smallest hog production during the past ten years indicated and with no material increases contemplated in the number of cattle or other livestock the domestic feeding demand will be materially smaller for the 1925 crop than during the present crop year.

JAN. CANADIAN MOVEMENT

England Buying in Cheapest Markets—Pacific Freight Rates Almost Prohibitive.

By E. A. URSELL,
Statistician.

F. T. WILLIAM, ONT., Feb. 6.—As the result of a very large volume of speculative trading by the general public during the month, particularly on the bull side of the market, prices of grain have advanced phenomenally, particularly in the Winnipeg market. Undoubtedly the unexpected entry of Russia as a buyer and the prohibition of exports from Bulgaria—indicating a more serious shortage of supplies in continental Europe than expected—coincident with the reduction of the estimate of Canadian production indicated in the final estimate and a marked rise in the Buenos Aires market to a point almost on a parity with Chicago were all important factors in adding strength to the market. On the other hand, as indicated a month ago, Britain and, in a general way, continental Europe are purchasing in the cheapest markets. Large quantities of wheat are on passage, particularly from Australia, Argentina and India, all purchased when prices were lower so that Liverpool prices are lower than replacement values in North American markets and with fair supplies on hand importers are endeavoring to make their purchases whenever markets appear most favorable to them.

In the meantime the total world shipments for the first six months of the season are almost exactly one-half the total requirements of importers as estimated by Mr. Broomhall, suggesting the total for the year is not likely to be exceeded. To offset the higher prices the French government has ordered milling at a much higher extraction both at home and in the production of imported flour by foreign mills. The use of substitutes is encouraged also. The adoption of such measures will reduce the total requirements for the season especially if, as has been suggested, they are introduced in other countries as well.

The movement of Canadian grain, whilst not large, has kept up with that of the last season when due allowance is made for the size of the crop. In the country the higher prices have probably accounted for marketings being almost as heavy as those of a year ago. The quantities moving forward to the head of the lakes and Vancouver are very much smaller. The all-rail movement to the seaboard from Fort William-Port Arthur is slightly larger for wheat than a year ago but extremely small for coarse grains; whilst winter storage cargoes afloat at eastern ports are being disposed of and unloaded very little faster than a year ago. The movement via Vancouver is extremely small, in striking contrast to that of last year at this time.

Ocean freight rates from Vancouver are almost prohibitive, the only tonnage available at acceptable rates being distress space. On the Atlantic seaboard rates show a tendency to weaken for lack of cargoes. The rate from Portland was reduced to 2/3 per quarter last week, whilst rates from W. St. John to Liverpool and London are 2/6 per quarter; to Antwerp and Rotterdam 11c per 100 lbs., and Hamburg 12c per 100

lbs.—all wheat, February or March shipment.

The number of cars passing inspections at the various points in the Western Division totalled 12,090 of all grains as compared with 23,747 a month ago and 18,947 a year ago. 9,097 of these were wheat as against 17,881 a month ago and 15,386 a year ago. Of these 4,264 or only 46.9 per cent graded into contract grades as compared with 9,073 or 50.8 per cent a month ago and 13,326 or 86.6 per cent a year ago. From the smaller proportion of wheat of contract grades passing inspection month by month it is apparent the supply of high grade milling wheat is rapidly diminishing. At the same time the large percentage of "No Grade" on account of excess moisture includes many cars which would otherwise be of contract grades. Barley and flaxseed continue to move in large volume, 977 cars of barley and 360 of flaxseed passing inspection as compared with 978 and 175 a year ago.

Comparative tables showing inspections, receipts, shipments and prices follow:

(1)—Number of cars inspected in the Western Grain Inspection Division during January:

	1925		1924	
	Cars.	Bus.	Cars.	Bus.
Wheat	9,097	12,106,200	15,386	20,308,500
Oats	1,509	2,814,700	2,135	4,435,500
Barley	977	1,409,800	978	1,413,500
Flaxseed	360	386,100	175	200,200
Rye	97	124,400	199	259,200

(2)—Total inspections of 1924 crops to the end of January as compared with the Final Estimate of Western Canada's production by the Dominion Bureau of Statistics:

	Estimated crop.	Total inspected.
	Bus.	Bus.
Wheat	235,694,000	156,371,500
Oats	229,046,000	23,620,200
Barley	68,576,000	24,386,000
Flaxseed	9,577,900	5,598,850
Rye	11,588,000	4,501,300

(3)—Total Receipts at Fort William-Port Arthur Elevators during the 6 months ended Jan. 31st:

	1925.	1924.
	Bus.	Bus.
Wheat	116,418,738	234,458,778
Oats	18,986,840	26,015,196
Barley	21,896,620	10,636,223
Flaxseed	5,197,926	3,457,863
Rye	4,415,721	4,718,328

(4) Total shipments from Fort William-Port Arthur Elevators during the 6 months ended Jan. 31:

	1925.	1924.
	Bus.	Bus.
Wheat	110,741,030	193,491,714
Oats	15,642,388	21,653,978
Barley	19,175,748	12,419,271
Flaxseed	2,586,013	2,921,227
Rye	4,694,382	5,427,836

(5) Distribution of all-rail movement from Fort William-Port Arthur, December and January:

	Atlantic Canadian U.S.A.		Seaboard Domestic.		Total.
	Bus.	Bus.	Bus.	Bus.	Bus.
Wheat	1,059,893	1,554,068	8,932	2,622,893	
Oats	57,203	345,070		402,273	
Barley	779,685	19,582		799,267	
Flaxseed		70,429	56,081	126,510	
Rye		10,714		10,714	

(6) Total grain handlings at Vancouver Public Elevators during the 6 months ended Jan. 31:

	1925.	1924.
	Bus.	Bus.
Receipts—		
Wheat	17,696,049	20,513,025
Oats	211,175	130,525
Barley	282,718	
Rye	30,120	124,673
Shipments—		
Wheat	14,995,986	19,655,191
Oats	153,708	125,303
Barley	92,949	
Rye	23,948	120,000

Prices, January, 1925. Basis in store, Fort William-Port Arthur. Spot closing prices:

	Jan. 2.	Jan. 31.
Wheat, 1 Nor.	\$1.83	\$2.12½
Oats, 2 C. W.	.65½	.73
Barley, 3 C. W.	.90½	1.07½
Flaxseed, 1 N. W. C.	2.65½	2.85½
Rye, 2 C. W.	1.40½	1.73

GALVESTON WHEAT SHIPMENTS.

Vessels clearing from Galveston during January, 1925, carried 1,766,068 bushels of export wheat and since July 1, 1924, a total of 29,111,817 bushels. No wheat was exported through this port during January, 1924, and but 5,105,000 during the 1923-24 season.

The Letter Box

New Manager.

Price Current-Grain Reporter: I have taken Thomas Lamme's place as manager of the Winfield Elevator & Supply Co. Change took place Jan. 1.—Jas. Henderson, Winfield, Ia.

Now at Earlham.

Price Current-Grain Reporter.—H. G. Fischer of Kinross, Ia., is now manager for the Farmers Elevator Co. at Earlham, commencing duties January 27th.—Farmers Elevator Co., H. G. Fischer, Mgr., Earlham, Ia.

Now at Howell.

Price Current-Grain Reporter: Have sold out in Cohoctah and bought in Howell but am not yet lined up so I would be able to give you any idea as to bean conditions in this section. You might be able to get this information from Mr. Carr of this place. He has bought beans here all this season and for many years in fact.—John Wriggelsworth, Howell, Mich.

Corn Demand Slow

Price Current-Grain Reporter: Corn movement has diminished rapidly the past few days and many dealers are getting rid of the corn that was purchased from the farmer and was yet to be delivered. Farmers have sold very little corn for the past thirty days and this condition will likely continue for some time unless the cash corn price recovers. Elevators are still holding some corn which will be marketed along for the next month and we look for only a moderate movement at any time from Illinois with a possibility of it getting very small. Present weather is not good for stored corn.

The demand for corn continues slow and all dealers have the same story to tell. It may take some time to work off the large visible supply which totals about three times the amount shown a year ago. Many substitutes are being used to replace corn and buyers taking only what they must have.—H. I. Baldwin & Co., Decatur, Ill.

Interested in Editorial.

Price Current-Grain Reporter: I was much interested in the editorial in your issue of Jan. 28 under the heading: "The Inter-Allied Debts," and I am glad you laid stress on the fact that these debts can only be paid in goods.

In fact during the war we loaned our allies goods, arms, ammunition, food, etc., which loans, for the sake of convenience, were expressed in dollars. These loans and the interest thereon can only be paid in the same way, namely: in goods, for we already have the bulk of the world's supply of gold, and we do not need foreign service. In fact we are more interested in building up our own shipping, banks, insurance companies, etc.

Unfortunately just as soon as Europe endeavors to pay us in goods, our manufacturers complain and insist upon an advance in the tariff to keep them out. Perhaps it would be better to wipe the inter-allied debts out entirely.—Geo. Marples, The Cudahy Packing Co., Chicago.

Conditions in Nebraska.

Price Current-Grain Reporter: Concerning trade conditions in this territory, we have had the hardest winter, beginning on Dec. 6, that we have ever experienced in this country and I have been here seventeen years.

Our first storm came with a heavy snow on the 6th of December and within a few days the temperature dropped down to from 10 to 26 below zero and remained there for several days and if the temperature got back to the zero mark we would get another heavy snow. This was repeated until we had fully 15 inches of solid packed snow on the

level, making it almost impossible to travel the roads or to get into the fields and all movement of commodities was brought to a complete standstill. There was not to exceed 5 per cent of the corn fields shucked out and available for pasture when this came on us and I don't believe there was more than 40 per cent of the corn shucked. There hasn't been any corn shucked since that first storm struck us and there is none to be had, and what corn this country has to market is yet to come. This extreme weather has made it necessary to feed heavier than for many years with the result that the end of our hay available for shipment is in sight.

Winter wheat, of which we have an immense acreage, is, so far, in excellent condition; never was better, and if we do not get a freezing and thawing April, we will produce our record crop this season. So far as we are concerned, the action of the hay market from here on out for this crop concerns us very little, and it is my opinion that we will not see prices lower than at present, at least no where west of the Missouri River, and it is possible that it might be considerable higher.—Prairie States Hay & Grain Co., by H. L. Pennington.

Visible Supply Table.

Price Current-Grain Reporter: Can you refer me to any old issue of your journal containing an explanation of the manner in which the wheat "visible supply" is compiled by the Chicago Board of Trade?—Thomas D. Hammatt, in Charge, Grain Marketing Section, Department of Commerce, Washington, D. C.

Answer.—While we have not published in any issue an explanation of the manner in which the wheat visible supply is compiled by the Chicago Board of Trade, it is accomplished in this manner: Telegrams are received from the various exchanges in the cities where wheat is stored and from these figures the Secretary's office of the Board of Trade compiled the visible supply table. The cities reporting for this table are as follows: Baltimore, Boston, Buffalo, Buffalo Afloat, Chicago, Chicago Afloat, Detroit, Detroit Afloat, Duluth, Duluth Afloat, Galveston, Indianapolis, Kansas City, Milwaukee, Milwaukee Afloat, Minneapolis, New Orleans, Newport News, New York, New York Afloat, Omaha, Peoria, Philadelphia, Sioux City, St. Joseph, St. Louis, Toledo, Toledo Afloat, On Canal, On Lakes, Grand Total, Corresponding Date, Increase, Decrease.

SEED CORN SHOW.

A national seed corn show will be held in Chicago March 2-7. Prizes totalling \$17,000 are offered by the Sears-Roebuck Agricultural Foundation, under whose direction the show is being held. A \$1,000 prize is offered for the grand champion ear. Another \$1,000 is offered to the county farm bureau, grange, farmers' union, farmers' club, county agent, farm advisor, or county community group sending in the largest number of entries, and a total of \$15,000 more for champion ears from each county in the country. The show will be judged by a committee of corn experts selected by the American Society of Agronomy.

Competition is open to the entire United States. Any farmer, farm woman, or farm child may enter one ear of selected seed corn. No entry fee is charged. To enter, it is only necessary to select the best ear and send it by parcel post to E. B. Heaton, Supt. National Seed Corn Show, Sears-Roebuck Agricultural Foundation, Chicago, Illinois. Entries will be received any time up to March 7. The name, address, county and state of the person entering the ear should be plainly written on a slip of paper and tied around the ear with the writing on the outside. No ear will be awarded a prize until tested for vitality and disease resistance.

All information obtained as to seed corn conditions will be made available at the earliest possible date. This year

the condition of ordinary crib selected corn is seriously poor. In some states only 25 per cent of last year's corn crop is fit for seed.

NEW ORLEANS GRAIN SHIPMENTS.

Vessels clearing from New Orleans during the month of January carried 1,716,075 bushels of wheat against 74,000 a year ago, an increase of 1,642,075 bushels. Total shipments since July 1, 1924, were 21,998,637 against 5,684,595 for the same period previous season, an increase of 16,314,042.

Shipments of corn during January were 295,543 against 861,309 a year ago, a decrease of 565,766 bushels. Total shipments since July 1, 1924, were 1,701,655, against 2,005,261 for the same period previous season, a decrease of 303,606.

Shipments of oats were 105,882 against 10,305, an increase of 95,577 and for the season 514,045 against 215,080, an increase of 298,965.

A HALF CENTURY OF FREIGHT RATES AND PRICES.

The purpose of the National Transportation Institute is to conduct a research and to disseminate the facts regarding all forms of transportation. Dr. David Friday, director of Research of the Institute, has recently completed an interesting survey on the changes in freight rates as compared to wholesale prices. The report shows that the cost of hauling in the United States has undergone little change in the past forty years, comparing freight rates with wholesale prices since 1867. While the costs of basic commodities have undergone violent fluctuations, the cost of freight transportation has jogged along close to the base level through it all, apparently having little effect on prices or on the change in industrial costs.

"Prices in the United States have gone through two major movements in the past fifty-five years," the announcement accompanying the figures states. "From the late sixties to 1897 the trend of prices was steadily downward with the exception of brief rallies in 1872, 1880, 1888 and 1893. After 1897 prices rose until 1910. War demand and the post-war boom carried prices to an unprecedented peak in 1920. After the 1921 depression prices rose until April, 1923. The price level at the beginning of 1924 stands somewhat above the price level of 1870."

"From 1867 to 1897 freight rates and prices fell together. Freight rates remained at the depression level until 1917, a period of twenty years, while prices were rising. When freight rates began to rise in 1918 they did not rise as fast or as far as prices. Since 1921 freight rates again have fallen."

The research council, taking 1885 as 100 both for freight rates and wholesale prices, shows the highest point for freight rates in 1867 at 194.0. Wholesale prices then stood at 197. Lowest mark for freight rates was 70.7 in 1916 and part of 1917 at the beginning of which year wholesale prices stood at 148, then shot up to 207. High water mark for wholesale prices was in 1920 with 263, at which time freight rates were 104.1.

High mark for freight rates in the post-war period was 126 in 1921, but it quickly dropped to 116 in 1923. The big spread between freight rates and wholesale costs began in 1899 and has widened ever since, so that, according to the charted figures, freight rates have only exerted a minor influence in determining the course of wholesale prices. Strict regulation of railroad rates down to a bare subsistence basis while industrial production has been free to go after profits is reflected in these figures.

The Wisconsin Grain & Warehouse Commission recently staged a complete demonstration of the way in which grain is handled from the time it arrives at a terminal until it is shipped out by rail or boat.

NORWAY GRAIN LANDS.

Drainage on a large scale has been finished in Jaederen, the southernmost point of Norway. Skasvand lake has been so drained that 5,000 square miles of land suitable for cultivation has been gained. The ground is remarkably fertile.

More drainage is in course of preparation. The mild climate and the snowless winters in that district promise to add to the valuable tract, making it possible for Norway to grow sufficient grain to feed the population.

POWERS REGULATORS.

Refinements in the mechanical equipment used in grain elevators, flour and feed mills, seed cleaning plants, meat packing houses and similar properties, have taken many steps forward in the last few years.

The present period of extremely high prices with opportunities for corresponding profits will encourage other developments in the protection of high priced foods and feed stuffs. During the days of food conservation, a fair start was made toward today's prominence of mechanical improvements of this sort. Among the most recent developments is the adaptation of Powers Regulators to the needs of our trade. The manufacturer of such devices has been recognized for something over thirty years in the mechanical, engineering and sales phases of temperature control. Their line includes practical equipment that has been tried and tested, applying proven principles of stabilizing temperatures, in drying rooms, kilns, corn driers, molasses heaters, and such tanks and vats as used in feed stuffs plants. The varied styles regularly manufactured and furnished with short or long leads depending on the requirements of our trade are supplemented by such special equipment as occasion demands.

Manufacturers and plant operators who are interested in temperature and heat control will be furnished some extremely interesting data if they will submit the sort of processing jobs wherein such equipment is needed to the Powers Regulator Co., 2774 Greenwood Ave., Chicago, Ill. The company maintains branch offices and competent engineers in some thirty-five large cities, and is at your service.

Powers Regulator Attachment on Ellis-Edwards Molasses Heaters.

For Sale at Favorable Terms Suited to the Buyer

For Sale the above modern, fully equipped elevator, 130,000 bu. capacity, located at Bryan, Ohio; in good grain territory, on New York Central and Big Four tracks between Toledo and Chicago, with receiving tracks on both sides, connected in the rear of elevator; a track scale. Equipped with car pulling system for the transfer of cars.

The plant is electrically equipped with purchased energy at low rate; two receiving legs, 2500 and 1600 bu. capacity per hour; a new Randolph Hot Air Grain Drier of 1000 bu. per hour capacity corn, 5% moisture; 1000 bu. per hour oat bleacher, with brand new boiler for steam heat and bleacher. Complete grain sacking plant, including two Richardson automatic scales and Union Special Sack Closing Machine. Gravity loading to cars, capacity one car per hour. All machinery in elevator is of large capacity for rapid handling of grain. Low operating cost for sacking a plant. The entire plant has been overhauled to meet fire underwriters' latest requirements.

A three-room brick office building and wagon receiving scales. The office includes a fully equipped laboratory for government weighing inspector.

RAYMOND P. LIPE, President

is retiring from the business which he established and has personally operated at Toledo and Bryan, Ohio. He is willing to sell the elevator at Bryan at considerable sacrifice in price and terms which can be arranged to suit the convenience of the buyer.

Mr. Lipe is personally handling the sale and solicits inquiries and offers at his Toledo, Ohio, office in the Second National Bank Building.

IMPORTANT! This elevator transits grain at Bryan, Ohio, from all points west, moving thru Chicago, Englewood, Indiana Harbor, Kankakee; also grain off the G. R. & I., Big Four-Benton Harbor Division; Vandalia moving via Butler; New York Central and all grain North and South on the Cincinnati Northern.

A most important advantage permits buying grain in Toledo, shipping it to Bryan, transiting same, moving it to Virginia Common points, the Carolinas, Georgia, Florida, etc. and getting the benefit of the re-shipping rate from Toledo.

THE RAYMOND P. LIPE CO., TOLEDO, OHIO

TickerLog

DAILY MARKET LETTER AND
SPECIAL WIRE SERVICE

314 TRADERS BUILDING
OPPOSITE BOARD OF TRADE

309 South La Salle Street, Chicago, Ill.

OVER THE TOP !!!

TICKERLOG astounds the grain world.

Beginning in June, 1924, TICKERLOG, the only National Grain service, day by day, week by week, and month by month, told of the sensationally bullish conditions underlying the market for wheat, corn and oats.

TICKERLOG left the "blackboard forecasting" to others; only on a few occasions did TICKERLOG point out the over-strained technical position of the market.

TICKERLOG literally carried its customers from the BOTTOM to the TOP.

When others were spreading, TICKERLOG said BUY wheat and corn. And on the day May wheat crossed \$2 per bushel, the market set by TICKERLOG for months, customers were FLASHED the warning that the bull market was over.

When wheat was at its very crest TICKERLOG boldly declared: "July wheat here (at \$1.72) is an investment short sale.

And wheat crashed down 20c per bushel in six sessions!

Paul S. Warden is now out in the Winter wheat belt, investigating Winter wheat condition, after the most dangerous Winter weather since the crop was 40 per cent ruined in 1916-17.

And Paul S. Warden, accredited the foremost crop and price authority in the world, will go to Europe June 1 to examine the crop in countries where the failure of 1924 lifted wheat prices \$1 per bushel in a few months.

Warden's reports, published exclusively in TICKERLOG, will have a vital bearing on the price of wheat, rye, corn and oats for 1925.

TICKERLOG, the national grain service, will continue to be the foremost authority on corn and oats.

TICKERLOG service consists of daily market letter and as many wires as your business requires.

One of TICKERLOG'S customers in Central Illinois makes the following statement:

"When I began TICKERLOG last Summer I decided to follow its price forecasts to the extent of just \$150. I literally began on a shoestring. Today I 'have the pair of new shoes'. In other words, my profits bought me a fine new sedan and swelled my bank balance just \$4,600. And, on TICKERLOG'S advice, I am out of the market now."

Another customer declares that he knows of a friend who plunged after getting \$8,000 credit. My informant says: "My friend actually owed \$125,000 when he entered the grain market last Summer as a TICKERLOG follower. He made \$300,000 and is now out of the market."

And, I should say he should STAY out of the market for the rest of his life.

TICKERLOG represents the outside grain man in Chicago where prices are made. Its service is NOT SOLD to anybody who lives in or near Chicago.

Not every man wants to plunge. The average grain man has to stay in the business whether it is a profitable or losing year.

Get right with TICKERLOG. Avoid the pitfalls and seize the few real opportunities that each year offers.

Do yourself and your business a favor by subscribing for TICKERLOG'S great daily service during the critical months that are just ahead.

The cost of TICKERLOG'S daily letter and special wire service is \$25 until July 1, 1925.

Make all checks payable to Paul S. Warden, 314 Traders Building, 309 So. La Salle Street, Chicago, Ill.

There is no other TICKERLOG. It stands unrivaled and alone.

Paul S. Warden

Terminal Markets

KANSAS CITY.

T. J. Tanner, Correspondent.

Directors of the Board of Trade, at their meeting Tuesday, elected to membership C. P. Cauthorn of the Hodgson-Davis Grain Co.

A. J. Strandberg of Strandberg, McGreevey & Co., brokers, attended the annual dinner of the New York stock exchange Friday night.

The Kansas City Board of Trade will adjourn February 12 for Lincoln's birthday and February 23, the day following the anniversary of Washington's birth.

Directors of the Board of Trade, at their weekly meeting Tuesday, adopted a resolution condemning the proposal to dissolve the Kansas City-Missouri River Navigation Co.

As pigeons were a nuisance at the old Board of Trade building, President H. C. Gamage has issued a request that members refrain from feeding the birds at windows of the new building.

C. W. Lonsdale of the Simonds-Shields-Lonsdale Grain Co., started to Washington Friday to attend the midwinter meeting of the United States Chamber of Commerce, of which he is a director.

W. H. Frazell, assistant secretary of the Board of Trade, has resigned, effective March 1, on account of ill health. He has been with the exchange for fifteen years. His successor will be C. W. Pershing.

G. Clinton Adams, who has been in the grain business at Winfield, Kan., for several years, has opened an office in the Board of Trade building, Kansas City. He is interested mainly in the seed trade.

Grain future trading in Kansas City made a new high record Friday, February 6th, the day of the big break in prices. The aggregate was 6,030,000 bus., including 4,329,000 bus. of wheat, 1,656,000 of corn and 45,000 of oats.

Creditors of the Atlas Cereal Co., Eighth and Santa Fe streets, Kansas City, have elected Joseph M. Jones as trustee. The company went into bankruptcy last May. According to a schedule filed in December, the assets were \$852,618, while the liabilities were \$251,566.

Visitors at the Board of Trade during the week included H. A. Abbott, Chicago; James Leary, Minneapolis; F. E. Davis, Tacoma, Wash.; W. K. Woods, St. Louis; F. E. Kramer, Topeka, Kans.; S. F. Stewart, St. Joseph, Mo.; W. B. Dunwoody, Joplin, Mo.; N. A. Talbot, Salina, Kans.; L. H. Powell, Wichita, Kans., and G. M. Cassity, Tonkawa, Okla.

W. P. Tanner-Gross & Co., Inc., have undertaken to operate the flour blending plant of the Radial Warehouse Co., in North Kansas City, Mo. About \$50,000 will be expended and the blending capacity will be increased to 5,000 bbls. a day. W. P. Tanner-Gross & Co., Inc., are a flour exporting concern. They were active in organizing the Radial Warehouse Co. after the failure of the Reserve Co., Inc., some months ago.

The Washburn-Crosby Co. of Minneapolis, which added more than 1,000,000 bus. to the grain storage capacity of its flour mill in Kansas City last year, is planning for a further enlargement of its flour and grain equipment. Tests of the ground adjoining the mill have been made. Nothing definite can be stated regarding the expansion, as the directors have taken no action, according to an interview with E. P. Mitchell, Kansas City, manager.

Kinds of Wheat Millers Want.

H. E. Weaver, chief chemist for the Larabee Flour Mills Corporation of St. Joseph, Mo., in addressing the short-course class in agricultural economics at the Kansas Agricultural College, said millers preferred Kansas wheat threshed from the stack. "Wheat direct from a combined harvester and thresher sweats too much," he continued. "If I had my way about it, I would recommend that a higher premium be paid upon wheat threshed from the stack, and that not so much on high protein content."

Mr. Weaver, in the course of his talk, declared that millers preferred the Turkey, Kharkof, and Kanred varieties, especially

emphasizing the first two. He added that Kanred seemed to possess the same desirable qualities as the two older varieties. Blackhull wheat, he said, contains too much bran and is too fibrous.

Wheat that tests from 58 to 60 pounds a bushel, that produces fairly thin bran, and is free from smut, he added, is the kind the miller wants. Wheat that is bin-burned is practically unfit for flour. Two years is too long to hold wheat, he said, because of its likelihood to burn.

January Weather in Kansas.

Although Kansas had almost a record number of sunny days last month for January, the month was one of the coldest in the history of the state, according to Weather Bureau records. Zero temperatures extended to all parts, with readings of 10 to 15 degrees below on several days in the north central and northwestern counties. The lowest record was 19 below on the 17th, near Burr Oak, Jewell County, and the highest, 68, at Ashland and Liberal, on the 25th. Average temperature, 26, was 3 degrees below normal.

Several eastern counties had from four to ten inches of snow, but the fall was light in the western third. The average for the eastern third was .60 inch, the middle third, .47 inch; the western third, .08 inch, and for the entire state, .38 inch, which is .30 inch below normal.

Wheat fared well under its snow blanket and the moisture from slow melting insured an ample supply for the remainder of the winter.

Cash Grain Markets.

Wheat—Receipts for the week, 517 cars, against 483 a week ago and 588 a year ago. Reflecting the drastic recession in futures, hard and dark wheat broke 15¢ a bushel, but there was a fair recovery on Saturday, when the speculative market turned up. Closing prices showed net losses of 1¢ to 16¢, with No. 1 ranging from \$1.78 to \$1.99, No. 2 at \$1.77 to \$1.99, No. 3 at \$1.77 to \$1.98 and No. 4 at \$1.75 to \$1.98. Buying for account of all interests was of a sparing and indifferent character most of the time. Naturally, the millers and others were desirous of waiting for the bottom. Premiums on protein qualities were easier. Export business was light, though Gulf bids were nearer a working basis late in the week than earlier. It was reported that more than half the local stock had been sold previously and would be shipped out as contracts matured. Advances from the country indicated the intention of farmers to continue marketing until the remaining small surplus was exhausted unless prices had a further big drop. The soft wheat offerings were light and the previous urgent demand was not in evidence. Prices fell even more sharply than in the case of hard and dark, and there was less recovery. At the close the net recession was 17¢ to 24¢ and quotations were: No. 1, \$1.98 to \$2.03; No. 2, \$1.98 to \$2.03; No. 3, \$1.90 to \$1.97; No. 4, \$1.90 to \$1.95. Stocks of wheat in Kansas City decreased 909,000 bus. to 10,693,000, as compared with 11,901,000 last year.

Corn—Receipts, 569 cars, against 467 a week ago and 712 a year ago. The increased movement brought a larger proportion of wet and soft corn, especially from northern territory, including South Dakota. Aside from elevator interests, there was a limited demand. Prices at the outset exhibited some strength, but the market later became weak with wheat. Buyers discriminated heavily against the high-moisture samples, and discounts were widened. Not much recovery was established when wheat turned up. The closing quotations were off 1¢ to 3½¢ on white, 3¢ to 4¢ on mixed and 2¢ to 4¢ on yellow. The best feeding demand was for yellow. Some white corn went to Texas mills. The industrial outlook in Kansas City was depressed by an announcement that the Corn Products Refining Co. had no plans for reopening its plant. Millers bought a few cars of white and yellow for meal manufacture. Feed mills were small takers of raw material. Local stocks increased 404,000 bus. to 5,944,000, against 1,500,000 a year ago.

Oats—Receipts, 125 cars, against 107 a week ago and 135 a year ago. This grain had a weak tone from the start, as storage people were practically the only buyers. Declines were constant, including a recession of ½¢ to 1¢ on the final day. White oats closed 2½¢ to 3½¢ lower than a week ago, with No. 2 at 58¢ and No. 3 at 57¢ to 58¢. Red seed oats dropped 2¢, to 66¢ for No. 2 and 64¢ for No. 3. Stocks increased 163,000 bus., to 2,352,000, as compared with 1,048,000 a year ago.

Kafir and Milo—Receipts, 166 cars, against 151 a week ago and 141 a year ago. Bearish atmosphere surrounding other grains paralyzed the trade in grain sorghums. Eastern manufacturers took only such supplies as were actually re-

quired and local handlers and storers allowed samples to drag from day to day. The week closed with a little better buying, but there was no recovery in prices. Kafir closed 16¢ to 20¢ per cwt. down, with No. 2 white at \$1.86 to \$1.88, No. 3 at \$1.84 to \$1.85 and No. 4 at \$1.80 to \$1.82. Milo lost 10¢ to 17¢, closing with No. 2 at \$2.02 to \$2.06, No. 3 at \$2.01 to \$2.05 and No. 4 at \$1.96. Stocks increased 166,000 bus. to 340,000, as compared with 151,000 a year ago.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

F. M. Spees, special representative of the Gruendler Patent Crusher and Pulverizer Co., St. Louis, was an Exchange visitor February 7th. He was formerly with Exello Feed Milling Co. here.

G. D. Estes, of the Mid-West Grain Co., Hutchinson, Kans., was a visitor on the St. Joseph Grain Exchange February 7th. He stated the wheat prospects appeared to be excellent at this time, and that the acreage is somewhat larger than a year ago. Farmers in the Hutchinson territory are hauling considerable wheat to market at the present prices, as road conditions will permit. Mr. Estes says there appears to be considerable wheat left in the country to market, probably 15 to 20 per cent in his territory.

Offerings of wheat and corn were liberal during the week ending February 7th. Wheat closed 13 cents under the previous Saturday on hard winter, and soft was 16 lower. Trade was a little improved toward the close of the week. Buyers have been taking only small quantities on the declining markets. Corn prices range 2 to 4 cents lower for the week, demand is principally from elevator and shipping firms, and sales have been somewhat slow. Oats offerings moderate; prices two cents lower for the week; demand fair.

Visitors on the St. Joseph Grain Exchange during the week ending February 7th included: H. L. Graham, Albany, Mo.; John Coughlin, Bigelow, Mo.; P. E. Field, Gower, Mo.; John Redman, Maysville, Mo.; C. Smith, Fortescue, Mo.; A. D. Saunders, Rea, Mo.; J. W. Dodson, Bigelow, Mo.; Wade Owens, Maysville, Mo.; T. N. Taylor, Maysville, Mo.; Chas. Hagerman, Diller, Neb.; A. P. Maupin, King City, Mo.; M. L. Batson, Fortescue, Mo.; S. E. Persinger, McFall, Mo.; H. E. Brunner, Turney, Mo.; W. S. Bird, Denton, Kansas; W. W. Gelvin, Cameron, Mo.; O. V. Perry, Clyde, Kans.; G. D. Estes, Hutchinson, Kans.; F. M. Spees, St. Louis; P. O'Connell, Plattsburg, Mo.

Receipts and Shipments.

Receipts and shipments of grain, St. Joseph, Mo., for the month of January, 1925, with comparative figures for 1924. (Figures are in bushels):

Receipts.	1925.	1924.
Wheat	1,261,400	457,800
Corn	1,468,500	957,000
Oats	122,000	62,000
Rye	3,000
Barley	7,000	7,000
Kafir	1,500
Milo Maize	1,500
Total	2,860,400	1,488,300
Shipments.		
Wheat	534,800	169,400
Corn	811,500	699,000
Oats	54,000	60,000
Total	1,400,300	928,400

VANCOUVER, B. C.

Morwood Clark, Correspondent.

Exports of wheat and flour to Japan through this port continue to increase. This trade has developed since the establishment of the first government elevator but only assumed considerable quantities in 1922 when the exports of wheat were 3,516,401 bus.; in 1923, 3,048,533 bus., while in 1924 they had increased to 7,664,162 bus. Wheat flour also shows very favorable increases. This commodity is winning popularity in Japan according to official figures. In 1920 the exports of wheat flour to Japan were 500 barrels; in 1921, 505; 1922, 65,948; 1923, 165,980, against 32,176 in 1924. This very serious falling off is explained by the fact that Japanese millers were not slow to "size up" the situation, and have greatly increased the capacity of their milling plants. For instance, the Nippon Flour Co. has just completed their Yokohama mill of 3,000 bbls. capacity which was designed, built and equipped with the latest machinery by Nordyke & Marmon of Indianapolis, Ind.

One of the outstanding features of this new mill is the system of handling wheat in bulk, which is an innovation to the general practice in the Orient, where it is customary to move all grain in sacks. Wheat will be automatically landed from the ships by means of a pneumatic arrangement by which it will be carried to a tower and then stored in silos. A three-story warehouse is provided for mill products and loading will be carried out by belt conveyors. This mill development, which is but the precursor of other expansions now

in contemplation, will lead to greater exports of Canadian wheat via Vancouver and will naturally further curtail the exports of wheat flour in barrels. The Nippon Milling Company has now a total capacity of over 10,000 barrels daily from its nine mills.

Mr. George McIvor, manager of the Calgary office of James Richardson & Son of Winnipeg, was in this city a few days ago.

Mr. McIvor is favorably impressed with the elevator accommodation now provided and says he will route as much grain as possible through this port. His company shipped 25,000,000 bus. of grain last year to Vancouver for various world ports, and this year has consigned more than any other grain firm using the route.

Mr. McIvor is likely to be the next head of the Alberta wheat pool.

Bulk wheat continues to move out of this port to the United Kingdom only in parcel lots, while charters for the Orient are a nonentity. Owing to the recent world excitement in wheat dealers here are frightened to quote "firm" prices for future delivery and the Orient is unable to bring its buying ideas up to the prices quoted here for Canadian wheat, so that, at the present there is practically little wheat going that way.

NEW YORK

J. M. Nugent, Correspondent.

William Guinter has joined the organization of T. T. Hunter, freight broker, and will represent him on the Produce Exchange floor.

Robert B. Gentles is now associated with B. V. McKinney and will represent him on the floor of the Produce Exchange in the conduct of his grain brokerage business.

During the past week, the following gentlemen visited the floor of the New York Produce Exchange: A. L. Green, E. Ekman, F. E. Alstrin, F. A. Fergerssen, Sam Mincer and F. Sexton, all of Chicago; also R. V. Biddulph and N. Wight, both of Montreal, and C. G. Smith, of Winnipeg.

There was some improvement in the foreign demand for wheat during the week, as the sharp break in futures in the Chicago and Winnipeg markets attracted buying by export interests. Total sales of wheat for the week were roughly estimated around five to six million bushels. The bulk of the business appeared to be in durums and American spring wheats, but there was also a fair trade toward the close of the week in Manitoba wheats.

Flour Situation.

New York, Feb. 7.—There was a reduction of about 50¢ per barrel in both spring and winter wheat flours during the week to correspond with the drop of some 20¢ per bushel in wheat. With this break, the consuming demand slowed up materially.

Export buying for Greece and Germany, as well as heavy sales abroad to Russia by the United Kingdom and Germany and France, featured the market.

Spring patents were quoted at \$9.60 to \$10.25; soft winter straights, \$9.75 to \$10, and hard winter straights, \$9.50 to \$9.85 per 196 lbs.

LOS ANGELES, CALIF.

C. G. White, Correspondent.

David Robbins, grain dealer, of Salt Lake City, Utah, was a visitor on the floor of the Exchange one day this week. Mr. Robbins is combining business and pleasure while in Southern California.

A. A. Townner, representative of the Red Star Milling Co., Wichita, Kansas, was a visitor on the floor of the Exchange one day last week as the guest of Strauss & Company. Mr. Townner spent several days in Los Angeles calling on his clients and renewing old acquaintances.

Another Lodge of the "Ancient Order of Fleas" was instituted in the rooms of the Los Angeles Grain Exchange last week. President Wilber reports a membership of 23 and several applications for membership will be presented at the next meeting. Grain men only are eligible.

The Sunset Milling & Grain Co. moved this week to their new elevator, located at 417 South Clarence Street. This elevator has a bulk storage capacity of 110,000 bu. in addition to two floors used for sacked grain and is completely equipped with modern machinery for the manufacturing of various mixed feed and conditioning grain. The new plant will be under the management of O. H. Blasingham and L. M. Harris, Assistant Manager, formerly of the Crescent Flour Co. of Denver, Colo.

Cash Markets.

While there has been considerable activity in the market at this point, the prices have practically remained the same. The month ending January 31st shows the largest receipts for grain and grain products of any one month since the organization of the Grain Exchange in 1913. There has been 1,744 cars of grain, seed and mill products arrived and at the close of the month there are but few holdovers. The wheat prices have stiffened somewhat, yet

mill feeds, bran and mill run have shown practically no change and are quoted at from \$1.00 to \$1.50 less than one week ago. Utah-Idaho mill run has sold at \$41.00 per ton, while some Kansas bran has changed hands at \$40.00. Alfalfa products are firm at \$32.00 for medium ground, dry meal and \$30.00 for alfalfa and molasses mixed. There has been a strong demand for cottonseed meal now for two or more weeks and the product is selling for \$47.00 per ton. Rolled barley is firm at \$57.00 and milo and kafir are selling at from \$2.50 to \$2.60 per hundred for eastern shipments, local or Imperial Valley milo are bringing a premium of from 10 to 15 cents over eastern grains. No. 3 yellow corn is unchanged at \$2.67½ to \$2.70; No. 2 on a basis of 5c over. No. 2 Western cleaned wheat, sacked, is quoted at \$3.50, while No. 2 hard winter, is selling at \$3.55 to \$3.60. Barley has shown a little weakness and California grown is being offered at \$2.65 with \$2.55 bid. The hay market has remained unchanged, although there has been heavier receipts than usual. No. 1 alfalfa, locally grown, is quoted at \$31.00 firm, while Imperial Valley and Arizona alfalfa are selling at \$28.00. No. 2 is quotable at \$2.00 less per ton. There is a fairly strong market for barley hay at \$29.00 and No. 1 oat hay is selling at \$31.00 per ton.

TOLEDO.

S. M. Bender, Correspondent.

Toledo flour stocks February 1 were 36,880 bbls., compared with 34,000 bbls. the month before and 35,000 bbls. a year ago.

Receipts of grain last week were 156 cars of wheat, 116 cars of corn, 87 cars of oats, 3 cars of rye, and 1 car of barley. Total, 363 cars.

Grain inspections for the month of January were 236 cars of wheat, 385 cars of corn, 257 cars of oats, 14 cars of rye and 1 car of barley. Total, 893 cars.

Flour production of Toledo Mills the past week was 32,300 bbls., equal to 67 per cent of capacity. The week before it was 29,000 bbls. and a year ago last week was 29,000 bbls.

Kent Keilholtz of Southworth & Co. and Dave Anderson of the National Milling Co. and their families have sailed from Havana for New York and will return to Toledo about February 10.

The Edgerton elevator at Edgerton, Ohio, has been making several improvements, among which is the addition of two bins, one for wheat and one for oats. Other labor-saving devices will be added later.

Premiums for all cash grains were lower this week. The demand has shown signs of lagging for some time and the recent weakness in futures brought forth a marked dullness. High prices brought out the grain and at two dollars farmers were free sellers of wheat. Soft wheat has declined faster than the futures, but should return to its premium after the present movement subsides.

Announcement of the retirement of Raymond P. Lipe from the grain and hay business was made this week. The firm will be dissolved on March 1, and Mr. Lipe and his family will spend most of the next year traveling in Europe. Louis Schuster and Arthur Cummerow will join the C. A. King & Co. in which firm they will carry on their respective lines of work. Members of the exchange regret deeply the loss of this prominent member and his jovial manner will be greatly missed. R. P. as he has been familiarly known to all, is one of the few who having become immensely wealthy, retains that camaraderie which is a distinguishing mark of the true gentleman.

DULUTH.

S. J. Schulte, Correspondent.

Charles F. Haley, manager A. D. Thomson & Co., is spending a vacation at Miami, Fla. He was accompanied down there by his son Charles F. Haley Jr.

The movement of grain was in larger volume on this market during the last week and stocks in the elevators gained over 1,000,000 bushels leaving the available storage space at around 5,000,000 bushels of which the Consolidated Elevator system accounts for more than 4,000,000 bushels.

Stephen H. Jones, a former president of the Duluth Board of Trade, but now an operator on the Chicago Board of Trade, was a visitor on this market during the last week. He expressed gratification over the volume of business put through in the trade down there, and confidence regarding the outlook for the new season, provided no fresh restrictions are imposed as a result of fresh agitation by the radicals. "It looks as if the trade is going to have its swing on the next crop in view of the short time remaining for the present session of congress and the improbability of an extra session of the lawmakers at Washington," he said.

The Capitol Elevator Co. has completed moving out approximately 100,000 bushels of durum all-rail on an order from a miller. The movement was made largely in order to afford space to take care of some other storage business. On the present lineup of spot premiums, some of the holdings of spring wheat and durum in the elevators here are showing good profits to their holders so that more of that grain may be moved all-rail in the event of demand keeping up. Storage space is expected to be at a heavy premium on this market shortly however in view of the continued movement and the inability of getting vessels under the elevator spouts until the

ice begins to weaken in the harbor. Grain men claim it would cost around \$4,000 to move a steamer with the ice as it is now.

Receipts of grain at Duluth and Superior elevators during January aggregated 4,601,816 bus., as compared with 3,316,341 bus. last year. Comparative statement of receipts and shipments from the elevators during January, as compiled by Charles F. Macdonald, secretary of the Duluth board of trade were:

	1925	
	Receipts.	Shipments.

Totals

Flour Prices Off.

Trade was slow in flour on this market during the last week with jobbers holding their orders down. The market eased 90c in patents. Prices per bbl. in carlots at mill follow: Family patent, \$9.35; bakers' patents, \$9.10; first clears, \$7; second clears, \$5.50.

MEMPHIS.

George Williamson, Correspondent.

Receipts of corn for the week were 172 cars and of oats, 116.

E. F. Schafer, of the Manye Milling Co., Omaha, Neb., was a visitor on 'change Thursday.

W. T. Brooking, of the Marshall-Hall Grain Co., St. Louis, was a visitor during the week.

W. E. Meek, of the Meek Milling Co., Marissa, Ill., was registered at the Merchants Exchange this week by C. B. Stout.

Because it does not know to whom to pay a bill of \$396 for storage on a contract made with the All-States Feed Mills in 1924, which concern is out of business, the International Sugar Feed Co. has filed a bill in chancery. Five people are named as claimants.

Reports from all over this territory continue to tell of plans for increasing acreage to feed crops. Weather conditions recently have been favorable for outdoor work and where plowing can be done before the rainy season much has been done.

Business continues to drag, and the dealers here have large stocks of everything on hand. It is generally believed that scarcity of money is one of the main reasons for the slow buying, as credits are not being extended freely yet and most business done now is on a cash basis. The corn market is easy and quotations lower, but even the reduction in cost does not seem to increase feeding. Track 3 white corn is quotable at \$1.31, 3 mixed at \$1.26 and 3 yellow at \$1.32. Oats are just as dull and likewise are lower. Track 3 white are quoted at 60½c to 61c, with few buyers at that figure.

OMAHA, NEBR.

Leigh Leslie, Correspondent.

There was moderate activity in flour trade circles last week.

Earl A. Beardsley, for many years with the Merriam & Millard Co., and since that company went out of business, a grain broker in this market, is now with the M. C. Peters Milling Co.

William Olsson, with Logan & Bryan's Omaha office for many years, died at his home here recently, aged 50. Mr. Olsson had been connected with the grain trade in Omaha for more than twenty years. His brother Nate has taken his place in Logan & Bryan's office here.

As wheat goes up in price the hazards of the milling business multiply, says J. N. Campbell, secretary of the Nebraska Millers' Assn. In order to protect themselves, Nebraska millers are trying to limit forward sales to 30 days without too great sacrifice. "If the flour buyer is playing the game right," says Mr. Campbell, "he cannot demand that he be given long-time contracts with the expectation that the miller will good-naturedly absorb the losses on a drop. We have had enough of that sort of thing in the recent past, and are not so foolish as to put our necks back in the noose to have them stretched some more."

"Nebraska flour is as good as any in the world," said A. R. Kinney, president of the Nebraska Consolidated Mills, "and its reputation could be firmly established as such in all markets if our mills would exercise care to keep the quality of their out shipments up to the standard of the flour they sell to the trade at home. The practice

of manufacturing an inferior flour to be dumped on the markets of the east should cease. I am thoroughly convinced, too, that the practice of pricing good flour too low has prevented the making of sales, for to make an article too cheap in price creates the impression in the mind of the customer that it is cheap in quality also. Millions of bushels of our Nebraska wheat is shipped out to be milled in the northwest and in the east because the millers in those sections know that it makes high grade flour."

ST. LOUIS.

E. C. Dreyer, of the Dreyer Commission Co., has returned from a visit to the Chicago trade.

C. B. Denman, president of the St. Louis Producers Commission Co., has been elected president of the National Live Stock Producers Association.

Eugene Smith, who for many years has been secretary of the Merchants Exchange, and Charles Rippin, who for several years has been traffic commissioner, have been made secretary-traffic commissioners.

BALTIMORE.

Robert C. Neu, Correspondent.

Rufus E. McCosh, having transferred his activities to Los Angeles, where he has entered the flour business, has tendered his resignation as a member of the Baltimore

G. Stewart Henderson, traffic manager of the Baltimore Chamber of Commerce, has been named general secretary of the joint committee in charge of the port differentials matter.

The name of George J. Turner, insurance man, is posted on the official bulletin board of the Baltimore Chamber of Commerce as an applicant for membership in this organization.

The steamship "Olson" is loading a full cargo of flour, about 52,000 barrels, at the export terminals of the Baltimore & Ohio Railroad Company, Locust Point, this city, for shipment to Russia.

A school in the grading of grain sorghums will be conducted in Baltimore for four days beginning February 10 by B. Rothgeb, of Washington, D. C., identified with the Agricultural Department.

At the regular monthly meeting of the Board of Directors of the Baltimore Chamber of Commerce on February 9 the various standing committees to serve during the coming year will be elected.

All of the grain inspectors and grain weighers attached to the Baltimore Chamber of Commerce were re-appointed for another year at the last regular monthly meeting of the Board of Directors of this organization.

At a dinner of the Baltimore Flour Club at the Emerson Hotel on the evening of February 4 the following were appointed as the nominating committee to select the various officers of the Club for the coming year, viz., Stanley G. Erdman, A. W. Mears, and Robert C. Neu.

Exports of flour and grain from the port of Baltimore during the month of January, 1925, with comparisons for same month last year, follow:

	January,	January,
	1925.	1924.
Flour, bbls.	45,103	44,778
Wheat, bus.	898,820	1,860,361
Barley, bus.	573,018
Rye, bus.	347,535	17,316

Out-of-town visitors on the floor of the Baltimore Chamber of Commerce last week included Fred Burrall, field manager of the Wichita Flour Mills Co., Wichita, Kans.; H. D. Garst, Bluefield, Va.; M. W. Gerlach, of the Montana Flour Mills Co., Lewiston, Montana; Geo. E. Breault, of Michigan.

OKLAHOMA CITY, OKLA.

W. F. Kerr, Correspondent.

The Farmers Elevator Co. at Wakita, Okla., is reported to have sold its plant to the Deer Creek Elevator Co. of Deer Creek, Okla.

A few weeks of vacation in Louisiana, Florida and the West Indies is being taken by W. B. Johnston and C. W. Goltry, Enid grain dealers, and their wives.

Flour jobbing has been made a part of the business of the Enterprise Seed Co. of Oklahoma City, which now occupies the former plant of the Plansifter Milling Co.

The charter of the Covington Milling Co. has been forfeited for non-payment of a corporation license tax, according to a notice published by the Corporation Commission.

C. W. Offutt, former Oklahoma City real

estate dealer, has become a member of the Offutt-Steffey Seed Co. of Oklahoma City. The concern, in addition to seed, carries the Quaker Oats Co. line of poultry feeds.

A delegation of Oklahoma millers, headed by President Lloyd Ford and Secretary Frank Foltz of the Oklahoma Millers' League, will attend a conference of Southwestern millers at Wichita, Kans., Feb. 11.

Oklahoma mills last week sold flour in Holland and Liverpool, their shipments being the first of the year under new orders. They paid export prices for hard wheat and were enabled to meet European competition in flour. Millers reported a good business in January and increased bookings the first week of February.

Charles McIntyre of Renfrow, J. R. Thomas of Carnegie, Harry Hunter of Okarche, Carl Cassidy of Frederick, Oscar Dow of Piedmont, Frank Wheeler of Wa-

tonga, and W. O. Wheeler of Weatherford were among Oklahoma grain dealers that recently were Oklahoma City Grain Exchange visitors.

Representatives of packing industries in Northwestern Oklahoma say that these industries in Oklahoma City must have better facilities for receiving cattle, sheep and hogs from this territory if they are to operate at a profit. That is the substance of what Thomas Wilson, the Chicago packer, told Oklahoma City business men recently in a series of speeches.

Support of Oklahoma City's efforts to secure a railroad direct into Northwest Oklahoma will be given by grain dealers and flour millers of that part of the state, as well as by those engaged in the livestock industry. Oklahoma City is said to have become one of the best grain markets in the Southwest and millers, particularly feed millers, desire better facilities for reaching the central and eastern sections of the state.

C. B. Cozart of Amarillo, former Oklahoma City grain dealer, who was here last week, reported that he had handled about one million bushels of kafir and milo maize raised in the Texas Panhandle, and that 85 per cent of it had gone to California and sold principally to those engaged in the poultry industry. He reported that early in February there was a slow movement of wheat, corn and oats in the Texas Panhandle.

In touring Western Oklahoma during the first week of February a field man of a grain concern found that 90 per cent of the growers had sold all their wheat. Heavy marketing by growers was done during that week. Many of these made deliveries to the Oklahoma Wheat Growers' Association. This man found that 90 per cent of the growers he called on are members of the association and that the number who have dropped out of the association is small. A membership campaign is being conducted by the association officials.

Wheat seed expansion and spreading as a result of winter freezes may cause a larger production of wheat in Oklahoma than had the grain passed through a mild winter. This is the belief of W. C. McDonald, of the Cordell Milling Co., who for fifty years has been an observer of wheat conditions as a flour miller in the Middle West. He asserts that the weather of January was the best for wheat that he has experienced in Oklahoma. That wheat was not damaged seriously by freezes in Western Oklahoma and the Texas Panhandle is shown by early February reports of growing condition. In nearly every place growth of the grain has revived, even where it appeared to have been killed entirely.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending February 6 were: Wheat, 813,906 bus., and rye, 82,750 bus.

Receipts of flour and grain for week ending February 7 were: Flour, 68,721 bbls.; wheat, 713,287 bus.; corn, 25,378 bus.; oats, 21,662 bus.; rye, 68,715 bus., and barley, 18,025 bus.

Exports of flour during the month of January, 1925, were 59,039 bbls., compared with 33,669 bbls. in December, 1924, and 35,889 bbls. in January, 1924.

Exports of wheat in January, 1925, were 4,899,942 bus., compared with 4,002,726 bus. in December, 1924, and 3,176,360 bus. in January, 1924.

Exports of corn none in January, 1925, or December, 1924. In January, 1924, there were 197,143 bus. and 964,433 bus. in 1923.

Exports of oats in January, 1925, were none, compared with 39,866 bus. in December, 1924, and 10,000 bus. in January, 1924.

Exports of rye in January, 1925, were 154,286 bus. and 223,137 bus. in December, 1924. Exports of barley in January, 1925, were 99,339 bus. and 101,191 bus. in December, 1924.

Stocks in Philadelphia public warehouses on February 1, 1925, were 125,170 bbls. of flour, compared with 146,273 bbls. January 2, 1925, and 165,732 bbls. February 1, 1924.

Stocks of wheat February 1, 1925, were 2,407,662 bus., compared with 2,625,323 bus. on January 2, 1925, and 1,851,203 bus. February 1, 1924.

Stocks of corn February 1, 1925, were 139,314 bus., compared with 76,022 bus. January 2, 1925, and 419,334 bus. February 1, 1924.

Stocks of oats on February 1, 1925, were 170,490 bus., compared with 115,501 bus. January 2, 1925, and 122,620 bus. on February 1, 1924.

Stocks of rye on February 1, 1925, were 278,401 bus., compared with 194,232 bus. January 2, 1925, and 79,968 bus. on February 1, 1924.

Stocks of barley on February 1, 1925, were 1,396 bus., against 30,988 bus. February 1, 1924.

The following cars of grain were unloaded last month at Girard Point: Wheat, 1,594; rye, 21, and corn, 110. Total, 1,725 cars.

During the month of January there were unloaded at Port Richmond 1,022 cars of wheat, 60 cars of barley, 37 cars of rye and 2 cars of corn. Total, 1,121 cars.

Those unloaded at 29th street elevator were 29 cars oats, 9 cars mixed grains, 4 cars buckwheat, 6 cars corn and 1 car barley. Total, 49 cars.

Philadelphia Flour Market.

Philadelphia, Feb. 7.—Receipts of flour for the past week were 68,721 bbls. The market opened weak and lower in the early part of the week in response to a decline in wheat, but recovered later with the re-

action in the grain and closed firm. There is a fair inquiry for home consumption and millers are strong in their views. We quote, per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, western, \$9.75 @10.25; do, nearby, \$9.50 @10; hard winter straight, \$10.25 @10.75; do, short patent, \$10.75 @11.25; spring first clear, \$9.50 @9.75; do, patent, \$10 @10.50; do, short patent, \$10.75 @11; fancy spring and city mills patent family brands, \$11.40 @12. Rye flour, \$9.25 @9.75 per bbl. in sacks, as to quality. Buckwheat flour, \$4.25 @4.50 per 98-lb. sack.

SIOUX CITY.

All departments of the Chamber of Commerce Club rooms on the fourth floor of the Commerce building, with the exception of the offices of the secretary and traffic bureau will be closed on the evening of February 14 to allow the contractors to proceed with remodeling for the new Chamber of Commerce headquarters.

Strenuous protests against the pure seed bill introduced in the Senate by Senator Rigby, of Cedar county, have been voiced by seed dealers of Iowa. The bill would invalidate the seedmen's disclaimer of warranty, as a defense in suits for damages growing out of the sale of worthless seed. H. A. Jones, of this city; H. J. Kling, of Cedar Rapids, and A. M. Eldridge, of Des Moines, led the attack on the bill. The seedmen told the committee the elimination of the disclaimer would open up the way for countless damage suits where improper handling or growing conditions were responsible for failure of their seeds. It also was contended the proposed law would seriously injure the business of Iowa seed firms and give the dealers outside the state, which could not be so regulated, an unfair advantage. In the end, it was argued, much of the seed sold in Iowa is purchased by the dealer from Iowa growers and the bill would shift responsibility of the grower to the dealer. The measure also was attacked as an effort to compel the seed dealer to guarantee a crop, regardless of conditions beyond his control.

CINCINNATI.

George Mosbacher, Correspondent.

Stocks of grain held in Cincinnati elevators for the week ending Friday, Feb. 6, and previous week are as follows:

	Feb. 6, 1925.	Jan. 30, 1925
Wheat	319,574	257,714
Corn	238,587	204,191
Oats	231,270	197,001
Rye	2,772	4,721

Appointment of the following standing committees was announced Friday by Frank L. Watkins, president of the Grain and Hay Exchange: Grain inspection, E. B. Terrill (chairman), A. Bender, John H. Dorsel, Walter O'Connell, August Fenger and W. G. Stueve; hay inspection, F. W. Winkler (chairman), H. N. Atwood, Sherman J. Boss, William Fedders, Frank R. Maguire, Albert Heile and E. A. Smith; auction and call, F. F. Collins (chairman), Elmer H. Heile and D. W. Hopkins; weighing, A. H. Braun (chairman), F. J. Currus, George A. Dieterle, Robert Lee Early, D. W. Hopkins, Harry E. Niemeyer and B. H. Wess; yard board of governors, Harry E. Niemeyer (chairman), William Fedders and Lou McGlaughlin; custodian department, Elmer H. Heile (chairman), F. J. Currus and H. Edward Richter; entertainment, Harry E. Niemeyer (chairman), Charles B. Hill and Earl F. Skidmore; finance, Ralph H. Brown (chairman), John De Molet and D. W. Hopkins; publicity, Lou McGlaughlin (chairman), Ralph H. Brown and F. F. Collins; traffic, F. W. Scholl (chairman), Henry M. Brouse, C. S. Custer, H. Edward Richter and E. B. Terrill; discount, A. C. Gale (chairman), C. S. Custer and W. G. Stueve; corn, E. B. Terrill (chairman), F. J. Currus and Charles G. Hagerty; oats, W. R. McQuillan (chairman), George Keller and Fred W. Scholl; rye and barley, Max Blumenthal (chairman), H. Edward Richter and Charles T. Schneider; constitution and by-laws, John De Molet (chairman), F. F. Collins and Dan B. Granger.

Shippers who are accustomed to consigning hay to the Cincinnati market, and who are at times dissatisfied with the results gained, are often inclined to overlook the fact that the law of supply and demand governs prices. This condition was furnished recently or during the month of January, when nearly 1,000 cars were dumped on the market, due to over-marketing, with the inevitable consequence of a bad break in prices. While it cannot be disputed that Cincinnati had a dull and draggy market with declines of about \$2 per ton, and that many shippers suffered severe losses, other markets were also swamped with more hay than there was a profitable demand for, but with greater reductions in values, amounting to as much as \$4 to \$5 per ton.

Cash Markets.

The wheat market was extremely dull, the sharp break being no inducement to

mills to buy, in fact mills were practically out of the market and were generally looking for further declines. As a consequence there was little demand for spot offerings and receivers showed more caution in making sales on the lower prices and sold only subject to the confirmation of shipper. Receipts were smaller and, compared with a week ago, prices about 14c lower. No. 1 red winter, \$2; No. 2 red winter, \$1.99; No. 3 red winter, \$1.95@1.98; No. 4 red winter, \$1.91@1.94; No. 5 red winter, \$1.86@1.91.

The corn market showed independent strength early in the week, and was materially aided by smaller receipts, but the decided weakness of wheat had its effect later and prices declined about 3c. The demand was slow because of the sharp and rapid option fluctuations, but at the lower basis the offerings were well absorbed. Industries and millers were good buyers, but elevators absorbed most of the arrivals. The congestion on tracks has been cleared. No. 3 white, \$1.26@1.27; No. 4 white, \$1.21@1.24; No. 5 white, \$1.17@1.20; No. 6 white, \$1.12@1.14; No. 3 yellow, \$1.27@1.28; No. 4 yellow, \$1.22@1.25; No. 5 yellow, \$1.18@1.21; No. 6 yellow, \$1.12@1.15; No. 3 mixed, \$1.24@1.26; No. 4 mixed, \$1.19@1.21; No. 5 mixed, \$1.15@1.18; No. 6 mixed, \$1.07@1.12.

The offerings of oats were limited, but the demand was slow and the market weak and about 2c lower. Mixed were almost unsalable. No. 2 white, 60½@61½c; No. 3 white, 58½@59½c; No. 4 white, 56½@57½c; No. 2 mixed, 58½@59½c; No. 3 mixed, 56½@57½c; No. 4 mixed, 53½@55½c.

PORTLAND, ORE.

Winter wheat has been badly damaged in some parts of the Northwest and Gilliam, Morrow, Wasco and Sherman counties report severe damage.

Corn trading is light in this section. The market is well filled up with Manchurian corn and the trade has more than it can absorb for the time being.

J. A. Eaves, president of the Todd Drydock & Construction Co., and well known here, has been elected president of the Tacoma Chamber of Commerce.

A bill is now before the state legislature providing for a credit of \$1,500,000 to be loaned to farmers in the frost devastated areas for use in the purchase of seed. The loans are to be secured by a first mortgage on the 1925-1926 crops and are to bear 6 per cent interest.

The directors of the Merchants' Exchange have re-elected the 1924 officers to serve during this year. They are: F. E. Shull, president; C. E. Dant, vice-president; J. C. Settle, secretary, and R. B. Wilcox, treasurer. Geo. A. Westgate was reappointed manager.

Strong resentment is being shown over the recent appointment made by Governor Pierce of new members of the commission of the Port of Portland. The new commission, which does not take office until June 1, consists of J. W. Ganong, C. E. Lewis, G. M. McDowell, Jefferson Myers and D. C. O'Reilly, and a bill has already been introduced in the legislature divesting the governor of power to appoint the members of this department. This commission, among its other tasks, manages the municipally-owned elevator.

More trading in wheat has been in evidence during the past week than for some time past and prices are getting to the point where it is believed holders will be free sellers. A rumor was current the early part of the week that two cargoes of Australian wheat had been sold to come to the Pacific Coast, and while the market for a few days was on a workable basis, it is believed that if bought it would go to California. It seems hardly possible that importers could overcome the duty of 42c per bushel.

Terminal receipts in cars were reported by the Merchants' Exchange for the season to Jan. 31 as follows:

	Wheat	Bar.	Flour	Corn	Oats	Hay
Portland ..	12,906	485	1,144	446	489	1,380

MILWAUKEE.

D. K. Steenberg, Correspondent.

The Hottelet Co., which had been in the dairy feed business since 1891, has gone out of business.

Upon application of the Grain Marketing Co., the board of directors of the Chamber of Commerce have designated St. Paul elevator E, which has a capacity of 700,000 bus., as a registered storage house.

Shipments of cash grain from Milwaukee last week were 153,300 bus. oats, 96,625 corn, 135,226 barley, 32,350 wheat, 14,590 rye; total, 432,091 bus., against 559,370 the preceding week and 632,930 a year ago.

Milwaukee cash grain markets are now being broadcasted each evening at 6 o'clock by the School of Engineering, WSOE. A. E. Bush, of the Bush Grain

Co., is chairman of the committee having the matter in charge.

Receipts of cash grain at Milwaukee last week were 192 cars barley, 311 corn, 148 oats, 47 wheat, 43 rye, 20 flax, 14 miscellaneous; total, 735 cars, against 737 the week before, 654 a year ago and 856 in 1923.

The steamer William A. Reiss was loaded with 250,000 bus. of corn and oats for shipment with the opening of navigation at the Kinnickinnic elevator of the Northwestern road, operated by Donahue & Stratton.

Milwaukee milling output last week was 6,700 bbls. as compared with 6,900 the previous week and 3,000 last year. Receipts of flour at Milwaukee last week totaled 19,162 bbls. as compared with 20,300 last year, and shipments were 19,780 bbls. as compared with 8,740 last year.

With its January issue, Doings in Grain at Milwaukee, monthly publication of the Milwaukee Chamber of Commerce, completed its thirteenth year. The magazine is edited by Harry A. Plumb, secretary-treasurer of the Chamber, and ranks as one of the finest local grain publications in the country.

Lower prices prevailed in the Milwaukee cash grain market during the past week, wheat showing decline of 14@15c for the period, rye 13@14c, oats 3½@4c, and barley 3@4c. Corn closed unchanged to 2@3c better basis for lower grades. Receipts were fair and demand fairly active except for wheat, which ruled fair.

The C. M. & St. P., by means of supplement No. 4 to I. C. C. B. 5703, now permit mixing, storing, sacking or repacking grain and grain products from Council Bluffs, Omaha, Kansas City, etc., when destined to points in Wisconsin and for ex-lake points via Canada-Atlantic Transit, Great Lakes Transit or Rutland-Lake Michigan Transit Cos.

C. R. Decker, vice-president of the Chase Bag Co., was recently reelected vice-president of the Milwaukee Association of Commerce. Announcement has also been made that Mr. Decker has again assumed charge of arrangements for the association's annual booster tour which this year will be taken by boat and provides for stops at all the larger ports around Lake Michigan.

A meeting of the Mid-West Regional Advisory Board, composed of shippers of the states of Wisconsin, Iowa, Illinois and a portion of Indiana and the upper peninsula of Michigan, will be held at Milwaukee some time during the coming July. J. L. Bowlus, alternate general chairman of the board and transportation manager of the Milwaukee Chamber of Commerce, has announced that special efforts will be made to attract the agricultural people to the meeting.

Wisconsin residents who visited at the Milwaukee Chamber of Commerce during the past week included: R. J. Miller, of Madison; W. G. Stoddart, of Markesan; Paul Siebold, of the Mischicot Roller Mills; Charles R. Stier, of the Gresham Milling Co.; W. Brunnette, of Green Bay; Joseph Straub, of the Lomira Elevator Co.; G. W. Wagstoff, representing the Russell Milling Co. of Minneapolis at De Pere; Harry Emmons, of Pewaukee; F. Stillmacher, of Fairwater; Theodore Edwards, of McFarland; G. Larson, of Spencer; A. Post, of Horicon; T. Swan, of Muckwanago; Joseph Wagner, of Beaver Dam; T. R. Evenson, of the Monroe Roller Mills; John Voelzke, of Milton Junction, and F. W. Andersen, of Chippewa Falls.

MINNEAPOLIS.

H. A. Paul, Correspondent.

Dave Fuller of the A. L. Goetzmann Co. has returned from a month's stay in California.

R. L. Groff of the Minneapolis Milling Co. has returned from an extended trip in the East.

Roy Purchase of the Commander Mills, located at Philadelphia, was a visitor at his home office here this week.

"Tom" Cassidy, well known to the Northwest grain trade through nearly forty years' connection with Chas. E. Lewis Co., has been voted a full partnership.

The Continental Baking Co. has bought a piece of property, half in Minneapolis and half in St. Paul, at Bedford and University avenues, where it will erect a bakery.

The Minnesota Farmers-Grain Dealers' Ass'n meets in Minneapolis on Feb. 17, 18 and 19 at the West Hotel. The officers expect an unusually large attendance this year.

Reports from the country show that cash receipts will be lighter for a short time at least. Northwestern receipts for the week were 2,032 cars vs. 2,395 a week ago and 1,539 a year ago.

Arthur Hastings, connected with the N. W. Consolidated Milling Co. for a number of years and lately with the Commander Milling Co., has opened an office in the Flour Exchange, jobbing in mill-feeds.

Although the opening of navigation on the Great Lakes will not be for some months, grain men here are beginning to

inquire about space, and vessel owners in Duluth are asking 4 cents a bushel on wheat from that port to Buffalo.

The past week saw one of the most turbulent markets in the Minneapolis pit since the war days. Last Friday, local May hit the high mark of \$2 and has not been within speaking distance of it since. Between this figure and the low of the current week, there is a spread of 23c, which most certainly should justify the above statement.

The Tri-State Grain Shippers Ass'n held its annual convention at the New Nicollet Hotel on the 5th. One of the most interesting features of the program was the expose of some of the legal phases of the Minnesota co-operative marketing law by Joseph Moonan, well known southern Minnesota attorney. Mr. Moonan showed the utter injustice of any law which makes the country elevator manager "his brother's keeper" by making the grain man the "goat" when a farmer breaks his pooling contract. The pool agreement is between the farmer and the pool and this is the only form of contract known on which the obligation for the strict keeping within the bounds rests on a third party and not only that but makes this third party pay a fine of \$500 in case he should even inadvertently purchase pooled wheat.

Cash Markets.

Wheat—Minneapolis cash grain houses reported sales aggregating close to a million bushels of wheat, both spring and durum, worked for export during the past seven days. Stocks for the week show an increase of 270,155 bushels vs. 256,767 last week and a decrease of 430,361 a year ago. Local mills were taking some wheat early in the week for shipment to Duluth, and Friday they picked up a quantity of low protein stuff. Saturday the tone of the

Grain Merchants

DULUTH and NEW YORK

market firmed up somewhat and with offerings lighter and shipping demand better, higher comparative premiums were paid for much of the receipts. No. 1 hard spring was quoted at 14½c over the May delivery; No. 1 dark northern at 2c under to 40c over and No. 1 northern at 4c under to 35c over. There is more durum coming in but a better demand absorbs the offerings in nice shape. Today No. 1 amber was selling at 6c under to 20c over Duluth May and No. 1 at 10c under to 14c over.

Corn—Early in the week demand for most all grades was fair but as the week progressed dry corn was about the only kind that was in any kind of request. The advent of the warm weather was, of course, to blame for this state of affairs. Spring is not here yet and with the return of more seasonable temperatures and its consequent reduced shipping and handling risk, there may be an improvement in the demand for the high moisture content corn as well as the low test. Today, No. 3 yellow was sold at 10½c under Chicago May; No. 4 at 16½c under, and No. 5 at 22½c under. No. 3 mixed quoted at 16½c under, No. 4 at 25½c under, and No. 5 at 29½c under.

Oats—As in the case of corn, oats enjoyed a fair demand early in the week but this slumped off later. Demand proved rather limited and offerings became too heavy for the demand to absorb. No. 3 whites brought as high as 2½c under the May Monday and Tuesday but today the bulk of the sales were made at 3½c under.

Flax—Offerings of flax were heavy one day and light the next but the crushers seemed to want good quality seed whenever they could get it and paid right for it. Poor quality was slow sale, however. Today's sales showed No. 1 going at May price to 3½c under the May

WINNIPEG.

Geo. H. Measham, Correspondent.

The week has been one of great nervousness and excitement in grain circles but closed with markets on a better footing and on a stable foundation. Friday witnessed a drastic break in all commodities. Prices declined so rapidly that stop loss orders were impossible of execution and confusion resulted. As a fact prices were depressed further perhaps than the occasion warranted due entirely to the pressure exerted by speculative longs who saw their profits vanishing with every tick of the clock.

On Saturday came the reaction—a firm and orderly market with good support from the export houses. Winnipeg wheat is

now in line for export business and prices will not decline as long as the United Kingdom and continent will purchase supplies at present figures. Our market reporter, Geo. H. Measham, who has been for fifteen years at that particular line of work sums up the situation as follows:

Would judge that the actual commercial value of wheat on a world market basis our No. 1 Nor. is good for \$1.95 to \$2. This is a wide spread but likely to narrow from now on. Markets on this side have been overbought and on the other side underbought. There is plenty of wheat on passage and world's shipments large. For the next month Europe is provided for. But the nearer we come to the new crop the less of the old crop is available. The world knows what actual wheat there is between now and the time the winter wheat crop will come on the market for consumption. The adjustment will be close but there is enough. Consequently importers will fight hard against further advances. Holders will struggle for a rise the mean looks like \$2 wheat for the present.

The new crop begins to loom up as a factor but it will be another three weeks before reliable news as to condition and acreage of the United States winter wheat is available. Bad prospects will have a bullish effect the world over. Good prospects a bearish effect.

The speculative element has undoubtedly been cut down by the breaks during the week but it is still an important factor in the market. But speculation cannot hold up prices above the consumptive demand or depress them unduly. The events of the week have brought this lesson home. The export and milling demand eventually bring about an adjustment to true levels.

Oats have held steadier than other grains. Visible supplies in Canada and in the United States are very large and the consumptive demand slow. Canada had a short oat crop but the world crop was large. Export demand is quiet. High grade oats for milling and seed are, however, none too plentiful and a widening of the spread between the top grades and the feed grades is probable as the season advances.

Barley has been in good demand from

PEORIA, ILL.

Oats receipts were 8 cars. The market was quiet with very little change.

Cattle and veal calves were unchanged with a top of \$12 and down. A few early sales on choice calves were made at \$12.50. Receipts were very light.

A light run of corn is expected at this market the coming week from Illinois. Country roads are breaking up and in many places reported bad.

Grain dealers from all over Illinois, numbering about 250, will be in Peoria Feb. 10, 11 and 12 to attend the twenty-second annual convention of the Farmers' Grain Dealers' Association. Some of the leading authorities on grain problems in the central west are coming to make addresses.

Hogs at local yards Saturday were quoted 5 cents higher, with a top of \$11.05 paid for best heavy and medium weights. Receipts were 1,500 head. Trading was active and the Peoria market is considered strongly in line with other markets. Light hogs, \$9.80@10.90; medium, \$10.80@11.05; heavies, \$10.90@11.05; packers, \$9.75@10.25.

James T. Dunlea, 68 years old, prominent live stock commission man and member of Fifer & Co., died suddenly at 10 o'clock Saturday night of heart disease. Mr. Dunlea had been connected with Fifer & Co. for the last forty years. He was at one time engaged in the grain business and was widely known throughout central Illinois among grain dealers and stockmen.

Corn receipts at this market remain fairly liberal with 74 cars. Saturday the demand was spotted and the market was irregular with sales ranging 1 cent lower to 1 cent higher. There was a fair demand. No. 4 yellow, \$1.17; No. 5 yellow, \$1.12@1.14; No. 6 yellow, \$1.09@1.10; No. 4 mixed, \$1.15; sample yellow, \$1.06; No. 4 yellow, \$1.17@1.18; No. 5 medium, \$1.12; sample, \$1.07½.

Grain receipts and shipments at Peoria for week ending Saturday, Feb. 7, as compared with same week last year, as reported by secretary of Peoria Board of Trade:

Receipts—	1925.	1924.
Wheat	10,800	13,200
Corn	488,700	238,000
Oats	264,600	199,000
Barley	26,600	21,000
Flour	790,700	471,800
Shipments—	1925.	1924.
Wheat	12,000	10,800
Corn	337,350	148,650

CHICAGO

Last Friday's trade in wheat aggregated 125,561,000 bushels, the largest on record, and the total in all grains was 191,208,000.

Flashlight photographs are a common occurrence these days to show the public something of the machinery and general activity on the board.

President Carey of the Chicago Board of Trade is spending a well earned vacation of a month or so in Florida expecting to be back on the floor late in March.

The Board of Trade Fellowship Club held its annual banquet at the Hotel La Salle on Saturday evening. S. P. Arnot, Frank

SAN FRANCISCO.

Receipts and Stocks.

The San Francisco Chamber of Commerce, Grain Trade Association section, reports by J. J. Sullivan, chief inspector, the following stocks of grain in tons of 2,000 lbs., etc., and beans in sacks, on hand first day of each month named of the years 1924 and 1925, at Port Costa, Stockton and San Francisco, as follows:

JOHN E. BRENNAN & CO.
CHICAGO

Comerford and H. A. Rumsey were the speakers.

Jas. E. Bennett is again and properly raising the issue relative to the desirability of a March delivery. This would offset the present disadvantages of the lapse between the December and May deliveries.

Among applications for membership in the Chicago Board of Trade are: Julius Seligman, Jiichi Inouye, Raymond F. Smith, Edmond D. Ledyard, Jas. A. Gallagher, Jas. J. Godfrey, B. G. McClanahan, Andrew R. Marquis.

Included in the applicants for solicitor is J. W. Harwell of the Taylor Grain Co., Omaha.

Joseph Wilshire, acting president of the Fleischmann Co., has wired President Carey of the Board of Trade, denying that the late Julius Fleischmann was interested in wheat, or that any recent sales had been made for his account.

The Illinois Ticker Co. service will continue the same high class information as in times past although the business has been sold outright to the Chicago Journal of Commerce. The men who have built up the ticker service will continue, however, as employees.

A prominent member of the Board of Trade Building Committee said that while the committee is working on various plans for a new building, nothing definite has been done and reports that a 20-story building is to be constructed on the present site are altogether premature.

W. B. PEARSON,
President, Arcady Farms Milling Co.,
Chicago, Ill.

James A. Patten and B. A. Eckhart, who have been members of the Board of Trade building committee, have resigned and Henry A. Rumsey has succeeded Mr. Eckhart as chairman, while John J. Bunell succeeds Mr. Patten. The Chicago Stock Exchange, it is rumored, is considering the advisability of joining the Board in its new building project, which would occupy the entire block bounded by Jackson and Van Buren streets on the north and south, and by La Salle and Sherman streets on the east and west.

Trade Opinion.

May wheat has covered a wide range since last week, which speaks for the activity of the market and the nervous state of the trade. The future course of the market will depend largely upon the attitude of foreigners, and extreme caution is necessary in trading at his level. Corn has shown independent strength. The weather map continues to reflect favorable country conditions for movement and sentiment continues bullish, but it will be difficult to create much enthusiasm until the cash situation shows a complete reversal from present conditions.—Bartlett, Frazier & Co.

Advancing tendencies in wheat which carried the May delivery above \$2.00 has been checked by the appearance of increasing shipments from Southern Hemisphere. Contrary to previous market action, coarse grains developed independent strength and this was no doubt due, in part, to the entrance into these markets of traders who had liquidated their wheat. The conviction is gaining ground that the peak of the movement of corn has passed, with a sizeable accumulation of lower grade corn, but very little of the grades applicable on

future contracts.—Thomson & McKinnon.
We do not believe recently radical readjustment in wheat prices can cause a steady market and we would not be surprised at still further declines in price. Receipts of corn continue rather light and we feel favorable, on good breaks, to the buying side of corn. There is not the merit in oats that there is in corn, but we prefer to take the buying side on good breaks.—J. J. Badenoch Co.

Fluctuations on wheat during the past week were wide, the greater part of the decline was attributed to a decline in Liverpool caused by increased exports from the Southern Hemisphere. Prices on corn reached the highest levels of the season during the past week and as country offerings are reported to be decreasing a firm undertone prevails. The oats market shows less strength than last week and the wide difference between the price of corn and the price of oats gives the impression that oats appear too cheap. This year's oat crop compared with corn crop is the largest on record, the bushels of oats production being 63 per cent of the bushels of corn production.—Clement, Curtis & Co.

A more confident feeling in the wheat market is beginning to prevail, but sales for shipment continue light and demand continues slow. Trading in corn was fairly active, although the demand from the east and sales in that direction continue surprisingly low. Arrival of oats have been moderate, but sales for shipment show no improvement.—Pope & Eckhardt Co.

FLOOD LOSSES THIRTY MILLIONS A YEAR.

Unpreventable losses from the three great floods and a number of lesser ones which occurred during the year ending July 1, 1924, are estimated to aggregate \$29,519,522, according to the river and flood division of the weather bureau of the United States Department of Agriculture, while the reported value of property saved through the flood warnings issued by the bureau was about \$12,000,000, an amount sufficient to maintain the entire weather bureau on its present basis for about five years.

Unpreventable flood losses are those occurring among growing and matured crops, as in the case of the Canadian river flood in Oklahoma in the latter part of 1923. This flood was caused by two periods of phenomenally heavy rains lasting almost a month. Notwithstanding ample and timely warnings given by the weather bureau, the crop loss amounted to not less than \$15,000,000. A large proportion of the season's crops had not been harvested, and 600,000 acres of rich farm lands were overflowed. Oklahoma suffered from two

other floods during the calendar year 1923, so that the Canadian and Arkansas river floods brought its total losses up to about \$30,000,000.

Another flood of very destructive character during the fiscal year was that in the Pittsburgh district of the Ohio river in March, 1924. In this flood rapidly melting snows and high temperatures played an important part. There were no crops endangered, and the timely and accurate flood warnings kept the losses down to about \$1,000,000, while the reported value of property saved through the warnings was \$10,000,000.

CASH PRICES FOR GRAIN.

Legal, Traffic and Arbitration Decisions

COURT DECISIONS.

Petition held sufficient to state cause of action for negligent failure to provide cars on reasonable notice of time needed. Petition, alleging notice to defendant railroad's station agent to furnish car on certain day, his assurance that it would be furnished thereon, failure to do so, and "that such delays were unreasonable," etc., held sufficient, at least after verdict, to state cause of action for negligent failure to provide cars on reasonable notice of time they were needed. Interstate shipments are governed by rules of law laid down by federal courts. Under federal rule, burden is on plaintiffs, suing for negligent failure to furnish cars after notice of time desired, to prove actual negligence in connection with such failure. Plaintiffs, not alleging nor trying case on theory of defendant railroad's negligent failure to notify them that cars could not be furnished as requested, and basing their instructions on alleged negligent delay in furnishing cars, cannot advance such theory for first time in Appellate court.—Walters et al., v. K. C. Southern Ry. Kansas City, Mo., Court of Appeals, Dec. 1, 1924.

TRANSPORTATION MATTERS.

Damaged Material in Car.

In a recent issue of the *Traffic World*, a reply to the following question was given:

If a car is refused on account of damaged material in the car, is it up to the shippers or the consignees to dispose of this car; providing both parties refuse to give instructions, who is responsible for the material in question? The reply was as follows:

Where the provision in a contract of sale is f. o. b. at point of shipment, the title will pass, as a general rule, when the property is placed on the cars for shipment; on the other hand, where the provision is for delivery f. o. b. at the point of destination, the title is not, as a rule, considered to pass until the subject matter has reached that point, as the delivery to the carrier is not a delivery to the buyer. The intention of the parties, as gathered from the terms of the contract, determines at what point the title will pass.

Where the title to the goods is in the consignee, it is the duty of the consignee to receive goods consigned to him. This rule is subject to the qualification that, by where the character of the property is, by the negligence of the carrier, so changed that it cannot be applied to the ordinary use of such goods, the consignee is within his rights in refusing to accept. Practically all of the decisions of the courts which state the rule that the consignee must accept a shipment, even though damaged in transit through the carrier's negligence, deal with a situation which results from the refusal of the entire shipment by the consignee, even though only a portion thereof is damaged, the courts invariably holding that under such circumstances it is the duty of the consignee to accept the entire shipment and hold the carrier responsible for the injury and that he cannot recover the value of the entire shipment from the carrier.

In *Brand vs. Weir*, 57 N. Y. S. 731, the court said: "In the event of a partial damage, the better rule seems to be that where the goods were injured through a cause for which the carrier is responsible, the consignee is not justified in refusing to receive them, but should accept them, and

hold the carrier responsible for the injury, it being the policy of the law to impose on the consignee the obligation to mitigate, as far as possible, the loss for which the carrier must respond. Hutchinson on Carriers, section 770-D."

The determination of where the title to the goods rests while the goods are in transit and after arrival at destination will determine the party who should give the carrier instructions, as to the disposition thereof and who should file claim with the carrier for injury thereto, unless otherwise agreed upon between the parties to the sale.

Where neither the consignor nor the consignee will give disposition instructions, the carrier must dispose of the goods in accordance with the provisions of paragraphs (b), (c), (d) and (e) of section 4 of the bill of lading.

Canadian Canal Statistics.

A summary of canal statistics for Canada for 1924 has just been issued. Total traffic for the season of navigation through the Canadian and United States locks of the Sault Ste. Marie canal aggregated 72,034,828 tons; the decrease of 19,342,003 tons from 1923 was almost entirely in iron ore, which was lighter by 4,575,410 tons. Wheat increased 6,776,105 bushels, or 203,283 tons, and was a new high record for this commodity. Other grains show an increase of 7,854,038 bushels, and flour increased 510,879 barrels.

Traffic in the Welland canal aggregated 5,037,412 tons, also a new record, being 34 per cent heavier than 1923 and 1,176,443 tons heavier than the previous high record made in 1914. The chief increase was wheat with 2,999,419 tons. This was 35,967,860 bushels over the 1923 movement. Canadian wheat increased 734,863 tons and United States wheat 344,173 tons. All other grains but barley showed increases.

Traffic on the St. Lawrence canals aggregated 5,536,374 tons, exceeding the previous high record of 1923 by 22 per cent. The chief factor was the wheat shipments, which increased 1,093,445 tons over 1923. The total of 99,796,700 bushels comprised 71,477,300 bushels of Canadian and 28,319,400 bushels of United States wheat.

Appointed Member of Commission.

Thomas F. Woodlock of New York has been appointed a member of the Interstate Commerce Commission in place of Commissioner Potter who resigned.

New Complaints.

Among the new complaints that have been filed with the Interstate Commerce Commission, are the following:

Board of Trade of Kansas City, Mo., vs. Abilene & Southern et al. Rates on grain and grain products from points in S. D. and Minn., from points in Neb. north of the Platte river and in Iowa north of and on main line of Rock Island to Kansas City, and from same points of origin to Omaha, Council Bluffs and Sioux City.

Parker Corn Co., Kansas City, Mo., vs. Santa Fe et al., rates in violation of sections 1 and 6 of this act, on numerous shipments of grain from points in Ark., Colo., Ill., Iowa, Kan., Minn., Mo., Neb., N. M., Okla., S. Dak., and Tex., to points in various states.

Delmar Co., Minneapolis, Minn., vs. Great Northern. Rates and charges in violation of section 6 on grain from points in S. D., N. D., and Minn., to Minneapolis, there inspected and graded, and reconsigned to other destinations.

Spencer Kellogg & Sons, Inc., New York City, vs. Erie. Unlawful charges

FORD TO GROW FLAX.

Henry Ford is going into the flax-growing industry extensively, according to M. Hannifan, one of his representatives, who has signed up considerable acreage near Ovid, Mich. Mr. Hannifan says that Ford has grown flax on his own lands, but that the demand of his industries has made it impossible to raise enough on his own properties. Flax is used in tires and upholstery. It usually brings the grower about \$25 a ton.

OATS IN PRIMARY MARKETS.

Receipts of oats last week at 14 primary markets, compared with the corresponding week last year and also for the period beginning Aug. 1 to Feb. 7 (final 000 omitted):

BARLEY MARKETS.

MILWAUKEE.—In response to a fair to slow demand from maltsters and shippers quotations for barley fell 3@4 cents for the week in the Milwaukee market. There was a decline, especially for the coarser grains, during every trading day. Receipts were fair, 192 cars last week as compared with 218 the previous week and 115 in 1924. Choice to fancy, 48 to 50 lbs. test, quotable at \$1.02@1.03; fair to good, 44 to 47 lb. test, \$1.00@1.02; light weight, 40 to 43 lb. test, 94@98c; feed, 90@95c. Iowa quoted 95c@1.03, as to quality; Wisconsin, 95c@1.03; Minnesota, 95c@1.03; Dakota, 95c@1.02; feed and rejected, 90@95c.

DULUTH.—Business in barley was light on this market during the last week. Demand was good early, but it dwindled later and at the close the market was easy. Elevators were the buyers to cover delivery contracts. Receipts were 11 cars and prices closed unchanged to 3c off at from 81 to 98c.

KANSAS CITY.—No fresh offerings of barley were noted this week. Buying was checked by weakness in other grains. Nothing was sold from store and stocks were unchanged, at 8,000 bus. Prices were nominal, but quotations were reduced 6@7c to 96@98c for No. 3 and 94@96c for No. 4.

MINNEAPOLIS.—Due to attempts to resell barley taken out of Minneapolis for the export trade, resulting in a rather weak situation early in the week and the market did not seem to recover from this weakness right up to today. Malting quality was in fair demand on one or two days, but it did not hold. Oat stuff was slow sale right through. Today's bids were in the range from 83 @95c.

PORTLAND, ORE.—Very little barley business being done. No occasional car is being worked in this direction from

the east, but the local trade seems well filled, and the consuming trade is buying sparingly. Business is not on a scale that it was several months ago, and prices are more or less nominal. Forty-four-pound barley is quoted bulk, \$44 per ton.

CHICAGO.—Offerings light and demand good. Good competitive demand and this market showing more stability than any other. Exports for the week were 1,413,000 bushels against 339,000 last year. Visible decreased 210,000 bushels against 195,000 last year. Malting quoted at \$1@1.05 with fancy higher. Feeding and mixing, 90c@\$1. Screening, 50 @85c. Ten thousand bushels sold for export.

RYE MARKETS.

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending Feb. 7:

	Mpls.	Dul.	Chi.	Win.	Mil.
Feb. 2.....	22	43	6	2	11
Feb. 3.....	8	25	20	6	4
Feb. 4.....	6	30	12
Feb. 5.....	10	33	8	8	5

	..	1.51½	.89½	1.11	1.73	2.41

RYE MARKETS.

MILWAUKEE.—The Milwaukee rye market ruled generally weak during the past week and quotations closed showing a drop of 13@14 cents for the period. The decline was steady during every day of trading except on Wednesday, when an improvement of 2@4 cents was noted. The general weak character of the market was, however, even noticeable in the undercurrent on that day and discounts were wider. Offerings for the week were generally off-grade with high moisture content and discounts were liberal. Considerable Wisconsin sold on a forward shipping basis, but on arrival grades were accordingly lower. Dry continued scarce and wanted. Market closed at \$1.66½ @1.69½ for No. 2, inside for Wisconsin, ranging at 8@11 cents under May price.

NEW YORK.—Export business in rye for the week amounted to about three million bushels in all positions. Germany, Finland and Norway were identified as the principal buyers. Rye premiums f. o. b. Atlantic displayed a slightly firmer tone toward the close of the week, but they are still much below replacement value.

DULUTH.—Operations in the rye market were marked by wide fluctuations during the last week. Sharp recessions came about as a result of selling in sympathy with breaks in the wheat markets. Export buying by Germany was reported, but the business was filled from stocks held in the East shipped down before the close of navigation. Spot No. 1 rye closed 15c off at \$1.55.

MINNEAPOLIS.—Demand was mostly slow during the week, both from shipping and milling sources, although today it showed a slight pick-up from the latter. Fancy white rye was in good request; otherwise the market was featureless. Bids today for No. 1 and No. 2 were mostly from 2½@4 under the May option.

CHICAGO.—The market was fairly active throughout the week with prices ranging lower. Exports for the past week were 373,000 bus. and only 43,000 a year ago. The visible supply increased 202,000 bushels, making the total 23,681,000. The closing prices for No. 1 were \$1.62; No. 2, \$1.61½; No. 3, \$1.56½@1.60, and No. 4, \$1.54½.

Beans and Potatoes

LOOK FOR LARGER ACREAGE.

WHITTEMORE, MICH.—Beans were a failure. This section will not get one-fourth of usual crop; mostly all marketed by now. We look for larger acreage this year.—Whittemore Elevator Co.

BEAN MARKET TO BE HIGHER.

UNIONVILLE, MICH.—Relative to the bean situation in our territory, we find that beans are back in farmers' hands, are in strong hands, and holders are not in the mood of selling at present market prices.

We anticipate a much higher market before new crop.—Unionville Milling Company.

BEANS ABOUT CLEANED UP.

DENVER, COLO.—The bean situation here is gradually being cleaned up. About 20 per cent of the crop is still on hand. Some of the dealers during the last thirty days have very materially reduced their stocks.

Quite a number of the farmers who have been holding for higher prices have been marketing their crops as a result of the advance in price.—Ady & Crowe Mercantile Co.

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Feb. 7:

Beans—
Boston—Dry beans: Pea h.-p. 100 lbs., \$7.25@7.50; Calif. small white, 100 lbs., \$8@9; yellow eyes, h.-p., 100 lbs., \$6.50 @7.25; red kidney, h.-p., 100 lbs., \$8.50; Lima, dried, cwt., \$14.
Chicago—Supplies light and demand good; market firm. Per 100 lbs.: Spot navy beans, Mich., choice, \$6@6.50. Fancy higher.
Minneapolis—Nominal. Quotations in lbs., including sacks: Fancy h.-p. navy, lb., 6c; Lima, Calif., 18c; brown, 5c. Peas—Green fancy, lb., 8c; yellow fancy, lb., 6c; marrowfat, lb., 9c.

POULTRY, VEAL, EGGS, BUTTER

POTATOES

Write Us—COYNE BROTHERS

119 W. South Water St. CHICAGO

New York—Market continued quiet and feeling about steady, with prices showing but little change. Domestic—Marrow, \$9.75@10.25; pea, choice, hand-picked, \$7.25; pea, screened and prime, \$6.75@7; red kidney, \$10.75; white kidney, \$9.50; Lima, Cal., \$15; imported, 100 lbs., marrow, \$9.50@9.75; white kidney, \$8.75@9; Lima, mad., 1923-24, \$12.25@12.50; 1922-23, \$9.50; Lima, Europe, large, \$11.75; medium, \$11.25.

Los Angeles—Beans in California continue to show advancing tendencies with nearly all the varieties and quotations somewhat higher this week in most lines. Bean quotations, per cwt., f. o. b., are: Bayo, \$7.30@7.40; black-eye, \$9.70@9.85; cranberry, \$7.75@8; kidney, \$9.65@9.90; Lima, standard, \$13.50@13.65; Lima, Henderson bush, \$12.50@12.75; pink, \$7.75@7.85; red, \$8@8.25; white, large, \$6.25@6.50, and white, small, \$7.50@7.65.

Potatoes—
Chicago—Car lot receipts during the week ending Feb. 7 were 395, against 412 last week and 324 a year ago. Market held steady. There was a fair business transacted for a week-end, although somewhat handicapped by the dense fog hanging over the city. The demand was restricted to the absolute needs of buyers and shippers were the best supporters of the market. Bulk, per 100 lbs., Wisconsin, \$1.10@1.20; ordinary and poor, \$1@1.05; round white sacks, Wisconsin, \$1.10@1.20; ordinary and poor, \$1@1.05; do Minnesota, \$1.05@1.15; Idaho russets, \$2.40@2.60; early Ohios, sacks, Red Rivers, \$1.25@1.35. New Potatoes—Few coming from the south. Demand light. Hampers, Texas, \$2.50; boxes, Idaho, repacked, \$2.25. Sweet Potatoes—Arrivals moderate; fair demand noted. Bushels, Illinois, Jerseys, \$2.50@2.75; Illinois, Nancy Halls, \$2.50; soft and poor, \$1.50; hampers, Tenn., Nancy Halls, \$2.75@3; Illinois, \$2.50@2.75; Jerseys, eastern, kiln dried, \$3.50; poor to wormy, \$2.25@2.50; Illinois, Jersey, large hampers, \$2.50@2.75; do small hampers, \$2@2.25; Nancy Halls, \$2.50.

New York—Sack potatoes steady to firm. Bermudas met a better demand. Sweet potatoes sold as quoted. Maine, bulk—180 lbs., \$3.25@3.90; carlots, cwt., \$1.65 @1.80; 150-lb. sack, \$2.75@3.25. State, bulk—180 lbs., \$3@3.25; 165-lb. sack, \$2.75@2.95; 150-lb. sack, \$2.50@2.75. L. I., bulk—180 lbs., \$3.75@4.50; 165-lb. sack, \$3@4.15; 150-lb. sack, \$3@3.75; 3 bu. sacks, \$3.25@3.50. Bermuda, bbl.—No. 1, \$14@14.50; No. 2, \$12@12.50; No. 3, \$7.50@8.50; Cuba, crt., \$3.25@3.50. Sweets—Jy., bsk., 75c@83.50; Del. and Md., bskt., 75c@82.75.

BUCKWHEAT MARKETS.

MILWAUKEE.—Closing quotations for buckwheat, per 100 lbs., at Milwaukee on Saturday, Feb. 7, were: Silver hull, \$2.30@2.40; Japanese, \$2.45@2.50.

BUFFALO.—Fancy in good demand and prices unchanged. Sixty-pound sacks holding 12 5-pound bags, \$2.75@3.

MINNEAPOLIS.—Spot quotations follow: Japanese, \$2.40; Silver Hull, \$2.40; mixed, \$2.40.

St. Louis.—Held at \$2.60 per 100 lbs.

CHICAGO.—Fancy Jap., \$2.60, and fancy Silver Hulled, \$2.35@2.40, with dirty seed less.

News of the Country Grain Trade

ARKANSAS.

Rogers, Ark.—The Meyers Feed Store is now managed by John C. Davis of Bentonville.

Little Rock, Ark.—The George Neimeyer Grain Co. has changed its name to the Guy Williams Milling Co.

CALIFORNIA.

San Francisco, Calif.—The Albers Bros. Milling Co. showed a 33% gross sale increase for the half year ending Dec. 31, 1924, over the same period of 1923.

CANADA.

Winnipeg, Canada.—A. A. Housman & Co. has opened a branch office here in charge of C. F. Avery. It holds a membership on the exchange.

Winnipeg, Canada.—The Globe Grain Co., Ltd., a correspondent of Lamson Bros., Chicago, will conduct a general commission and brokerage business in grain, provisions, cotton, stocks, etc., here.

IDAHO.

Moscow, Ida.—The Milwaukee Grain & Elevator Co. is now managed by H. H. Simpson, formerly in the grain business in Moscow.

ILLINOIS.

Polo, Ill.—Floyd Finkle has sold his feed mill to William C. Schryver.

Colfax, Ill.—E. S. Lyons purchased the Colfax Grain Co. elevator at auction for \$5,055.

DuQuoin, Ill.—Fire destroyed the Seacher Flour Mill at a loss of about \$75,000, half covered by insurance.

Annanaw, Ill.—Chester Parker will succeed Richard Arnold as manager of the Farmers Grain & Supply Co.

Astoria, Ill.—A. C. Rapp of Owaneco, Ill., has been appointed manager of the Farmers Grain & Service Co.

Rio, Ill.—At the annual meeting of the Rivoli Grain Co. the officers were re-elected and a 7% dividend was declared.

Warrensburg, Ill.—Mr. Faith of C. H. Faith & Son died here Jan. 11 and the business has been sold—Mabel F. Noel.

Leverett, Ill.—C. W. Higdon, formerly manager of the Farmers Elevator at Roberts, has purchased an elevator here.

Palmer, Ill.—The Farmers Grain Co. has 9,000 bushels of wheat in its bins, purchased under a dollar, and will now reap a nice profit around \$10,000.

San Jose, Ill.—The San Jose Farmers Elevator Co. held its annual meeting recently, officers were elected, and a 100 per cent stock dividend was declared.

Grand Ridge, Ill.—At the annual meeting of the Grand Ridge Co-operative Grain & Supply Co., A. H. Rinker and E. B. Kohn were re-elected directors, and H. L. Grubbs, manager.

Shirley, Ill.—A good business was reported for the past year at a meeting of the Shirley Co-operative Farmers Elevator Co. Roy Reese is manager and Ernest Cryer, president of the executive board.

Illioipolis, Ill.—The Mansfield-Ford Grain Co. has incorporated with capital of \$20,000 to deal in grain, lumber and coal. Incorporators: W. M. Close, Isaac A. Looze and John D. Constant. Correspondent: W. M. Close, Illioipolis.

Bloomington, Ill.—The Covell Farmers Grain Co. has decided to purchase common stock in the Grain Marketing Co., to become a member of the co-operative association, and also subscribe to an amount of the preferred stock.

Sublette, Ill.—At the annual meeting of the Farmers Elevator Co., the following officers were elected: Wm. Glaser, president; Geo. Erbes, vice-president; Henry Wendel, secretary; and George Fauble, treasurer. A 4% dividend was declared.

Sheffield, Ill.—The following board of directors was elected at a meeting of the Farmers Grain Co.: President, S. W. Smith; secretary, Charles Bill; R. C. Perrier, C. E. Curtis, J. Johnson, J. L. Smith and George Kane, who succeeded Casper Pierson. C. E. Wescott is manager.

Hillsdale, Ill.—The following officers were elected at a meeting of the Farmers Co-operative Elevator Co.: C. J. Golden, vice-president; Charles Haak, secretary; and Homer Dailey, manager. Directors: Levi Ropp, Charles Haak, Harry Cooke, Frank Wake, W. W. Cain, John Woodburn and C. J. Golden.

Alton, Ill.—At the annual meeting of the elevator stockholders here, the officers were re-elected as follows: President, Peal Haycraft; vice-president, C. A. Hilliard; secretary, Jas. Root; treasurer, T. L. Stroheck;

and manager, John Hauter. Two new directors, Chris Schmidt and Walter Reader, were elected.

Urbana, Ill.—The Somer Township Grain & Coal Co. of Ford's Crossing held its annual meeting and elected the following officers: President, Jacob Ziegler; vice-president, Fred Stevens; secretary-treasurer, R. A. Marriott. George McClurg was retained as manager.

Mendota, Ill.—The following directors were elected at the fifth annual meeting of the Mendota Farmers Co-operative Supply Co.: R. M. Crawford, Louis Hoffman, Fred Herr, Henry Feik, Dana E. Miller, John Scheidenhelm, Jr., John Swisher, Mark Crandall and J. A. Eckert. John Scheidenhelm, Jr., was chosen president; Louis Hoffman, vice-president; Henry Feik, secretary; and John Swisher, treasurer. John Barth is manager.

INDIANA.

Dale, Ind.—E. T. and Robt. Winkler sold the controlling stock in the Dale Milling Co. to C. E. Schaaf, Louis Huppert and Horace Walter.

Middlebury, Ind.—J. P. Lantz of Stryker, O., has purchased the Middlebury Grain Co. Hobbs, Ind.—The Hobbs Grain Co. elevator is being improved.

Rochester, Ind.—Directors as follows were elected by the Rochester Co-operative Elevator Co.: James Downs, Norman Stoner, Robert Miller, E. C. Mercer and Lon Carruthers.

Peru, Ind.—The Farmers Co-operative Elevator Co. has elected Jason J. Blair, president; Frank Daniels, vice-president; and Charles Spangler as secretary-treasurer. Directors: Jason J. Blair, Charles E. Hoffman, Frank Daniels, William Aultman and Charles Spangler.

IOWA.

Cherokee, Ia.—Weart & Lysaght Co. have installed a feed mill at their elevator here.

Silica, Kans.—The Farmers Elevator here has replaced its gasoline engine with an electric motor.

INCREASE IN WHEAT AND RYE ACREAGES.

The total winter rye acreage of 12 countries reporting Feb. 1 is 27,319,000 acres compared with 25,968,000 acres for the same countries last year, according to information received by the U. S. Dept. of Agriculture from the International Institute at Rome. This is an increase of 1,351,000 acres, or 5 per cent, due mostly to the larger area reported for Poland, which is placed at 12,

RECEIVERS-SHIPPERS

CORN—OATS

CONSIGNMENTS SOLICITED

THE TOWNSEND-WARD CO.

Chamber of Commerce, BUFFALO

215,000 acres compared with 10,915,000 acres harvested in 1924.

The Polish rye crop last year of 144,000,000 bushels was about one-fifth of the total production in all important countries of the northern hemisphere outside of Russia. The total of 10 countries in Europe for which reports have been received is 22,355,000 acres against 21,025,000 acres for the same countries last year, an increase of 1,330,000 acres, or more than 6 per cent.

The total wheat acreage of 12 countries now reported, including an estimate for Poland just received, is 111,995,000 acres against 108,361,000 acres, an increase of 3,634,000 acres, or more than 3 per cent. The wheat acreage of Poland is given as 2,550,000 acres compared with 2,658,000 acres, the area harvested in 1924.

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grain from the principal ports of the United States to foreign countries during the week ending Jan. 31, 1925 (000 omitted):

Articles and countries.	Week ending Jan. 31, 1925.	1924, to Jan. 31, 1925.	July 1, 1924, to Jan. 31, 1925.
Barley	541	193	17,107
To United Kingdom	541	193	8,077
Other Europe	541	193	8,199
Other countries	541	193	831
Corn	181	337	4,458
Oats	49	5	4,174
Rye	657	5	28,564
To Germany	656	5	3,274
Other Europe	656	5	6,645
Canada	1	1	18,645
Wheat	*2,138	527	152,012
To Italy	552	84	16,218
United Kingdom	609	180	32,571
Other Europe	930	60	47,512
Canada	2	2	48,481
Other countries	47	201	7,230
Tot. United States	3,566	1,067	206,315
Canadian in transit:			
Barley	361	130	6,648
Oats	64	226	7,919
Rye	260	234	2,501
Wheat	1,359	2,848	32,045
Total Canadian	2,044	3,438	49,113
*Including via Pacific ports this week:			
Wheat, 112,000 bus.; flour, 54,400 bbls.			

BULLS AND BEARS.

Well, Old Top: The grain trade's thermometer has been indicating for sometime \$2 wheat in May, or possibly before a new crop, but world wide advertising of an acute shortage before next year's crop has kindled such a hot fire of speculation under markets that the dinner is cooked three months ahead of time and all trade thermometers are burned up. Of course, the bear fire department is trying its best to subdue the flames. The conflagration is still raging and with the visible decreasing, the bears are about out of everything to fight the fire with, except dynamite in the shape of statistics, and unless the wind changes soon they are likely to suffer a total loss in July and even get badly scorched in September, as if statistics prove out that the shortage is so acute, what little wheat that will move in July will be a mere drop in the bucket against the purchase contracts for delivery in that month. Until the smoke clears up my advice, Old Top, on future markets is to keep well back of the fire line.—*Tod Sloan, B. Christopher & Co., Kansas City, Mo.*

BROOM CORN MARKETS.

This week spring like weather has prevailed throughout the Southwest and to all appearances, it would seem as though the backbone of the winter season had been broken. This, however, is an unknown factor in the Southwest area, as sudden weather changes at this season of the year are the usual order.

Buyers, however, all taking advantage of existing conditions as field reports indicate and state that the same degree of eagerness and effort to secure crops is in evidence that has been manifested during the past month. Activity is noted in all districts, being concentrated principally to central and northwest districts of Oklahoma, as has been the case recently and also in western Kansas and adjacent sections in Colorado and New Mexico. Corn is being secured in southern Oklahoma Dwarf districts in a minor way. The field situation appears to have the same strength as has been noted for some time past, prices paid for crops on the farms continue on the same general basis as heretofore, the spread on bulk corn bought being from \$70 to \$100. Occasional crops have been picked up around \$65, with crops showing better than the average, commanding \$110, \$115, \$120 and \$125. That not any amount of corn is taken above \$100 is attributed to the fact that to secure good corn has been the goal of buyers throughout the entire buying season and as a result of this effort but a small per cent of this grade is available in the remaining field supply.

Although buyers are numerous throughout the various districts, the buying effort is not resulting in any large quantity of corn being secured.—*Broom Corn Review.*

CASH CONTRACT OATS.

Following is the monthly range of cash contract oats (No. 2 white and better) at Chicago for a series of years:

MILWAUKEE SEEDS.

Movement of timothy seed and clover seed at Milwaukee as reported for THE PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce, for week ending Feb. 7, 1925:

	Receipts, lbs.		Shipments, lbs.	
	Tim.	Clov.	Tim.	Clov.
1925.....		12,845	54,515	25,230
1924.....	32,100	24,350	288,330	17,180

SEED SCARCE

RANTOUL, ILL.—Around here we had a short crop of corn. Farmers are selling freely at the high prices. It looks like 75 per cent of the corn will be marketed this winter. Other seasons very little is sold in the winter.

Seed is scarce and all of it has to be shipped in except timothy seed. Farmers are not buying at present on account of high prices on clover; will lay off till they need it.

No stock on feed here as the corn is too high and the quality is poor and prices are not what they should be. A good many farm sales and it seems to be selling good.—J. G. Huls Seed Farms.

SEED RECEIPTS AT TOLEDO.

Following is a statement of seed receipts and shipments at Toledo in bags for week ending Feb. 7, and season to date and comparisons, also stocks, etc., as compiled by C. A. King & Co.:

	Receipts.	Shipments.
	Clov. Alsike. Tim.	Clov. Alsike. Tim.
This wk..	352 58 316	1,388 302 20
Last wk..	241 252 85	1,408 83 139

Field and Grass Seeds

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending Feb. 7, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.	Clover.	Other.
	Rcts. Shpts.	Rcts. Shpts.	Rcts. Shpts.
Week ..	457 391	311 227	195 781
Prev. wk.	273 541	176 170	282 602
1924	199 337	552 364	820 485
1924-25...	29,647 18,684	7,082 4,063	12,616 12,653
1923-24...	27,280 12,641	6,125 4,279	17,478 8,013
1922-23...	27,367 22,682	7,335 5,853	19,312 4,747

Timothy—Unchanged. Fair country run \$5.60@5.85 per 100 lbs., good country run about \$6@6.15, and high grades at \$6.40@6.50.

Alfalfa Seed—Dull. Recleaned country lots \$21@23 per 100 lbs.

Clover Seed—Nominal. Country lots \$25@27.75 for 100 lbs., good \$28.25@29.25, choice \$29.75@30.75, fancy \$31@32, and Mammoth \$29@33.

Alsike—Steady. Average country lots \$20.25@21 per 100 lbs. Fair Seed \$16.25@17.25, and poor at \$11.50@13.50.

GRASS SEED DEALERS' MEETING.

The Wholesale Grass Seed Dealers' Ass'n will hold its annual meeting at the Drake Hotel, Chicago, on June 22 and 23, and it will probably be the first time for many years that this convention has not been held at the same week and the same place with the American Seed Trade Ass'n.

KANSAS CITY SEED MARKET.

KANSAS CITY, Feb. 7.—Cane seed prices broke sharply this week on account of recessions in kafirs and other feed grains. The seed had been held up more by demand for mixture with grain sorghums than for planting. Price reduction was 10@20c per cwt., with red top quoted, as from first hands, at \$1.60, orange at \$1.50@1.60 and black amber at \$1.50. In a wholesale way carlots of country-run seed were obtainable at about 15c over the prices paid to shippers, but recleaned seed was still higher. It is believed that a large percentage of the Southwestern crop is yet to be threshed and moved. While inquiries for seed are from a wide territory, buying has not been free on the recent advance in the market. It is hoped that the planting demand will improve on the reduced price basis. On account of the tight corn situation this year, a large acreage of forage is expected.

Millet seed held firm, due to light offerings and continued belief in small country holdings, especially of the German variety. Demand was not particularly urgent, but dealers looked for a scramble in the spring unless prices go too high. Kansas City houses are bidding the country as follows for carlots, per cwt.: German, \$3.50@4.25; common, \$2.50@3; Siberian, \$2.30@2.75; hog, \$2@2.25.

Sudan seed is in fair demand, with little coming from the country. Kansas City houses have good stocks. Recleaned seed is offered at \$5@6 per cwt. Prices being paid for country receipts of uncleaned seed are \$3.50@4.50.

Spring trade in grass seeds is developing normally, though real activity will come later. Clover seed is wanted for sowing in wheat fields, but it is scarce and very high. Wholesale prices are quoted as follows: Red clover, \$20@34; timothy, \$6@7; sweet clover, \$9@13; blue grass, \$17@28; alfalfa, \$15@27.

Cow peas are very high, owing to small offerings from Georgia and other producing states. Demand shows curtailment on this account. The Whip-poorwill variety is held by Kansas City houses at \$5 a bushel and the New Era at \$4. Bids to producers of soy beans are as follows: Virginia, \$2.75 per bushel; Black Wilson, \$2.25; Midwest and Morse, \$1.65.

TOLEDO SEED MARKET.

TOLEDO, O., Feb. 9.—Clover showed a good advance this week, especially in the February option, which went to a premium over the March. Deliveries on contract were liberal during the week and expected to be heavy during the balance of the month. Buying was mostly for the account of investors and seedsmen who removed hedges to cover sales of cash seed. Clover stocks are thought to be in strong hands and will go into consumptive channels rather than among seed dealers. As soon as spring makes her appearance for a lengthy stay the dealers expect a lively improvement in the cash trade, which is already fairly good. This same demand will have a marked bearing on the trend of the market during the next few weeks. Should it be very active and stocks decrease at a lively pace prices might go into new high ground. Farmers may not be anxious to buy clover at the present level, but there is always a certain number who will have no other legume. Foreign clover shipments have been heavy and Toledo has received some excellent lots. Receipts of clover this week were 352 bags, season to date, 9,963 bags, and a year ago to date, 19,214 bags. Shipments were 1,388 bags, season to date, 8,312 bags, year ago, 18,263 bags. Prime inspected this week 650 bags, total this season, 4,850 bags, year ago, 10,850 bags.

Alsike showed more strength and was about 15 cents higher for the week. Trade is rather light, but should improve as the cash demand becomes more active. Dealers look for a good trade in alsike at its discount under red clover. Canadian alsike was short last year and some seed may go there. Receipts this week 58 bags and shipments 302 bags.

Timothy was firm with prices unchanged for the week. Trading is quiet and will likely remain so until some feature appears in the market to stimulate trade. Stocks are large and the quality of the seed excellent. Receipts this week 316 bags and shipments 20 bags.

DULUTH FLAXSEED MARKET.

DULUTH, Feb. 7.—Prices went on the toboggan in the course of trading during the last week. The weakness was especially emphasized on Friday, when breaks of from 8 to 9 cents came about, following precipitate recessions in the wheat markets. On the net result of the six days' operations, spot and February seed showed declines of 15% to 16% cents and the March, May and July futures of from 15% to 19 cents.

The movement of seed this way from the country was limited amounting to 25,341 bushels, but shipments, largely to Milwaukee and Chicago to supply crushers' needs, were 96,949 bushels, leaving stocks in the elevators aggregating 853,000 bushels.

The week's price recessions were just what specialists in that market had been looking for right along. The breaks in fact were considered to have

been overdue. Conservative operators had for some time back been skeptical regarding the solidity of the flaxseed market's price structure. They considered that a shakeout of some of the crowd that had been enrolled on the long side of the market might happen along at any time. Stress was laid by them upon the large supplies of flaxseed in sight at Duluth and in Fort William and in elevators over the Canadian Northwest, and the heavy run of Argentine seed that has set in, with the amount on passage to Atlantic ports reported at 1,272,000 bushels. From present indications it was thought that linseed oil men in the vicinity of the seaboard would rely upon Argentine seed to cover their needs, and it was considered that a dearth of supplies to take care of operators in the Middle West and in Buffalo territory need not be apprehended in view of the quantities of domestic seed that would be available for shipment at the opening of navigation. That lineup of the situation was claimed to have acted as a wet blanket upon bullish enthusiasm. In the meantime the trade is disposed to sit tight and to study the situation before adding to their commitments upon either side of the market.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday, and the same period last year, were:

	Saturday.	Wk. ago.	Yr. ago.
On track...	\$3.06 1/4-09 1/4	\$3.22-26	\$2.61 1/4-67 1/4
To arrive...	3.06 1/4	3.22-23	2.61 1/4
February ..	3.06 1/4	3.22	2.61 1/4
March	3.07	3.23 1/2
May	3.07	3.25 1/2	2.60 1/4
July	3.04 1/2	3.23 1/2	2.58

BEAN MARKET FIRM.

SAGINAW, MICH.—Regarding the bean situation, would advise that we consider the market in firm position, and would not be surprised to see somewhat of an advance before the crop has been moved.

Growers are at present very firm in their ideas of value, and elevators do

not seem to be carrying heavy stock.—Chas. Wolohan, Inc., per G. O. Downer.

I. C. C. DEFENDS ITSELF.

Charges by President Coolidge's agricultural conference that the Interstate Commerce Commission has failed or been unable to recognize "its responsibility as an advocate of the shipper and has developed into a court," and that there are few if any courts "where it is more expensive or more difficult to obtain relief," were met in a letter to President Coolidge by Clyde B. Aitchison, chairman of the commission, just made public.

Speaking for the commission, Chairman Aitchison declared that the commission's conception of duty was "divergent from the conception expressed by the conference."

"We feel that some of the seeming misapprehensions of the conference could have been cleared away by inquiry of us thereon, or by reference to our annual reports, our rules of practice, or our long maintained procedure and the decisions of the Supreme court in reviewing our actions," write Mr. Aitchison.

"The commission wishes me to say that its concept of duty, as embraced in the statutes enacted by the concurrence of the legislative and executive departments, and as interpreted by the Supreme court, is divergent from the conception expressed by the conference. It is not our view that we are responsible as an advocate either for the shipper or for the carrier."

VISIBLE SUPPLY OF GRAIN.

THE POULTRY EMBARGO.

The New York embargo against shipments of live poultry which has had such a paralyzing influence on the poultry market is being gradually lifted, but in the meantime the thing to do, according to the Peter Fox Sons Co., of Chicago, is to market all poultry dressed.

FARMERS GET BEET PULP.

An agreement has just been reached by Utah sugar interests and the Sugar Beet Growers Coöperative Ass'n as to price for the 1925 crop, and the farmers are to have the first right to all the beet pulp they may want for feed for stock on their own farms, but they may not resell it.

COTTON SEED MEAL.

KANSAS CITY, Feb. 7.—The cottonseed meal market is exhibiting dullness which is hard to explain, except on the ground that February usually is a slow month for trade. Offerings are fairly free from Arkansas, Texas and Oklahoma, but in the latter state the mills quote for deferred shipment rather than prompt. Oklahoma mill prices are 50c to \$1 a ton lower, at \$39 for carlots; Texas, 50c off at \$37; Arkansas unchanged to \$1 higher, at \$37.50@38.50. The Kansas City price of carlots is \$44.10 and ton lots are \$4 more. Handlers say improvement in buying is likely to be witnessed in March, a month that always brings blustery weather.

Minneapolis mills and Chicago handlers exerted selling pressure in the linseed meal trade this week, but no demand south of Iowa and Nebraska was awakened. The feed was offered at a decline of \$1 a ton, or \$46. Kansas City dealers quoted meal at \$50.80 for car lots and \$54.80 for ton lots. The recession here was 50 a ton.

On the advance of \$5 a ton, announced two or three weeks ago, there have not been large sales of tankage. Old contracts are being filled. Carlots are quoted at \$65 and ton lots at \$70.

A good trade continues in meat scrap. This product is selling at \$75 a ton for carlots and \$80 for tons.

OIL MEAL MARKET.

While the linseed oil meal market is a shade lower it has not declined as much as the wheatfeed market. Prices are off about 50c from last week, but the tone of the situation continues quite steady at this level.

The mills still have plenty of shipping directions and sales from day to day seem to keep them going very nicely.

Our above prices on linseed oil meal are for prompt February, March or April shipment.—*The Bertley Bulletin, Chicago, Feb. 7.*

MINNEAPOLIS LINSEED MARKET.

MINNEAPOLIS, MINN., Feb. 7.—Last week we stated that flaxseed was keeping step with the advance in wheat. There has been wild speculation in all kinds of grain. Our exchanges have been so crowded with men buying wheat, flax and other grains that it was hard to transact legitimate business.

They were all dreaming of what they would do with their profits when wheat reached \$2.50, but the bubble broke, and the speculators are going home poorer and, we hope, wiser men.

The big advances in grain were started by large shipments to Europe, and then the general public came in and boomed the market, and when the prices began to break, they went down like a row of bricks. The prices of flaxseed have followed other grain and have declined about as much this week as they gained last.

There is very little flaxseed left in the Northwest, and the competition in buying will keep the price on a high level. This decline has put the market on a much safer basis than the boom prices of last week.

Argentine shipments still remain very small. The Argentine prices have not declined anything like as much as the North American prices. Last week Argentine value of flaxseed advanced 17½c per bushel, and this week it has only lost 4 cents of the advance. Therefore, the net gain in prices for the two weeks is 14½c per bushel. These erratic fluctuations undoubtedly unsettle the oil buyer, but our market here is only a tempest in a teapot, and if Argentina continues firm, prices of oil are apt to remain near present quotations.—*Archer-Daniels-Midland Co.*

WEEKLY LINSEED REVIEW.

NEW YORK, Feb. 9, 1925.—*United Kingdom:* There has been a fair trade in Indian seed in all positions during the week, but business in Plata seed continues slow with very little doing, as this variety is considered comparatively dear.

Linseed oil rules firm with supplies scarce. The demand is generally good. There is a small business passing in cotton oil around present levels.

India: Shipments of linseed this week amount to 300,000 bushels compared with 332,000 bushels last week. The crop outlook in this country is satisfactory.

Argentina: Markets for linseed in this country have displayed an easier tone with the foreign demand less active. Clearances of seed last week were very small. Port stocks decreased and now aggregate 2,400,000 bushels compared with 2,800,000 bushels last week and four million bushels at this time last year. Occasional rains have hindered the movement of seed from the interior to the ports. However, country offers are not pressing.

NEW YORK OATS MARKET.

Oats: Receipts 108,000 bushels bonded, 84,000 bushels domestic. The heaviness of the cash situation was such that values did not respond readily when improvement was shown in other grains. The lack of domestic inquiry throughout the entire Eastern country and the constant selling pressure in evidence from all markets was responsible for a further easing of premiums. The small decrease in the visible was unexpected, though the movement recently has fallen off somewhat. There is still no sign of an export demand in volume. Locally, there was no improvement in the spot demand, as consumptive requirements have evidently been reduced to a minimum. Under these circumstances dealers continue a hand-to-mouth policy, making prompt disposition of the moderate offerings impossible. Transactions in the higher grades were of an negligible quantity, what little inquiry there was, being for the lower grades, on account of the price. There are no indications at present of an improvement in the demand from consumptive sources, and but little prospect of spot values reaching a parity with the West.—*L. W. Forbell & Co.*

CRITICAL SITUATION IN FEEDS.

Monday's market of this week suggests a prospective price reduction, ranging from \$2 to \$3 in linseed oil meal. It is believed that the Minneapolis crushers will have shipped all the orders on the books by the 20th of February. The fact that feed mixers are running light and that interior points among small oil meal buyers have been doing very little is not encouraging for immediate business. In Buffalo, one of the large crushers very shrewdly anticipated the heavy decline with heavy sales of oil meal about the first of February. It is reported that the other operators in the East are doing little.

Wheat feeds for Monday, Feb. 9th, were off 50c to \$1.50 per ton as compared with closing days of last week. This is not surprising, for in the entire list of feeds, a period exceeding seven months of advancing markets naturally led up to the present situation. During this time there were only minor recessions and well posted men in the feed trade have been expecting the present slump.

WHAT CHAMPION WAS FED.

A production of over 30,000 pounds milk and 1,000 pounds butter fat in a yearly advanced registry test period makes Redfield Colantha Alewin, a 7-year-old purebred Holstein-Friesian cow, owned by the Yankton State hospital at Yankton, S. D., one of the leading dairy cows of America and the champion producer of both milk and butter in the state.

The feed on which this cow made her record consisted of choice alfalfa hay and corn silage for roughage. The grain ration was made up of 9 pounds ground corn, 6 pounds ground oats, 1½ pounds bran, 2 pounds oil meal and 1½ pounds beet pulp—the latter added to give the ration bulk. This mixture was fed wet with an equal amount of water, making the total weight of the daily soaked grain ration from 32 to 48 pounds, which was divided into four feeds of from 8 to 12 pounds each.

THE FEED MARKETS.

MILWAUKEE.

Milwaukee, Feb. 7.—Substantial declines for practically all items quoted in the Milwaukee feed market are noted in today's quotations as compared with those of the previous week. Due to the fact that all who bought flour at low prices which prevailed several months ago are now ordering it out at substantial profits, causing unusual activity at the various mills, the production of bran and middlings is now considerably in excess of the demand. Cottonseed meal and oat feed prices closed unchanged, being the only feeds to hold their own despite the weak character of the market. Current quotations are: Winter bran, \$29.20@29.70; spring bran, \$28@29.50; standard middlings, \$29.50@30.50; flour middlings, \$36.50@38; red dog, \$40@42; rye feed, \$30@31; linseed oil meal, \$47@48; cottonseed meal, \$39.50@44; hominy feed, \$45; oat feed, \$12.50@13; gluten feed, 30 days, \$36.80; in 100-lb. sacks, carlots, f. o. b. Milwaukee.

CINCINNATI.

Cincinnati, Feb. 7.—There was no improvement from the dull conditions reported in mill feeds last week and further reductions of 50c per ton were recorded for all bran and middlings. Dairy interests are still feeding their stock with cheap forage and are making little effort to use mill feeds because of the low prices for milk. It is said that large co-operative milk concerns are buying the output of breweries and distilleries high protein grain and drying it for feeding in place of mill and other feeds. Quotations represent 100-lb. sacks: Soft winter wheat bran, \$33.50@34; hard winter wheat bran, \$33@33.50; standard middlings, \$35.50@36; soft wheat middlings, \$38@38.50; gray hard middlings, \$38@38.50; mixed feed, \$36.50@37; No. 1 alfalfa meal, \$31; hominy feed, \$47.50@48.

DULUTH.

Duluth, Feb. 7.—With jobbers confining their orders to an immediate needs basis, trading was slow in feeds during the last week. Jobbers held down their buying on

account of high prices. Millfeeds broke sharply and ground feeds are unchanged. Closing prices per ton follow: Bran, \$28.50; shorts, \$31; red dog, \$41; Boston mixed, \$33; flour middlings, \$37; ground oats, \$37; No. 1 ground feed, \$44.50; No. 2 ground feed, \$42.75; No. 3 ground feed, \$40.75; cracked corn, \$48.50; coarse corn meal, \$48.50.

NEW YORK.

New York, Feb. 7.—Reductions of 50c@1 per ton occurred in both city and Western feeds. The only feature on the buying side was a little demand for Western bran for March shipment. City bran was quoted at \$35.50, middlings \$39.50 and red dog \$47.50, while Western bran ruled at \$34.25, middlings \$38.50 and red dog \$48@48.50 per ton.

BALTIMORE.

Baltimore, Feb. 7.—There is a slightly easier feeling in spring wheat bran, but the premium on Western middlings is well maintained. Hominy feed is quiet at slightly easier quotations. Gluten feed is again lower. Dried beet pulp in fair demand in a jobbing way. Alfalfa meal steady under encouraging advices from primary producing sections. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$36@36.50; Western middlings, per ton, 100-lb. sacks, \$39@40; city mills winter wheat bran, per ton, 100-lb. sacks, \$41@42; hominy feed, per ton, \$52@53; gluten feed, per ton, \$44@45; alfalfa meal, per ton, \$32@33; dried beet pulp, per ton, \$38@40.

PHILADELPHIA.

Philadelphia, Feb. 7.—Feedstuffs are generally quiet but offerings are moderate and prices show little change. Quotations are for carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$37@40; winter middlings, \$42@43; spring bran, Western shipment, \$35@35.50; standard wheat middlings, W. S., \$37.50@38; flour middlings, W. S., \$44@46; red dog, W. S., \$48@49; low grade flour, W. S., \$59@60; rye middlings, W. S., \$40; reground oats feed, \$16@27; fine yellow hominy, W. S., \$52@52.50; fine white hominy, W. S., \$53@53.50; cottonseed meal, 36% protein, W. S., \$42@42.50; cottonseed meal, 41% protein, \$44@44.50.

MEMPHIS.

Memphis, Feb. 7.—Feeds of all kinds are slow and most of them easier. The consumer is somehow getting by with less than thought possible, so stocks are large. Receipts of millfeed were large for the week and buyers indifferent. Track wheat bran quoted at \$31, but offers to come in low as \$30, while track gray shorts quoted at \$27 and offered come in low as \$26. Alfalfa meal receipts were 43 cars, but quotations still held nominally at \$29 for one. Cottonseed meal fails to do any better and quotations gradually easing off about 25c today on the local call board. Asked prices for spot or immediate, \$33.50 for 36 per cent, \$35.50@36 for 41 and \$37.75@38 for 43.

MINNEAPOLIS.

Minneapolis, Feb. 7.—There was but little feature to the local feed trade during the current week. When the market showed signs of returning life some ten days ago and prices advanced sharply for a day or two, there was a feeling that a turn for the better was at hand. Pressure of country mill offerings, for future as well as track and transit stuff, broke the market sharply and some rather low sales were made since last Monday. There is no doubt but that feed is out of line with other commodities, but right now it is a straight question of too much supply for the current demand and a sloppy market is the natural result. Asking prices by local jobbers for today were: Standard bran, \$26.50; pure bran, \$27; standard midds., \$28; red dog, \$40@41, and flour middlings, \$34.50@35. Weekly shipments totaled 14,704 tons vs. 14,100 last week and 12,946 a year ago. Oil meal is holding firm around the \$47 level for carlots. Resellers are offering some at slightly lower prices, but local crushers claim to be well sold ahead and are asking firm prices for their offerings. Weekly shipments totaled 7,746, 715 lbs. vs. 7,215,000 last week and 4,053,163 a year ago.

BOSTON.

Boston, Feb. 7.—Quotations today on millfeeds for prompt shipment are as follows: Spring bran, \$34.50@35; middlings, \$39@44; mixed feed, \$38.50@43; red dog, \$47.50; gluten feed, \$48.95; gluten meal, \$53.70; hominy feed, \$53.50; stock feed, \$51; oat hulls, reground, \$20; cottonseed meal, \$42.50@48.50; linseed meal, \$49@49.50.

ALFALFA AS HOG FEED.

Alfalfa may soon score another victory and assume an important position in the ration for grooming hogs for market, according to results of experiments conducted in the animal husbandry department at South Dakota State college.

In two trials conducted recently, one lot of pigs was fed only corn and tank-

the uncut hay was fed as when the hay was chopped. Further trials will be conducted along this line before definite recommendations will be issued.

"If our present results are borne out in further trials, it will be of great importance to farmers of South Dakota," A. H. Kuhlman, of the animal husbandry department, declared.

"If choice alfalfa hay fed in racks will produce gains approximately as good as those obtained in feeding chopped hay, many farmers in this state will be in a position to greatly increase their returns from feeding pigs in winter months. The addition of alfalfa hay has increased the daily gains in every instance; in fact, the average gains made by the pigs in trial compare very well with those made by pigs in forage during the summer."

The annual directory of the Farmers' Grain Dealers' Ass'n of Illinois is just off the press. It is prepared in good shape and issued from the Secretary's office at Bloomington.

age. Another lot was fed corn, tankage, linseed oil meal and chopped alfalfa hay. Where it required 367 pounds of corn and 43 pounds of tankage to produce 100 pounds of gain in the first lot, it required only 325 of corn, 25 pounds of tankage, 12.5 pounds of oilmeal and 12.5 pounds of alfalfa hay in the second lot.

While several experiment stations have recommended only chopped alfalfa hay for use in a hog ration, the animal husbandry department recently entered a test to learn the value of whole alfalfa hay. Three lots of hogs were fed chopped hay while three other lots were given good alfalfa hay in a rack. The results thus far indicate that the pigs made approximately as good gains where

COLLIS PROCESS PURE DRIED BUTTERMILK

SHOULD BE A PART OF ALL POULTRY MASH FEEDS

Feed Manufacturers who keep in touch with the experimental work conducted by the Agricultural Colleges and Poultry Feeding Experts in the scientific feeding of poultry, realize what a prominent place Dried Buttermilk has taken as part of all Mash Feeds fed.

If you are manufacturing mash feeds for growing, developing baby chicks, egg production in hens and pullets, and for fattening without **Collis Process Pure Dried Buttermilk**, you are doing so contrary to all present day teachings.

Buy your requirements now from the largest producers of Dried Buttermilk in the world.

Buttermilk dried by the Collis Process retains all feeding value and Lactic Acid found in fresh churned pasteurized buttermilk.

FEEDSTUFF SITUATION.

All feeds show a pronounced weakness and this, occasioned by a lack of demand. Flour shipments are gradually increasing in the Northwest with the consequent increase of mill feeds, and the demand for same is not sufficient to keep it absorbed without selling pressure being exerted. The actual consuming demand is very small and what business is available is in scattered lots over widely scattered territories.

MINNEAPOLIS.—Bran, \$26; standard middlings, \$27; flour middlings, \$33.50; red dog, \$39 to \$40.

CHICAGO.—Bran, \$28.60; standard middlings, \$29.60; flour middlings, \$36.10; red dog, \$41.60 to \$42.60.

KANSAS CITY.—Bran, \$26; brown shorts, \$31; gray shorts, \$32.50.

ST. LOUIS.—Bran, \$28.40; brown shorts, \$33.40; gray shorts, \$34.90.

ALFALFA MEAL.

Due to an emergency rate now in effect and continuing until early March on alfalfa hay from Wyoming, alfalfa millers have been able to obtain hay at a price which would enable them to sell meal at slight reductions and still make profits. For this reason, mainly, alfalfa meal has taken a slight reduction. This, however, has not stimulated demand and the meal is being absorbed at present in very small and limited volume. Nominally quoted second-hand basis, choice, \$29.50; No. 1, \$27.50; No. 2, \$25.50; delivered Chicago. In new bags, 50c a ton more. Fine ground grades \$3 to \$4 a ton premium over medium ground.

REGROUND OAT FEED.—The supply slightly in excess of demand. Most urgent selling is for immediate instructions. Nominally quoted reground, \$12.50 to \$13; unground, \$13 to \$14 for quick and February shipment. Slight premiums being asked for future months including April.

HOMINY FEED.—Decidedly more sellers' interest than buyers'. In spite of the strong corn market, hominy has declined because of the lack of demand. Nominally quoted second-hand bag basis, white, \$45; yellow, \$43.50. In bulk, where available, \$1 to \$2 a ton more depending upon the mill selling.

LINSEED OIL MEAL.—This like all other feed stuffs requires a demand to hold the market at present prices. Lack of demand may show further weakness and declines in prices for linseed oil meal. Mills apparently are very well supplied with directions for the next week or two. Nominally quoted \$46 Chicago, \$46 Minneapolis. In bulk, from \$2 to \$2.50 per ton less.

DRIED BUTTERMILK.—With production cut down sharply, stocks are now in strong hands and prices are steady. Demand is very satisfactory. Quotations are as follows: Creamery in carlots at 6½c per lb. and L. C. L. up to 8 cents.

COTTONSEED MEAL.—There has been no change in this market, demand continuing slow and prices are easy. A large cotton crop with resulting heavy production of seed and surplus stocks are the main influences in the market. Meal is nominally quoted for 43 per cent protein, Chicago basis, at \$43.50.

GLUTEN FEED.—Eastern demand is not nearly as heavy as it was the same time a year ago. Other sections of the country, however, report a very satisfactory business. Mixed feed manufacturers have not ordered beyond January shipment, and are only taking the product as it is required. Quotations follow: Gluten feed in bulk \$33 a ton, sacked \$35.80; gluten meal of 40 per cent protein \$44.80 in sacks, \$42 in bulk.

PACKERS' PRODUCTS.—Demand is slow and market weak, although no change in prices has occurred as yet. Prices

are as follows: Meat scraps in carlots f.o.b. Chicago, \$65@70 a ton; 60 per cent protein digester tankage, \$60; raw bone meal, \$55.

CHARCOAL.—Seasonable demand at a price basis f.o.b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35@50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

COTTON NEWS

Outlook for 1925.

According to the U. S. Department of Agriculture the outlook for cotton production in 1925, though perhaps less favorable than 1924 from the standpoint of production costs, is otherwise encouraging. From present indications stocks at the end of the current season will not be large, foreign demand should be sustained, industry is in a liquidated condition and cotton growers in general are in an improved financial position. It appears that the world could absorb at sustained prices a crop of twelve to thirteen million bales and that producers in those sections of the belt where conditions are favorable for cotton production at present prices would be justified in planting not to exceed their 1924 acreage.

It now appears probable that the consumption of American cotton during the season 1924-25 will be considerably greater than that of last season and that although the carry-over at the end of this season will be somewhat in excess of that from the 1923-24 crop it will not be burdensome.

From the movement of the 1924 crop it may be inferred that the present season's supply of American cotton will be well enough digested to permit easy distribution of the 1925 crop. Exports to date have been much heavier than last year. European purchasers have been buying freely and there is greater activity in the cotton mills in England and Germany than at this time last year. The stabilization of exchange has made it possible for European merchants to participate to a larger extent in the handling of the crop and stocks in European ports which have for the past three years been abnormally low are now increasing. On the other hand, though mills in Great Britain have slightly increased the number of working hours per week over last year, they are still on a short time schedule with but little if any increase in exports of cotton goods. U. S. exports of raw cotton to France, Italy and Japan are substantially greater than last year.

Offsetting the strength in the export movement was the low consumption of American mills in the early fall compared with the fall of 1923. But on the other hand, the American industry seems to be fully liquidated, stocks of manufactured goods being much less throughout the industry, so far as ascertainable at this time, than in the fall of 1923. Mill stocks of raw cotton are also less than last year. Consequently any increases in consumer demand would be likely to be felt promptly in the movement of raw cotton.

A survey of the foreign growth shows an unusually large production in India. Most Indian cotton, being of shorter length, does not ordinarily compete directly with the American crop except when the price of American cotton is relatively high, but the general effect of an increased supply of Indian cotton can not be ignored. The Egyptian crop is larger this year, but not unusually large. Material increase of production in Egypt is unlikely. In other countries, notwithstanding the continued effort to encourage cotton growing, the total production is not a large factor in the world market. No very good figures of world carry-over of all cotton can be obtained at this time. Such information as is available, however, indicates that the world carry-over will be somewhat larger than for either of the two preceding years, but not excessively so.

Alfalfa Department

ALFALFA MEAL MARKET.

KANSAS CITY, Feb. 7.—Alfalfa meal mills are busy on February contracts, but are not making many new sales. They are not seeking any new business for the current month, but would like to sell for April and May. These deferred orders are expected to appear about the middle of February. Mill prices were unchanged again this week. Carlots were quoted, per ton, as follows: Choice, \$27@28; No. 1, \$25@26; No. 2, \$22.50@23; No. 3, \$22@22.50.

Slackening of demand for molasses-grain feeds was noted this week, but there were fair sales of horse, poultry and dairy feeds. Old orders, running 30 to 60 days ahead, kept the mills busy. Raw materials were plentiful. In a few cases the prices were reduced 50c a ton, but hog feeds went up with corn. Following are the quotations on carlots: Dairy feeds, \$39@48.50; cattle feeds, \$37@46; hog feeds, \$45@53.50; pig meal, \$73; horse and mule feeds, \$33.50@48; alfalfa molasses feeds, \$26.50@34; scratch poultry feeds, \$52@59; mash poultry feeds, \$54@81.

RECORD SEED CROP IN MINNESOTA.

Ernest Klodt, a farmer near Park Rapids, threshed 1360 pounds of alfalfa seed from a fraction less than four acres of ground, establishing what is said to be a record for this state. The seed sold for 40 cents a pound netting the grower over \$400 above all cost. The seed was planted in 1923 without a nurse crop and in 1924 the stand came on so well that the most of it was waist high by the time the seed was ripe, the middle of September.

ALFALFA IN NEBRASKA.

According to F. D. Keim, the acreage of alfalfa in Nebraska has grown to 1,125,000 and the state ranks first in the production of that crop. The acreage of the United States has doubled about every ten years since 1899 and is now about 10,000,000, about 1/7 of which is re-seeded each year calling for about 25,000,000 pounds of seed.

INCREASED ACREAGE IN WISCONSIN.

One thousand new acres of alfalfa in Wood County, Wisconsin, is the 1925 goal fixed by the agricultural committee of the county board, and the growing of protein feeds was named as the greatest single needs of the farmers of that section.

BEST FEED FOR DAIRY COWS.

According to farmers of Wadena County, Minnesota, alfalfa is unsurpassed as a feed for dairy cows.

In answer to a questionnaire recently sent out by the county agent, every farmer using alfalfa praised that crop as a superior feed for dairy cows.

A SAFE COURSE.

Last week we reminded you to be careful and to buy with larger margins. We still say be careful. With prices as high as they are it is time to exercise extreme caution. All prices are dangerously high. Fluctuations will be big and wide.—Transit Grain & Commission Co., Ft. Worth, Tex.

PROTEST WHEAT IMPORTS.

The association of flour manufacturers of Valladolid have telegraphed to the military directorate protesting the proposal of importers to bring foreign wheat into Spain. They say that this importation would lead to an increase in the price of domestic wheat.

Hay Department

NOT MUCH HAY ON FARMS.

DONNELSON, ILL.—We still have some hay in storage but we shipped out around 200 tons in early January. There is not much hay left on the farms in this locality. We are having numerous inquiries for timothy seed. The impression seems to be that the dry weather last fall badly killed the new sown timothy.—Dennellson Farmers' Equity, J. M. Hampton.

HAY IN POOR DEMAND.

BLOOMVILLE, OHIO—Hay is not moving very freely from this section, owing to the poor demand. Right after the first of the year buyers came in for quite a lot of hay but since that time the demand has slumped off quite materially and markets have declined in prices. Farmers are reluctant to sell their hay at prices dealers are offering. Dealers are handling hay with a very small margin of profit and business is unsatisfactory. There is quite a large percentage of hay still to go forward.—The Dellinger & Sons Co.

HAY INSPECTION IN SOUTH-EAST.

The North Carolina Agricultural College and North Carolina Department of Agriculture have arranged a meeting at the college in Raleigh, N. C., on Feb. 17, 18 and 19, for hay dealers and others in the states who are interested, to discuss the grading and inspection of hay. Samples of the federal grades will be exhibited and the discussions will take the form principally of studies of the grading of hay under federal grades and the use of the federal hay inspection service. The work will be conducted by Prof. Darst of the agricultural college, Mr. R. B. Etheridge, state federal hay inspector for North Caro-

lina, and representatives of the United States Department of Agriculture. Dealers and others interested are cordially invited to attend the meetings.

SNOW RETARDS HAY MOVEMENT.

AUBURN, N. Y.—A heavy fall of snow has retarded the movement of hay, but there is lots of hay in the country, but only a small portion of it is hay of real good quality. Much more hay is overripe and not top grade. Not so much hay has been moved this year as usual during the same period. Present prices, however, would seem to attract rather a free movement between now and spring as, notwithstanding the fact that the season is getting along toward spring, the severe winter is stimulating feeding.—B. A. Dean & Son, Inc., Warren H. Dean, President.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

E. H. Cash of Cash, Griggs & Kinell and John R. English of the Southern Hay Co. were admitted to membership in the Kansas City Hay Dealers' Association Tuesday.

C. F. Arnold says there is a considerable surplus of timothy hay yet to come, especially from Missouri, but not much of the remaining supply is of high grade. He reports a moderate demand in the South, with preference for high grades. Mr. Arnold reports a fair request for clover-mixed hay, but very little inquiry for straight clover.

"There has been numerous rejections of alfalfa and timothy hay on arrival in the Southern states lately," said J. A. Brubaker Wednesday. "Arkansas dealers have been especially hard to please. Doubtless, some of the hay shipped in the last month has been objectionable, owing to the wet condition in which it

North & Company

Receivers—Shippers

Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

was baled. Melting snow soaked into the stacks and caused damage. It is not possible to tell how many wet bales are in a car until it is entirely unloaded. When damp hay arrives in the warm climate of the South, it begins to heat."

The breaking up of country roads is the only thing that will prevent a continued large inward movement of alfalfa hay, according to the view of Newton C. Campbell, president of the Kansas City Hay Dealers' Association. This, he says, will prevent long hauls, but not short ones. Mr. Campbell's idea is that farmers want to get rid of their hay before the time for spring farm work.

"I think there is a demand for all of the good alfalfa hay that is likely to come to the market," said Lloyd Faris one day this week, "but buyers lately have been holding off on account of the declining prices. If the market turns up, they will take hold. This does not apply to the grades from standard down, especially the water-soaked hay, of which there is a surfeit."

Plans for the annual banquet of the Kansas City Hay Dealers' Association took definite shape Tuesday, when the board of directors appointed a committee consisting of D. B. Tilson, Wilford Taylor and C. M. Funk to select a place for the dinner and arrange the program. It is likely that the affair will be held at the Kansas City Club or the Kansas City Athletic Club. The date will be around March 1. About 60 members and friends are expected to attend.

There are varying reports as to the amount of alfalfa hay remaining in the Platte valley, the great hay district of Nebraska, which has shipped heavily to Kansas City since harvest. A letter received from Carney this week says 60 per cent is held by farmers at that point, but there are other places that report the surplus practically all gone. Some Kansas City dealers credit Kansas with a considerable amount of hay yet to be marketed. New Mexico offered alfalfa this week for the first time in a long while.

CHICAGO HAY NOTES.

Receipts are somewhat lighter, but prices have thus far shown very little recovery.

Albert Miller & Co. advise that all timothy and mixed that is sound is selling readily at prices quoted, but that stained and musty hay is hard to move.

Bridge & Leonard report that there is enough hay coming in to take care of the trade, the result being that the market is cleaning up very slowly.

Van Wie & Moorhead say receipts the early part of the week were light but ample to take care of demand.

HAY MARKET REVIEW.

The hay market ruled firmer during the week ending Feb. 7, states the Weekly Hay Market Review of the Department of Agriculture. Receipts fell off on account of lower prices, together with bad roads in some sections, but the demand was slack as buyer's needs had been largely supplied by the recent heavy run. Good hay was scarce and sold readily, but the liberal offerings of ordinary and low grades of hay were slow sale even at wide discounts.

The relatively lower level of timothy prices as compared with last year suggests that the production of market hay should be more closely adjusted to the decreasing demand. Dairy hay, particularly alfalfa, has held firm and a general survey of the situation indicates that production might be increased profitably where the local sup-

NORTHERN HAY & FEED CO.

502 Corn Exchange Minneapolis Minn.

HAY Shippers

Write for Quotations

WESTERN UPLAND ALFALFA AND TIMOTHY

ply is not equal to the domestic consumption. Freight rates bulk large in the marketing of hay and the tendency is toward a greater degree of self-sufficiency in forage production as evidenced by an increasing acreage of tame hay in many of the Southern states and by a greater acreage of alfalfa in the North Central states. It is obvious that unless total production is to be increased this increase in consuming territory must be balanced by a decrease in the surplus producing sections. High freight rates may make it inadvisable to produce for more than local needs interiors remote from market.

The timothy market was firmer. The Boston market continued dull but light receipts caused higher prices at New York and the accumulations at Cincinnati and Pittsburgh were reduced. Light receipts met only a fair demand at Chicago and the shipping trade was less active at Kansas City, but good timothy sold readily at St. Louis and Minneapolis.

Alfalfa was practically unchanged at Omaha and good alfalfa held steady at Kansas City, but receipts at this market were generally in bad condition and wet and damaged alfalfa was not wanted, even at heavy discounts, the shipping demand from the Southeast was slack and alfalfa was weaker at Memphis and Atlanta. California markets held steady to firm with a good demand for hay.

Prairie held steady with a fair demand at Chicago and Kansas City. The Minneapolis and St. Paul market was firm with light receipts while the demand was more active at Omaha.

HAY MARKETS.

MILWAUKEE.

Feb. 7.—Condition of the Milwaukee hay market continued unchanged during the past week with little movement and slight demand. Current quotations are: No. 1 timothy, \$15@16; No. 2 timothy, \$13@14; No. 1 mixed, \$14@14.50; No. 2 clover mixed, \$12@13; sample hay, \$7@9; marsh feeding, \$11; packing, \$10; rye straw, \$10@10.50; oat straw, \$10@10.50.

CINCINNATI.

Feb. 9.—The influx of large quantities of hay the past two weeks when receipts totaled nearly 500 cars gave way to materially smaller arrivals this week, and in consequence a steadier market prevailed with slightly firmer prices for the best offerings. The demand, though, was only moderately active as many buyers were amply supplied from the recent accumulation, but good hay of all descriptions were readily picked up at a slight advance. Timothy sold best, but good light mixed and choice cars of clover easily commanded a premium. Poor stuff and especially cars containing grassy hay were neglected or sold only at a heavy discount. Timothy—No. 1, \$18@18.50; No. 2, \$16@17; No. 3, \$13@14; threshed, \$10@12; no grade, \$10@12. No. 1 heavy clover mixed, \$15.50@16.50. No. 1 light clover mixed, \$16@17. Clover mixed—No. 1, \$15@16; No. 2, \$13@14; no grade, \$10@12. Clover—No. 1, \$16@16.50; No. 2, \$13@14; no grade, \$10@12. Second cutting alfalfa—No. 1, \$24@26; No. 2, \$20@22. First cutting alfalfa—No. 1, \$16@17; No. 2, \$14@16. Sound sample grassy hay, \$12@14. Straw—Wheat, \$10@11; oats, \$9.50@10; rye, \$12@13.

TOLEDO.

Feb. 9.—Hay demand in this market is slightly better with dealers from outside becoming more interested. Stocks are large, but could easily be reduced with an active trade. Prices remain firm and inquiries more numerous. Receipts light. Colder weather may have a stimulating effect marketwise. Prices the past week were as follows: No. 1 timothy, \$14; No. 2 timothy, \$12; No. 1 light clover mixed, \$13; No. 1 heavy clover mixed, \$12; No. 1 clear clover, \$12; No. 1 first cutting alfalfa, \$16; No. 1 second cutting alfalfa, \$22; No. 1 sound dry wheat straw, \$9; No. 1 sound dry oats straw, \$9.50, f. o. b. Toledo.

DULUTH.

Feb. 7.—There were no developments in the hay trade on this market during the last week. Buyers were in the market more freely as a result of logging operations being active over the territory and feeders needing supplies. Prices are firm and unchanged per ton, as follows: Timothy—No. 1, \$16@17; No. 2, \$15. Mixed timothy—No. 1, \$16; No. 2, \$12. Prairie—No. 1, \$16; No. 2, \$14; No. 3, \$12. Midland

—No. 1, \$11; No. 2, \$9. Straw—Rye, \$9; oat, \$8.50.

BALTIMORE.

Feb. 7.—The local hay market is steady on the better descriptions of timothy and choice light clover mixed hay, of which descriptions there is no over-supply on spot. Demand fair at quoted prices for top grades. Low grade and inferior hay still slow to find favor even at its relative value. Straw of all sorts is firm under light spot stocks and continued small receipts. We quote: Timothy—No. 2, \$20.50 @21.50; No. 3, \$17@19. Light clover mixed—No. 1, \$19.50@20. Clover mixed—No. 1, \$19@19.50; No. 2, \$17@18. Straw—No. 1 straight rye, \$18@19; No. 1 wheat, \$16@17; No. 1 oat, \$16@17.

NEW YORK.

Feb. 5.—The New York Hay Exchange Ass'n has issued the following weekly report, with latest quotations:

	Hay.	Straw.
Receipts for week, tons.....	264	11
Receipts last week	908	26
Receipts from Sept.	29,329	407

As a result of a considerable reduction in receipts, due in a measure to the severe up-state snow storms, prices have advanced and today are held firmly from \$1@2 per ton over one week ago.

At 33rd street, Manhattan, prices advanced early to the present quotation levels and are held firmly at the close.

At Brooklyn the advance did not take place until about the middle of the week, when trading resumed sharply, accordingly hardening prices and gradually improving values so that at the close the range of values was slightly under Manhattan. During the fore part of the week, under extremely light call, concessions were made in instances of earlier arrivals to check heavy car demurrage and storage charges.

Stocks on hand at all points are now considerably reduced, with the situation more favorable to the receivers.

Rye straw in light supply and a limited demand with prices nominal.

Federal grade quotations for large bales follow: Timothy—No. 1, \$26@27; No. 2, \$24@25; No. 3, \$21@22. Light clover mixed—No. 1, \$24@25; No. 2, \$21@22; No. 3, \$18@19. Medium clover mixed—No. 1, \$21@22; No. 2, \$18@19. Heavy clover mixed—No. 1, \$20@22. Light grass mixed—No. 1, \$24@25; No. 2, \$21@22; No. 3, \$18@19. Heavy grass mixed—No. 1, \$18@19.

CHICAGO.

Feb. 7.—With ample receipts and warmer weather, the demand, especially for the poorer grades of hay, is very light, while receipts of straw continue somewhat excessive. Timothy—No. 1, \$20@21; No. 2, \$16@18; No. 3, \$13@14. Timothy and clover light mixed—No. 1, \$18@19; No. 2, \$15@16; No. 3, \$12@13. Heavy mixed—No. 1, \$17@19; No. 2, \$14@15; No. 3, \$11@13. Timothy and grass, light mixed—No. 1, \$18@19; No. 2, \$15@16; No. 3, \$12@13. Heavy mixed—No. 1, \$15@17; No. 2, \$14@15; No. 3, \$11@13. Clover grass mixed—No. 1, \$17@19; No. 2, \$15@16; No. 3, \$12@13. Alfalfa, \$12@13. Prairie, Ill., Ind., Wis., feeding, \$12@13. Packing, \$10@12. Straw—Rye, \$10@11; oat, \$8@9; wheat, \$7.50@8.50.

PITTSBURGH.

Feb. 9.—Hay receipts have fallen off the last few days; the demand, however, is for the best timothy and greenery cured clover mixed hay only. The lower grades, especially the clovers, are still extremely dull and prices very unsatisfactory. Quotations: Timothy—No. 1, \$20@20.50; standard, \$18.50@19; No. 2, \$16@17; No. 3, \$14@15. No. 1 L. C. mixed, \$17.50@18. No. 1 H. C. mixed, \$18@18.50. Clover mixed—No. 1, \$18@18.50; No. 2, \$13@15. Clover—No. 1, \$18@18.50; No. 2, \$12@15. Straw—Receipts of straw continue liberal and the market shows no improvement. The larger part of the arrivals consists of oats straw and the demand for wheat straw is slightly better than for oats straw. Quotations: Wheat straw—No. 1, \$12@12.50; No. 2, \$11.50@12. Oat straw—No. 1, \$11.50@12; No. 2, \$11@11.50. Rye straw—No. 1, \$13@13.50; No. 2, \$12@12.50.

KANSAS CITY.

Feb. 7.—Reductions in offerings of all varieties of hay except prairie sent the total receipts down to 703 cars this week. There were 853 cars a week ago and 655 a year ago.

The arrivals of alfalfa were 511 cars, or 181 less than for the preceding week. While damaged and wet hay predominated in the supply, showing big discounts and selling very slow, the upper grades and those suitable for dairy use exhibited steadiness. On the whole, the price ranges were unchanged. Dealers believe liberal stocks remain in farmers' hands. An effort is being made in Kansas to increase the acreage, which in the last few years has fallen below normal.

An improved shipping demand helped to take care of larger offerings of prairie. Receipts increased 45 cars, to a total of 133. No. 1 advanced 50c early in the week and held the gain. No. 2 was a trifle stronger, but other grades, including damp bales and brown stuff, moved poorly and were no higher.

With timothy the most conspicuous, the arrivals of tame hay other than alfalfa were 59 cars, or 14 less than a week ago. Trade was dull on all kinds. Price reactions were general. Timothy sold 50c lower, clover mixed lost 50c and pure clover dropped \$1.

Only 4 cars of straw were offered. There was no urgency in the demand and prices were unchanged to 50c down.

Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City: Alfalfa—Select dairy, \$24.50@26; choice,

\$22.50@24; No. 1, \$20.50@22; standard, \$16 @20; No. 2, \$14@15.50; No. 3, \$10@13.50. Prairie—No. 1, \$11@12; No. 2, \$9.50@10.50; No. 3, \$7.50@9; packing, \$6@7. Timothy—No. 1, \$16@17; standard, \$15@15.50; No. 2, \$13.50@14.50; No. 3, \$12@13. Clover mixed—Light, \$16@16.50; No. 1, \$14.50@15.50; No. 2, \$12@14. Clover—No. 1, \$15@17; No. 2, \$11@14.50. Straw—Wheat, \$7@7.50.

MEMPHIS.

Feb. 7.—Receipts for the week were 78 cars, which with stocks already full and demand continuing restricted resulted in an easier market, especially for the lower grades. Prices are more or less nominal and distressed offerings plentiful and offered at concessions. Quote: Timothy, one, \$22; standard, \$21; two, \$19@20. Alfalfa, choice, \$30; one, \$28; standard, \$25.50; two, \$19@20.

PHILADELPHIA.

Feb. 7.—Baled hay and straw were in small supply and firm under a fair demand, with exceptional lots of choice quality commanding a premium over quotations. Straw is scarce and firm, with demand cleaning all offerings of choice stock. Hay (Federal grades): Timothy—No. 1, nominal; No. 2, \$21@22; No. 3, \$17@19; sample, \$10@12. Light clover mixed—No. 1, \$20@21; No. 2, \$17@18; No. 3, \$12@14. Medium clover mixed—No. 1, \$17@18; No. 2, \$14@15. Heavy clover mixed—No. 1, \$16 @17. Light grass mixed—No. 1, \$19.50@20. Straw—No. 1 straight rye, \$16.50@17; No. 2 straight rye, \$15@16; wheat, \$16.50@17; oat, \$16.50@17.

MINNEAPOLIS.

Feb. 7.—Trade in hay was rather quiet during the week, requirements of most dealers being temporarily supplied, and timothy hay especially was in moderate demand; the prairie varieties move more freely. Prices were somewhat lower for timothy and about unchanged for other varieties.

Timothy—No. 1, \$18; No. 2, \$16.50. Mixed, different grasses—No. 1, \$16.50; No. 2, \$15. Clover mixed—No. 1, \$16; No. 2, \$12.50. Upland—No. 1, \$16; No. 2, \$15; No. 3, \$13. Midland—No. 1, \$13; No. 2, \$11. Packing hay, \$8. Straw—Rye, \$9; oat, \$8.50; wheat, \$8. Alfalfa—No. 1, \$23; No. 2, \$19.

PORTLAND, ORE.

Feb. 5.—Buying prices f. o. b. Portland: Alfalfa, \$19.50@20 ton; valley timothy, \$19 @20; eastern Oregon timothy, \$22@22.50; clover, \$16.50@17.50; oat, \$19@20; oat and vetch hay, \$18.50@19.50; straw, \$7.50@8.

OMAHA.

Feb. 6.—Prairie hay receipts light. Demand light. Prices steady. Care should be taken to keep snow and ice out of bales when baling. Alfalfa hay receipts fair. Arrivals mostly fair and poor grades. Shipping demand light. Considerable alfalfa showing baled with snow and ice, causing trouble in this warm weather, and will not sell except at heavy discount. Prices steady. Prices below are for carload lots: Upland prairie—No. 1, \$11.50@12; No. 2, \$9@10.50; No. 3, \$7.50@8.50. Midland prairie No. 1, \$10@11; No. 2, \$8.50@9.50; No. 3, \$6.50@7.50. Lowland prairie—No. 1, \$8.50 @9.50; No. 2, \$6.50@7.50. Alfalfa—Choice, \$19@20; No. 1, \$17.50@18.50; standard, \$14 @17; No. 2, \$12.50@13.50; No. 3, \$11@12. Straw—Oat, \$7.50@8.50; wheat, \$7@7.50.

ST. LOUIS, MO.

Feb. 9.—The arrivals of hay continue to be pretty liberal on both sides of the river. The market continues to be dull and overstocked, especially on medium and low grades, under a limited demand. Clover—Choice qualities selling fairly well; medium and lower grades almost impossible to place. Alfalfa—Arrivals heavy; choice qualities selling fairly well; medium and low grades exceedingly slow and dull.

Prairie—Choice qualities in fair demand; other grades neglected and difficult to sell. Straw—Steady.

No. 1 timothy, \$21@22; standard timothy, \$19@20; No. 2 timothy, \$16@18; No. 3 and sample, \$10@12; No. 1 clover mixed, \$18@19; No. 2 clover mixed, \$15@17; heavy mixed, \$14@16; No. 1 clover, \$18@19; No. 2 clover, \$14@16; threshed hay, \$12@14; choice alfalfa, \$26@28; No. 1 alfalfa, \$23@25; standard alfalfa, \$20@22; No. 2 alfalfa, \$17@19; No. 1 prairie, \$15@16; No. 2 prairie, \$13@14; rye straw, \$9@10; wheat straw, \$8.50@9.50.

EXPORTS OF HOG PRODUCTS.

The past week's clearance of hog products compared with previous week and last year:

	Feb. 7, 1925.	Jan. 31, 1925.	Feb. 9, 1924.
Pork, bbls....	945	170	1,790
Pork, lbs.....	179,550	32,300	340,100
Meat, lbs.....	17,060,000	15,888,000	17,447,000
Total meat.....	17,239,550	15,920,300	17,787,100
Lard	21,233,000	13,727,000	27,544,000
Total products...	38,502,550	29,647,300	45,331,100

CANADIAN GRAIN IN U. S.

The following table exhibits the quantities of bonded grain in the United States reported last week compared with previous week and one year ago:

	Feb. 7, 1925.	Jan. 31, 1925.	Feb. 9, 1924.
Wheat	15,403,000	16,468,000	21,900,000
Oats	798,000	872,000	1,483,000
Rye	1,340,000	1,368,000
Barley	1,188,000	1,396,000	169,000

MOVEMENT OF PROVISIONS.

Following were receipts and shipments of provisions at Chicago for week ending Feb. 7, 1925, and since Oct. 25, 1924, compared with the corresponding time in 1924:

	For week.	Since Oct. 25, 1924.	Same time 1924.
Received—			
Cut meats, lbs.....	7,174,000	99,657,000	41,283,000
Lard, lbs.....	13,038,000	111,699,000	63,405,000
Shipped—			
Cut meats, lbs.....	16,191,000	240,286,000	261,186,000
Lard, lbs.....	7,803,000	153,556,000	176,968,000

LIVE STOCK MOVEMENT.

Receipts and shipments of live stock at Chicago the past week, with comparisons, follow:

	Hogs.	Cattle.	Sheep.
Receipts—			
Past week.....	285,074	52,892	82,731
Preceding week.....	280,122	56,128	66,834
Last year.....	240,786	57,284	64,781
Shipments—

1922	215,000	690,000	229,000	1,134,000

Combined receipts at the twenty markets for 1925 to date and corresponding period in under-mentioned years, as compiled by the Chicago *Drovers' Journal*:

	Cattle.	Hogs.	Sheep.	All kinds.
1925....	1,341,000	5,754,000	1,399,000	8,494,000
1924....	1,420,000	5,951,000	1,554,000	8,925,000

CHICAGO PROVISION REVIEW.

CHICAGO, Feb. 9.—The provision trade is in an unsatisfactory condition. Hog supplies are large and prices are higher in proportion than the cured product. One of the local packers says that there is a loss of 90c a hundred pounds in hogs and the yield is 1 to 2 per cent less than November, and 2 to 3 per cent below last year. Pork loins are selling relatively low with the demand not as heavy as it should be, packers are making lard at a good rate and stocks at western points on February 1 were 67,181,000 lbs., compared with 31,539,000 lbs. a month previous, and 21,088,000 lbs. last year. This excess of about 46,000,000 lbs. of lard as compared with a year ago is bothering packers more than it is the speculators who are buying it. Dry salted meat stocks last month increased nearly 9,000,000 lbs. but were 12,000,000 lbs. less than last year, and were 48,023,000 lbs. against 60,453,000 lbs. last year. Pickled meat

stocks were 212,414,000 lbs. against 185,055,000 lbs. the previous month and 208,549,000 lbs. last year. Total stocks of all meats increased 39,726,000 lbs. for the month, against 27,582,000 lbs. last year. Total stocks are 289,341,000 lbs., against 302,253,000 lbs. last year.

Speculative buying was good on all breaks with packers and profit takers the principal sellers. Prices moved within a moderate range and lard closed unchanged to 2½c higher with short ribs up 30c and barley 15c. Prices for the week follow:
